Disposition Written by BROWN, CYNTHIA E @ 06 Jan 2016 0929 EST**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: SEE ADD NOTE SECTION FOR MORE INFORMATION ON THIS ENCOUNTER.**Note** Written by BROWN, CYNTHIA E @ 06 Jan 2016 0928 EST**CC GROUP (URINE TEST)**

Daniel arrived 45 minutes early to group. Daniel is at session # 24 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. Group discussed one member's unwillingness to follow through with what he promised to group. The point of trust and making changes is what treatment is about was made. Group debriefed their activities during Christmas and New Year's. No group member admitted to drinking or using drugs. A discussion of euphoria and how childhood experiences with video games was like drinking in losing track of time, food, and human interaction.

Daniel shared that he kept one of his dating sites open for 2 extra days because he had already started a conversation with someone and wanted to complete it. He shared this woman he was having the "conversation" with became his date for New Year's. He stated that it was "lack luster". This was the reason he was taking himself off the dating sites in the first place. He was confronted with lying to the group. He stated that he sees as changing his mind. He failed to see the promise as binding or a commitment. He stated that doing he wanted and necessarily the next right thing gets him trouble. He was able to relate to his production at work being discussed as poor. He stated that he just does not work as hard as he could and senior paygrades are starting to notice. He stated that he wants to do better and will his CBT to make better decisions. Daniel appeared engaged and interested in the treatment process. Daniel appeared engaged and was appropriate and active throughout the session. Daniel has several treatment plan problem objectives out of date on his treatment plan. He will not be in group next week due to a class he is taking but agreed to an individual session when he returns. Daniel will continue with Continuing Care treatment and has an outdated treatment plan. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 19 January 2016 at 1230 for group.

No evidence of SI/HI during this encounter

Note Written by GONZALEZZARAZUA,JORGE A @ 30 Dec 2015 1356 EST

Daniel arrived on time and is at session #20 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 ½ hours. Group went over their recent holiday weekend and how they were able to handle any urges or cravings to drink. Members also shared their plans for the upcoming New Year's weekend and how they plan to deal with possible triggers or urges to drink. All members denied consuming alcohol or abusing illegal drugs since their last visit.

Daniel shared that he spent his Christmas holiday working on his computer based game, but at times throughout the night he would check his social media and notice that plenty of his online friends would post pictures of themselves out with family and friends, opening presents or just hanging out celebrating the holiday. He states that he felt envious and lonely and had a craving to want to drink, but instead continued to work on his game and the feeling would pass. He also reports that later in the weekend he became upset because a female friend who he states he was interested in canceled on their date. He states that he was mad about it because he thought they had a good time during their previous date. Daniel states that online dating is taking a lot of his time as he does it often and after receiving feedback from the group states that he will likely delete his online dating profiles and would share with the group during the next session.

Daniel appeared engaged and interested in the treatment process. He appeared engaged and was appropriate and active throughout the session. Daniel has Problem #5, Objective # 3 overdue 18 December 2015. He will schedule his individual appointment after the New Year's holiday to update his treatment plan with this counselor. He will continue with Continuing Care treatment and has Problem #5, Objective # 3 due 18 December 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel will continue with Continuing Care treatment and is scheduled to return 05 January 2016 for his next group session.

No evidence of SI/HI during this encounter.

NO VITALS TAKEN AT SARP TREATMENT

S/O Note Written by HILL, LARRY D @ 23 Dec 2015 1213 EST**History of present illness**

The Patient is a 30 year old male.

The patient was in attendance for the Continuing Care Support Group.

A/P Last Updated by MAPLES, MICHAEL J @ 22 Dec 2015 1320 EST**1. Alcohol dependence, uncomplicated**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 1 - The patient attended group session from 1230 - 1400.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by HILL, LARRY D @ 23 Dec 2015 1211 EST**Released w/o Limitations****Discussed:** Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session 22 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group shared their holiday plans and how Christmas will look through sober eyes, for some the first time in years. No group member admitted to drinking alcohol or abusing drugs since last seen at SARP.

Daniel sat relaxed for the majority of the group, but did provide minimal feedback to others and was observed probing as usual.

Daniel was eventually drawn into the group and shared his holiday plans saying "I plan on spending Christmas alone this year and catch up on a lot of work I have to get done in my business. I have to step back and look at myself and identify that I'm choosing to be alone during the holidays due to my business and not because I have nowhere to go. I find myself drinking more when I'm around others for example, last year I was at my mom's house and I drank a lot there more than usual." Daniel wrote that he has not attended any required AA meetings, has no sponsor and is working steps 3&4. Daniels progress reports are contradictory as to his sponsor status and meeting attendance, where some he has a sponsor and others he does not.

Daniel appeared engaged and interested in the treatment process and was appropriate and less active throughout the session.

Daniel has several objectives that are overdue and his ITP is out dated. Daniels ITP will be updated during his next individual session 28 December 2015. Daniel will continue with Continuing Care treatment and his record will be updated at his next individual session as stated above. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is scheduled to return at 1230 28 December 2015. No evidence of SI/HI during this encounter. Secondary Record maintained at SARP Washington Navy Yard.

NO VITALS TAKEN AT SARP TREATMENT

A/P Last Updated by MAPLES, MICHAEL J @ 15 Dec 2015 1228 EST**1. Alcohol dependence, uncomplicated**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 1 - The patient attended group session from 1230 - 1400.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by GONZALEZZARAZUA, JORGE A @ 18 Dec 2015 1245 EST**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session #19 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 ? hours. Group opened today by doing their weekly check-in, recapping their week and identifying any possible triggers or cravings. Group also said good bye to a group member by doing a group closing exercise.

Daniel shared that over the past 2 weeks he rekindled an old relationship with one of his ex-girlfriends. He states that she contacted him and invited him to a game and he accepted. While at the game, Daniel reports to have experienced a craving for beer as a lot of people around him were drinking while everyone seemed to be having fun. Daniel states that he was able to control his craving and the rest of the day went on just fine without him drinking. He also states to having had a serious talk with his friend and they were able to shared feelings that they had kept bottled up for over a year since they stopped talking. Daniel states that although nothing serious seems to be coming out from meeting up with her, he liked the fact that they were able to shared insight about each other.

Daniel appeared engaged and interested in the treatment process. He appeared engaged and was appropriate and active throughout the session. Daniel completed Problem #5, Objectives #1 and 2 of his ITP. He will continue with Continuing Care treatment and has Problem #5, Objective # 3 due 18 December 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 22 December 2015 for his next group session.

No evidence of SI/HI during this encounter.

Disposition Last Updated by GONZALEZZARAZUA, JORGE A @ 11 Dec 2015 1310 EST**Released w/o Limitations**

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session #20 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group performed their check-in reporting changes since last group and thoughts, cravings or triggers; no group member admitted to drinking alcohol or abusing drugs since last seen at SARP. The group shared about challenging family relationship and the newness of holidays without alcohol.

Daniel shared that he believes he is making progress as he is slowly being able to communicate with others and is actually enjoying having others company. He states he continues to work on his personal projects developing software and at this point that continues to be his main priority. Daniel provided feedback to another member, stating he could relate to some of the issues he is confronting as he also faces similar circumstances when he thinks about his past with his father and how hard it is to let go and move forward.

Daniel appeared engaged and interested in the treatment process. He appeared engaged and was appropriate and active throughout the session. Daniel appeared quite for most of the group, but seemed to relate to another group member when talking about things that have happened in the past and how hard it is to let go at times. Daniel has no objective due from his ITP. He will continue with Continuing Care treatment and has Problem #5, Objective # 1 and 2 due 11 December 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 15 December 2015 at 1230 for group.

No evidence of SI/HI during this encounter.

Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

Note Written by REGIS,JAMES @ 04 Dec 2015 0647 EST

Continuing Care Group - Tuesday, 01 December 2015

Daniel arrived on time to his Continuing Care Group which was held on Tuesday the 1st of December 2015, from 1230-1400. This is Daniel's 19th of 26 scheduled sessions. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Daniel performed his check-in with the group members going over any triggers or cravings he may have had during the past week and holiday. Afterwards, Daniel said goodbye to a group member who was closing out of group today.

During Daniel's check-in, Daniel shared that he didn't do anything for Thanksgiving. Daniel said that he relaxed all weekend and was able to do a lot of programing on his new computer game. He stated that he was able to go out on a date with one of his female friends but that it was strictly platonic and amicable. He wrote that he was able to become "independent from romantic relationships" a something that he did this week as a positive step towards his recovery. He also wrote how he was able to relate in todays group with the act "revenge seeking" and it's importance at times.

Daniel seemed thoughtful and indifferent about his holiday weekend and up and coming week and events. He wrote that he attended only 1 AA meeting and that he still doesn't have an AA sponsor but that he is working on steps #3 & #4 of the AA 12 Step program while abstaining from alcohol. See "CCG PATIENT ATTENDANCE NOTE" in SARP Patient file for complete information. Daniel has Problem #5 Objectives #1 and #2 of his ITP due next week on the 11th of December 2015. Daniel will return for his next CC treatment group on the 8th of December 2015.

Daniel had no evidence of SI/HI/ATV during this encounter.

Secondary record maintained at SARP Washington Navy Yard 202-433-7577.

A/P Last Updated by MAPLES, MICHAEL J @ 24 Nov 2015 1304 EST**1. Alcohol abuse, uncomplicated**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 6 - THE PATIENT ATTENDED GROUP SESSION FROM 1230-1400

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - CONDUCTED CASE MANAGEMENT TO REVIEW AND UPDATE THE OVERALL SARP CLINICAL RECORD. IN ADDITION SERVICES TO HELP ASSIST THE PT AND TO MONITOR TREATMENT PROGRESS AND OVERALL SERVICE DELIVERED.

Disposition Last Updated by GONZALEZZARAZUA, JORGE A @ 25 Nov 2015 1049 EST**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his group session. He is at session #16 of the scheduled 26 sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 ? hours. All group members denied drinking or abusing drugs. Group members performed their check-in exercise and identified possible triggers or cravings for the upcoming long holiday weekend. Group also filled out "Types of Relapses Before Chemical Relapse" worksheet and shared their individual answers with the rest of the group.

Daniel shared that he had a trigger yesterday because his friend who he had planned on visiting over the Thanksgiving weekend cancelled on him at the last minute. He states that normally he would just get mad and start drinking, but instead used what he has learned in CBT and was able to fight off the urge to want to drink on impulse. He states that instead he went on a local date and pretty much forgot about the craving and focused on his game developing; reminding himself that staying local is a better option for him because he can get so much more done then going out of town.

Daniel appeared comfortable throughout today's session. He seemed active and willing to engage in discussion with group, sharing and providing feedback. Daniel has no objective due today. He will continue with Continuing Care treatment and has Problem #5, Objectives #1 and 2 from ITP due 11 December 2015. See Daniel "'Continuing Care Progress Report" for more information on this encounter. Daniel is scheduled to return 01 December 2015 for her next group session.

No evidence of SI/HI during this encounter.

Disposition Last Updated by GONZALEZZARAZUA, JORGE A @ 20 Nov 2015 1252 EST**Released w/o Limitations**

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his group session. He is at session #15 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 ? hours. The group shared updates since last group regarding triggers and cravings during their check-in exercise. Group completed "Positive Influence List" and "Negative Influence List" worksheets and shared their answers with the group. No group member admitted to drinking alcohol or abusing drugs since last seen at SARP. Each group member submitted a sample for testing.

Daniel shared that he has had a good week since his last visit to SARP. He states that he spent some time with friends from work and is looking forward to continue that trend. He also shared that this upcoming weekend he plans to visit a female friend that lives a couple hours from here and might spend the weekend with her. He states that she is also in recovery so drinking while out with her will not be an issue. Daniel identified both his mother and step dad as positive influences toward his recovery. He listed his dad as a positive influence and also had his step mom listed being both, positive and negative depending on what they talk about or her mood.

Daniel appeared appropriate and interested in the treatment process. He seemed active and appropriate throughout today's session. Daniel has no objective due today. Daniel will continue with Continuing Care treatment and has Problem #5, Objective #1 and 2 due 11 December 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is scheduled to return 24 November 2015 at 1230 for group.

No evidence of SI/Hi during this encounter

S/O Note Written by MAPLES,MICHAEL J @ 12 Nov 2015 0757 EST**History of present illness**

The Patient is a 30 year old male.

THE PATIENT ATTENDED AN INDIVIDUAL SESSION FROM 0800-0900.

A/P Last Updated by MAPLES,MICHAEL J @ 12 Nov 2015 0759 EST**1. Alcohol abuse, uncomplicated**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 1 - THE PATIENT ATTENDED GROUP SESSION FROM 0800-0900

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - CONDUCTED CASE MANAGEMENT TO REVIEW AND UPDATE THE OVERALL SARP CLINICAL RECORD. IN ADDITION SERVICES TO HELP ASSIST THE PT AND TO MONITOR TREATMENT PRGRESS AND OVERALL SERVICE DELIVERED

Disposition Last Updated by GONZALEZZARAZUA,JORGE A @ 13 Nov 2015 1411 EST**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his monthly individual appointment with this counselor, dressed appropriately in casual civilian attire. Daniel opened by stating that he is doing well and feeling more comfortable in the group setting than he did a few months ago prior to him having to go TAD for school. He also reports that he is seeing his therapist is putting an honest effort on working on his issues, rather than overlooking them.

Daniel shared that he is feeling good and accomplished after having accepted an invite from a male co-worker to attend a BBQ gathering this week. He states that he actually had a good time at the gathering and even met new people who he had conversations with. Daniel admits that it was not easy and at certain points he would wonder if he was being appropriate or too weird, but would then forget about it and just enjoyed most of the evening.

Daniel update his treatment plan by adding 4 more problems to his Master Problems List. He also states that at this time he is unable to complete Problem 1, Objective 7 as he is not comfortable approaching men and being open with them, something he states he is currently working on with his therapist. Daniel and this counselor have agreed to delay Problem 1, Objective 7 until 04 January 2016 and will revisit at that time. Daniel is scheduled to return for his next group session on 17 November 2015 @ 1230Hrs. He has Problem 5, Objectives 1 and 2 due 11 December 2015.

No evidence of SI/HI during this encounter.

Disposition Last Updated by GONZALEZZARAZUA, JORGE A @ 13 Nov 2015 1400 EST**Released w/o Limitations**

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session #14 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230-1400, total of 1 ? hours. The group opened today by welcoming one new member to the group, performing individual introductions and going over group rules. Group also performed their weekly check-in exercise, reporting any current struggles, cravings or triggers that they might have suffered since their last visit.

Daniel shared that he is attending AA again and is currently working on steps 3 and 4 with his home group. He states that he is also trying to overcome his inability to hang-out with other males and will try to attend a BBQ gathering with guys from work. He states that he is often invited to gatherings by his male peers, but normally does not attend as he has always preferred to spend time with women, rather than with men.

Daniel appeared active and comfortable throughout today's group session. He seemed at ease sharing what his goals are and what he is trying to do, without hesitating if anyone was judging him or bothering himself about what anyone else was thinking of him. Daniel has Problem #1, Objective #7 of his ITP overdue 20 Oct 2015 and has scheduled an individual appointment on 12 November 2015 with this counselor to update his treatment plan. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel will continue with Continuing Care treatment and is scheduled to return on 17 November 2015 for his next scheduled group session.

No evidence of SI/Hi during this encounter.

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Tiffany arrived on time and is at session #13 of the 40 scheduled sessions for the Continuing Care treatment program attending from 1230-1400, total of 1 ? hours. The group opened today by welcoming one new member to the group, performing individual introductions and going over group rules. Group also performed their weekly check-in exercise, reporting any current struggles, cravings or triggers that they might have suffered since their last visit.

Tiffany shared that she continues to battle her struggles and is doing all the things that are asked of her by her sponsor and other AA members to help her stay sober each day. She reports that this coming weekend she has signed up along with a few of her acquaintances to attend a "Gratitude breakfast" and also a "Step study" group. She also engaged with another member who is having family issues and offered her support, stating she was proud of him for handling his current situation without resorting to drinking. Tiffany report she is feeling better overall and although still feeling lonely at times, it is not as intense as it has been in the past.

Tiffany appeared comfortable and active throughout today's group session. She seemed to care about another group member's current struggles with family issues and offered

S/O Note Written by MAPLES,MICHAEL J @ 03 Nov 2015 1244 EST**History of present illness**

The Patient is a 30 year old male.

THE PT ATTENDED THE OUTPATIENT CONTINUING CARE TREATMENT PROGRAM (CC).

A/P Last Updated by MAPLES,MICHAEL J @ 03 Nov 2015 1246 EST**1. Alcohol dependence, uncomplicated**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 6 - THE PATIENT ATTENDED GROUP SESSION FROM 1230-1400

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - CONDUCTED CASE MANAGEMENT TO REVIEW AND UPDATE THE OVERALL SARP CLINICAL RECORD. IN ADDITION SERVICES TO HELP ASSIST THE PT AND TO MONITOR TREATMENT PRGRESS AND OVERALL SERVICE DELIVERED.

Disposition Last Updated by GONZALEZZARAZUA,JORGE A @ 06 Nov 2015 1419 EST**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments:

Daniel arrived on time and is at session #13 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230-1400, total of 1 ? hours. The group performed their weekly check-in, reporting their struggles, triggers and cravings. The group was challenged with a scaling question; on a scale from 1-10, 1 being the lowest, 10 being the highest, how dedicated are you to your recovery? The group shared post group feelings from last group after two members shared they suffered a relapse.

Daniel shared that he has taken positive steps since sharing about his relapse during the previous group. He states he attended AA this past week is trying to be more active in managing his anxiety and working with his psychologist. He admitted that at times he does not do or use all the tools he has learned since starting treatment to help him in his sobriety, but last week was a reminder for him and is looking forward to continue in a positive light.

Daniel appeared relaxed and attentive during today's group session. He seemed to connect with the group and provided feedback. He also seemed receptive to what others shared and feedback that was provided. Daniel has Problem #1, Objective #7 of his ITP overdue 20 Oct 2015. Daniel will be asked to setup an individual appointment with his counselor to address treatment planning and updating. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel will continue with Continuing Care treatment and is scheduled to return on 09 November 2015 for his next scheduled group session.

No evidence of SI/HI during this encounter.

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder presents for f/u appt. Pt ran out of Zoloft and so for the past 2 weeks he has been off of it. Since Zoloft was discontinued pt has been struggling with some mild withdrawal symptoms, but hypersomnia has resolved. He no longer needs to naps for 30-45 min about three times per day. He is sleeping 6-7 hours per night with Melatonin. He feels much more productive and has lost weight. He is running 25-30 miles per week and is using CBT skills to combat anxiety. He has re-enlisted for 6 more years with a nice financial bonus that he will use to pay off his debts. Re-enlistment ceremony was on 16OCT and his family came.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.

Allergies

Current Allergies Reviewed. NKDA.

Current medication

Melatonin for insomnia.

- limited impact of these visits.
- * MEDS: Denies other medication trials
 - * INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.
 - * SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

Personal history

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college.

Behavioral: Caffeine use 4 cups of coffee per day. Stops drinking caffeine after 2pm and never a smoker / Never Used Tobacco Products.

Alcohol: Alcohol use Drank one glass of wine recently.

Subjective

NO Learning Disability, Language or Learning Barriers.

Review of systems

No current substance use symptoms

No current cognitive symptoms

No current psychotic symptoms

Physical findings**General Appearance:**

° Alert. ° Well developed. ° Well nourished. ° In no acute distress.

Neurological:

° No disorientation was observed, oriented x3. ° No hallucinations. ° Memory was unimpaired. ° Remote memory was not impaired. ° Recent memory was not impaired. ° Judgement was not impaired.

Speech: ° Normal, regular rate, non-pressured. ° Rate was not slowed. ° Not pressured. ° Tone was not a monotone.

Psychiatric:

Demonstrated Behavior: ° Behavior demonstrated no abnormalities - appropriate and cooperative. ° No psychomotor retardation. ° Behavior demonstrated no psychomotor agitation. ° No decreased eye-to-eye contact was observed.

Mood: ° Euthymic Able to smile appropriately. ° Not depressed. ° Not anxious.

Affect: ° Normal anxious. ° Not labile. ° Not flat. ° Not constricted. ° Showed no irritability.

Thought Processes: ° Not impaired, they were linear, logical, and goal directed. ° Attention demonstrated no abnormalities. ° Attention span was not decreased.

Thought Content: ° Insight was intact. ° No delusions. ° No suicidal ideation. ° No suicidal plans. ° No suicidal intent. ° No homicidal ideations. ° No homicidal plans. ° No homicidal intent.

Discussion of risk of assessment and intervention

Interventions Provided at this session:

Vital signs reviewed. No indication for lab and radiology studies at this time.

Objective 1 (Corresponds to Goal #): Anxiety, depressed mood, irritability

-

Interventions:

- 1.Restart Zoloft at 25mg daily to help with withdrawal symptoms. After 7-14 days if pt is doing well decrease Zoloft to 12.5mg daily and then taper off. Discussed r/b/se. Obtained informed consent for medication.
2. Continue SARP. Advised pt to attend an AA or SMART-recovery meeting if he experiences cravings for alcohol or begins to have thoughts of using alcohol to cope with anxiety related to work.
3. Referred pt for individual CBT.

Objective 2 (Corresponds to Goal #): Insomnia

-

Interventions:

1. Continue Melatonin QHS prn insomnia

Disposition Last Updated by GONZALEZZARAZUA, JORGE A @ 30 Oct 2015 1206 EDT**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: SEE ADD/NOTE SECTION FOR MORE INFORMATION ON THIS ENCOUNTER.**Note** Written by GONZALEZZARAZUA, JORGE A @ 30 Oct 2015 1206 EDT

Daniel arrived on time and is at session #12 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230-1400, total of 1 ½ hours. The group processed one member's recent relapse, which sparked another member to admit to a relapse. Several group members provided

feedback and reported being envious that the two replaces got to drink and voiced disappointment. No other group members admitted to drinking alcohol or abusing drugs since last seen at SARP. The group was reminded that they are here at SARP for treatment of alcohol/drugs.

Daniel opened group today and revealed that he relapsed. He shared that while out with some friends at a steak house he was offered a glass of wine and he decided to accept without hesitation. He states to have drunk two glasses of red wine with his dinner. Daniel reports that although he knows that he is not allowed to drink while in the program, he chose to do so without real regard to what could happen. When confronted by two counselors as why he decided to drink, Daniel stated he just wanted to and felt as if it should be ok for him to have a couple glasses of wine if he wanted to. Daniel also brought up that he initially self-referred himself for other underlying reasons and not specifically because he thought he had an issue with alcoholism. After hearing from a member who also suffered a relapse in the past week, Daniel shared that there were some underlying reasons as to why he decided to drink. He stated that he was upset because he had family over for his re-enlistment the past week and his father decided to not come. He states that his relationship with his father still affects him to this

date and believes that the stress of having everyone around and his father being the one person to not show led him to drink.

Daniel appeared comfortable in today's group, sharing and giving feedback to other members. He seemed to lack any remorse or guilt about why he chose to drink and at points appeared to defend his decision. Daniel seems to not trust the group, stating the dynamics have changed since he first started and not feeling comfortable. A SARP staffing will be scheduled for Daniel and his case will be re-evaluated for treatment update. Daniel has an outdated treatment plan and will be scheduled for an individual appointment following the findings of his SARP staffing for treatment planning and updating. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is scheduled to return on 03 November 2015 for his next group session.

No evidence of SI/HI during this encounter.

S/O Note Written by ZEMBRZUSKA,HANNA DOMINIKA @ 02 Oct 2015 1310 EDT**History of present illness**

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder presents for f/u appt. Pt has been doing well on Zoloft 100mg daily, but has been experiencing anxiety related to work which causes him to think about using alcohol to cope. He has been struggling with hypersomnia rather than insomnia and attended a Sleep Pathways Group. He naps for 30-45 min about three times per day despite sleeping 5-6 hours per night. His PCM referred him to sleep clinic and he has an appt on 17NOV at 10:30AM. He has re-enlisted for 6 more years with a nice financial bonus that he will use to pay off his debts. Re-enlistment ceremony will be on 16OCT and his family is coming. Pt will be on leave 12-23OCT in the local area.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.

Allergies

Current Allergies Reviewed. NKDA.

Current medication

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

Zolof 100mg daily
 Melatonin for insomnia.

Past medical/surgical history**Reported:**

- Recent Events: Medication compliance.
 Medical: Reported medical history Penile warts (HPV)
 Neurotic excoriation (scalp picking when anxious)
 Asthma during childhood
 Allergic response to pets
 Recurrent intestinal pain (possibly lactose intolerance)
 PRK (2011)
 and psychiatric history
- * THERAPY: multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014. She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.
 - * MEDS: Denies other medication trials
 - * INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.
 - * SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

Personal history

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college. He found himself unable to experience from the past or avoid having feelings related to it?

- [1] Avoid activities or situations because they remind you of a stressful experience from the past?
- [0] Trouble remembering important parts of a stressful experience from the past?
- [0] Loss of interest in things that you used to enjoy?
- [0] Feeling distant or cut off from other people?
- [2] Feeling emotionally numb or being unable to have loving feelings for those close to you?
- [0] Feeling as if your future will somehow be cut short?
- [0] Trouble falling or staying asleep?
- [1] Feeling irritable or having angry outbursts?
- [1] Having difficulty concentrating?
- [1] Being 'super alert' or watchful on guard?
- [0] Feeling jumpy or easily startled?

Add point values from each response. TotalD.

Behavioral: Caffeine use 4 cups of coffee per day. Stops drinking caffeine after 2pm and never a smoker / Never Used Tobacco Products.

Alcohol: Alcohol use Has drank a few beers recently.

Subjective

NO Learning Disability, Language or Learning Barriers.

Review of systems

No current substance use symptoms
 No current cognitive symptoms
 No current psychotic symptoms

Physical findings**General Appearance:**

° Alert. ° Well developed. ° Well nourished. ° In no acute distress.

Treatment Team Members -

Individual Therapist: SARP

Medication Prescriber: ZEMBRZUSKA

Group Therapist: TBD

Additional Provider and treatment: SARP at Washington Navy Yard

Date last updated: 10/1/2015

Reviewed with patient on: same

Does patient agree with plan? Yes

If not, what part?

Projected date of next treatment plan update: f/u in 4 weeks

Discussion of risk of assessment and intervention

Interventions Provided at this session:

Vital signs reviewed. No indication for lab and radiology studies at this time.

Objective 1 (Corresponds to Goal #): Anxiety, worry, irritability

-

Interventions:

1. Increase Zoloft to 150mg daily. Discussed r/b/se. Obtained informed consent for medication.

2. Continue SARP. Advised pt to attend an AA or SMART-recovery meeting if he experiences cravings for alcohol or begins to have thoughts of using alcohol to cope with anxiety related to work.

3. Referred pt for individual CBT.

Objective 2 (Corresponds to Goal #): Depressed/apathetic mood

-

Interventions:

1. Increase Zoloft to 150mg daily. Discussed r/b/se. Obtained informed consent for medication.

Objective 3 (Corresponds to Goal #): Insomnia

-

Interventions:

1. Continue Melatonin QHS prn insomnia

2. Pt to continue using CBT-I app and use progressive muscle relaxation and imagery at bedtime to promote relaxation and decrease ruminative thoughts

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

1. Visit for: administrative purpose: DFA negative for HSV1/2 and VZV, confirming previous testing negative for herpetic infection. STD testing in previous month also negative, at this time etiology for ulcerations does not reveal any infectious etiology. Will recommend patient to stop any topical irritant for treatment of molluscum as not demonstrated on clinical exam. Follow up with PCM for repeat exam in 2-3 weeks if new ulcerations or erosions present. If resolving then continue with gentle skin care recommended today. May be due to irritant from aldera used for HPV condyloma. Consider retesting RPR for false negative as syphilitic chancre may still be in differential. If new primary lesions occurring PCM to send back to derm for potential biopsy.

Disposition Written by CUNNINGHAM, RACHEL E @ 30 Sep 2015 1037 EDT

Follow up: 2 week(s) with PCM or sooner if there are problems.

S/O Note Written by CUNNINGHAM, RACHEL ELIZABETH @ 29 Sep 2015 1037 EDT**Chief complaint**

The Chief Complaint is: Rash.

Reason for Visit

Visit for: STAFFED WITH DR. [] HANDFIELD [] GRATRAX [] GREEN [] LACKEY [] KENTOSH [x] MARQUART [] MEYERLE [] STEARNS [] SPERLING [] DARLING

30 yo M with 1 month hx of painful eroded papules in the groin and on the penis, STD workup negative per PCM and previous course of valtrex did not improve. Has hx of multiple sexual partners. Here for further evaluation, notes he does have hx of genital warts and uses alda on them but has not been using it on the areas in question. Partner currently does not have any STD or similar rash. Uses condoms. Has recently had bronchitis with subjective fevers which began before the papules appeared. HIV testing recently negative.

History of present illness

The Patient is a 30 year old male.

He reported: Past medical history reviewed and updated dermatology problem list.

No previous history of skin symptoms. Rash:

Visit is not deployment-related.

 Date Resulted: 14 Sep 2015 1210
 COLLECT_SAMPLE: OTHER SOURCE
 Order Comment: for specimen already in lab

VIROLOGY RESULT: NO HERPES SIMPLEX VIRUS ISOLATED.

Specimen: Groin, Left
 Collected: 08 Sep 2015 0819

Results: Final report

A/P Last Updated by CUNNINGHAM,RACHEL E @ 29 Sep 2015 1037 EDT

1. SKIN NEOPLASM GROIN: Given punched out erosions on groin hx of multiple sexual partners, will get DFA today to rule out HSV infection. Previous tests showed non acute phase of HSV (IgG positive, IgM negative). Has had course of valtrex 500 twice daily for 10 days 1 month ago but did not resolve, may not have been correct treatment or may represent atypical presentation of another herpetic infection. Rest of STD workup negative.

Laboratory(ies): -HERPES DFA ~ (Routine) Ordered By: CUNNINGHAM,RACHEL E Ordering Provider: CUNNINGHAM, RACHEL ELIZABETH; VARICELLA DFA (Routine) Ordered By: CUNNINGHAM,RACHEL E Ordering Provider: CUNNINGHAM, RACHEL ELIZABETH

2. FOLLICULITIS DECALVANS: Tufted folliculitis in the past on biopsy with scarring alopecia from inflammation and manipulation. Continued reports of itching, flaking and occasional pustules. Will use topical steroid solution daily as needed with antifungal shampoo.

Medication(s): -FLUOCINOLONE--TOP 0.01% SOLN - APPLY TO SCALP EVERY DAY AS NEEDED #1 RF3 Ordered By: CUNNINGHAM,RACHEL E Ordering Provider: CUNNINGHAM, RACHEL ELIZABETH

Anxiety & Depression Screening Version: 1 Completed On: 28 Sep 2015

1. Over the last 2 weeks, how often have you been bothered by feeling nervous, anxious, or on edge?: More than half the days
2. Over the last 2 weeks, how often have you been bothered by not being able to stop or control worrying?: Several days
3. Over the last 2 weeks, how often have you been bothered by feeling down, depressed or hopeless?: Not at all
4. Over the last 2 weeks, how often have you been bothered by having little interest or pleasure in doing things?: Not at all
5. Over the last 2 weeks, how often have you been bothered by the thoughts that you would be better off dead or hurting yourself in some way?: Not at all

S/O Note Written by AUSTIN,MARIE @ 28 Sep 2015 1205 EDT**Chief complaint**

The Chief Complaint is: Bronchitis & Re-evaluate STD.

History of present illness

The Patient is a 30 year old male.

Pt reported that he came to BAZC on 18Aug2015 to evaluate Bronchitis and Herpes. He states his lab tests came back negative for all speculated STDs, but warts remain on his left genital area.

Pt states that he went to Occ Health, in Fort Meade, apprx 1 week ago to evaluate his bronchitis and he received Mucinex and Zpack but the bronchitis remains. Continues to cough, he is taking his albuterol and ran out of mucinex. He does not have a cough medicine.

General overall feeling /health - Very Good.

S/O Note Written by JARRETT, ERICA M. @ 23 Sep 2015 1551 EDT**Chief complaint**

The Chief Complaint is: Sleep pathways.

History of present illness

The Patient is a 30 year old male.

This is the patient's second visit to the IBHC clinic.

<<Note accomplished in TSWF-IBHC Group/Class tab>>

Pt attended the second of two Sleep Pathway Shared Medical Appointments.

The following topics were covered: sleep restriction, connections between anxiety/worry and insomnia; beliefs and attitudes that contribute to insomnia; worry management strategies; relaxation/imagery strategies; and relapse prevention.

Reviewed pt's sleep diary. Pt advised . Pt expressed understanding of these recommendations.

Sleep enhancement class, Getting a Good Night's Sleep, offered as part of Women's Health Week.

Discussed: Basics of sleep and treatment for insomnia: stimulus control, sleep hygiene, relaxation strategies, sleep restriction, beliefs and attitudes that contribute to insomnia, and worry management strategies. Provided handouts on the covered topics.

Practiced diaphragmatic breathing and provided a brief demonstration of progressive muscle relaxation. Provided information about the CBTi Coach application for smart phones which has a sleep diary and sleep enhancement tools. Reviewed audio downloads for relaxation on the WRNMMC Medical Home, IHWS, Mind-Body Skills Program website.

Recommendations: 1) Limit nap times to less than 30 minutes X 1 and do not nap in the evening; 2) maintain consistent wake ups and bed times during the week/weekends. 3) Keep restricting caffeine use to before noon.

....

Group/Class Intervention

See above.

Disposition Written by BROWN,CYNTHIA E @ 16 Sep 2015 0711 EDT

Released w/o Limitations

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: CC GROUP URINE TEST
 Daniel arrived on time to group. Daniel is at session # 12 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group welcomed a new group member using the introduction exercise. The group discussed "drunk dreams" and control issues. They also discussed how hard it is to be vulnerable. Daniel shared that he has been really sick with a cold. He did admit that he drank cough medicine with alcohol in it. This was revealed after he was told that he has a urine test today. He stated during group he took it Sunday but admitted that he took it yesterday. He shared how he is struggling with control issues. The girl that he is seeing now made him dinner and he was not appreciative but was more critical. The group encouraged him to respect what others do for him. As he spoke group members were seen as checking out by looking around the group and not at him. He monopolized only a few minutes of the group and cut off to allow the group to give feedback. Daniel appeared engaged and interested in the treatment process. Daniel appeared engaged and was appropriate and overly active throughout the session. Daniel moved Problem #1, Objective #7 from his ITP to 20 October 2015. Daniel will continue with Continuing Care treatment and has Problem #1, Objective #7 due 20 October 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 20 October 2015 at 1230 for group. DANIEL WILL NOT BE IN GROUP FOR THE NEXT 4 WEEKS DUE TO LEAVE AND TRAINING.
 No evidence of SI/HI during this encounter
 Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

S/O Note Written by CORSO, MEGHAN L @ 17 Sep 2015 0858 EDT**History of present illness**

The Patient is a 30 year old male.

He reported: Encounter Background Information: Pt attended the first class of a two part series on sleep. This class opened with a basic discussion on sleep and the physiological effects of sleep deprivation. We also explored sleep disorders including sleep apnea and insomnia as well as treatment for both sleep apnea and insomnia. We covered topics such as: sleep hygiene, stimulus control, fight or flight response and relaxation techniques (deep breathing and PMR). Pt participated in a deep breathing exercise. Instructor also introduced the CBTi app and demonstrated how to use this app for relaxation exercises. Pt instructed to complete sleep diary (instructor walked through in detail) and the online questionnaire.

A/P Written by CORSO, MEGHAN L @ 17 Sep 2015 0859 EDT**1. Lack of adequate sleep:** Pt goals:

- 1) complete sleep questionnaire online
- 2) complete sleep diary using CBTi app or paper version
- 3) identify 3 areas of sleep habits and set SMART goal
- 4) attend class #2 in two weeks

Procedure(s): -Health And Behav Intervention, Each 15 Min Grp (2 Or More) x 3

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder presents for f/u appt after Zoloft was increased to 100mg daily. Pt has been taking Zoloft 100mg daily without side effects. He did run out of the Zoloft a few weeks ago and was without the medication for 26 hours which caused him to feel dizzy and have flu-like symptoms. These symptoms resolved once he resumed Zoloft. Pt reports that his depressive and anxiety symptoms have been stable. He has been struggling with hypersomnia rather than insomnia recently. He wants to nap throughout the day despite sleeping 6-7 hours per night. His PCM referred him to sleep clinic. He is in a romantic relationship that is going well. He was separated from his shop at work which has worked out well. He has re-enlisted for 6 more years with a nice financial bonus that he will use to pay off his debts.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.

Allergies

Current Allergies Reviewed. NKDA.

Current medication

Zoloft 100mg daily

Melatonin for insomnia.

Past medical/surgical history**Reported:**

Recent Events: Medication compliance.

Medical: Reported medical history Penile warts (HPV)

Neurotic excoriation (scalp picking when anxious)

Asthma during childhood

Allergic response to pets

Recurrent intestinal pain (possibly lactose intolerance)

PRK (2011)

and psychiatric history

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

- * THERAPY: multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014. She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.
- * MEDS: Denies other medication trials
- * INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.
- * SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

Personal history

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college. He found himself unable to experience from the past or avoid having feelings related to it?

- [1] Avoid activities or situations because they remind you of a stressful experience from the past?
- [0] Trouble remembering important parts of a stressful experience from the past?
- [0] Loss of interest in things that you used to enjoy?
- [0] Feeling distant or cut off from other people?
- [2] Feeling emotionally numb or being unable to have loving feelings for those close to you?
- [0] Feeling as if your future will somehow be cut short?
- [0] Trouble falling or staying asleep?
- [1] Feeling irritable or having angry outbursts?
- [1] Having difficulty concentrating?
- [1] Being 'super alert' or watchful on guard?
- [0] Feeling jumpy or easily startled?

Add point values from each response. TotalD.

Behavioral: Caffeine use 4 cups of coffee per day. Stops drinking caffeine after 2pm and never a smoker / Never Used Tobacco Products.

Alcohol: Not using alcohol Not currently. Did consume alcohol on 27 May 2015.

Subjective

NO Learning Disability, Language or Learning Barriers.

Review of systems

No current substance use symptoms

No current cognitive symptoms

No current psychotic symptoms

Physical findings**General Appearance:**

° Alert. ° Well developed. ° Well nourished. ° In no acute distress.

Neurological:

° No disorientation was observed, oriented x3. ° No hallucinations. ° Memory was unimpaired. ° Remote memory was not impaired. ° Recent memory was not impaired. ° Judgement was not impaired.

Speech: ° Normal, regular rate, non-pressured. ° Rate was not slowed. ° Not pressured. ° Tone was not a monotone.

Psychiatric:

Demonstrated Behavior: ° Behavior demonstrated no abnormalities - appropriate and cooperative. ° No psychomotor retardation. ° Behavior demonstrated no psychomotor agitation. ° No decreased eye-to-eye contact was observed.

Mood: ° Euthymic Able to smile appropriately. ° Not depressed. ° Not anxious.

Affect: ° Normal anxious. ° Not labile. ° Not flat. ° Not constricted. ° Showed no irritability.

Thought Processes: ° Not impaired, they were linear, logical, and goal directed. ° Attention demonstrated no abnormalities. ° Attention span was not decreased.

Thought Content: ° Insight was intact. ° No delusions. ° No suicidal ideation. ° No suicidal plans. ° No suicidal intent. ° No homicidal ideations. ° No homicidal plans. ° No homicidal intent.

Note Written by HILL,LARRY D @ 26 Aug 2015 1446 EDT

Daniel CC note

Daniel arrived on time. Daniel is at session # 11 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group was allowed to process and lead the discussion. There was tension in the group and the discussion turned to planning a group social event. Several options were discussed with no definite plan was decided upon. It came to a discussion of what the group was about and how group members supported each other. The group appeared to be storming and by the end of group they began to be more cohesive and a working group. Group went over by 4 minutes because the discussion became about their recovery and how the group can help.

Daniel sounded disappointed as he said "I just do not share in group anymore because I believe no one cares about me and what is going on." Another group member spoke up in the group process saying "this is my therapy and I'm here to use it to help me with my issues because I don't have anything else." Daniel was observed validating her saying "thank you for having the balls to say what I could not." The tension in the room was high as Daniel and another group member had a disagreement with each other. Another group member told Daniel "it sounds like you are always talking out your ass." Daniel sounded defensive in his tone and then brought up an old issue that was processed and gone to take a jab back at this other group member." At this point the group almost completely shut down and the counselors took over to help group member's process what was happening in group. Daniel reported the strength of another group member saying what she felt helped him learn how to deal with and handle situations in group where he is uncomfortable.

Daniel appeared engaged and interested in the treatment process. Daniel appeared annoyed, engaged and was appropriate and active throughout the session. Daniel had no current problems or objectives due from his ITP. Daniel will continue with Continuing Care treatment and has an outdated treatment plan and will schedule an individual session on 1 Sep 15 for review and update. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 1 September 2015 at 1230 for group. No evidence of SI/HI during this encounter Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

Disposition Last Updated by HILL,LARRY D @ 19 Aug 2015 1351 EDT**Released w/o Limitations**

Discussed: Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session # 10 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group welcomed a new group member using the introduction exercise. Group rules were read and explained for clarification. The entire group denied drinking or using drugs. Group discussed places and events that remind them to drink and the coping skills they are using now. Group processed the worksheet "Create a Friend" and shared how they compared to it in being friends with others. Daniel opened group up with what he called a "new addiction" in his life McDonald's hamburgers. He said "I do not know why I like them they are just good." This counselor helped him understand with a short brief of the brain reward pathway and addiction, helping his understanding. Daniel was observed relating to another group member sharing about relaxing on her patio with a cigar and drink and how hard it is to change places and things related to drinking. Daniel said "I still cannot go out on my patio due to the drinking relationship I had out there. Daniel sounded excited as he reported he no longer uses his old on-line dating sights. At some point in the group Daniel was in the role of a junior counselor and asking opened questions to other group member. Daniel appeared engaged and interested in the treatment process. Daniel appeared engaged and was appropriate and active throughout the session. Daniel has no current problems or objectives due from his ITP. Daniel will continue with Continuing Care treatment and has Problem # 4, Objective # 2 due 25 Aug 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 08 September 15 for group. No evidence of SI/HI during this encounter. Secondary Record maintained at SARP Washington Navy Yard 2024337577

Disposition Written by BROWN,CYNTHIA E @ 12 Aug 2015 1341 EDT**Released w/o Limitations**

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for group. Daniel is at session # 9 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. No group member admitted to using alcohol or drugs since last seen at SARP. The group began with each member identifying their current feeling in one word. Several group members shared of current struggles including; work, stress, PCS and family issues. The group closed with one group member using the closing exercise.

Daniel was very subdued in the group today. He did not appear to have a need to counsel any other group member which is his normal mode of operando. He only really shared with the group that he has a girlfriend now. They have been together for about 10 days and she makes him really happy. He heard in the closing that he should slow down with the dating scene. The closing member shared that he did not have relationship happiness until his second marriage. Daniel appeared engaged and interested in the treatment process. Daniel appeared engaged and was appropriate and active throughout the session. Daniel has Problem #1, Objective #8 overdue from his ITP. This will addressed upon his return 17 July 2015. Daniel will continue with Continuing Care treatment and has Problem # 4 Objective #2 due 24 August 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 18 August at 1230 for group.

No evidence of SI/HI during this encounter.

Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 2 - The patient attended group from 1230-1400.
-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Written by BROWN,CYNTHIA E @ 29 Jul 2015 1243 EDT

Released w/o Limitations

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: CC GROUP

Daniel arrived on time for group. Prior to group we discussed his need to have the attention of a female in group. We discussed how this was his issue and it needed to not interfere with the group process for him or for her. He was cautioned about being a Junior Counselor trying to give advice to group members instead of keeping the focus on his self. He began to discuss how he was having a female recently and she wanted to touch him but it turned him off. He is not in talk therapy and only does medication management. He was told he would best deal with these issues with Mental Health and he agreed to speak to his medication manager. Daniel is at session # 8 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The entire group denied that they drank alcohol or abused drugs. The group seemed very future oriented speaking of what is coming up for them in the next weeks and months. All group members were encouraged to make their individual treatment planning sessions prior to leaving today.

Daniel did not appear engaged or interested in the treatment process. He noted as having a side conversation with a group and making inappropriate comments to him. He appeared to provide advice to other group members again that had nothing to do with his own experience. Daniel rescheduled Problem #4, Objective #2 stating he needed more time from his ITP. He is late also on Problem #1 Objective #8 and that will be addressed next week. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 4 August 2015 at 1230 for group

No evidence of SI/HI during this encounter

Released w/o Limitations

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for group today. Daniel is at session # 7 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group welcomed a new group member using the introduction exercise. The group denied drinking or abusing drugs since their last report to this group. The group reviewed euphoric recall as a relapse trigger. We discussed the engagement to 12 step meetings or other supportive activities and found most group members reduced the number of meetings attended since starting this program. The entire group was encouraged to make individual session to speak with their primary counselor about the requirements of this group and program.

Daniel shared that he had run out of his Zoloft and went several days without it. He described having withdrawal but stated he is back on it now. He stated that he feels better and knows that the medication is necessary for him. Daniel stated that his only 1 AA meeting and he keeps himself busy the rest of the time. He admitted that he is required to attend more AA meetings (3) by his treatment plan. Daniel appeared engaged and interested in in what the female group member was doing and not the group. He was noted as playing "jr. counselor" in stating that attending AA meetings helps others. Daniel appeared upset at the end of the session and stated that he is using his CBT to assist in his behaviors. Daniel did have Problem 4 Objective 2 due today but failed to forward it. Daniel will continue with Continuing Care treatment and has Problem #4, Objective #2 to be completed next week. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 28 July 2015 at 1230 for group.

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: CC GROUP

Daniel arrived on time to group. Daniel is at session #6 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. No one in group admitted to drinking or abusing drugs. The group welcomed a new group member using the introduction exercise. The group shared the struggles of the last week and any triggers to drink or abuse drugs in the past week. Group completed and discussed the worksheet "Supportive Relationships."

Daniel took up most the group talking in circles. Even when confronted he continued to contradict himself. The group was noted as checking out but no group confronted him this defensive behavior. He did report a childhood incident but did not recall the details enough to assure that the situation happened. He reported on his worksheet that he did not share about this but did. Not enough detail in this and he stated that his parents were notified. Daniel appeared monopolize the group impeding the treatment process. Daniel did not completed any treatment plan objectives and did not have any due. Daniel will continue with Continuing Care treatment and has Problem #4, Objectives #2 and 8 due 21 July 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 21 July 2015 at 1230 for group.

No evidence of SI/HI during this encounter

Note Written by HILL,LARRY D @ 01 Jul 2015 1416 EDT

Daniel CCG note

Daniel arrived on time and is at session 5 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group performed the check-in process identifying changes or events since last group. The group discussed pleasurable activities that they already do and identified one new activity to do before next group. They discussed common styles of thinking and how they apply to themselves and identified individuals who support their addiction and those who support their recovery. No group member admitted to drinking or using since last group. Daniel appeared tense as group began dressed in shorts and a button up shirt. Daniel sounded pained as he addressed another female group member who said she felt uncomfortable with Daniel and said he is a pervert. Daniel reported feeling judge and looked discouraged at the accusations due to their brief contact outside group. They processed these feelings and safety, respect and non-judgmental behaviors for other group members and seemed able to work through their differences. Daniel has a co-occurring sex addiction and seems to be a driving factor in their personal issues that Daniel reports he is working on. Daniel reported meeting a new girl and spending the night with her jumping head first into a relationship knowing this in in direct violation of his own efforts to find a loving relationship. Daniel was able to identify those working against his recovery saying "I'm the number one problem", he additionally identified his sober network those individuals he can call when he struggles. Daniel reported he would like to cook a surprise food for the group, prior to next group. Daniel appeared uneasy, engaged, interested and was appropriate and active throughout the session even when processing tension between group members. Daniel addressed Problem #1, Objective #1, 4 & 6 from his ITP. Daniel will continue with Continuing Care treatment and has Problem # 1, Objective # 2 due 21 July 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 7 July 2015 for group. No evidence of SI/HI during this encounter. Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

Disposition Last Updated by HILL,LARRY D @ 25 Jun 2015 1230 EDT**Released w/o Limitations**

Discussed: Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session # 4 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group checked-in and reintroduced themselves to a member that had been absent. They processed cravings and shared about how they sleep now compared to when they were drinking. One group member reported struggling with lack of motivation and not caring about anything. No group member reported drinking or using since last seen at SARP WYN.

Daniel appeared frustrated as he reported feeling judged as another member reported sharing not being comfortable sharing intimate details of her life with men. Daniel said "I feel judge as a man and like you don't trust me, and I'm more comfortable sharing with women than a man." This counselor had to block this interaction noticing some tension between these two group members and identified this to them and both members decided to just drop it and not process this tension. Daniel was observed providing positive feedback to another group member struggling with motivation and not caring saying "it sounds like you could be depressed and should get seen for it." Daniel seems to struggle with female interactions in the group and is noted from him in his past relationships. Daniel wrote "I could relate to everyone today and felt a myriad of feeling."

Daniel appeared engaged, interested and was appropriate and active throughout the session. Daniel addressed Problem # 1, Objective # 1 & 4 from his ITP. Daniel will continue with Continuing Care treatment and has Problem # 1, Objective # 2 & 8 due 21 July 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 30 June 2015 for group. No evidence of SI/HI during this encounter. Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

S/O Note Written by TAYLOR, BRADLEY MICHAEL @ 23 Jun 2015 0724 EDT**Chief complaint**

The Chief Complaint is: Scalp.

History of present illness

The Patient is a 30 year old male.

30 y/o male. Per patient, has history of MRSA infection on scalp about 5 to 6 years ago. Hair has never completely grown back. More recently has started to develop scale in same area as well as other areas of scalp. Unsure if area has remained the same size. He feels it has been getting larger.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Allergies

Current Allergies Reviewed.

Past medical/surgical history**Reported:**

Medical: Reported medical history reviewed

Review of systems**Systemic:** No fever and no chills.**Skin:** Pruritus and skin lesion: rash:**Physical findings****General Appearance:**

° Well developed. ° Well nourished. ° In no acute distress.

Neurological:

° Oriented to time, place, and person.

Psychiatric:

Mood: ° Euthymic.

Affect: ° Normal.

Skin:

- Skin: Scalp: Approx 1.5 to 2 cm annular patch of noticeably decreased hair density on posterior apex scalp. Smaller but also annular area next to it. Slightly raised scar like plaque. Follicle drop and tufting of hair noted. Mild erythema and scale.

**A/P** Last Updated by TAYLOR,BRADLEY M @ 23 Jun 2015 1135 EDT

1. Alopecia: Tufted, scarring alopecia on scalp after reported infection about 6 years ago. Patient feels it is slowly progressing. Mild erythema and some scale which feel most likely represents overlying mild seb derm but cannot completely rule out active scarring process. Discussed options with patient to include treating for seb derm and monitoring response vs biopsy for further evaluation. Patient elected to proceed with biopsy. Two punch biopsies completed today. Perilesional and normal posterior scalp. Tolerated well. Wound care discussed. Follow up in 10 to 14 days for suture removal and biopsy results. Sooner for concerns. Ddx includes mature scar w/overlying seb derm v folliculitis decalvans v LPP v other scarring etiologies.

Seen and d/w Dr. Stearns.

Procedure(s):

-Biopsy Skin x 1 - Universal protocol requirements were met per WRNMMC Policy. Patient's identification was checked (name & birthdate). procedure and site, side matches the consent form. the lesion was prepped with alcohol. local anesthesia was provided by local injection with a 30g needle of 1ml of 1%lidocaine with epinephrine. a 4 mm punch biopsy was then performed. estimated blood loss was negligible. the wound was closed with 4 -0 suture, and a sterile dressing applied. wound care discussed, f/u 10 days for suture removal and discussion of path results.

Laboratory(ies):

-Biopsy Skin Each Additional Lesion x 1
-TISSUE EXAM (Routine) Start Date: 06/23/2015 Order Date: 06/23/2015 11:35 Ordered By: TAYLOR,BRADLEY M Ordering Provider: TAYLOR, BRADLEY MICHAEL

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 6 - The patient attended group from 1230-1400.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by HILL,LARRY D @ 17 Jun 2015 1450 EDT**Released w/o Limitations**

Discussed: Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time and is at session #3 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. The group started with checking in on happenings since last group, the group welcomed one new member and closed with two group members using the introduction and closing exercises. The group shared about life struggles while the where drinking and how they affect them now. No group member admitted to drinking or abusing drugs since last seen at SARP.

Daniel appeared interested as another group member frustratedly listed many reasons why she felt she should drink, use drugs and return to old habits. Daniel was observed relating her struggles to his own life saying "I use to think the same way and when I was drinking I would over use my prescription pain meds knowing I should not but would do it anyways." "I'm disappointed in myself because I continually struggle with relationships and have been with 126 women and had been doing very good but I had sex with two women in the past two days. This to me is my old behavior but it was worse when I was drinking." "I want a health relationship but struggle and don't know how to have one, I'm very picky." Daniel seems to be struggling with a sex addiction and dealing with a myriad of feeling including shame, guilt and disappointment in himself for lack of control.

Daniel appeared engaged and was appropriate and active throughout the session. Daniel addressed Problem #1, Objectives # 1, 4, & 6 from his ITP. Daniel will continue with Continuing Care treatment and has Problem #1, Objective #2 due 21 July 2015. See Daniel's "Continuing Care Progress Report" for more information on this encounter. No evidence of SI/HI during this encounter. Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

S/O Note Written by ZEMBRZUSKA, HANNA DOMINIKA @ 12 Jun 2015 0728 EDT**History of present illness**

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Navy Information Operations Command (NIOC) at Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder presents for f/u appt. Pt has been taking Zoloft 75mg daily without side effects. Pt reports that he continues to be happier more often, but it is not consistent. He reports no difference in his anxiety. He continues to have anxious ruminations about work which lead to initial insomnia. He has been taking Melatonin a few times a week at bedtime, but does not want to take it every night. He is implementing the skills he learned in CBT-I group and using the CBT-I app. Sleeping about 7 hours per night, but finds himself tired in the afternoon and will sometimes take a 30-60min nap. He reports consuming 1/2 pint of alcohol on 27May due to feeling stressed about work and interpersonal difficulty in romantic relationship. He is a people pleaser and has a hard time saying no. He may be separated from his shop at work which he thinks will be better because he does not like his current job. He needs to pick up collateral duties to pick up next rank.

From SARP note: The SM self-referred for SARP evaluation due to his growing concern about his drinking and inability to stop. According to the SM, his alcohol of choice is vodka. He prefers to drink alone at home. His drinking frequency is daily. He reported an increase in his drinking, over the past 8 months, to daily drinking. He described drinking 2 re on 16JUN2014 and was diagnosed with GAD and neurotic excoriation (scalp picking when anxious). He was then referred to a LCSW at WRNMMC for therapy and

Created: 16 Aug 2017

attended therapy sessions until 30OCT2014. He was then command referred to SARP on 17MAR2015 and diagnosed with Alcohol Use Disorder, moderate to severe. SARP referred pt to a 28 day inpatient alcohol rehab at Ft. Belvoir from which the pt was discharged at the end of April 2015.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.

Allergies

Current Allergies Reviewed. NKDA.

Current medication

Zoloft 75mg daily

Melatonin for insomnia.

Past medical/surgical history**Reported:**

Recent Events: Medication compliance.

Medical: Reported medical history Neurotic excoriation (scalp picking when anxious)

Asthma during childhood

Allergic response to pets

Recurrent intestinal pain (possibly lactose intolerance)

PRK (2011)

and psychiatric history

* THERAPY: multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014.

She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.

* MEDS: Denies other medication trials

* INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

Personal history

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college. He found himself unable to experience from the past or avoid having feelings related to it?

[1] Avoid activities or situations because they remind you of a stressful experience from the past?

[0] Trouble remembering important parts of a stressful experience from the past?

[0] Loss of interest in things that you used to enjoy?

[0] Feeling distant or cut off from other people?

[2] Feeling emotionally numb or being unable to have loving feelings for those close to you?

[0] Feeling as if your future will somehow be cut short?

[0] Trouble falling or staying asleep?

[1] Feeling irritable or having angry outbursts?

[1] Having difficulty concentrating?

[1] Being 'super alert' or watchful on guard?

[0] Feeling jumpy or easily startled?

Add point values from each response. TotalD.

Behavioral: Caffeine use tea and coffee 1-2x/wk. Never a smoker / Never Used Tobacco Products.

Alcohol: Not using alcohol Not currently. Did consume alcohol on 27 May 2015.

Subjective

NO Learning Disability, Language or Learning Barriers.

Review of systems

No current substance use symptoms

No current cognitive symptoms

- Duration of the encounter 30 min.

Practice Management

Continue assessment and intervention

Multi-Disciplinary Treatment Plan:

Treatment Team Members -

Individual Therapist: SARP

Medication Prescriber: ZEMBRZUSKA

Group Therapist: TBD

Additional Provider and treatment: SARP at Washington Navy Yard

Date last updated: 11JUN2015

Reviewed with patient on: same

Does patient agree with plan? Yes

If not, what part?

Projected date of next treatment plan update: f/u in 1 month

Discussion of risk of assessment and intervention

Interventions Provided at this session:

Objective 1 (Corresponds to Goal #): Anxiety, worry, irritability

-

Interventions:

1. Increase Zoloft to 100mg daily. Pt's depressive symptoms appear to have responded to Zoloft, but anxiety is still not under good control. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next session.
4. R/o OCD.

Objective 2 (Corresponds to Goal #): Depressed/apathetic mood

-

Interventions:

1. Increase Zoloft to 100mg daily. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next session.

Objective 3 (Corresponds to Goal #): Insomnia

-

Interventions:

1. Continue Melatonin QHS prn insomnia
2. Pt to continue using CBT-I app and use progressive muscle relaxation and imagery at bedtime to promote relaxation and decrease ruminative thoughts

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

S/O Note Written by PATSOS,ASHLEY N @ 09 Jun 2015 1219 EDT**History of present illness**

The Patient is a 30 year old male.

The patient was present for the Continuing Care Support Group (CCSG).

A/P Last Updated by PATSOS,ASHLEY N @ 09 Jun 2015 1221 EDT**1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 6 - The patient attended group from 1230-1400.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by HILL,LARRY D @ 10 Jun 2015 1356 EDT**Released w/o Limitations****Discussed:** Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time. Daniel is at session 2 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1400, total of 1 1/2 hours. Group welcomed one new group member using the introduction exercise. The group closed with 2 group members. One group member admitted to drinking while in treatment which led to another group mentioning he drank also. The group processed how they could these struggling group members.

Daniel reported doing well during the check in process and said "I have to be honest with the group; I also had a lapse 2 weeks ago and drank most of pint of vodka. I have been struggling with a female friend that wants to be more than a friend and ended up in a liquor store and bought the bottle. I had unopened cranberry juice at home and mixed them and ended up pouring out some of it." Daniel reported feeling guilty concerning his lapse. Daniels honesty seemed to be brought forward from another group member he knows that shared of a recent lapse. Daniel seems to struggle with self-image and puts a lot of his time and efforts into others writing "I have not been worrying about others and what they think of me." Daniel reports working the 12 steps but has no sponsor. Daniel appeared engaged, interested and was appropriate and active throughout the session. Daniel addressed Problem #1, Objective #1 and 4 attending group and sharing from his ITP. Daniel will continue with Continuing Care treatment and has Problem # 1, Objective # 2 due 21 July 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 16 June 2015 at 1230 for group. No evidence of SI/Hi during this encounter Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

Disposition Last Updated by BROWN,CYNTHIA E @ 03 Jun 2015 0801 EDT**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: CC GROUP

Daniel is at session # 1 of the 26 scheduled sessions for the Continuing Care treatment program attending from 1230 to 1415, total of 1 1/2 hours. All members of the group denied that they drank or used drugs. The group welcomed a new group member using the introduction exercise. The group discussed in depth what they have gotten out of treatment so far. The group closed with a patient.

Daniel was introduced to the group. He appeared very comfortable with the format and other group members. He shared his coping skill as CBT. He stated that it helps him to regulate his emotions. At one point he engaged in friendly banter with a group member and other group members responded that he will fit in this group. He smiled and appeared to enjoy the engagement. Daniel appeared engaged and interested in the treatment process. Daniel appeared engaged and was appropriate and active throughout the session. Daniel addressed Problem #1, Objective #1 by attending group from his ITP. Daniel will continue with Continuing Care treatment and has Problem #1, Objectives #2 and 8 due 21 July 2015. See Daniel "Continuing Care Progress Report" for more information on this encounter. Daniel is schedule to return 9 June 2015 at 1230 for group.

No evidence of SI/HI during this encounter

Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

Note Written by BROWN,CYNTHIA E @ 03 Jun 2015 1342 EDT**INDIVIDUAL SESSION CC FOR GROUP INTAKE**

Daniel is at session 1 of the 26 scheduled sessions of the Continuing Care treatment program attending from 0930 to 1030, total of 1 hour. Daniel and I reviewed his treatment plan with the basic requirements for the Continuing Care group. He agreed to all of the terms and conditions. We will establish his goal for treatment when he returns on 9 June 2015 for group at 1230. We reviewed the limitations of confidentiality and he indicated he understood. He indicated that he enjoys using the CBT to regulate his emotion. He admitted that he struggles to find a long term relationship and finds most women to be objectionable in one major way or another. The large number (126) women that he has been with have been disappointing to his standard but he feels very lonely. Daniel appeared engaged and interested in the treatment process. Daniel is to start working on his treatment plan today for the CC group. He addressed Problem #1, Objective #1 by attending this appointment from his ITP. Daniel will continue with Continuing Care treatment and has Problem #1, Objectives #2 and 8 due 21 July 2015. Daniel is schedule to stay today for group.

No evidence of SI/HI during this encounter

Secondary Record maintained at SARP Washington Navy Yard 202-433-7577.

S/O Note Written by PATSOS,ASHLEY N @ 27 May 2015 1017 EDT**History of present illness**

The Patient is a 30 year old male.

The patient attended the Outpatient Treatment Program (OP).

A/P Last Updated by PATSOS,ASHLEY N @ 27 May 2015 1018 EDT**1. ALCOHOL DEPENDENCE (ALCOHOLISM)**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by GONZALEZZARAZUA,JORGE A @ 29 May 2015 1311 EDT**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his group appointment. He is in Week 4, Day 1 of OP treatment attending from 0900-1100, total of 2 hours. This will be Daniel's last OP session. Today's session opened up with 3 members closing with the group as well as the other group members closing with the departing members.

Daniel performed his closing with the group prior to departing the OP group for the last time and shared that he is doing well and hopes to continue to improve and maintain his sobriety. He states that the skills he has learned are paying dividends for him and wants to use them going forward to maintain a more balanced lifestyle.

Daniel seemed at ease and comfortable performing his closing from OP group. He will be attending an intake appointment with a counselor to commence his Continuing Care.

Daniel showed no evidence of SI/HI/ATV

Next scheduled apt 02 June 2015 @ 1030.

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577

History of present illness

The Patient is a 30 year old male.

The patient attended the Outpatient Treatment Program (OP).

A/P Last Updated by PATSOS,ASHLEY N @ 22 May 2015 0851 EDT

1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.
 -ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Written by REGIS,JAMES @ 22 May 2015 1539 EDT

Released w/o Limitations

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. -
 Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 4, Day 3 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniel's 12th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with Daniel doing his check-in with the group members going over any triggers or cravings he may have had during the past couple of days.

During Daniel's check-in, Daniel stated that he's looking forward to this weekend because he has plans with the girl that he's been hanging out with. He stated that they hung out last night and that he made dinner for her at his place and the watched a movie together. Daniel also stated that he plans on seeing her tonight and on Sunday where they're supposed to go to Kings Dominion amusement park and spend the day together. This he says will be a huge test for them because it's going to determine if they can spend an entire day together.

Daniel seemed optimistic but challenged about his new girl "friend". He appeared relaxed as if there's no pressure because he's not seeking a girlfriend but mentions several times how these encounters are measures of whether or not they can get along. He was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for OP Level Treatment at BNHC-WNY on the 27th of May 2015 @ 0900 to close out of OP group and start his process to CCG.

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

To be reviewed by NBHC-WNY SARP Program Manager on Tuesday 26th of May 2015.

Procedure(s):

-BEHAVIORAL HEALTH COUNSELING AND THERAPY, PER 15 MINUTES x 1 - Met with patient one-on-one from 0800-0900 to review Individual Treatment Plan.
 -ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.
 -ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by REGIS,JAMES @ 21 May 2015 1441 EDT**Released w/o Limitations**

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. -
 Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 4, Day 2 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniel's 11th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with Daniel doing his check-in with the group members going over any triggers or cravings he may have had during the past couple of days

During Daniel's check-in, Daniel stated that he was looking forward to going on a date again tonight with the same girl he went out with the other day. He also mentioned during group discussion that before he gets to the point of hating anything, that he uses his cognitive tools that he learned in residential treatment to better assess what he is going through and to try to find out what the root of his hatred is all about.

Daniel seemed indifferent regarding his date tonight but became very empathetic and inspired to question and express his thoughts on the need to not have hateful sentiments towards others. He was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs. Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for OP Level Treatment at BNHC-WNY on the 22nd of May 2015 @ 0900

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Note Written by REGIS,JAMES @ 21 May 2015 1441 EDT**Individual 1-on-1 session w/Counselor for OP Level 1 Step-Down Treatment**

Daniel arrived on time for his Individual 1-on-1 session with his counselor on Wednesday 20th of May 2015 from 08:00 to 09:00 (1 hour). This is Daniel's 1-on-1 Individual session for Week #4 of his OP Level 1 Step-Down Treatment at SARP WNY. He stated that he had a stomach ache and that he believes that there's something wrong with his digestive system. Daniel also stated that his Performance Evaluation for this year continues to be a source of stress for him because, although they're not received until November 15th, he has to submit it to his CoC by August (which is just a couple of months away). He said that he needs to start doing "stuff" so that he can get a decent evaluation; which is important for him for his career.

Daniel seemed worried and concerned regarding his evaluation. He appears to be putting a lot of anxiety on himself to start doing stuff that can positively reflect on his evaluation. At times, he justified his emotions by saying that if he gets a "Promotable" evaluation (which is a lower evaluation than the "Must Promote" last year) he can still pick-up the next rank in his rate even with that "Promotable" evaluation.

Daniel continues to attend AA meetings and incorporate his abstinence tools towards his sobriety. He was reminded to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

DOB: [REDACTED]

1985

SSN: ***-**-****

DoD ID: 1286180538

Created: 16 Aug 2017

The group will also serve as opportunity for group members to share their experiences and gain support from others.

Brief Summary of content of session #4- last session:

Members discussed past week and changes/challenges they have made and come across with incorporating CBTi components, sleep hygiene, completing sleep log and keeping to their calculated sleep window.

Agenda for session four: briefly discussed how thinking influences sleep and how to think in ways that promote sleep, discussed changing dysfunctional core beliefs, ways to quiet the mind (buffer zone). Continued to discuss sleep diary and importance of completing every week for maximum opportunity to improve sleep quantity and quality. Reviewed sleep log, how to calculate Sleep Efficiency for using sleep training/restriction and completed Sleep Need Questionnaire in order to identify if sleep widow should be modified. Encouraged group members to cont to use sleep log and calculate SE on their own if needed. Gave group members as needed extra sleep logs, Sleep need questionnaires, and Addressing Insomnia in the Future handout.

Summary of Patient Information and Participation:

SM reports he continues to use the CBTi app on his phone which helps him record his sleep and automatically calculates his sleep efficiency. Reports his sleep efficiency is ~ 92% and his sleep widow is 930pm-530am. Reports the behavioral and cognitive changes he has made has helped him get better quality and quantity sleep. He cont to reports getting out of bed at the scheduled time is somewhat difficult, but is trying to make it a habit.

He reports he is not as tired throughout the day. Reports he will cont to use the CBTi app and has found it helpful.

Pain: None reported

Mental Status: SM presented to the group dressed appropriately in civilian attire.

His mood was euthymic and affect was congruent with mood. Speech was logical and goal directed with no evidence of loosened associations or flight of ideas. Thought processes were deemed to be intact with no evidence of hallucinations or delusions.

Risk Assessment: SM did not report any SI/HI. Status will continue to be monitored in group and also by individual providers.

Plan: last session- informed group members of future CBTi group sessions and encouraged members to attend for refresher or contact group leader for questions/concerns
Other treatment modalities (e.g. medication management, individual treatment) will continue as planned.

Released w/o Limitations

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 4, Day 1 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniel's 10th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with Daniel doing his introduction to 2 new group members followed by his check-in going over any triggers or cravings he may have had during the past couple of days

During Daniel's check-in, Daniel stated that he went on another date to a bar last week with another young lady that he met on line. Daniel stated that he found himself again sitting at a bar conversing with his date who was drinking and that he had no desire to drink. Daniel also stated that he really likes this girl because she is into sci-fi like he is which he says is rare. Daniel later said that he knew he cared about this girl because he became nervous around her which showed him that he really liked her.

Daniel seemed delighted and peaceful about his date and how successful it turned out. He continues to ask inquisitive and detailed questions in group. Daniel remains adamant when it comes to his programming project. He was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for a 1-on-1 Individual session with his counselor on the 20th of May 2015 @ 0800
 Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 3, Day 3 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniel's 9th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with Daniel doing his check-in to the group members going over any triggers or cravings he may have had during the past couple of days. During Daniel's check-in, Daniel stated that he went to a bar last night on a date with a young lady that he met on line. Daniel stated that this was the first time that he found himself actually sitting at a bar conversing with his date who was drinking. Daniel stated even though the bartenders came around a couple of time asking him if he wanted a drink, he insisted on just water. Regarding the topic of Peer Pressure that came up in group today, Daniel stated that he too would use a lie as a way to defuse him not drinking. Specifically, Daniel said that he would say he has "diabetes" and that he cannot drink. Daniel seemed blissful about his night and the fact that he didn't have any urge to drink. He stated that he was able to concentrate on his date and getting to befriend her. Daniel continues to appear self-reliant and assertive when it comes to his programming project. Daniel was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs. Daniel showed no evidence of SI/Hi/ATV

S/O Note Written by ZEMBRZUSKA, HANNA DOMINIKA @ 15 May 2015 0806 EDT**History of present illness**

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Navy Information Operations Command (NIOC) at Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder presents for f/u appt after Zoloft was increased to 75mg daily and he was started on Melatonin. Pt reports that his depressed mood has lifted and he is happier more often, but it is not consistent. He reports no difference in his anxiety, however, he has become more focused and productive. He wants to be a positive role model for others struggling with alcohol. He is again interested in volunteering which is something he did at the prime of his military career. He has been working on his computer game, created an LLC, and is tracking his hours working on the game. He continues to have anxious ruminations about work which lead to initial insomnia. He has been taking Melatonin at bedtime, but does not want to take it every night. He has been attending CBT-I group and using the CBT-I app both of which he has found helpful. He no longer reads his phone prior to bedtime. Sleeping about 7 hours per night. He reports sexual side effects (decreased interest) from Zoloft, but feels that this is beneficial since sex has been a distraction for him in the past.

From SARP note: The SM self-referred for SARP evaluation due to his growing concern about his drinking and inability to stop. According to the SM, his alcohol of choice is vodka. He prefers to drink alone at home. His drinking frequency is daily. He reported an increase in his drinking, over the past 8 months, to daily drinking. He described drinking 2 re on 16JUN2014 and was diagnosed with GAD and neurotic excoriation (scalp picking when anxious). He was then referred to a LCSW at WRNMMC for therapy and attended therapy sessions until 30OCT2014. He was then command referred to SARP on 17MAR2015 and diagnosed with Alcohol Use Disorder, moderate to severe. SARP referred pt to a 28 day inpatient alcohol rehab at Ft. Belvoir from which the pt was discharged at the end of April 2015.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.

Allergies

Current Allergies Reviewed. NKDA.

Current medication

Zoloft 75mg daily

Melatonin for insomnia.

Past medical/surgical history**Reported:**

Recent Events: Medication compliance.

Medical: Reported medical history Neurotic excoriation (scalp picking when anxious)

Asthma during childhood

Allergic response to pets

Recurrent intestinal pain (possibly lactose intolerance)

PRK (2011)

and psychiatric history

* THERAPY: multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014.

She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.

* MEDS: Denies other medication trials

* INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.

Merwin, Daniel Dennis

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

- * SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

Personal history

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college. He found himself ul experience from the past or avoid having feelings related to it?

- [1] Avoid activities or situations because they remind you of a stressful experience from the past?
 [0] Trouble remembering important parts of a stressful experience from the past?
 [0] Loss of interest in things that you used to enjoy?
 [0] Feeling distant or cut off from other people?
 [2] Feeling emotionally numb or being unable to have loving feelings for those close to you?
 [0] Feeling as if your future will somehow be cut short?
 [0] Trouble falling or staying asleep?
 [1] Feeling irritable or having angry outbursts?
 [1] Having difficulty concentrating?
 [1] Being 'super alert' or watchful on guard?
 [0] Feeling jumpy or easily startled?

Add point values from each response. TotalD.

Behavioral: Caffeine use 16 oz tea/day and never a smoker / Never Used Tobacco Products.

Alcohol: Not using alcohol Not currently.

Subjective

NO Learning Disability, Language or Learning Barriers.

Additional Screening Questions:

Are you having any thoughts about harming another person? Denies

Do you feel like you are at risk for workplace violence? Denies

Review of systems

No current substance use symptoms

No current cognitive symptoms

No current psychotic symptoms

Physical findings**General Appearance:**

° Alert. ° Well developed. ° Well nourished. ° In no acute distress.

Neurological:

° No disorientation was observed, oriented x3. ° No hallucinations. ° Memory was unimpaired. ° Remote memory was not impaired. ° Recent memory was not impaired. ° Judgement was not impaired.

Speech: ° Normal, regular rate, non-pressured. ° Rate was not slowed. ° Not pressured. ° Tone was not a monotone.

Psychiatric:

Demonstrated Behavior: ° Behavior demonstrated no abnormalities - appropriate and cooperative. ° No psychomotor retardation. ° Behavior demonstrated no psychomotor agitation. ° No decreased eye-to-eye contact was observed.

Mood: • Dysthymic. • Anxious. ° Not depressed.

Affect: • Abnormal anxious. ° Not labile. ° Not flat. ° Not constricted. ° Showed no irritability.

Thought Processes: ° Not impaired, they were linear, logical, and goal directed. ° Attention demonstrated no abnormalities. ° Attention span was not decreased.

Thought Content: ° Insight was intact. ° No delusions. ° No suicidal ideation. ° No suicidal plans. ° No suicidal intent. ° No homicidal ideations. ° No homicidal plans. ° No homicidal intent.

Neurovegetative Assessment: • Dangerousness assessment: suicide risk Suicide Risk and Protective Factors Review:

Diagnosis

Generalized Anxiety Disorder

Alcohol Use Disorder, moderate to severe

Active Problem List:

1. Anxiety, worry, irritability
2. Depressed/apathetic mood
3. Insomnia

Long-Term Goals:

1. Improve relationship/increase social support from mother and sister
2. Improve financial knowledge/pay off debts

Discussion of risk of assessment and intervention

Interventions Provided at this session:

Objective 1 (Corresponds to Goal #): Anxiety, worry, irritability

-

Interventions:

1. Continue Zoloft 75mg daily. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next session.
4. R/o OCD.

Objective 2 (Corresponds to Goal #): Depressed/apathetic mood

-

Interventions:

1. Continue Zoloft 75mg daily. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next session.

Objective 3 (Corresponds to Goal #): Insomnia

-

Interventions:

1. Continue Melatonin QHS prn insomnia
2. Pt to continue using CBT-I app and use progressive muscle relaxation and imagery at bedtime to promote relaxation and decrease ruminative thoughts
3. Continue CBT-I group with Ms. Melton at WRNMMC.

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR

Procedure(s):

-BEHAVIORAL HEALTH COUNSELING AND THERAPY, PER 15 MINUTES x 1 - Met with patient one-on-one from 0800-0900 to review Individual Treatment Plan.

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by REGIS,JAMES @ 15 May 2015 0759 EDT

Released w/o Limitations

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. -

Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 3, Day 2 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniel's 8th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with Daniel doing his check-in to the group members going over any triggers or cravings he may have had during the past couple of days. During Daniel's check-in, Daniel stated how excited he was because he had just set up a date for after group with a girl that he's been talking to online. He stated that whether anything happens with her or not, he is OK with that fact. Daniel also mentioned how the Navy is his only family and it's what has validated him throughout these years. He continued to say that the Navy is "all that he has".

Daniel seemed very suspicious and cynical while describing his date. He showed signs of why he has very little belief in his self-worth. However, while he was describing his programing abilities, Daniel continues to appear self-reliant and assertive. Daniel was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for OP Level Treatment at BNHC-WNY on the 15th of May 2015 @ 0900

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Note Written by REGIS,JAMES @ 15 May 2015 0800 EDT

Individual 1-on-1 session w/Counselor for Week #3 OP Level 1 Treatment

Daniel arrived on time for his Individual 1-on-1 session with his counselor on Wednesday 13th of May 2015 from 08:00 to 09:00 (1 hour). This is Daniel's 1-on-1 Individual session for Week #3 of his OP Level 1 Treatment at SARP WNY. He stated that he just set up a lunch date with a friend of his. Daniel then stated that, although he is looking forward to seeing his date that he doesn't think she will find him to be "her type" nor like him because she's very attractive. This he explains is directly attributed to his concerns of self-worth along with his anxiety issues that he feels he has to continue working on. Daniel also stated that he continues to write the program for his game which he admits will give him recognition and will validate him as being essential.

Daniel seemed excited and enthusiastic about his lunch date but immediately appeared cautious suspicious when thoughts of his self-worth arose. He continues to show passion for his company and the development of his gaming software along with extreme eagerness to succeed and to be validated.

Daniel continues to attend AA meetings and incorporate his abstinence tools towards his sobriety. He was reminded to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will for his Level 1 OP Group here at WNY on May 11th 2015 @ 09:00

Note Written by MELTON, APRIL M @ 12 May 2015 1138 EDT**Group Therapy Note**

Date: **11 May 15**
 Time w/Patient **1300-1400**

Purpose of Group:

Group members will learn and utilize CBTi components and follow healthy sleep guidelines to assist in managing insomnia. The group will also serve as opportunity for group members to share their experiences and gain support from others.

Brief Summary of content of session #3:

Merwin, Daniel Dennis

DOB: [REDACTED]

1985

SSN: ***-**-****

DoD ID: 1286180538

Created: 16 Aug 2017

THIS INFORMATION IS PROTECTED BY THE PRIVACY ACT OF 1974 (PL-93-579). UNAUTHORIZED ACCESS TO THIS INFORMATION IS A VIOLATION OF FEDERAL LAW. VIOLATORS WILL BE PROSECUTED.

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

Members discussed past week and changes/challenges they have made and come across with incorporating CBTi components, sleep hygiene, completing sleep log and keeping to their calculated sleep window. Agenda for session three: discussed how thinking influences sleep and how to think in ways that promote sleep, discussed changing dysfunctional core beliefs, ways to quiet the mind (buffer zone) and practiced and provided hand out of pleasant imagery exercise. Continued to discuss sleep diary and importance of completing every week for maximum opportunity to improve sleep quantity and quality. Reviewed sleep log, how to calculate Sleep Efficiency for using sleep training/restriction this week and identified sleep window for several members to begin sleep restriction.

Summary of Patient Information and Participation:

SM reports he continues to use the CBTi app on his phone which helps him record his sleep and automatically calculates his sleep efficiency. Reports his sleep efficiency is ~ 92% and his sleep window is 930pm-5am. Reports he is having a hard time getting out of bed in the morning when his alarm wakes up and is not going to bed every night when he at scheduled time. He reports he is not as tired throughout the day. Reports he will work on this but notices that he is getting to sleep faster, as he is not using his phone to watch news or be stimulated right before bed.

Agreed to complete Sleep Log this week and attend next group session.

Pain: None reported

Mental Status: SM presented to the group dressed appropriately in civilian attire.

His mood was euthymic and affect was congruent with mood. Speech was logical and goal directed with no evidence of loosened associations or flight of ideas. Thought processes were deemed to be intact with no evidence of hallucinations or delusions.

Risk Assessment: SM did not report any SI/HI. Status will continue to be monitored in group and also by individual providers.

Plan: Continue with group meetings 4 weeks

Other treatment modalities (e.g. medication management, individual treatment) will continue as planned.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 3, Day 1 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniel's 7th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with the introduction of 1 new group member and a review of group rules followed by a brief discussion concerning phobias and pet peeves of the group.

During Daniel's introduction, Daniel stated that although he bites his nails and picks at his hair, that he is very conscious when other people do that around him. He stated that he doesn't bite them as much now because of his braces but before he had his braces; he explained how he was always doing it. Daniel went on to tell another group member that she would have hated him because he would be biting his nails all the time.

Daniel continues to appear very attentive to the groups needs by continuing to take on the "fixer" role and attempting to solve different issues that arises in group. He seems very insightful on both his current situation and that of the group. Daniel was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for a 1-on-1 Individual session with his counselor on the 13th of May 2015 @ 08:00

S/O Note Written by PATSOS,ASHLEY N @ 08 May 2015 0911 EDT**History of present illness**

The Patient is a 30 year old male.

The patient attended the Outpatient Treatment Program (OP).

A/P Last Updated by PATSOS,ASHLEY N @ 08 May 2015 0912 EDT**1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by GONZALEZZARAZUA,JORGE A @ 08 May 2015 1425 EDT**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his group appointment. He is in Week 2, Day 3 of OP treatment attending from 0900-1100, total of 2 hours. The group started off by doing a check-in and summarizing their current emotional state with a feeling word. Daniel and the rest of the group member also shared their respective plans for the upcoming weekend, providing insight and support to each other.

Daniel shared that he is excited about his upcoming weekend and states that he has quite a bit of work planned. He shared that he is working on developing a computer game and has set aside a few hours each morning and afternoon to sit down and write code for his game. He also states that he will be attending a Nerf gun event called Zombies vs Humans on Saturday which is a fun way to do Nerf gun battles. He also mentioned that he will be attending a couple self-help meetings each day to satisfy the requirements of his ITP.

Daniel appears comfortable in the group setting, engaging well with others and being vocal about what others are sharing or planning on doing. His check-in and sharing are mostly on the short side and rather vague. Daniel addressed Problem 1, Objective 1 and 2 of his ITP by attending his group session on time and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Anxiety & Depression Screening Version: 1 Completed On: 07 May 2015

1. Over the last 2 weeks, how often have you been bothered by feeling nervous, anxious, or on edge?: Not at all
2. Over the last 2 weeks, how often have you been bothered by not being able to stop or control worrying?: Not at all
3. Over the last 2 weeks, how often have you been bothered by feeling down, depressed or hopeless?: Not at all
4. Over the last 2 weeks, how often have you been bothered by having little interest or pleasure in doing things?: Not at all
5. Over the last 2 weeks, how often have you been bothered by the thoughts that you would be better off dead or hurting yourself in some way?: Not at all

S/O Note Written by ARGUINZONI, JUAN B. @ 07 May 2015 1835 EDT**History of present illness**

The Patient is a 30 year old male.

<<Note accomplished in TSWF-CORE>>

30 y/o male (PCM Ms Austin) who comes to clinic for physical exam for SARP (Substance Abuse Rehabilitation Program). Patient used to drink 7-8 mixed drinks a day (rum, vodka) and was hospitalized for inpatient program at Fort Belvoir and discharged on 22 april 15 (his last etoh intake was 25 march 15). At present is on SARP program at Navy Yard. He takes sertraline for generalized anxiety disorder. Has had patches of dry skin on scalp and is requesting dermatology consult. Feels fine otherwise and has no other complaints.

Medication list reviewed with patient, reconciliation completed.

Allergies

Review of systems**Systemic:** No fever, no chills, and no recent weight loss.**Head:** No headache.**Otolaryngeal:** No earache, no nasal discharge, no nasal passage blockage (stuffiness), and no sore throat.**Cardiovascular:** No chest pain or discomfort.**Pulmonary:** No dyspnea and no cough.**Gastrointestinal:** No nausea, no vomiting, no abdominal pain, no bright red blood per rectum, no diarrhea, and no constipation.**Genitourinary:** No change in urinary frequency and no feelings of urinary urgency. No dysuria.**Musculoskeletal:** No back pain.**Neurological:** No lightheadedness.**Psychological:** Not thinking about suicide. No homicidal thoughts.**Physical findings****Vital Signs:**

• Temperature: Reviewed. • RR: Reviewed. • PR: Reviewed. • Blood pressure: Reviewed.

General Appearance:

° Normal. ° Well developed. ° Well nourished. ° In no acute distress.

Head:

Injuries: ° No evidence of a head injury.

Appearance: ° Head normocephalic.

Neck:

Appearance: ° Of the neck was normal.

Palpation: ° No tenderness of the neck.

Thyroid: ° Showed no abnormalities.

Eyes:

General/bilateral:

Pupils: ° PERRL. ° Size of the pupil was normal. ° Pupil accommodation was not impaired.

External: ° Eyelids showed no abnormalities. ° Conjunctiva exhibited no abnormalities.

Sclera: ° Normal.

Ears:

General/bilateral:

Outer Ear: ° Normal.

External Auditory Canal: ° External auditory meatus normal.

Right Ear:

External Auditory Canal: ° Normal.

Tympanic Membrane: ° No bulging tympanic membrane. ° Not erythematous.

Middle Ear: ° No fluid in middle ear.

Left Ear:

External Auditory Canal: ° Normal.

Tympanic Membrane: ° No bulging tympanic membrane. ° Not erythematous.

Middle Ear: ° No fluid in middle ear.

Nose:

General/bilateral:

Discharge: ° No nasal discharge seen.

External Deformities: ° No external nose deformities.

Cavity: ° Nasal septum normal. ° Nasal mucosa normal. ° Nasal turbinate not erythematous. ° Nasal turbinate not swollen.

Sinus Tenderness: ° No sinus tenderness.

Oral Cavity:

Lips: ° Showed no abnormalities.

Buccal Mucosa: ° Examination showed no abnormalities.

Pharynx:

Oropharynx: ° Normal. ° Tonsils showed no abnormalities.

Lymph Nodes:

° Cervical lymph nodes were not enlarged. ° Submandibular lymph nodes were not enlarged. ° Supraclavicular lymph nodes were not enlarged.

Lungs:

° Respiration rhythm and depth was normal. ° Exaggerated use of accessory muscles for inspiration was not observed.

S/O Note Written by PATSOS,ASHLEY N @ 06 May 2015 0912 EDT**History of present illness**

The Patient is a 30 year old male.

The patient attended the Outpatient Treatment Program (OP).

A/P Last Updated by PATSOS,ASHLEY N @ 06 May 2015 0913 EDT**1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by GONZALEZZARAZUA,JORGE A @ 08 May 2015 1430 EDT**Released w/o Limitations****Discussed:** Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his group appointment. He is in Week 2, Day 2 of OP treatment attending from 0900-1100, total of 2 hours. The group started off by doing a check-in and summarizing their current emotional state with a feeling word. The group was also reminded by this counselor about abiding by group rules as well as emphasized the importance of owning their own statements.

Daniel shared that he went on a date with a lady he met online. He states that this is the norm for him and that he had no triggers since his last session. He states that he also went to a meeting with a member of his old group in residential treatment after she called him to invite him to a meeting. Daniel also shared with other group members that he thought they were glamorizing their relationship with alcohol versus looking at their current situation.

Daniel appears comfortable in the group setting, engaging with other group members and providing feedback as he sees necessary. However, after his check-in this counselor noticed that Daniel focused largely on everyone else's issues, trying to help out and provide feedback, but did very little sharing of his own. Daniel addressed Problem 1, Objective 1 and 2 of his ITP by attending his group session on time and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled apt 08 May 2015 @ 0900.

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Questionnaires

A/P Last Updated by PATSOS,ASHLEY N @ 06 May 2015 0810 EDT

1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR

Procedure(s):

-BEHAVIORAL HEALTH COUNSELING AND THERAPY, PER 15 MINUTES x 1 - Met with patient one-on-one from 0800-0900 to review Individual Treatment Plan.
 -ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Written by REGIS,JAMES @ 06 May 2015 0910 EDT

Released w/o Limitations

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. -
 Comments: Daniel arrived on time for his Individual 1-on-1 session with his counselor on Wednesday 06th of May 2015 at 08:00. This is Daniel's 1-on-1 Individual session for Week #2 of his OP Level 1 Treatment at SARP WNY. He stated that he was put on night shift at his job which with treatment has become an issue for him to stay on. He stated that he is worried about how his command is going to react when he tells them that he cannot work the night schedule because of his treatment program. Daniel also stated that he realizes that his taking Zoloft has diminished his sexual turn-on which he read is a side effect. Daniel mentioned that he is getting very involved in his game writing these days and is thinking about establishing contract with different people in the industry to help with his company. He realizes that he is driving more these days (over 100 miles this past week) to support his treatments in the DMV area.

Daniel seemed indifferent when talking about his treatment plan. However, when explaining his company and the development of his gaming software, Daniel seemed extremely enthusiastic and ecstatic. His job continues to be a source of frustration for him as he deal with a civilian counterpart that is out of the loop of his treatment needs.

Daniel continues to attend AA meetings and incorporate his abstinence tools towards his sobriety. He was reminded to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will for his Level 1 OP Group here at WNY on May 06th 2015 @ 09:00

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Created: 16 Aug 2017

Due to several new group member, Facilitator and co-facilitator provided information from session one to assist new group members in obtaining and understanding CBTi group. Participants introduced themselves, offered personal treatment goals. Agenda for session two discussed and handouts given to group members focusing on sleep guidelines, habits that influence sleep. Discussed sleep diary and importance of completing every week for maximum opportunity to improve sleep quantity and quality, by utilizing learned skills and adhering by sleep guidelines. Reviewed sleep log, how to calculate sleep Sleep Efficiency for using sleep training/restriction this week.

Summary of Patient Information and Participation:

SM reports this week he used the CBTi app on his phone which helped him record his sleep and automatically calculated his sleep efficiency for him. Agreed to complete Sleep Log this week and attend next group session.

Pain: None reported

Mental Status: SM presented to the group dressed appropriately in civilian attire.

His mood was euthymic and affect was congruent with mood. Speech was logical and goal directed with no evidence of loosened associations or flight of ideas. Thought processes were deemed to be intact with no evidence of hallucinations or delusions.

Risk Assessment: SM did not report any SI/HI. Status will continue to be monitored in group and also by individual providers.

Plan: Continue with group meetings 4 weeks

Other treatment modalities (e.g. medication management, individual treatment) will continue as planned.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 2, Day 1 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniels's 4th day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with the introduction of 2 new group members and a review of group rules followed by Daniel performing his check-in to the group going over any triggers or cravings he may have had during the past couple of days.

During Daniel's check-in, Daniel stated that he had a productive weekend even though he didn't get a chance to work on his gaming program that much. Daniel stated that he is looking forward to going on a date in Baltimore with a young lady whom he met on a dating website. He stated that she is a software programmer which intrigues him because of his own interest in writing gaming programs.

Daniel seemed indifferent and cautious regarding his leisure activities during this past weekend. He seems to understand how to apply his sobriety tools in different situations even though he appears to question himself. In regards to his date, Daniel looked to be very confident and interested in its outcome. Daniel was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs. Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for a 1-on-1 Individual session with his counselor on the 06th of May 2015 @ 0800 Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Disposition Last Updated by GONZALEZZARAZUA,JORGE A @ 01 May 2015 1445 EDT**Released w/o Limitations**

Discussed: Diagnosis, Alternatives with Patient who indicated understanding. - Comments: Daniel arrived on time for his group appointment. He is in Week 1, Day 3 of OP treatment attending from 0900-1100, total of 2 hours. The group started off by doing a check-in and summarizing their current emotional state with one feeling word. The group was also reminded by this counselor about abiding by group rules as well as emphasized the importance of owning their own statements.

Daniel shared that being in OP group has been good for him as he believes there are still more things he wants to work on, pertaining to his recovery and why he used alcohol to cope with life. He states that he is getting back into the swing of things back at work and is trying to not allow himself to get stressed. He states that for the weekend, he has a trip planned to King's Dominion water park with a friend, allowing him some "fun time" and just relaxing in his place.

Daniel appears comfortable and willing to be an active participant in OP treatment. He seems to want to take charge of his recovery and used some of the tools he learned while in residential treatment. Daniel addressed Problem 1, Objective 1 of his ITP by attending his group session on time and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled apt 04 May 2015 @ 0900.

Brief Summary of content of session #1:

Facilitator and co-facilitator introduced themselves and provided information regarding CBTi group agenda. Participants introduced themselves, offered personal treatment goals and were asked to complete Insomnia Severity Index, Restless Leg Syndrome Assessment, STOP questionnaire and Dysfunctional Beliefs about Sleep survey. Education on sleep, sleep stages, insomnia and CBTi components provided. Discussed sleep diary and importance of completing every week for maximum opportunity to improve sleep quantity and quality.

Summary of Patient Information and Participation:

Pt presents with a formal diagnosis of GAD and was referred to group by Dr. Zembrzka. Pt stated mood today is good and participated in the group, offering personal treatment goals and reason for attending the group; he wants to improve quality of sleep. Reports he sleeps about 5hrs per night but is in bed for a total of 8hrs. Agreed to complete Sleep Log this week and attend next group session.

Pain: None reported

Mental Status: SM presented to the group dressed appropriately in military uniform. His mood was euthymic and affect was congruent with mood. Speech was logical and goal directed with no evidence of loosened associations or flight of ideas. Thought processes were deemed to be intact with no evidence of hallucinations or delusions.

Risk Assessment: SM did not report any SI/HI. Status will continue to be monitored in group and also by individual providers.

Plan: Continue with group meetings for ~4 weeks. Other treatment modalities (e.g. medication management, individual treatment) will continue as planned.

S/O Note Written by PATSOS,ASHLEY N @ 29 Apr 2015 0933 EDT**History of present illness**

The Patient is a 30 year old male.

The patient attended the Outpatient Treatment Program (OP).

A/P Last Updated by PATSOS,ASHLEY N @ 29 Apr 2015 0933 EDT**1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by REGIS,JAMES @ 29 Apr 2015 1427 EDT**Released w/o Limitations**

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 1, Day 2 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniels's 2nd day of treatment in group. Neither Daniel nor any other group member admitted to consuming any alcohol or illegal drugs since their last group session. Group began with the review of group rules followed by Daniel performing his check-in to the group going over any triggers or cravings he may have had during the past couple of days.

During Daniel's check-in, Daniel stated that he was feeling apathetic because he spoke to his step mother who gave him news about his father's postings on Facebook. Daniel went on to say that he thought his father's actions were childish and that he didn't care about it. He said that his triggers usually involved his being disappointed in relationships which would lead him to drinking. The group asked him about his disappointed relationship with his father and whether or not that's ever caused him to drink; to which he said no.

Daniel seemed perplexed and disappointed when explaining his relationship and arguments with his father. He appears withdrawn and exasperated regarding his rapport with his father. Daniel was reminded in group to continue working on his ITP. Daniel is currently addressing Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs. Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for a 1-on-1 Individual session with his counselor on the 1st of May 2015 @ 0800
Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Comments: EPWORTH SLEEP: 8**Questionnaire AutoCites** Refreshed by PARSON, MARSHEA S @ 28 Apr 2015 0945 EDT**Questionnaires**

Tuberculosis Exposure Risk Assessment Version: 3 Completed On: 28 Apr 2015

1. Since your last Tuberculosis Exposure Questionnaire were you exposed to anyone known to have or suspected of having active tuberculosis (i.e. with persistent cough, weight loss, night sweats, and/or fever)? No

2. Since your last Tuberculosis Exposure Questionnaire or Post Deployment Health Assessment (DD Form 2796), did you have direct & prolonged contact with any individuals of the following groups: refugees or displaced persons: patients hospitalized with tuberculosis, prisoners, or homeless shelter populations? No

3. Write the name of any country or countries where you have traveled or deployed to since your last Tuberculosis Exposure Questionnaire.: N/A

4. During this travel, did you have prolonged direct contact with the local population? Prolonged direct contact is generally understood as having been within six feet of a person with a bad continuous cough for at least eight consecutive hours on a single day, or for a total of at least fifteen hours per week of a multi-week stay.: No

5. Have you had a prior history of TB or prior treatment for Latent TB? No

6. PROVIDER: Have you recently had a chronic cough AND did you have any of the following at the same time? Fever, Coughed up Blood, Unexplained Weight Loss, Night Sweats: No

7. PROVIDER: Since your last risk assessment, did you develop any of the following conditions: organ transplant; HIV Infection; Immunosuppression secondary to use of prednisone (equivalent of >15mg/day> 1 month) or other immunosuppressive medication such as Humira, Enbrel or Remicade? No

8. PROVIDER: Since your last TB risk assessment did you develop any of the following conditions: diabetes, silicosis, cancer of head or neck, Hodgkin's disease, leukemia, end stage renal disease, intestinal bypass or gastrectomy, chronic malabsorption syndrome, low body weight (10% or more below ideal weight) or injection drug use? No

EPWORTH Sleepiness Scale Version: 1 Completed On: 28 Apr 2015

1. How likely are you to doze off or fall asleep while SITTING and READING?: 3

2. How likely are you to doze off or fall asleep while WATCHING TV?: 1

3. How likely are you to doze off or fall asleep while INACTIVE in a meeting, theater, or other similar place?: 0

4. How likely are you to doze off or fall asleep as a PASSENGER in a car for an HOUR without a break?: 3

5. How likely are you to doze off or fall asleep while LYING DOWN to rest in the afternoon when circumstances permit?: 0

6. How likely are you to doze off or fall asleep while sitting and TALKING to someone?: 0

7. How likely are you to doze off or fall asleep while SITTING QUIETLY after a lunch without alcohol?: 1

8. How likely are you to doze off or fall asleep in a CAR, while stopped for a few minutes in the traffic?: 0

S/O Note Written by PARSON, MARSHEA S @ 28 Apr 2015 0945 EDT**Chief complaint**

The Chief Complaint is: FACE TO FACE PHA, ACTIVE DUTY.

Reason for Visit

Visit for: FACE TO FACE PHA.

History of present illness

The Patient is a 30 year old male.

Annual Periodic Health Assessment includes record review/assessment/counseling of avoidable health risk factors, clinical preventive services, deployment health history, and individual medical readiness assessment IAW MANMED.

Past medical history reviewed, problem list reviewed, medication list reviewed, family history reviewed, and surgical history reviewed.

Military service [] Y [X] N Deployed since previous PHA

[] Y [X] N Post-Deployment Health Assessment completed

[] Y [X] N Post-Deployment Health Reassessment completed

[] Y [X] N Post-Deployment labs/tests completed

[] Y [X] N Deployment/Shipboard limiting conditions identified

. Currently on active duty.

No systemic symptoms.

Navy ADMS educated to the Face to Face PHA. Ft Meade, CTN1. Denies new behavioral health, new medical health complaints. Reviewed problem list. No deployment limiting conditions. Reviewed and educated to Framingham and survey results.

Past medical/surgical history**Reported:**

Medical: Not currently wearing eyeglasses If Yes, do they have 2 pairs? [] Yes [X] No. No chronic illness. An allergy SEE ABOVE.

Medications: Medication history SEE ABOVE. Not taking medication for high blood pressure.

Tests: A hearing test was performed 1) Is there a DD 2215 (baseline hearing test) in the health record? [X] Yes [] No

Note Written by PONDS,BRANDON J @ 28 Apr 2015 0928 EDT

Thank You for Completing the Fleet and Marine Corps Health Risk Assessment

You rated your health as Good. Personal perception about how healthy you are is usually quite accurate. Your Personal Health Risk Appraisal Report identified 4 risk categories from the answers you provided that relate to overall health, which places you in a **MEDIUM** risk group. Numbers of risk factors have been shown to predict future health care use and health care costs. It is important for individuals to move toward the "low risk" category by reducing the number of behavioral risks, and for those already at low risk, to avoid increasing the number of risk factors over time.

<table border="1"> <tr> <td>High Risk</td> <td>= 5 or more risk categories</td> </tr> <tr> <td>Medium Risk</td> <td>= 3-4 risk categories</td> </tr> <tr> <td>Low Risk</td> <td>= 0-2 risk categories</td> </tr> </table>	High Risk	= 5 or more risk categories	Medium Risk	= 3-4 risk categories	Low Risk	= 0-2 risk categories	<p>You reported 4 categories, which places you at MEDIUM risk.</p> <p>The categories you scored "unhealthy" on included:</p> <ul style="list-style-type: none"> • Stress Management • Sexual Health • Nutrition • Sleep
High Risk	= 5 or more risk categories						
Medium Risk	= 3-4 risk categories						
Low Risk	= 0-2 risk categories						

 **Body Mass Index (Note the limitations of BMI below) — Normal Weight**

http://www.cdc.gov/nccdphp/dnpa/bmi/adult_BMI/about_adult_BMI.htm

YOUR BODY MASS INDEX = 22.1.

Both being overweight or being underweight are related to increased risk of disease and death. Among most Americans, BMI is a reliable indicator of total body fat. It is an inexpensive and easy-to-perform method of screening for weight categories that may

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED]

1985

SSN: ***-**-****

DoD ID: 1286180538

Created: 16 Aug 2017

lead to health problems. Limitations of BMI are that it may overestimate body fat in athletes and others who have a muscular build or underestimate body fat in individuals who lack lean muscles mass.

 **TOBACCO USE— *Never used tobacco*** <http://www.ucanquit2.org>
<http://betobaccofree.hhs.gov/>

You are doing the single most important thing to stay healthy! Not smoking saves you money (over \$2000/year for one pack per day), helps you avoid many tobacco related diseases, and adds to your fitness level and overall health.

 **TOBACCO USE— *Never used tobacco*** <http://www.ucanquit2.org>
<http://betobaccofree.hhs.gov/>

Not using smokeless tobacco is a great choice. You can avoid oral cancer, tooth and gum disease, and maintain a fresh and clean mouth.

 **ALCOHOL USE— *No*** <http://www.nlm.nih.gov/medlineplus/alcoholconsumption.html>

 **ALCOHOL USE— *Never*** <http://www.rethinkingdrinking.niaaa.nih.gov/>

You indicate a healthy choice not to drink heavily, even during celebrations. Sailors and Marines also look out for their shipmates and fellow Marines who have been drinking.

 **ALCOHOL USE— *Never (i.e. not during the past year)***
<http://www.rethinkingdrinking.niaaa.nih.gov/>

You are being a responsible Sailor or Marine by never driving drunk or riding with someone who has been drinking. You can also help fellow Sailors and Marines avoid alcohol related incidents by looking out for those who try to drink and drive - and help them get home safely.

 **INJURY PREVENTION— *Always*** <http://www.nhtsa.gov/Driving+Safety>

By always using your seat belt, you decrease your risk of serious injury or death after an accident by about 50%.

 **INJURY PREVENTION— *Always*** <http://www.nhtsa.gov/Driving+Safety>

Your use of a protective helmet provides significant protection against head injury or death. Wearing other protective gear, maintaining control of your vehicle, and driving defensively can also reduce your risk.

 **INJURY PREVENTION— *Always*** <http://www.cdc.gov/niosh/topics/safety.html>

You are protecting yourself against injuries and disease at your worksite by using appropriate safety equipment

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED]

1985

SSN: ***-**-****

DoD ID: 1286180538

Created: 16 Aug 2017

**STRESS MANAGEMENT— *Somewhat satisfied***<http://www.nlm.nih.gov/medlineplus/stress.html> <http://afterdeployment.dcoe.mil>

You are only somewhat satisfied with your life. Life satisfaction is a common goal that we as human beings strive to achieve. Work, relationships and social activities can all contribute to life satisfaction. Look to these sources for improving your level of satisfaction.

**STRESS MANAGEMENT— *Sometimes***<http://www.med.navy.mil/sites/nmcscd/nccosc/serviceMembersV2/stressManagement/theStressContinuum/Pages/default.aspx> <http://startmovingforward.dcoe.mil>

Occasional stress in your work or at home is common. Problem-solving or discussing possible solutions with someone else may help reduce or eliminate some of your stress.

**STRESS MANAGEMENT— *Sometimes***<http://www.helpguide.org/topics/relationships.htm> <http://afterdeployment.dcoe.mil>

Finding someone with whom you can talk can help you see that you are not alone in how you feel. Talking with others can also provide you with strategies to successfully manage your concerns. Counselors and chaplains are available to assist you. .

**SEXUAL HEALTH— *Most of the time***[http://www.med.navy.mil/sites/nmcphc/health-](http://www.med.navy.mil/sites/nmcphc/health-promotion/reproductive-sexual-health/Pages/condoms.aspx)[promotion/reproductive-sexual-health/Pages/condoms.aspx](http://www.med.navy.mil/sites/nmcphc/health-promotion/reproductive-sexual-health/Pages/condoms.aspx)

Choosing to use a latex condom consistently and correctly each time you have sex will significantly reduce your risk of acquiring a sexually transmitted infection

**PHYSICAL ACTIVITY— *3 weeks per month***<http://www.cdc.gov/physicalactivity/everyone/guidelines/adults.html>

To promote and maintain health, all healthy adults aged 18-64 years need moderate-intensity aerobic activity for a minimum of 150 minutes each week or vigorous-intensity aerobic activity for 75 minutes each week. Combinations of moderate- and vigorous-intensity activity can be performed to meet this recommendation. Exercise sessions can be broken up into as little as 10 minutes at a time.

**PHYSICAL ACTIVITY— *2 days per week***<http://www.cdc.gov/physicalactivity/everyone/guidelines/adults.html>

Muscle-strengthening activities should work all the major muscle groups of your body (legs, hips, back, chest, abdomen, shoulders, and arms). To gain health benefits, muscle-strengthening activities need to be done to the point where it is hard for you to do another repetition without help. Adding muscle allows you to do more activities, improves appearance, and reduces the risk of several chronic diseases.

**NUTRITION— *At least 3-5 times per week or more***<http://www.cdc.gov/nutrition/everyone/basics/fat/index.html>

Some dietary fat is needed for good health, but high levels of fat in your diet may lead to excessive weight gain and increase your risk of certain cancers. Eating foods high in saturated and trans-fats also increases your risk of heart disease. Select foods low in

Merwin, Daniel Dennis

saturated fats, trans fats, and cholesterol; eat plenty of whole grains, fruits and vegetables; and choose low fat milk products and lean meats.

NUTRITION— *Two* <http://www.cdc.gov/nutrition/everyone/fruitsvegetables/index.html>

The national goal for Americans is to consume at least two servings of fruits per day. Fruits and vegetables contain essential vitamins, minerals, and fiber that may help protect you from chronic diseases and can make weight control easier. The actual number of cups of fruits and vegetables needed daily also depends on an individuals age, gender, and level of physical activity.

SUPPLEMENTS— *Never* <http://humanperformancecenter.org/dietary-supplements>

People choosing to supplement their diets with herbals, vitamins, minerals, or other substances need to know about the products they choose so that they can make informed decisions about them. The choice to use a dietary supplement can be a wise decision that provides health benefits. However, under certain circumstances, these products may be unnecessary for good health or they may even create unexpected risks or interact with medications. It is wise to ask your physician or pharmacist before taking supplements.

DENTAL— *Daily* <http://www.ada.org/public.aspx>

You are to be commended for flossing your teeth daily. Daily flossing is recommended to remove plaque and food particles from between the teeth and under the gum line, which prevents gum disease, tooth loss, decay, and bad breath. In addition to flossing , the American Dental Association recommends brushing your teeth twice a day with fluoride toothpaste to achieve good dental health.

NUTRITION— *Two* <http://www.cdc.gov/nutrition/everyone/fruitsvegetables/index.html>

The national goal for Americans is three servings of vegetables per day, with at least one being a dark green or orange vegetable. Fruits and vegetables contain essential vitamins, minerals, and fiber that may help you from chronic diseases and can make make weight control easier. The actual number of cups of fruits and vegetables needed daily also depends on an individuals age, gender, and level of physical activity.

SLEEP— *Sometimes* <http://www.med.navy.mil/sites/nmcphc/health-promotion/psychological-emotional-wellbeing/Pages/sleep.aspx>

People who get enough restful sleep are able to concentrate on their activities, have more energy, and generally feel better. For many people with busy schedules, it is important to set aside enough time for sleep and to avoid issues at bedtime that can interfere with sleep. Talk with your physician if you are frequently unable to achieve restful sleep.

PREGNANCY— *My partner or I are correctly and consistently using birth control ALL the time* <http://www.med.navy.mil/sites/nmcphc/health-promotion/reproductive->

[sexual-health/Pages/contraception.aspx](#)

There is a wide range of new, safe and effective contraception options available, some that work for years after you have started them. Some are permanent and others are easily and quickly reversible when you are ready to have a baby. But not all forms of contraception are equally effective. It makes sense to carefully consider your parenting plans and get informed about contraception so you and your partner can select the option that works best for you. Be well informed about contraception, and talk with your partner and doctor.

Past medical/surgical history**Reported:**

Medical: Not currently wearing eyeglasses If Yes, do they have 2 pairs? [] Yes [X] No. No chronic illness. An allergy SEE ABOVE.

Medications: Medication history SEE ABOVE. Not taking medication for high blood pressure.

Tests: A hearing test was performed 1) Is there a DD 2215 (baseline hearing test) in the health record? [X] Yes [] No

2) Is there a complaint of tinnitus that has not been addressed? [] Yes [X] No

3) Is there a complaint of changes in hearing since the last hearing test? [] Yes [X] No

4) Is there an in-depth audiometric evaluation in the record when existing hearing tests shows thresholds in either ear at 500, 1000 and 2000 Hz that average 30 dB or greater or 45 dB or greater at 3000 Hz or 55 dB or greater at 4000 Hz? [] Yes [X] No

5) If the patient is enrolled in a Hearing Conservation Program, has there been a monitoring audiogram within the past 12 months? [] Yes [X] No.

SEE ABOVE.

Family history

No family history of cancer

Mental illness (not retardation) MATERNAL

Heart disease PATERNAL

Diabetes mellitus PATERNAL.

S/O Note Written by PATSOS,ASHLEY N @ 27 Apr 2015 0840 EDT**History of present illness**

The Patient is a 30 year old male.

The patient attended the Outpatient Treatment Program (OP).

A/P Last Updated by PATSOS,ASHLEY N @ 27 Apr 2015 0847 EDT**1. ALCOHOL DEPENDENCE WITH CONTINUOUS DRINKING BEHAVIOR**

Procedure(s):

-ALCOHOL &/ DRUG SERVICES; GROUP COUNSELING BY A CLINICIAN x 8 - The patient attended group session from 0900-1100.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by REGIS,JAMES @ 29 Apr 2015 0721 EDT**Released w/o Limitations****Discussed:** Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. -

Comments: Daniel arrived on time for his Out Patient (OP) group appointment. He is in Week 1, Day 1 of OP Level 1 treatment which meets from 0900-1100, total of 2 hours here at SARP-WNY. Today was Daniels's first day of treatment in group. Daniel did his introduction to the group which consisted of two other members present; as well as performed a check-in exercise and elaborated on his weekend.

During the introductions, Daniel stated that he had recently completed Level III Residential treatment at Fort Belvoir hospital and that he was encouraged by the knowledge and tools that he gained from his stay there. Daniel also stated that he is currently working on designing a video game which is taking up a lot of his time and that he wants to make sure he's addressing this need he has to please other people vs himself.

Daniel seemed determined and anxious to address his need to do things for himself and not others. He looked decisive prepared regarding him sharing the circumstances and events that got him here with the group. Daniel addressed Problem 3, Objectives 1 through 4 of his ITP by attending his group session and abstaining from alcohol/drugs.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel will be for OP Level 1 on 29th of April 2015 @ 0900

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

Signed By REGIS, JAMES (Para-Professional, SARP WNY) @ 29 Apr 2015 0722**Co-Signed By** BROWN, CYNTHIA E (Paraprofessional) @ 29 Apr 2015 1118

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Navy Information Operations Command (NIOC) at Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder. Pt initially presented to Integrative Care on 16JUN2014 and was diagnosed with GAD and neurotic excoriation (scalp picking when anxious). He was then referred to a LCSW at WRNMMC for therapy and attended therapy sessions until 30OCT2014. He was then command referred to SARP on 17MAR2015 and diagnosed with Alcohol Use Disorder, moderate to severe. SARP referred pt to a 28 day inpatient alcohol rehab at Ft. Belvoir from which the pt was discharged yesterday. SARP would like psychiatrist to evaluate pt for psychotropic medication for his depressed mood, anxiety, and sleep symptoms. Pt reports that every day he experiences either a depressed mood or apathy. He does have moments of happiness when he works on his computer game or cooks, but these moments don't last long. He often wonders what the point of life is and what his purpose in life is. He often worries about the future and tasks he has to complete. He feels that he is always planning and runs through scenarios (good version, bad version) of things in his head. He is frequently irritable, impatient, and judgmental of others. His anxious ruminations lead to initial insomnia. He did sleep well last night, but in rehab he was using Melatonin at bedtime. He has been started on Zolof, but has not noticed a benefit yet. Denies side effects.

From SARP note: The SM self-referred for SARP evaluation due to his growing concern about his drinking and inability to stop. According to the SM, his alcohol of choice is vodka. He prefers to drink alone at home. His drinking frequency is daily. He reported an increase in his drinking, over the past 8 months, to daily drinking. He described drinking 2 ? 3 self-poured drinks, which has an estimated 4 ounces of alcohol per drink. He described the appeal in terms of the calming effect on his mind, specifically to dampen his anxious ruminations and ?obsessing.? He further reported that drinking helps prepare him for sleep onset (he has had problems with initial insomnia). Clinical interview further revealed evidence for marked tolerance, significant spending on alcohol (\$400 - \$500 per month), hangovers (every other week), being told that he drinks too much (past girlfriends), drinking despite the consistent worsening of his negative mood state, and unsuccessful efforts to reduce/quit drinking. In his personal reflection, he indicated that he does not like himself relative to his drinking and desires to stop. He recognizes that there are multiple triggers to his drinking and usually these involve longstanding feelings of disappointment, frustration, and loneliness. It should be noted that the SM indicated that he has been engaging in painful introspection, particularly regarding his childhood and family life.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.

Allergies

Current Allergies Reviewed. NKDA.

Current medication

Zolof 50mg daily started on 26MAR2015

Melatonin for insomnia.

Past medical/surgical history**Reported:**

Recent Events: Medication compliance.

Medical: Reported medical history Neurotic excoriation (scalp picking when anxious)

Asthma during childhood

Allergic response to pets

Recurrent intestinal pain (possibly lactose intolerance)

PRK (2011)

and psychiatric history

* THERAPY: multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014.

She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.

* MEDS: Denies other medication trials

* INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

Personal history

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college. He found himself 'bored' with college. He enlisted in the Navy in October, 2005, after dropping out of college, working two jobs, and being on the verge of 'living on the street.' There were mounting debts (rent, college tuition, basic apartment furniture) also at the time. He started as an Aviation Boatswain's Mate, then cross-rated in 2009 to Cryptologic Technician 'Network'. His duty stations have included USS ESSEX, Pensacola, and NIOC Maryland. He has been very successful in his enlisted service thus far, but has been disenchanted at his current Command because everyone is physically separated and it is not a tight knit command.

Pt was engaged to a Filipino girl he met while stationed overseas, but he ended the engagement in 2010 because she was 'crazy.' No kids.

Behavioral: Caffeine use 16 oz tea/day and never a smoker / Never Used Tobacco Products.

Alcohol: Not using alcohol Not currently. Discharged yesterday from Ft. Belvoir 28 day Residential Alcohol Treatment.

Subjective

Additional Screening Questions:

Are you having any thoughts about harming another person? Denies

Do you feel like you are at risk for workplace violence? Denies

PTSD CHECKLIST (PCL-C)

- [2] Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?
- [0] Repeated, disturbing dreams of a stressful experience from the past?
- [0] Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?
- [2] Feeling very upset when something reminded you of a stressful experience from the past?
- [2] Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?
- [1] Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?
- [1] Avoid activities or situations because they remind you of a stressful experience from the past?
- [0] Trouble remembering important parts of a stressful experience from the past?
- [0] Loss of interest in things that you used to enjoy?
- [0] Feeling distant or cut off from other people?
- [2] Feeling emotionally numb or being unable to have loving feelings for those close to you?
- [0] Feeling as if your future will somehow be cut short?
- [0] Trouble falling or staying asleep?
- [1] Feeling irritable or having angry outbursts?
- [1] Having difficulty concentrating?
- [1] Being 'super alert' or watchful on guard?
- [0] Feeling jumpy or easily startled?

Add point values from each response. Total Score = 13 DATE:

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? [] Not difficult [X] Somewhat difficult [] Very difficult [] Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? [] Yes [X] No

If 'Yes', how often? [] Several days [] More than half the days [] Almost everyday.

Depression Screening:

- [1] 1. Little Interest or pleasure in doing things
- [1] 2. Feeling down depressed or hopeless

Discussion of assessment and intervention

Tx Plan cont'd:

Diagnosis

Generalized Anxiety Disorder
 Alcohol Use Disorder, moderate to severe

Active Problem List:

1. Anxiety, worry, irritability
2. Depressed/apathetic mood
3. Insomnia

Long-Term Goals:

1. Improve relationship/increase social support from mother and sister
2. Improve financial knowledge/pay off debts

Discussion of risk of assessment and intervention

Interventions Provided at this session:

Objective 1 (Corresponds to Goal #): Anxiety, worry, irritability

-

Interventions:

1. Increase Zoloft from 50mg to 75mg daily. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next session.
4. R/o OCD.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by REGIS,JAMES @ 25 Mar 2015 1415 EDT

Released w/o Limitations

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: Daniel arrived on time for his individual 1-on-1 session with his counselor on Monday 23rd of March 2015 at 08:00.

Daniel was told that his bed was confirmed for him to attend Level 3 Inpatient Treatment at Fort Belvoir Residential Treatment Center in VA. Daniel stated that he is ready to go to treatment; then mentioned that he was unable to reframe from abstaining from alcohol this weekend past weekend. Daniel stated that he had a date on Friday night that stood him up. While there waiting for her at the bar, he felt "upset" and decided to start drinking rum and cokes. After 6 rum and cokes, he decided to stop. Daniel mentioned that that was the 3rd time this week that he's been stood up. He further stated that he went home in a cab and passed out. He also mentioned that he stayed in his apartment the entire weekend and did nothing.

Daniel appeared miserable and fully aware of how different triggers can lead him to start drinking to mask his discontent. Realizing that Daniel does not have the necessary tools to handle these deterrence's, Daniel was asked to use a "feelings chart" to describe how he felt when he was at the bar. Daniel mentioned several to include, frustrated, disappointed, envious (of other couples), idiotic, enraged, jealous, hurt. This exercise made Daniel understand the importance of acknowledging all of the feelings he is going through and to understand that it's not just being "upset".

Daniel has not drunk since Friday night and states that he will abstain from alcohol throughout his treatment. He will check in to Fort Belvoir Level 3 Residential Treatment facilities in VA at 08:30 on Wednesday 25th of March 2015.

Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel is upon completion of Level 3 Residential Program at Ft Belvoir.

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

60 minutes face-to-face/floor time. >50% of appointment time spent counseling and/or coordinating care.

on-one from 0800-0900 to review Individual Treatment Plan.

-ALCOHOL AND/OR DRUG SERVICES; CASE MANAGEMENT x 1 - Conducted Case Management to review and update the overall SARP Clinical Record. In addition, reviewed additional services to help assist the patient and to monitor treatment progress and overall service delivered.

Disposition Last Updated by REGIS,JAMES @ 20 Mar 2015 1448 EDT

Released w/o Limitations

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: Daniel arrived on time for his individual 1-on-1 session with his counselor on Friday 20th of March 2015 at 07:30. Daniel was told that his LIP assessment confirmed the recommendation for him to attend Level 3 Inpatient Treatment. Daniel completed the package for admission to Fort Belvoir Residential Treatment Center. Daniel stated that he is ready to go next week. Daniel then mentioned that he's noticed that he is eating more now than when he was drinking and that he was stood up twice this week; both on Tuesday and on Thursday by the same girl which made him feel disappointed and lonely. Daniel also mentioned that he didn't know what he was doing this weekend but that he did have a date for tonight who already knows that he will not be drinking. Daniel appeared bashful and optimistic regarding his willingness to attend treatment next week. When communicating about being stood up this week, Daniel seemed hurt and perplexed. While expressing his disappointment about being stood up, he seemed in disbelief that this happened to him twice. Regarding his abstaining from alcohol, Daniel gives the impression of being very cautious. Daniel will continue to abstain from alcohol throughout his treatment. He was asked to make a weekend plan which included snowboarding and his 1st AA meeting on Saturday and then going to the gym and another AA meeting on Sunday. Daniel showed no evidence of SI/HI/ATV

Next scheduled appointment for Daniel is on the 23rd of March 2015 @ 07:30

Secondary record maintained at SARP Washington Navy Yard (202) 433-7577.

19 MAR 2015**Psychological Health Evaluation**

IDENTIFYING DATA AND REASON FOR REFERRAL: The Service Member (SM) is a 30-year old, single, Caucasian male, E-6/AD/USN, with approximately 9 ½ years continuous active duty service, currently assigned to Navy Information Operations Command (NIOC) at Fort Meade, Maryland. The SM was seen as a self-referral, based on his concern about his drinking.

CONSENT/PRIVACY: The SM was given an explanation of the nature and purpose of the present evaluation, as well as the limits of confidentiality and he consented to the procedures. He signed the Privacy Act statement on 17 MAR 2015 – a copy is in his secondary (clinic) file.

HISTORY OF PRESENT CONCERNS: The SM self-referred for SARP evaluation due to his growing concern about his drinking and inability to stop. According to the SM, his alcohol of choice is vodka. He prefers to drink alone at home. His drinking frequency is daily. He reported an increase in his drinking, over the past 8 months, to daily drinking. He described drinking 2 – 3 self-poured drinks, which has an estimated 4 ounces of alcohol per drink. He described the appeal in terms of the calming effect on his mind, specifically to dampen his anxious ruminations and “obsessing.” He further reported that drinking helps prepare him for sleep onset (he has had problems with initial insomnia). Clinical interview further revealed evidence for marked tolerance, significant spending on alcohol (\$400 - \$500 per month), hangovers (every other week), being told that he drinks too much (past girlfriends), drinking despite the consistent worsening of his negative mood state, and unsuccessful efforts to reduce/quit drinking. In his personal reflection, he indicated that he does not like himself relative to his drinking and desires to stop. He recognizes that there are multiple triggers to his drinking and usually these involve longstanding feelings of disappointment, frustration, and loneliness. It should be noted that the SM indicated that he has been engaging in painful introspection, particularly regarding his childhood and family life. Over the past couple of years, he has been frustrated in his job (is preparing to leave the Navy at his EAOS in OCT 2015) and disappointed in his romantic life. He reported a longstanding history of intermittent suicidal ideation. He reported a couple of instances of suicide attempts in adolescence. In his adult life, his suicidal ideations, which occur about once per month, might include consideration of various methods, but without intense distress or intent to follow through. He further revealed that the thought of pain associated with any act of self-harm discourages serious consideration of suicide. Additionally, the SM reported that he tends to pick at the hair in particular places on his scalp – he pointed to some visible bald patches at the crown of his head that has become a source of embarrassment to him.

REVIEW OF RECORDS: the SM's AHLTA records were reviewed. SM's record was notable for multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014.

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.

HISTORY OF HEAD INJURIES AND BLAST EXPOSURE: The SM denied any history of head or concussive injuries.

PSYCHIATRIC HISTORY: Much of his history is reported in sections above. Family history was significant for depression (mother, sister) and Bipolar Disorder (sister, maternal grandmother). SM denied past and present use of illicit substances. He reported abusing his albuterol inhaler during his childhood/adolescence. With regard to conduct problems, the SM described himself as a "good kid," however noted school suspensions due to computer hacking, fighting, and being connected with the presence of stink bombs at school. He denied any past legal problems or history of arrests.

MEDICAL HISTORY: The SM reported a history of asthma during childhood, but also that he had an allergic response to pets, which were kept in the home. He used an inhaler throughout his childhood. At times, he had to be hospitalized due to his asthma response and he estimates that, summed together, he spent a total of about 30 days hospitalized. He reported a problem with recurrent intestinal pain that has not yet been definitively diagnosed. This has been a problem since about age 15 and is tied to having to go to the bathroom. He had PRK performed in 2011. He was not taking any prescription or OTC medications at the time of the evaluation. There were no known drug allergies. He denied use of tobacco products. He reported his consumption of caffeinated beverages in terms of 14 oz. of coffee daily, more on weekends.

PAIN: The SM reported mild dental pain associated with his orthodontic braces. He reported his pain as a 2 on a scale from 0 – 10 (10 = most excruciating; 0 = none).

SOCIAL AND FAMILY HISTORY: The SM was the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler. He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. The SM indicated that he had few friends. He was often by himself; he was absorbed playing with Legos and watching Star Trek. He left his family abruptly, upon graduation from high school, in 2003. He enlisted in the Navy in October, 2005, after dropping out of college, working two jobs, and being on the verge of "living on the street." There were mounting debts also at the time. He started as an Aviation Boatswain's Mate, then cross-rated in 2009 to Cryptologic Technician – Network. His duty stations have included USS ESSEX, Pensacola, and NIOC Maryland. He has been very successful in his enlisted service thus far, but has been disenchanted at his current Command. He expressed an interest in getting out of the Navy and continuing his current line of work as a civilian contractor.

MENTAL STATUS AND BEHAVIORAL OBSERVATIONS: SM was an adequately groomed and dressed, Caucasian male with red hair. He appeared younger than his age of 30. SM was alert and fully oriented. Eye contact was good. He was cooperative with the interview and answered all questions. Behavior and conduct were appropriate to the interview. Affect was subdued, but responsive. He reported his mood as "mixed...crappy...anxious...frustrated." Immediate and remote memory appeared good. Thought processes were clear, coherent, linear, logical, and goal-directed. Speech was of normal rate, rhythm, and volume. There was no evidence for psychosis as indicated by hallucinations, delusions, and bizarre thinking. Intelligence, based on verbal skills and vocabulary, was estimated to be average. Judgment and impulse control appeared intact, without evidence for gross impairment. Treatment motivation was viewed to be good.

PRIMARY FINDINGS: The SM's pattern of drinking meets the criteria for Alcohol Dependence. He is unable to manage or control his drinking and has little confidence that he can discontinue on his own. He appreciates the multiple triggers, usually mood related, that make him vulnerable to resumption of drinking. He will require the high structure and controlled environment of a residential setting. Level III care is therefore indicated. He also presents with prominent psychological concerns – persistent dysphoria with intermittent, mild suicidal ideation. There is an anxiety component, obsessive/ruminative

Created: 16 Aug 2017

thinking, and compulsions. Trichotillomania may explain his compulsion to pick at his hair (leaving bald patches). A repeat mental health evaluation to specifically address his mood/anxiety symptoms and possible Axis II contributions to his recurrent dysphoria is also appropriate.

SAFETY ISSUES: The Service Member is not currently reporting suicidal or homicidal ideation, intentions, or plans. At present, the Service Member has sufficient ego strength and functional capacity to alert others should he experience a crisis. There are no acute signs of distress presently requiring more extensive suicide risk assessment at this time. Neither is there a need to increase his level of care or restrict autonomy.

FITNESS FOR DUTY AND DISPOSITION: The Service Member is currently psychologically fit for full duty. There is no psychological condition at present that warrants medical board action. The impact of his psychological symptoms described above have largely been associated with distress, to a lesser degree decrements in functioning

DIAGNOSIS:

AXIS I: Alcohol Use Disorder, Moderate – Severe
History of Anxiety Disorder, NOS
R/O Trichotillomania
AXIS II: Cluster C traits
AXIS III: No known contributory physical illnesses
AXIS IV: multiple sources of dissatisfaction
AXIS V: Current GAF: 51

SUMMARY OF FINDINGS AND RECOMMENDATIONS:

1. Based on the available data, the Service Member meets the criteria for Alcohol Dependence.
2. The Service Member is recommended to attend Level III (Residential) treatment, which will afford him the high structure, monitoring, and support required to sustain his abstinence over the course of treatment. His risk of drinking resumption is unacceptably high on an outpatient basis. Level III care will help equip him with the tools/skills he will need to maintain his sobriety and participate meaningfully in his recovery trajectory following completion of residential care.
3. He is to remain abstinent throughout the period of treatment and continuing care.
4. The Service Member is to attend AA meetings at the frequency recommended by the SARP counselor.
5. The Service Member is recommended to resume mental health care at Walter Reed – Bethesda. He will benefit most from a re-evaluation, particularly for psychotropic medication consultation with regard to his mood, anxiety, and sleep symptoms. Cognitive behavioral therapy for insomnia might also be helpful, given his ruminative style.
6. These findings and recommendations were discussed with the SM, who expressed understanding and willingness to comply.

S/O Note Written by NILSEN, LINDA M @ 04 Nov 2014 1357 EST**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

10-30-14: Follow-up appointment for patient being seen for adjustment disorder and anxiety disorder. Patient arrived on time. Patient stated that his sleep is not good. He wakes up in the middle of the night and sometimes has a hard time going back to sleep. Over the weekend, he had a date with a woman who lives in Harrisburg, PA. While he was in the area, he also tried to look up a woman he dated several years ago. He is trying to accept other's points of view. He did not find the one, and the other didn't turn out. One of his main concerns with women he dates, is he needs alone time to do his own thing (computer programming mainly).

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009 Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings.

Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lots, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more 20 oz a day of coffee - sometimes more. Tobacco use current smoker Used to smoke hooka when overseas - Amt per Day: Used to smoke hooka when overseas - Amt per Day: Alcohol: Alcohol use Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down.

Individual Therapist: L Nilsen, LCSW-C

Date last updated: 9-11-14

Reviewed with patient on: 9-11-14

Does patient agree with plan? yes

If not, what part?

Projected date of next treatment plan update: 12-11-14

Discussion of assessment and intervention

Tx Plan cont~"d:

Diagnosis

I. 300.00 Anxiety D/O NOS

II. 799.9 deferred

III. none

IV. Limited support system, few friends

V. current GAF: 65

Active Problem List:

1. Anxiety
2. Relationship problems

Long-Term Goals:

1. Reduce overall frequency, intensity, and duration of the anxiety so that daily functioning is not impaired.

2. Develop the necessary skills for effective, open communication

Discussion of risk of assessment and intervention

Interventions Provided at this session:

supportive therapy

Objective 1 (Corresponds to Goal #1):

- The patient will learn, and by self-report, implement skills to reduce overall anxiety and manage anxiety symptoms.

Interventions:

1. Establish rapport with the client toward building a therapeutic alliance.

Objective 2 (Corresponds to Goal # 2):

- By self report, Increase the frequency of the direct expression of honest, respectful, and positive feelings and thoughts within relationships.

Interventions:

1. Help patient review any new relationships for possible problems.

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

S/O Note Written by NILSEN, LINDA M @ 24 Oct 2014 0907 EDT**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

Created: 16 Aug 2017

10-23-14: Follow-up appointment for patient being seen for adjustment disorder and anxiety disorder. Patient arrived on time. Patient is re-enlisting for another 4 years. His family (Mom, sister, sister's child and brother) are coming to the event on Dec 12. They are staying at his house. He is not close to his family, but is working on getting closer. Patient is also going home for Christmas. He feels guilty and anxious about them. He feels guilty because if other people knew how little he sees them, they would think less of him. After his parents divorced, he rarely saw his Mom. He says he has probably seen her in total about a year since the divorce. His mother is bi-polar. She has been in therapy in the past. Her mother is also bi-polar and takes meds. Patient likes his mom's side of the family. They were nice to him when he was a child. His grandfather taught him Doss, other computer stuff, and played video games with him. He has not seen his dad for 5 years. Dad now has another family and lives in Cal. Dad's brother was in jail for having sex with an under-aged girlfriend. He was about 20 years older than her and was married at the time. His other brother is disabled and lives with their mom. He is mean. The grandmother is mean too. When he was a child, he stayed with them for several weeks at a time. (He visited his mom for about 2 weeks a summer.) Patient states that his sister seems to have inherited the worst parts of both families-she is bi-polar and is the same kind of mean as his father's mother.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009 Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10 Pain Severity 0 / 10.

Current medication

and psychiatric history

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings.

Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lots, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more 20 oz a day of coffee - sometimes more. Tobacco use current smoker Used to smoke hooka when overseas - Amt per Day: Used to smoke hooka when overseas - Amt per Day:

Therapy

- Duration of the encounter 60 min.

Practice Management

Continue assessment and intervention
 Multi-Disciplinary Treatment Plan:

Treatment Team Members -

Individual Therapist: L Nilsen, LCSW-C

Date last updated: 9-11-14

Reviewed with patient on: 9-11-14

Does patient agree with plan? yes

If not, what part?

Projected date of next treatment plan update: 12-11-14

Discussion of assessment and intervention

Tx Plan cont~"d:

Diagnosis

I. 300.00 Anxiety D/O NOS

II. 799.9 deferred

III. none

IV. Limited support system, few friends

V. current GAF: 65

Active Problem List:

1. Anxiety
2. Relationship problems

Long-Term Goals:

1. Reduce overall frequency, intensity, and duration of the anxiety so that daily functioning is not impaired.
2. Develop the necessary skills for effective, open communication

Discussion of risk of assessment and intervention

Interventions Provided at this session:

supportive therapy

Objective 1 (Corresponds to Goal #1):

- The patient will learn, and by self-report, implement skills to reduce overall anxiety and manage anxiety symptoms.

Interventions:

1. Establish rapport with the client toward building a therapeutic alliance.

Objective 2 (Corresponds to Goal #2):

- By self report, Increase the frequency of the direct expression of honest, respectful, and positive feelings and thoughts within relationships.

Interventions:

1. Help patient review any new relationships for possible problems.

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

S/O Note Written by NILSEN, LINDA M @ 16 Oct 2014 0958 EDT**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

Created: 16 Aug 2017

10-16-14: Follow-up appointment for patient being seen for adjustment disorder and anxiety disorder. Patient arrived on time. Pt saw his PCM who excused his PTR, but did not fill out the paper for his regular PT. His ankle is still giving him trouble. He said that she was rude. When asked if he told her, he said no, he does not confront people. He learned as a child to just deal with whatever is going on. He was at sea the first 3 years in the Navy, stationed by Japan. They were on 12 hr shifts, not much down time. He tried to be the "perfect" worker-did his job the best that he could. He does believe this is where some of his anxiety came from. He started pulling his hair out during this time. So he has continued to put up with bad behavior. I encouraged him to tell the providers he finds them rude. He talked about his problems with reading and writing. In the past he has not been able to do well in school. He can handle books on tape and videos. It sounds like he might have a learning disability. We discussed ways he could work around this and on it. Patient stated he is going home to his mom's for X-mas. He said that he jokingly said that they needed to find some girlfriend possibilities for him. He said he was joking, but they have already found someone for him to meet.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009 Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10 Pain Severity 0 / 10.

Current medication

See ALTHA, per patient, none

and psychiatric history

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings.

Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't

want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient

's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lot, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't

want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't

want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't

tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more 20 oz a day of coffee - sometimes more. Tobacco use current smoker Used to smoke hooka when overseas - Amt per Day: Used to smoke hooka when overseas - Amt per Day:

Alcohol: Alcohol use Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut

Do you feel like you are at risk for workplace violence? denied

Additional Screening Questions:

Are you having any thoughts about harming another person? denied

Do you feel like you are at risk for workplace violence? denied

PTSD CHECKLIST (PCL-C)

- ☐ Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?
- ☐ Repeated, disturbing dreams of a stressful experience from the past?
- ☐ Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?
- ☐ Feeling very upset when something reminded you of a stressful experience from the past?
- ☐ Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?
- ☐ Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?
- ☐ Avoid activities or situations because they remind you of a stressful experience from the past?
- ☐ Trouble remembering important parts of a stressful experience from the past?
- ☐ Loss of interest in things that you used to enjoy?
- ☐ Feeling distant or cut off from other people?
- ☐ Feeling emotionally numb or being unable to have loving feelings for those close to you?
- ☐ Feeling as if your future will somehow be cut short?
- ☐ Trouble falling or staying asleep?
- ☐ Feeling irritable or having angry outbursts?
- ☐ Having difficulty concentrating?
- ☐ Being 'super alert' or watchful on guard?
- ☐ Feeling jumpy or easily startled?

Add point values from each response. Total Score = 0 DATE: 8-4-14

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? ☐ Not difficult ☐ Somewhat difficult ☐ Very difficult ☐ Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? ☐ Yes ☐ No

If

'Yes

', how often? ☐ Several days ☐ More than half the days ☐ Almost everyday.

Depression Screening:

- ☐ 1. Little Interest or pleasure in doing things
 - ☐ 2. Feeling down depressed or hopeless
 - ☐ 3. Trouble sleeping or sleeping too much
 - ☐ 4. Feeling tired or little energy
 - ☐ 5. Poor appetite or overeating
 - ☐ 6. Feeling bad about self
 - ☐ 7. Trouble concentrating on things
 - ☐ 8. Moving or speaking slowly or being restless
 - ☐ 9. Thoughts that you would be better off dead
- Add point values from each response. Total (PHQ-9) Score = 7/27 on 8-4-14

Difficulty doing work, taking care of things at home, or getting along with other people? ☐ Not at all ☒ Somewhat ☐ Very ☐ Extremely.

Generalized Anxiety Disorder Screening:

- ☐ 1. Feeling nervous, anxious, or on edge
- ☐ 2. Not being able to stop or control worrying
- ☐ 3. Worrying too much about different things
- ☐ 4. Trouble relaxing
- ☐ 5. Being so restless that it's hard to sit still
- ☐ 6. Becoming easily annoyed or irritable

PCM _ NP Austin, out of office this week.

RelayHealth sent to patient -

NP Austin is out of the office this week, so I am looking at her lab & xray results.

Below are copies of your recent MRI's, showing evidence of a prior lateral (the outside of the ankle) ankle sprain and, also, mild degenerative changes over the "bunion" area of your foot.

This is just a "FYI". Please keep your pending appointments with NP Austin 10/20/14 and with Physical Therapy 11/4/14, at which times you can review the results again, if needed.

v/r

Dr.Rinis

 Amended Report Text:

HISTORY: Continuous pain following injury

COMPARISONS:

Left foot and ankle radiographs dated 5/6/14

TECHNIQUE:

WRNMMC MRI of the left ankle was performed utilizing standard imaging sequences (3 plane localizer, axial T1, axial PD fat-sat, coronal T1, coronal PD fat-sat, sagittal T1, sagittal PD fat-sat). No intravenous or intra-articular contrast was administered. Subsequently, MRI of the forefoot was obtained to include 3 plane localizer, coronal T1, coronal PD fat-sat, axial T1, sagittal T1, axial PD fat-sat, sagittal PD fat-sat.

FINDINGS:

ANKLE: A skin marker was placed along the anterolateral aspect of the lower leg at the site of symptoms.

Plantar aponeurosis: within normal limits.

Tendons Achilles' tendon: within normal limits.

Peroneal tendons: within normal limits.

Flexor tendons:

Apart from minimal fluid accumulation at the knot of Henry, the flexor tendons about the ankle are otherwise within normal limits.

Extensor tendons: within normal limits.

Ligaments:

Syndesmotc ankle ligaments: within normal limits.

Low lateral ankle ligaments:

The anterior talofibular ligament appears thickened. Calcaneofibular and posterior talofibular ligaments are within normal limits.

Deltoid ligamentous complex: within normal limits.

Spring ligamentous complex: within normal limits.

Lisfranc ligament: within normal limits.

Sinus tarsi and tarsal tunnel: within normal limits.

Muscle morphology and signal intensity: within normal limits.

Bone morphology and signal intensity: within normal limits.

Chondral surfaces: within normal limits.

FOREFOOT:

Tendons: Distal peroneal tendons: within normal limits.

Distal flexor tendons: within normal limits.

Distal extensor tendons: within normal limits.

Ligaments:

Intermetatarsal ligaments: within normal limits.

Lisfranc ligament: within normal limits.

DoD ID: 1286180538

Created: 16 Aug 2017

The plantar plate and capsular ligamentous structures about the metatarsal phalangeal and interphalangeal joints of the forefoot are within normal limits.

Recesses and Bursae:

No evidence of Morton's neuroma or intermetatarsal bursitis.

Muscle morphology and signal intensity: within normal limits.

Bone morphology and signal intensity:

Mild degenerative changes are seen at the 1st metatarsophalangeal joint.

IMPRESSION:

Findings suggestive of prior lateral ankle sprain.

From Daniel Merwin To Ms. Marie Austin, NPP Provider Ms. Marie Austin NPP Patient Daniel Merwin Sent Date Sep 30, 2014 8:53 AM Subject Medical Waiver - Foot Details Message I was in to have my ankle looked at and medical waiver signed. Two signatures were missed. I will be at Walter Reed in the morning on 02 October 2014 for another appointment. I will stop by with the paper work. The MRI is scheduled for Sunday October 5th, 2014 and the follow up with Austin, Marie is set for 20 October 2014. A note on my foot. It was definitely swollen yesterday around the area of pain. I was actually able to purposely hurt it along with making a popping/grinding sound when I rotated my ankle within its normal range of motion. I discovered it when I accidentally stretched my ankle when lying in bed. So I decided to test it by pointing my toe forward and then rotating it in 360 degrees, each revolution made a sound or two and increased the pain. The pain lasted through the night and still exists this morning at a level of about 3.

3. Over the last 2 weeks, how often have you been bothered by feeling down, depressed or hopeless?: Not at all
4. Over the last 2 weeks, how often have you been bothered by having little interest or pleasure in doing things?: Not at all
5. Over the last 2 weeks, how often have you been bothered by the thoughts that you would be better off dead or hurting yourself in some way?: Not at all

S/O Note Written by AUSTIN, MARIE @ 02 Oct 2014 0801 EDT**Chief complaint**

The Chief Complaint is: Scalp issues, PT referral for left ankle and PRT waiver.

History of present illness

The Patient is a 29 year old male.

<<Note accomplished in TSWF-CORE>>

PO1 needed a PARFQ and PRT waiver as a result of injured he sustained in April of 2014. Initial injury occurred while he was running and stepped into a hole hyperextending his foot. He was seen in the ER with a negative xray r/o a fx . He continued to have increased swelling and pain and was seen and x rayed again no fx seen . He then was sent for traing and has returned to WR and underwent PT . There is some improvement in pain . However he continues to have pain and swelling over the medial malleolus and is unable to run or walk fast .

PMH is positive for several stress fx in the foot in his young adult years.

Patient is compliant with medications.

Current medication

Motrin but no OTC meds, vitamins, herbals, etc.

Past medical/surgical history**Reported:**

Medical: Reported medical history Ankl pain

Surgical / Procedural: Surgical / procedural history none.

Personal history

Social history reviewed No tob no etoh.

Family history

Family medical history

Noncontributory.

Review of systems**Systemic:** No fever, no chills, and no recent weight loss.**Head:** No headache.**Otolaryngeal:** No earache, no nasal discharge, no nasal passage blockage (stuffiness), and no sore throat.**Cardiovascular:** No chest pain or discomfort.

S/O Note Written by NILSEN, LINDA M @ 16 Oct 2014 0822 EDT**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

9-25-14: Follow-up appointment for patient being seen for adjustment disorder and anxiety disorder. Patient arrived on time. Patient saw a physical therapist yesterday. He has been having problems with his left ankle since April 2014. He wanted to get light limited duty. He found out after he got there that only his PCM can issue light limited duty. They did give him a brace to help immobilize the ankle. He is working on his list of serious dating potentials. So far he has decided he does not want kids and does want someone who is OK with he doing things he likes to do (like computer work for long periods of time). Focus on sleep problems - mainly getting to sleep. It takes him 1 - 2 hours to get to sleep each night. His mind is very active. He thinks about problems he wants to solve, etc. If he stops thinking about one problem, he starts thinking about another problem. This writer suggested he write down the problem so he can let it go for the night. He said he could then have to keep rereading what he wrote to make sure he got it right. During the next week, he is going to think about how to set things aside for the night without forgetting them and not getting them quite right when he starts thinking about them the next day.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009 Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10 Pain Severity 0 / 10.

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings. Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lot, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't tell him.

Do you feel like you are at risk for workplace violence? denied

PTSD CHECKLIST (PCL-C)

- ☐ Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?
- ☐ Repeated, disturbing dreams of a stressful experience from the past?
- ☐ Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?
- ☐ Feeling very upset when something reminded you of a stressful experience from the past?
- ☐ Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?
- ☐ Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?
- ☐ Avoid activities or situations because they remind you of a stressful experience from the past?
- ☐ Trouble remembering important parts of a stressful experience from the past?
- ☐ Loss of interest in things that you used to enjoy?
- ☐ Feeling distant or cut off from other people?
- ☐ Feeling emotionally numb or being unable to have loving feelings for those close to you?
- ☐ Feeling as if your future will somehow be cut short?
- ☐ Trouble falling or staying asleep?
- ☐ Feeling irritable or having angry outbursts?
- ☐ Having difficulty concentrating?
- ☐ Being 'super alert' or watchful on guard?
- ☐ Feeling jumpy or easily startled?

Add point values from each response. Total Score = 0 DATE: 8-4-14

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? ☐ Not difficult ☐ Somewhat difficult ☐ Very difficult ☐ Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? ☐ Yes ☐ No

If

'Yes

', how often? ☐ Several days ☐ More than half the days ☐ Almost everyday.

Depression Screening:

- ☐ 1. Little Interest or pleasure in doing things
 - ☐ 2. Feeling down depressed or hopeless
 - ☐ 3. Trouble sleeping or sleeping too much
 - ☐ 4. Feeling tired or little energy
 - ☐ 5. Poor appetite or overeating
 - ☐ 6. Feeling bad about self
 - ☐ 7. Trouble concentrating on things
 - ☐ 8. Moving or speaking slowly or being restless
 - ☐ 9. Thoughts that you would be better off dead
- Add point values from each response. Total (PHQ-9) Score = 7/27 on 8-4-14

Difficulty doing work, taking care of things at home, or getting along with other people? ☐ Not at all ☒ Somewhat ☐ Very ☐ Extremely.

Generalized Anxiety Disorder Screening:

- ☐ 1. Feeling nervous, anxious, or on edge
- ☐ 2. Not being able to stop or control worrying
- ☐ 3. Worrying too much about different things
- ☐ 4. Trouble relaxing
- ☐ 5. Being so restless that it's hard to sit still
- ☐ 6. Becoming easily annoyed or irritable

Therapy

- Duration of the encounter 60 min.

Practice Management

Continue assessment and intervention

Multi-Disciplinary Treatment Plan:

Treatment Team Members -

Individual Therapist: L Nilsen, LCSW-C

Date last updated: 9-11-14

Reviewed with patient on: 9-11-14

Does patient agree with plan? yes

If not, what part?

Projected date of next treatment plan update: 12-11-14

Discussion of assessment and intervention

Tx Plan cont~"d:

Diagnosis

I. 300.00 Anxiety D/O NOS

II. 799.9 deferred

III. none

IV. Limited support system, few friends

V. current GAF: 65

Active Problem List:

1. Anxiety
2. Relationship problems

Long-Term Goals:

1. Reduce overall frequency, intensity, and duration of the anxiety so that daily functioning is not impaired.
2. Develop the necessary skills for effective, open communication

Discussion of risk of assessment and intervention

Interventions Provided at this session:

supportive therapy

Objective 1 (Corresponds to Goal #1):

- The patient will learn, and by self-report, implement skills to reduce overall anxiety and manage anxiety symptoms.

Interventions:

1. Establish rapport with the client toward building a therapeutic alliance.

Objective 2 (Corresponds to Goal # 2):

- By self report, Increase the frequency of the direct expression of honest, respectful, and positive feelings and thoughts within relationships.

Interventions:

1. Help patient review any new relationships for possible problems.

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

° Behavior demonstrated no psychomotor agitation. ° No decreased eye-to-eye contact was observed.
 Mood: ° Euthymic. ° Not depressed. ° Not anxious.
 Affect: ° Normal. ° Not labile. ° Not flat. ° Not constricted. ° Showed no irritability.
 Thought Processes: ° Not impaired, they were linear, logical, and goal directed, they were linear, logical, and goal directed. ° Attention demonstrated no abnormalities.
 ° Attention span was not decreased.
 Thought Content: ° Insight was intact. ° No delusions. ° No suicidal ideation. ° No suicidal plans. ° No suicidal intent. ° No homicidal ideations. ° No homicidal plans.
 ° No homicidal intent.

Neurovegetative Assessment: • Dangerousness assessment: suicide risk Suicide Risk and Protective Factors Review:

Non-Modifiable:

- x Gender (risk factor if male):
- x H/O Suicide Attempts: age 17, bottle of asprin
- Organized Plan:
- Chronic Psychiatric Disorder:
- Recent Psychiatric Hospitalization:
- x H/O Abuse or Trauma:
- Chronic Physical Illness:
- x Family H/O Suicide/Attempts: both sisters have made attempts - he is surprised one is still alive
- Other Recent Loss:
- Chronic Pain:
- Age (risk factor if <25 or >60): age 29

Modifiable:

- Suicidal ideation/plans/intent:
- x Access to Lethal Means: gun in house
- Poor Treatment Compliance:
- Hopelessness:
- x Psychic Pain/Anxiety: anxiety
- Acute Event:
- Insomnia:
- Low Self-Worth:
- x Impulsivity:
- Substance Abuse:
- x Financial Stress: got into debt, working on it
- Legal Stress:

Protective:

- Strong Therapeutic Alliance:
- Positive Coping Skills:
- Responsible to/for Family:
- Responsible to/for Pet:
- Frustration Tolerance: likes to hid his feelings
- x Resilience:
- Good Reality Testing: can add details that are not true
- x Amenable to Treatment:
- Social Support: just his girl friend, no one to talk to
- Religious Beliefs Contrary to Suicide:

Risk of Harm to Others: denied

Action Taken Based on Risk Assessment:

- [x] Released without limitations. Advised of emergency procedures.
- [] SM released to Chain of Command with the following limitations:
- [] SM sent to ER for evaluation for admission to inpatient psychiatry
- [] Other: Suicide Risk and Protective Factors Review:

• Duration of the encounter 60 min.

Practice Management

Continue assessment and intervention

Multi-Disciplinary Treatment Plan:

Treatment Team Members -

Individual Therapist: L Nilsen, LCSW-C

Date last updated: 9-11-14

Reviewed with patient on: 9-11-14

Does patient agree with plan? yes

If not, what part?

Projected date of next treatment plan update: 12-11-14

Discussion of assessment and intervention

Tx Plan cont-"d:

Diagnosis

I. 300.00 Anxiety D/O NOS

II. 799.9 deferred

III. none

IV. Limited support system, few friends

V. current GAF: 65

Active Problem List:

1. Anxiety

2. Relationship problems

Long-Term Goals:

1. Reduce overall frequency, intensity, and duration of the anxiety so that daily functioning is not impaired.

2. Develop the necessary skills for effective, open communication

Discussion of risk of assessment and intervention

Interventions Provided at this session:

supportive therapy

Objective 1 (Corresponds to Goal #1):

- The patient will learn, and by self-report, implement skills to reduce overall anxiety and manage anxiety symptoms.

Interventions:

1. Establish rapport with the client toward building a therapeutic alliance.

Objective 2 (Corresponds to Goal #2):

- By self report, Increase the frequency of the direct expression of honest, respectful, and positive feelings and thoughts within relationships.

Interventions:

1. Help patient review any new relationships for possible problems.

Patient agrees to contact the clinic, call 911, or go to the nearest Emergency Department if symptoms worsen or if suicidal or homicidal thoughts develop.

Note Written by LAI, PHILOMENA C @ 24 Sep 2014 1547 EDT**Chief complaint**

The Chief Complaint is: L ankle sprain

Visit for: Re- Evaluation

(9/24/2014)

Subjective: Patient presents to clinic reporting continue L ankle pain since his return doing PT as he has been walking, running, jumping a lot, L ankle swelling resurface, now pain on L ankle even walking for long distance. Patient states he will be doing his PFT in 2 weeks but will not be able to do the running portion of PT.

(8/8/2014)

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED]

1985

SSN: ***-**-****

DoD ID: 1286180538

Created: 16 Aug 2017

Subjective: Patient reports he has no ankle pain with walking, he has done 2-mile walking, doing stairs with no pain, noticed bruising on L ankle and some swelling, L ankle looks slightly different from R, L ankle popping/cracking with movement and there is pain when that happens. Patient reports he has not tried running yet and he will be doing his PFT (1.5 m run) in Oct.

Objective: Observation: very mild swelling L ankle ROM: L ankle DF 10 deg, PF 45 deg, EV 15 deg, IV 35 deg Strength: L ankle 5/5 throughout. Flexibility: mod tightness hamstrings, mild/mod tightness calf

Assessment/Plan: Improved L ankle ROM with full strength, bilateral hamstrings and calf tightness continue. Patient was instructed on continue with ankle ROM, emphasized importance of daily stretching, proper running gait. Patient will gradual progress to jog/run on his own Follow up in 4 weeks to re-assess.

History of present illness: INITIAL EVALUATION (6/27/2014): Patient is a 29 y/o M referred to physical therapy for evaluation and treatment of L ankle sprain. Patient initially injured L ankle in April 2014 while he was sprinting during softball game when his L foot went into the hole. Since onset, symptoms have unchanged

Meds: reviewed in AHLTA.

Pain scale 72 hrs: current 0/10 best 0/10 worst 3/10

Description of pain: comes and goes

Aggravating factors: motion

Mitigating factors: rest, elevation, ice

Day pattern: episodic

Recent/previous treatment: none

Functional limitations: no running at this time, increased throbbing sensation after prolonged walking

Patient goals: to run again (patient used to run 5 miles per day 4-5 time per week).

Past medical/surgical history**Reported:**

Past medical history reviewed and discussed. Co-morbidities: none

Diagnostics: x-ray L ankle in AHLTA

Medical precautions: none

Job duties: desk primarily.

Objective

Observation: genu and tibial varus, normal calcaneus alignment, mild swelling L lateral malleolus area

palpation: TTP lateral L ankle anterior to lateral malleolus

flexibility: mod tightness hamstrings, calf

Joint Mobility: normal L ankle joint mobility

Sensation/Reflex: intact

ROM: ankle: DF L 15 deg R 13 deg, PF L 44 deg R 50 deg, IV L 35 deg R 35 deg, EV L 12 deg R 15 deg, 1st ray ext L 50 deg R 70 deg, flex L 12 deg R 30 deg

Strength: DF - 5/5 bil, PF 5/5 bil, IV L 5/5 R 5/5, EV L 5/5 R 5/5

Special Tests: thompson - neg, talar tilt - neg, ant/post drawer

function: gait - no significant deviations, SLS EO - L/R = 30 sec, good ankle stability bil, SLHR L 25/25 R 25/25, no instability noted but fatigue quickly L with pain

Tests

Re-evaluation (9/24/2014): Patient with recurrent ankle pain, most likely repeated strain from excessive impact activities .

Recommend patient hold off from jumping, squatting and running activities at this time to allow sufficient time for healing. Patient will need to continue strengthening and stretching program. Provided prescription for ankle brace to provide support.

Assessment (6/27/2014): Patient presented with decreased L ankle ROM s/p ankle sprain, mild weakness of ankle IV and EV with no instability. Patient would benefit from physical therapy home based ex program to improve ROM and strength.

Rehab prognosis: good

Physical Therapy goals:

STG to be achieved in 3 weeks

Patient to be independent with HEP- met

Patient to increase ROM to: L ankle DF 10 deg, PF 40 deg, IV 35 deg EV 10 deg - met

LTG to be achieved in 6-8 weeks

Decrease pain to: 0/10

Increase MMT to: 5/5 - met

Improve function to: tolerate long distance walking without increased in symptoms
running 1 mile 50% pace with no increased in symptoms

Patient education: Patient educated on his/her condition in reference to pertinent anatomy and biomechanics using anatomical models and illustrations, self care, physical therapy and POC.

HEP instructions and performance (8/8/2014): stretch - hamstrings, calf, joint mobilization for DF/PF, ROM, alphabets

Plan of Care: Continue HEP for stretching and strengthening. Follow up in 5-6 weeks for re-evaluation.

S/O Note Written by NILSEN, LINDA M @ 25 Sep 2014 0930 EDT**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

9-18-14: Follow-up appointment for patient being seen for adjustment disorder and anxiety disorder. Focus on relationships. He has turned match.com back on. He did this before his girlfriend moved out. Realized he should have talked to her about ending their relationship first. Pt stated he has had numerous sexual encounters. He needs to slow down how quickly he gets very involved in a relationship. Patient is going to work on making a list of the top 10 things he wants in a potential partner.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009 Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10 Pain Severity 0 / 10.

Current medication

See ALTHA, per patient, none

Past medical/surgical history**Reported:**

Medical: Reported medical history

See ALTHA

and psychiatric history

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing

Personal history

Social history Born and raised in Riverside, CAL. Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings.

Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't

want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient

's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lot, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't

want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't

want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't

tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more 20 oz a day of coffee - sometimes more. Tobacco use current smoker Used to smoke hooka when overseas - Amt per Day: Used to smoke hooka when overseas - Amt per Day:

Alcohol: Alcohol use Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down.

Are you having any thoughts about harming another person? denied

Do you feel like you are at risk for workplace violence? denied

PTSD CHECKLIST (PCL-C)

- ☐ Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?
☐ Repeated, disturbing dreams of a stressful experience from the past?
☐ Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?
☐ Feeling very upset when something reminded you of a stressful experience from the past?
☐ Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?
☐ Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?
☐ Avoid activities or situations because they remind you of a stressful experience from the past?
☐ Trouble remembering important parts of a stressful experience from the past?
☐ Loss of interest in things that you used to enjoy?
☐ Feeling distant or cut off from other people?
☐ Feeling emotionally numb or being unable to have loving feelings for those close to you?
☐ Feeling as if your future will somehow be cut short?
☐ Trouble falling or staying asleep?
☐ Feeling irritable or having angry outbursts?
☐ Having difficulty concentrating?
☐ Being
'super alert
' or watchful on guard?
☐ Feeling jumpy or easily startled?

Add point values from each response. Total Score = 0 DATE: 8-4-14

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? ☐ Not difficult ☐ Somewhat difficult ☐ Very difficult ☐ Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? ☐ Yes ☐ No

No

If

'Yes

, how often? ☐ Several days ☐ More than half the days ☐ Almost everyday.

Depression Screening:

- ☐ 1. Little Interest or pleasure in doing things
☐ 2. Feeling down depressed or hopeless
☐ 3. Trouble sleeping or sleeping too much
☐ 4. Feeling tired or little energy
☐ 5. Poor appetite or overeating
☐ 6. Feeling bad about self
☐ 7. Trouble concentrating on things
☐ 8. Moving or speaking slowly or being restless
☐ 9. Thoughts that you would be better off dead

Add point values from each response. Total (PHQ-9) Score = 7/27 on 8-4-14

Difficulty doing work, taking care of things at home, or getting along with other people? ☐ Not at all ☒ Somewhat ☐ Very ☐ Extremely.

Generalized Anxiety Disorder Screening:

- ☐ 1. Feeling nervous, anxious, or on edge
☐ 2. Not being able to stop or control worrying
☐ 3. Worrying too much about different things
☐ 4. Trouble relaxing
☐ 5. Being so restless that it
's hard to sit still
☐ 6. Becoming easily annoyed or irritable
☐ 7. Feeling afraid as if something awful might happen

Add point values from each response. Total (GAD-7) Score = 12/27 on 8-4-14

It is very difficult for him to do his work, take care of things at home, or get along with other people

Difficulty doing work, taking care of things at home, or getting along with other people? ☐ Not at all ☐ Somewhat ☐ Very ☐ Extremely.

S/O Note Written by NILSEN, LINDA M @ 25 Sep 2014 0909 EDT**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

9-11-14: Follow-up appointment for patient being seen for adjustment disorder and anxiety disorder. Patient trying to decide whether to reenlist or not. He thinks he might be better off owning his own business. If he stays in the military and he advances, he will end up supervising more which he does not like as much. He is more than qualified for his job now. He gets bored easily. His girlfriend moved out. She had been talking to her X. She is not as neat as the SM, he likes to have everything clean again.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009 Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10 Pain Severity 0 / 10.

Current medication

See ALTHA, per patient, none

Past medical/surgical history**Reported:**

Medical: Reported medical history

and psychiatric history

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings.

Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't

want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient

's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lot, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't

want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't

want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent

the rest of the time hiding her drinking. She also was taking anti-depressants and didn't

tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more 20 oz a day of coffee - sometimes more. Tobacco use current smoker. Used to smoke hooka when overseas - Amt per Day: Used to smoke hooka when overseas - Amt per Day:

Alcohol: Alcohol use Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down.

Are you having any thoughts about harming another person? denied

Do you feel like you are at risk for workplace violence? denied

Additional Screening Questions:

Are you having any thoughts about harming another person? denied

Do you feel like you are at risk for workplace violence? denied

PTSD CHECKLIST (PCL-C)

- ☐ Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?
- ☐ Repeated, disturbing dreams of a stressful experience from the past?
- ☐ Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?
- ☐ Feeling very upset when something reminded you of a stressful experience from the past?
- ☐ Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?
- ☐ Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?
- ☐ Avoid activities or situations because they remind you of a stressful experience from the past?
- ☐ Trouble remembering important parts of a stressful experience from the past?
- ☐ Loss of interest in things that you used to enjoy?
- ☐ Feeling distant or cut off from other people?
- ☐ Feeling emotionally numb or being unable to have loving feelings for those close to you?
- ☐ Feeling as if your future will somehow be cut short?
- ☐ Trouble falling or staying asleep?
- ☐ Feeling irritable or having angry outbursts?
- ☐ Having difficulty concentrating?
- ☐ Being
'super alert
' or watchful on guard?
- ☐ Feeling jumpy or easily startled?

Add point values from each response. Total Score = 0 DATE: 8-4-14

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? ☐ Not difficult ☐ Somewhat difficult ☐ Very difficult ☐ Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? ☐ Yes ☐ No

If

'Yes

, how often? ☐ Several days ☐ More than half the days ☐ Almost everyday.

Depression Screening:

- ☐ 1. Little Interest or pleasure in doing things
- ☐ 2. Feeling down depressed or hopeless
- ☐ 3. Trouble sleeping or sleeping too much
- ☐ 4. Feeling tired or little energy
- ☐ 5. Poor appetite or overeating
- ☐ 6. Feeling bad about self
- ☐ 7. Trouble concentrating on things
- ☐ 8. Moving or speaking slowly or being restless
- ☐ 9. Thoughts that you would be better off dead

Add point values from each response. Total (PHQ-9) Score = 7/27 on 8-4-14

Difficulty doing work, taking care of things at home, or getting along with other people? ☐ Not at all ☒ Somewhat ☐ Very ☐ Extremely.

Generalized Anxiety Disorder Screening:

- ☐ 1. Feeling nervous, anxious, or on edge
- ☐ 2. Not being able to stop or control worrying
- ☐ 3. Worrying too much about different things
- ☐ 4. Trouble relaxing
- ☐ 5. Being so restless that it's hard to sit still
- ☐ 6. Becoming easily annoyed or irritable
- ☐ 7. Feeling afraid as if something awful might happen

Add point values from each response. Total (GAD-7) Score = 12/27 on 8-4-14

It is very difficult for him to do his work, take care of things at home, or get along with other people

S/O Note Written by LAI, PHILOMENA C. @ 08 Aug 2014 0735 EDT**Chief complaint**

The Chief Complaint is: L ankle sprain

Visit for: Re- Evaluation

Subjective: Patient reports he has no ankle pain with walking, he has done 2-mile walking, doing stairs with no pain, noticed bruising on L ankle and some swelling, L ankle looks slightly different from R, L ankle popping/cracking with movement and there is pain when that happens. Patient reports he has not tried running yet and he will be doing his PFT (1.5 m run) in Oct.

Objective: Observation: very mild swelling L ankle ROM: L ankle DF 10 deg, PF 45 deg, EV 15 deg, IV 35 deg Strength: L ankle 5/5 throughout. Flexibility: mod tightness hamstrings, mild/mod tightness calf

Assessment/Plan: Improved L ankle ROM with full strength, bilateral hamstrings and calf tightness continue. Patient was instructed on continue with ankle ROM, emphasized importance of daily stretching, proper running gait. Patient will gradual progress to jog/run on his own Follow up in 4 weeks to re-assess.

History of present illness: INITIAL EVALUATION (6/27/2014): Patient is a 29 y/o M referred to physical therapy for evaluation and treatment of L ankle sprain. Patient initially injured L ankle in April 2014 while he was sprinting during softball game when his L foot went into the hole. Since onset, symptoms have unchanged

Meds: reviewed in AHLTA.

Pain scale 72 hrs: current 0/10

best 0/10 worst 3/10

Description of pain: comes and goes

Merwin, Daniel Dennis

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

Aggravating factors: motion

Mitigating factors: rest, elevation, ice

Day pattern: episodic

Recent/previous treatment: none

Functional limitations: no running at this time, increased throbbing sensation after prolonged walking

Patient goals: to run again (patient used to run 5 miles per day 4-5 time per week).

Past medical/surgical history**Reported:**

Past medical history reviewed and discussed. Co-morbidities: none

Diagnostics: x-ray L ankle in AHLTA

Medical precautions: none

Job duties: desk primarily.

Objective

Observation: genu and tibial varus, normal calcaneus alignment

palpation: no TTP

flexibility: mod tightness hamstrings, calf

Joint Mobility: decreased L TC ant/post mob, STJ med/lat mob

Sensation/Reflex: intact

ROM: ankle: DF L 3 deg R 13 deg, PF L 28 deg R 50 deg, IV L 24 deg R 35 deg, EV L 6 deg R 15 deg, 1st ray ext L 56 deg R 70 deg, flex L 25 deg R 30 deg

Strength: DF - 5/5 bil, PF 5/5 bil, IV L 4+/5 R 5-/5, EV L 4+/5 R 5/5

Special Tests: thompson - neg, talar tilt - neg, ant/post drawer - neg

function: gait - no significant deviations, SLS EO - L/R = 30 sec, good ankle stability bil, SLHR L 25/25 R 25/25, no instability noted.

Tests

Assessment (6/27/2014): Patient presented with decreased L ankle ROM s/p ankle sprain, mild weakness of ankle IV and EV with no instability. Patient would benefit from physical therapy home based ex program to improve ROM and strength.

Rehab prognosis: good

Physical Therapy goals:

STG to be achieved in 3 weeks

Patient to be independent with HEP

Patient to increase ROM to: L ankle DF 10 deg, PF 40 deg, IV 35 deg EV 10 deg

LTG to be achieved in 6-8 weeks

Decrease pain to: 0/10

Increase MMT to: 5/5

Improve function to: tolerate long distance walking without increased in symptoms
running 1 mile 50% pace with no increased in symptoms

Patient education: Patient educated on his/her condition in reference to pertinent anatomy and biomechanics using anatomical models and illustrations, self care, physical therapy and POC.

HEP instructions and performance (15 min): stretch - hamstrings, calf, joint mobilization for DF/PF, ROM, alphabets

Plan of Care: Patient has consented to physical therapy treatment. Patient to perform HEP indep. Follow up in 6 weeks..

S/O Note Written by NILSEN, LINDA M @ 04 Aug 2014 1525 EDT**History of present illness**

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient "picks" at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Insomnia Severity Index: 8/28 Patient has a hard time getting to sleep, at times it takes 2 hrs. He wakes up during the night when he has something on his mind. If he listens to rain and storms it helps him sleep better.

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10.

Merwin, Daniel Dennis

Current medication

See ALTHA, per patient, none

Past medical/surgical history**Reported:**

Medical: Reported medical history

See ALTHA

and psychiatric history

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing.

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings.

Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lot, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more. Current smoker Used to smoke hooka when overseas - Amt per Day:

Alcohol: Alcohol use Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down.

Subjective

Generalized Anxiety Disorder Screening:

- [3] 1. Feeling nervous, anxious, or on edge
 [1] 2. Not being able to stop or control worrying
 [2] 3. Worrying too much about different things
 [2] 4. Trouble relaxing
 [1] 5. Being so restless that it's hard to sit still
 [3] 6. Becoming easily annoyed or irritable
 [0] 7. Feeling afraid as if something awful might happen

Add point values from each response. Total (GAD-7) Score = 12/27 on 8-4-14

It is very difficult for him to do his work, take care of things at home, or get along with other people

Difficulty doing work, taking care of things at home, or getting along with other people? [] Not at all [] Somewhat [] Very [] Extremely.

PTSD CHECKLIST (PCL-C)

- [] Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?
 [] Repeated, disturbing dreams of a stressful experience from the past?
 [] Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?
 [] Feeling very upset when something reminded you of a stressful experience from the past?

[] Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?

[] Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?

[] Avoid activities or situations because they remind you of a stressful experience from the past?

[] Trouble remembering important parts of a stressful experience from the past?

[] Loss of interest in things that you used to enjoy?

[] Feeling distant or cut off from other people?

[] Feeling emotionally numb or being unable to have loving feelings for those close to you?

[] Feeling as if your future will somehow be cut short?

[] Trouble falling or staying asleep?

[] Feeling irritable or having angry outbursts?

[] Having difficulty concentrating?

[] Being

'super alert

'or watchful on guard?

[] Feeling jumpy or easily startled?

Add point values from each response. Total Score = 0 DATE: 8-4-14

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? [] Not difficult [] Somewhat difficult [] Very difficult [] Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? [] Yes [] No

If

'Yes

', how often? [] Several days [] More than half the days [] Almost everyday.

Depression Screening:

[1] 1. Little Interest or pleasure in doing things

[0] 2. Feeling down depressed or hopeless

[2] 3. Trouble sleeping or sleeping too much

[0] 4. Feeling tired or little energy

[0] 5. Poor appetite or overeating

[1] 6. Feeling bad about self

[1] 7. Trouble concentrating on things

[2] 8. Moving or speaking slowly or being restless

[1] 9. Thoughts that you would be better off dead

Add point values from each response. Total (PHQ-9) Score = 7/27 on 8-4-14

Difficulty doing work, taking care of things at home, or getting along with other people? [] Not at all [x] Somewhat [] Very [] Extremely.

Additional Screening Questions:

Are you having any thoughts about harming another person? denied

Do you feel like you are at risk for workplace violence? denied

Physical findings**General Appearance:**

° Alert. ° Well developed. ° Well nourished. ° In no acute distress.

Neurological:

° No disorientation was observed, oriented x3. ° No hallucinations. ° Memory was unimpaired. ° Remote memory was not impaired. ° Recent memory was not impaired. ° Judgement was not impaired.

Speech: ° Normal, regular rate, non-pressured. ° Rate was not slowed. ° Not pressured. ° Tone was not a monotone.

Psychiatric:

Demonstrated Behavior: ° Behavior demonstrated no abnormalities - appropriate and cooperative. ° No psychomotor retardation. ° Behavior demonstrated no psychomotor agitation. ° No decreased eye-to-eye contact was observed.

Mood: ° Euthymic. ° Not depressed. ° Not anxious.

Affect: ° Normal. ° Not labile. ° Not flat. ° Not constricted. ° Showed no irritability.

Thought Processes: ° Not impaired, they were linear, logical, and goal directed. ° Attention demonstrated no abnormalities. ° Attention span was not decreased.

Thought Content: ° Insight was intact. ° No delusions. ° No suicidal ideation. ° No suicidal plans. ° No suicidal intent. ° No homicidal ideations. ° No homicidal plans. ° No homicidal intent.

Neurovegetative Assessment: • Dangerousness assessment: suicide risk Suicide Risk and Protective Factors Review:

Non-Modifiable:

x Gender (risk factor if male):

x H/O Suicide Attempts: age 17, bottle of aspirin

History of present illness

The Patient is a 29 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

INITIAL ASSESSMENT 8-4-14: 29 year old SWM Navy, E-6, with 9 years TIS, 2 years at NIOC at Ft Meade. 2 years to go, not sure if he wants to stay in - will have to stay in or some time due to braces on teeth. Self referral. Patient believes that his family of origin is impacting on how he relates to others now that he is an adult. During the past month, he has experienced the following symptoms: anxiety or worries and difficulty concentrating. Patient 'picks' at his scalp. Has several dry patches where he has scraped/picked the hair out in circles. He has been doing this since 2009. He thinks it is a combination of dry skin and his picking at the scalp.

Nutrition: tries to eat healthy, goes out 1 X a week, has some family issues - father is large, has diabetes - does not want to turn out like him

Abuse: Father was physically abusive of sisters more so than with him. Dad also shaved patient's head when he was 17 because he thought Sm's hair was too long. Patient was allergic to animals, Father kept cats and dogs. SM used emergency inhaler 3 or 4 X a day.

Goals he would like to deal with: 1.) anxiety, 2.) past issues - family abuse (verbal, physical), 3.) new way of handling issues - rather than ignore them.

Visit is deployment-related Stress got to him while in Japan and stationed on ship 3/2006 - 4/2009.

Pain Severity 0 / 10.

Current medication

See ALTHA

Past medical/surgical history**Reported:**

Medical: Reported medical history

See ALTHA

and psychiatric history

* THERAPY: Fleet and Family Aug 2012 for 4 or 5 months

* MEDS: none

* INPATIENT/RESIDENTIAL CARE: denied

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: in H/S, swallowed a whole bottle of aspirin - felt sick, never told anyone

* FPMH: sister is bi-polar, other sister depressed. Mom and grandmother are bi-polar. Father is obese, diabetic, alcoholic? - drinks every other or every night - has not seen him since 2009 so is not sure how he is doing.

Personal history

Social history Born and raised in Riverside, CAL, Dad was in military for 2 years. SM is 29, sisters are 27 and 26. All full siblings. Parents divorced when he was 2 or 3. Dad got full custody immediately. He didn't want mother to ever see them.

Mother left bruises on his sister. Lost full custody. Dad was really more abusive. Age 8, got step-mother, they were together for 10 years. Step-mother later told patient that she stayed with their father for their sakes as long as she could. Before their divorce, father started seeing his next wife. Brought her to patient's track events. Dad got divorced from her about 1 yr ago. SM lived in Cal until 14.

EDUCATION/MILITARY: H/S in NJ. Really awful, started Freshman yr at one school, then they moved again during that yr. He lost most of his credits that yr. Got along at school because he was a runner. 2.2 GPA, no scholarships. Worked during the school yr and summers. Rented a room from his step-mom (told his dad he was going away to school). Lived with her for 2 yrs and went to college for 1 semester. Drinking lot, dating crazies, decided to join the military. Planned on making a career of the military, not sure now. Doesn't want to move anymore.

ADULT RELATIONSHIPS: never married, no children. Last relationship - Kristina, age 29. They have been together 6 months, living together 4 months. Her lease was up so they moved in together. He thinks he wants to break up with her. She doesn't want to talk about anything. The relationship before this one lasted 2 years. The first 6 months were good. The rest of the time was rocky. They started out as house mates. She had drinking problems. He tried to help by not drinking either. She spent the rest of the time hiding her drinking. She also was taking anti-depressants and didn't tell him.

SPIRITUAL: none

Behavioral: Caffeine use 20 oz a day of coffee - sometimes more. Current smoker Used to smoke hooka when overseas - Amt per Day:

Alcohol: Alcohol use Liquor - 1-3 drinks, 1 or 2 X a week if liquor in fridge, 6 or more drinks one time or less a month, trying to cut down.

Subjective

Additional Screening Questions:

Are you having any thoughts about harming another person? denied

Do you feel like you are at risk for workplace violence? denied

Physical findings**General Appearance:**

* Alert. * Well developed. * Well nourished. * In no acute distress.

Neurological:

* No disorientation was observed, oriented x3. * No hallucinations. * Memory was unimpaired. * Remote memory was not impaired. * Recent memory was not impaired. * Judgement was not impaired.

Speech: * Normal, regular rate, non-pressured. * Rate was not slowed. * Not pressured. * Tone was not a monotone.

Psychiatric:

Demonstrated Behavior: * Behavior demonstrated no abnormalities - appropriate and cooperative. * No psychomotor retardation. * Behavior demonstrated no psychomotor agitation. * No decreased eye-to-eye contact was observed.

Mood: * Euthymic. * Not depressed. * Not anxious.

Affect: * Normal. * Not labile. * Not flat. * Not constricted. * Showed no irritability.

Thought Processes: * Not impaired, they were linear, logical, and goal directed. * Attention demonstrated no abnormalities. * Attention span was not decreased.

Thought Content: * Insight was intact. * No delusions. * No suicidal ideation. * No suicidal plans. * No suicidal intent. * No homicidal ideations. * No homicidal plans.

* No homicidal intent.

Neurovegetative Assessment: * Dangerousness assessment: suicide risk Suicide Risk and Protective Factors Review:

S/O Note Written by YORK,CARLA M. @ 27 Jun 2014 1007 EDT**Chief complaint**

The Chief Complaint is: Anxiety.

Referred here

By PCM, Thomas S. Clark, FNP.

History of present illness

The Patient is a 29 year old male.

This is the patient's second visit to the IBHC clinic.

Source of information was self.

Feedback was provided to the PCM.

- Pt was given IBHC brochure describing the behavioral health program. Discussed with patient model of service to include the limits of confidentiality (i.e. abuse reporting, suicide intervention, etc.) and short-term intervention focused approach

- Pt indicated understanding.

Patient was seen for 30 minute IBHC appointment.

Previous history of visit is not deployment-related. No decrease in concentrating ability.

Pain Severity 0 / 10.

<<Note accomplished in TSWF-IBHC Anxiety tab>>

Progress and barriers in adhering to behavior change plan: work-related stress, on a 30 day assignment to 'fix

' a systems problem; feels that his symptoms have been evident since he was a child and therefore not likely to change with brief intervention

Changes in symptoms and/or functioning: reports some improvement in mood, anxious thoughts; however, that he continues to constantly think about getting tasks done, believes it traces back to his childhood and father's authoritarian parenting style

....

Anxiety Intervention:

[] Trained in relaxation strategies

[x] Trained in improving communication skills

[x] Discussed potential treatments for anxiety (i.e. PE, CPT, CBT)

[x] Discussed various factors related to the development and maintenance of anxiety (including biological, cognitive, behavioral, and environmental factors).

[] Developed Crisis Response plan.

[x] Trained in strategies for increasing balanced thinking.

S/O Note Written by O'SULLIVAN, ROBIN R @ 16 Jun 2014 1505 EDT**Chief complaint**

The Chief Complaint is: Anxiety.

Referred here

By PCM, Thomas S. Clark, FNP.

History of present illness

The Patient is a 29 year old male.

This is the initial visit to the IBHC clinic.

Source of information was self.

Feedback was provided to the PCM.

- Pt was given IBHC brochure describing the behavioral health program. Discussed with patient model of service to include the limits of confidentiality (i.e. abuse reporting, suicide intervention, etc.) and short-term intervention focused approach

- Pt indicated understanding.

Patient was seen for 30 minute IBHC appointment.

Normal appetite.

Sleep disturbances.

Previous history of visit is not deployment-related. No decrease in concentrating ability.

Pain Severity 3 / 10 (dental and ankle).

<<Note accomplished in TSWF-IBHC Anxiety tab>>

Description of Symptoms:

Anxiety symptoms include irritable bowel, anxious mood, biting nails, picking hair, attentional difficulties, irritable, insomnia. No issue with sleep onset, but difficulty with sleep maintenance (averaging 5 - 8 hours in bed, but awake much of that time; Pt estimated 3 - 4 hrs sleeping).

Duration of Problem:

Since age 14 has experienced most of symptoms of anxiety listed above, with exception of hair difficulty (began August 2011).

Factors correlated with onset: Pt described difficult childhood and home environment (father alcoholic & harsh disciplinarian, mother bipolar). More recently, Pt spent 850 days at sea over 3 years & had mersa 3xs during this, contributing to scalp/hair picking. Currently, Pt was selected for new job which is high stress, with increased responsibility, leadership and management duties (would prefer to do computer work in isolation). Pt is considering separation (eligible in 2 years) due to dissatisfaction with Navy, but anxious about alternative future options;

Frequency of symptoms: daily and pervasive throughout the day.

Severity of symptoms: Very difficult - able to perform well at work but is uncomfortable by feeling anxious and inability to relax.

Course of problem: slightly worse lately, which Pt attributed to recent dispute with girlfriend and increasing work-related stress.

Psychosocial factors: Stress from work enhances a preexisting anxious tendency; Pt described his relationship with his girlfriend as conflict avoidant and desires it to have more honest communication.

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

Aggravating factors: over-planning, anxious ruminating thoughts; obsessively planning procedures to optimize efficiency; rigid with cleaning at home.

Alleviating factors: Drinking coffee is reported to be helpful; Reading technical material and computer programming; alone time and spending time with his girlfriend.

Current tx: Pt stated has he has avoided seeking help for fear of impacting career.

Past tx: Pt received therapy for about 18 months at Ft Meade and found this helpful.

Functional impact: Pt stated it is hard to enjoy free time and is constantly stressed at work.

....
Anxiety Intervention:

[] Trained in relaxation strategies

[x] Trained in improving communication skills

[x] Discussed potential treatments for anxiety (i.e. PE, CPT, CBT)

[x] Discussed various factors related to the development and maintenance of anxiety (including biological, cognitive, behavioral, and environmental factors).

[] Developed Crisis Response plan.

[x] Trained in strategies for increasing balanced thinking.

[] Other:

Personal history

Behavioral: Caffeine use 2 - 4 cups / coffee daily, rare energy drinks. No tobacco use in the last 10 years.

Alcohol: Alcohol use 2-3 drinks / week.

Review of systems

Systemic: Not feeling tired (fatigue).

Neurological: No disorientation.

Psychological: Normal enjoyment of activities, a desire to continue living, not thinking about suicide, not having a suicide plan, and no stated intent to commit suicide. No homicidal thoughts, not thinking of a way to do it, and without a stated intent to kill. No frequent thoughts of death / morbid ideation and no impulsive behavior.

Physical findings**General Appearance:**

° Alert. ° Well developed. ° Well nourished. ° In no acute distress.

Neurological:

° No disorientation was observed - oriented to place, person, time, and situation. ° No hallucinations. ° Memory was unimpaired. ° Remote memory was not impaired. ° Recent memory was not impaired. ° Judgement was not impaired.

Speech: ° Normal - regular rate, non-pressured. ° Rate was normal. ° Rate was not slowed. ° Not pressured. ° Tone was not a monotone. ° Volume was normal. ° No articulation abnormalities. ° No language abnormalities were demonstrated.

Psychiatric:

Demonstrated Behavior: ° No decreased eye-to-eye contact was observed.

Attitude: ° Cooperative.

Mood: ° Anxious. ° Euthymic. ° Not depressed.

Affect: ° Normal. ° Not labile. ° Not flat. ° Not constricted. ° Showed no irritability. ° Congruent with the mood.

Thought Processes: ° Not impaired - they were linear, logical, and goal directed. ° Evaluation of connectedness showed no deficiency. ° Attention demonstrated no abnormalities. ° Attention span was not decreased.

Thought Content: ° Insight was intact. ° No delusions.

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

The patient completed the DUKE Health Profile, a 17-item measure of health-related quality of life. On this measure, scores range from 0 to 100, with higher scores indicating better health status.

Mental Health score was 2 standard deviations or more below the mean indicating a lower score than about 98% of others of similar age and gender.

Social Health score was 2 standard deviations or more below the mean indicating a lower score than about 98% of others of similar age and gender.

General Health score was 2 standard deviations or more below the mean indicating a lower score than about 98% of others of similar age and gender.

• DEPRESSION SCREENING / MONITORING (PHQ-9)

- [0] Little Interest or pleasure in doing things
 [1] Feeling down depressed or hopeless
 [2] Trouble sleeping or sleeping too much
 [0] Feeling tired or little energy
 [0] Poor appetite or overeating
 [0] Feeling bad about self
 [0] Trouble concentrating on things
 [2] Moving or speaking slowly or being restless (circled fidgety & restless)
 [0] Thoughts that you would be better off dead

Add point values from each response and document in the box below.

Difficulty doing work, taking care of things at home, or getting along with other people?

[] Not at all [x] Somewhat [] Very [] Extremely

Thoughts that you would be better off dead: [] Yes [x] No

....

Generalized Anxiety Disorder Screening:

- [3] 1. Feeling nervous, anxious, or on edge

Counseling/Education

Anxiety Recommendations for patient:

1. Follow-up with individual psychotherapy and psychiatric consultation at Outpatient Adult Behavioral Health at WRNMMC.
2. Diaphragmatic breathing (3 x / day, 10 - 20 breathes)
3. Read handouts on anxiety, disputing cognitive distortions, and relaxation.
4. Read handout on sleep and download CBT-i Coach app.

Anxiety Recommendations for PCM Team: Support Pt in implementing above recommendations

....

A/P Last updated by JARRETT,ERICA M @ 20 Jun 2014 1414 EDT

1. GENERALIZED ANXIETY DISORDER: Pt was seen for a 30 minute initial consultation to address symptoms of anxiety. Pt meets diagnostic criteria for Generalized Anxiety Disorder: (inability to control excessive worry with restlessness, fatigue, difficulty concentrating, irritability, and sleep disturbance more days than not for longer than the past 6 months). Pt recalls times in his past that he self-isolated and avoided social encounters due to anxiety and feels his chronic worry negatively impacts his functioning. Pt is in the preparation stage of change in managing his anxiety, to include attending initial consultation with psychiatric and behavioral health providers for further treatment. In the meantime, Pt received education on relaxation techniques and agreed to implement the following interventions:

1. Follow-up with individual psychotherapy and psychiatric consultation at Outpatient Adult Behavioral Health at WRNMMC.
2. Diaphragmatic breathing (3 x / day, 10 - 20 breathes)
3. Read handouts on anxiety, disputing cognitive distortions, and relaxation.
4. Read handout on sleep and download CBT-i Coach app.
5. Follow up in two weeks with IBHC (Dr. York, 27 June 2014, 10:00 a.m.)

2. NEUROTIC EXCORIATION: Per DSM-V, excoriation disorder is a separate diagnosis. Pt routinely picks his skin on the back of his scalp and has created a bald spot larger than the size of a quarter. Pt reported this behavior initially began with Folliculitis a few years ago, but has persisted and occurs whenever he feels anxious.

Disposition Last Updated by JARRETT,ERICA M @ 20 Jun 2014 1415 EDT

Released w/o Limitations

Follow up: as needed in 2 week(s) with PCM and/or in the HEALTH PROMOTION CL BE clinic or sooner if there are problems. - Comments: Follow up scheduled for 27 June 2014 at 1000 with Dr. York.

Discussed: Diagnosis, Medication(s)/Treatment(s) with Patient who indicated understanding.

30 minutes face-to-face/floor time. >50% of appointment time spent counseling and/or coordinating care.

SO Note Written by DOUGHERTY, DIANA L @ 04 Jun 2014 0855 EDT**Chief complaint**

The Chief Complaint is: L ankle swelling.

History of present illness

The Patient is a 29 year old male.

<<Note accomplished in TSWF-CORE>>

Pt is 24 yo AD navy who presents with c/o L ankle swelling/pain that has persisted since injury 15 April 2014. He reports that while playing softball, he sustained injury that involved forward force of the foot into a hole while playing softball. At that time, he was evaluated in the ER, found to have no e/o fracture on XR, and given a brace and crutches. He used the brace for approx 2 weeks, and the crutches for approx 4 at which point he was able to bear weight with minimal pain. Repeat XR obtained by his PCM in early May continued to demonstrate no e/o fracture.

Today, he presents because of ongoing aching pain at the ankle joint and forefoot, associated with swelling localized to the ankle. He denies sharp pain or point tenderness, and is able to bear weight. However ROM is limited, and pain exacerbated particularly with dorsiflexion. He has been unable to obtain a timely appointment with his primary provider, and needs exemption from PT.

No localized joint pain and no localized joint swelling. No sensory disturbances.

Current medication

Ibuprofen prn

Past medical/surgical history**Reported:**

Medical: Reported medical history
 reviewed, noncontributory.

Review of systems**Musculoskeletal:** No knee symptoms.**Physical findings****Vital Signs:**

Amended Report Text:

History:

Running and stepped in hole c/o left ankle/foot pain and swelling. R/o fx

Technique:

Frontal, oblique, and lateral radiographs of the left foot and ankle

Comparison: None available

Findings:

No acute fracture or dislocation. Osseous alignment and mineralization is normal. Joint spaces are preserved. The ankle mortise and talar dome are intact. A small developing plantar calcaneal spur is identified. No significant degenerative or erosive changes are seen. There is mild soft tissue edema overlying the lateral malleolus.

Impression:

Mild soft tissue edema overlying the lateral malleolus without evidence of acute osseous abnormality. _____

10. Risk Score Item #19 of PCL or click Not Administered.: Not Administered PCL
11. MEDCOM 774 Results: **SELECT ALL THAT APPLY-----IF NEGATIVE FOR BOTH -----STOP/DONE unless otherwise indicated. (CLICK DONE AND AUTOCITE): Negative for Both;**

SO Note Written by SLOAN,DAWN M @ 11 Aug 2013 2245 EDT**Chief complaint**

The Chief Complaint is: High Risk Medical Screening.

History of present illness

The Patient is a 28 year old male.

<<Note accomplished in TSWF-CORE>>

28yo Male presented for TIO High risk medical screening. Has form for review.

Does have hx of asthma as child, last episode in 2005 requiring albuterol. No episodes despite exposure to cats and dogs since, which were his trigger in the past. Notes hospitalization for 'bowel obstruction' last Oct with neg colonoscopy. No abdominal issues since stopping coffee and watching dairy.

Medication list reviewed, reconciled and list given to patient.

Currently on active duty. Visit is not deployment-related.

Good general overall feeling.

Pain assessment: denies.

Pain Severity 0 / 10.

PHQ-2 Depression Screen Negative.

Patient feels safe at home.

Patient has NOT had specialty care, ER visit, or hospitalization since last visit.

Allergies

Current Allergies: Cats updated 7 Aug 2013.

The Chief Complaint is: NAVY PHA.

History of present illness

The Patient is a 28 year old male.

A PHA has been completed in past year. Date: 10 APR 2013.

In the Navy and currently on active duty. Visit is not deployment-related.

Good general overall feeling.

Pain Severity 0 / 10.

Patient feels safe at home.

Patient has NOT had specialty care, ER visit, or hospitalization since last visit.

Allergies

Current Allergies: NKDA.

Current medication

NO CURRENT MEDS.

Past medical/surgical history**Reported:**

Medical: Reported medical history Asthma

Dyspnea

Skin neoplasm of uncertain behavior

Rosacea

Lattice peripheral retinal degeneration

Myopia

Allergic rhinitis

Exposure to venereal disease

Personal history

Behavioral: No tobacco use in the last 10 years.

Alcohol: Alcohol use AUDIT-C Date: 11/05/2012.

History

SO Note Written by COPSEY, HELEN C @ 24 Oct 2012 0936 EST**Reason for Visit**

Visit for: R/O of IBD.

History of present illness

The Patient is a 27 year old male.

This is a WM, AD PO2, who presents for R/O of IBD. He reports a long history of presumed IBS presenting with intermittent lower abdominal cramping that occurs several times per week, and is triggered by dairy intake, anxiety, and physical activity. This can be associated with looser stool and mild urgency, although in general he reports a soft stool each day. An evaluation for these symptoms along with isolated BRBPR in 2005 (IL) includes a CT scan showing moderate stool retention in the colon, and a flex sig that was reportedly limited d/t patient discomfort. He denies any rectal bleeding since that time. He does endorse occasional oral aphthi but otherwise denies any additional complaints. His weight has been stable.

Earlier this month he experienced worsening of his baseline abdominal pain, possibly precipitated by consuming a milk-shake. A CT in the ER showed focal colitis at the right colon (hepatic flexure) with fecalization of the small bowel, concerning for IBD. CRP was 1.2, labs otherwise nl. A follow-up colonoscopy with Dr. McNally showed cogested appearing mucosa in the left colon. Images of the right colon/ cecum are limited due to liquid stool, and the TI was not intubated per report. Biopsies are pending. The patient reports self-resolution of the pain, and has since been feeling back to baseline.

Allergies

ASA- (nausea).

Past medical/surgical history**Reported:**

Merwin, Daniel Dennis

Medical Record

Merwin, Daniel Dennis

DOB: [REDACTED]

1985

SSN: ***-**-****

DoD ID: 1286180538

Created: 16 Aug 2017

Past medical history

- Allergic asthma (cats); Headache, NOS

Surgical / Procedural: Prior surgery

- PRK, Tonsillectomy

Medications: Medication history

- Albuterol, Aleve prn (less than once per week)

(I personally reviewed the medication history, allergy history and compliance with medications with this patient)

Surgical:

Pre-op ASA class 1

Previous therapy

History of possible limitations and risks do not include complications from anesthesia

Personal history

Tob: (-)

Etoh: (2 drinks every other day)

Drug use: (-)

Family history

No chronic liver disease

No malignant neoplasm of the large intestine

No malignant neoplasm of the gastrointestinal tract

No known FH of IBD, autoimmune diseases.

Review of systems**Systemic:** Not feeling tired (fatigue). No fever, no chills, no night sweats, and no recent weight loss.**Head:** No headache.**Eyes:** No vision problems.**Otolaryngeal:** No hoarseness, no lump in the throat, and no mouth sores.**Cardiovascular:** No chest pain or discomfort and no palpitations.**Pulmonary:** No dyspnea and no cough.**Gastrointestinal:** No dysphagia, no pain on swallowing, no heartburn, no regurgitation, no early satiety, no nausea, no vomiting, no hematemesis, no hematemesis ('coffee grounds'), no abdominal swelling, no jaundice, no recent increase in bowel frequency, and not decrease. No tenesmus, no melena, no hematochezia, no acholic stools, no steatorrhea, and stool diameter is not smaller. No change in consistency of stool and no nocturnal diarrhea. No rectal pain.**Genitourinary:** No urinary symptoms.**Endocrine:** No endocrine symptoms.**Hematologic:** No tendency for easy bruising.**Musculoskeletal:** No arthralgias, new. No nonspecific pain, swelling, and stiffness.**Neurological:** No confusion and no memory lapses or loss.**Psychological:** Mood was euthymic and no sleep complaints.**Skin:** No pruritus, no change in skin texture, new, and no rash, new.**Physical findings****Vital Signs:**

° Current vital signs reviewed.

Standard Measurements:

° Patient was not observed to be obese.

General Appearance:

° Awake. ° Alert. ° Oriented to time, place, and person. ° Well developed. ° Well nourished. ° In no acute distress. ° Patient did not appear uncomfortable. ° Not acutely ill. ° Not chronically ill.

Neck:

Appearance: ° Of the neck was normal.

Eyes:

General/bilateral:

Sclera: ° Showed no icterus.

Oral Cavity:

° Normal OP clear, Mallampati score = 1.

Chest:

° Visual inspection revealed no abnormalities.

Lungs:

° Normal CTA B.

Cardiovascular:

° System: normal RRR, no M or G.

Abdomen:

° Normal soft, NT/ND, +BS.

Neurological:

° Level of consciousness was normal.

ba/DICTATION DATE: 23 November 2005

CT SCAN OF THE ABDOMEN AND PELVIS WITH CONTRAST:

Technique: 7.5 mm cross-sectional images of the abdomen and pelvis were obtained following oral and intravenous introduction of contrast.

Findings: There is a normal appearance of the liver, spleen, and pancreas. There is no gallstones. No dilatation of biliary ducts or pancreatic duct identified. There is no enlargement of the adrenal glands. There is no hydronephrosis. No renal stones are seen. There is no lymphadenopathy. No abnormal collection of fluid in the abdomen or pelvis identified. Moderate amount of fecal material noted throughout the colon. There is no changes of appendicitis. No aneurysmal dilatation of the abdominal aorta noted. There is no signs of bowel obstruction.

IMPRESSION: NORMAL COMPUTED TOMOGRAPHY OF THE ABDOMEN AND PELVIS.**MODERATE AMOUNT OF FECAL MATERIAL THROUGHOUT THE COLON.****Rad Result** Cited by COPSEY, HELEN C @ 24 Oct 2012 0956 EST**MERWIN, DANIEL DENNIS 20 [REDACTED] 27yo [REDACTED] 1985 M**

Supervised By: BERNARD, JACQUELINE, MD, CDR, USN

Supervised By Date: 11-Oct-2012 08:16:00

Amended Report Text:

ADDITIONAL HISTORY: Abdominal pain.

TECHNIQUE: CT of the abdomen and pelvis was performed under standard abdomen/pelvis CT protocol with 5 mm axial helically acquired images obtained from the level of the diaphragm to the level of the pubic symphysis after the intravenous administration of 110 mL Isovue 370 and oral contrast. Coronal and sagittal reformatted images were also obtained.

COMPARISONS: Acute abdominal series 10/10/12.

FINDINGS:

Lung bases are clear.

Liver parenchyma and vasculature is unremarkable. Normal biliary tree without intra-or extrahepatic biliary ductal dilatation. Pancreas, spleen, adrenals, and kidneys are normal. No identifiable ureteral abnormalities. Fluid-filled urinary bladder is unremarkable.

Enteric contrast visualized to the level of the mid ileum. Stomach is normal. There is fecal material and air noted within the distal ileum extending to a mildly distended stool filled cecum. The appendix is identified and is normal. There is a focal area of vascular prominence involving the mesentery at the level of the hepatic flexure. The colon wall at this level appears mildly thickened but otherwise decompressed. The colon distal to the hepatic flexure is decompressed and normal in appearance.

Shotty subcentimeter mesenteric lymph nodes about the upper abdomen. No intra-abdominal mass or fluid collection. Vascular structures are normal in configuration.

Pelvic organs are unremarkable. No free pelvic fluid. No pelvic or inguinal lymphadenopathy.

Soft tissues, muscles, and osseous structures are unremarkable.

IMPRESSION:

Focal colitis at the level of the hepatic flexure with proximal stool retention and fecalization of small bowel. Findings are nonspecific and may be representative of an acute infection or inflammatory etiology such as Crohn's disease. Clinical correlation is recommended.

Note: Findings above were discussed with Dr. Hardware, via telephone at 0450 hours on 10/11/12. _____

A/P Last Updated by COPSEY, HELEN C @ 24 Oct 2012 1002 EST

1. Imaging Studies Nonspecific Abnormal Findings: CT concerning for colitis and fecalization of SB ? radiographic artifact, constipation, acute vs. chronic inflammation, stenosis. Colonoscopy with limited evaluation of right colon, ICD, distal ileum. Recommend MRE for further evaluation of small bowel as d/w Dr. Kikendall. He may ultimately require repeat colonoscopy, however will await biopsy results prior to determining next steps. Patient voices understanding/ agreement.

2. abdominal pain: Patient with long history of intermittent abdominal pain ? due to IBS vs. dietary intolerance vs. inflammatory. Will proceed with evaluation to r/o IBD, however if negative encouraged patient to continue f/u with GI for management of chronic symptoms.

Disposition Last Updated by COPSEY, HELEN C @ 24 Oct 2012 1003 EST**Released w/o Limitations**

Follow up: in the GI INFLAM BOWEL DIS BE clinic. - Comments: Will call pt 850-602-8501 after obtaining pathology and discussing need for repeat colonoscopy with IBD staff.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments:

45 minutes face-to-face/floor time. >50% of appointment time spent counseling and/or coordinating care.

Note Written by BROWN, CANDICE C @ 23 Oct 2012 0738 EST**Consult Order**

Referring Provider: SALTER, CAROLYN A

Date of Request: 12 Oct 2012

Priority: ASAP

Provisional Diagnosis:

IBD vs mass

Reason for Request:

27 y/o male w/ ascending colon inflammation s/p colonoscopy 12 OCT. Pt needs GI f/u to discuss results.

Signed By COPSEY, HELEN C (PA-C, MSHS, WRAMC- GI Clinic) @ 24 Oct 2012 1003Note Written by COPSEY, HELEN C @ 24 Oct 2012 1004 EST

(Added after encounter was signed.)

PATH**PATH**

Spoke with Dr. Barner re: patient's pathology results- not yet placed into CHCS. Biopsies of left-colon show benign colonic mucosa, without active inflammation, chronicity or architectural distortion.

Note Written by COPSEY, HELEN C @ 08 Nov 2012 1503 EST

(Added after encounter was signed.)

MRE results

MRE d/w patient- essentially nl specifically right colon/T1, will review at IBD conference. Pt denies any continued pain. Will defer repeat COLO for now, however reconsider pending progress. Would re-check CRP, which should be down from hospitalization. Pt v/u.

The Patient is a 26 year old male.

Barriers to learning were identified as: None.

Allergies

Allergy information in Autocite area was reviewed and verified with patient.

Current medication

See med list.

Past medical/surgical history**Reported History:**

Reported medications: No medication history including current prescription medications; over-the-counter medications; nutraceuticals; herbals; supplements and medications not included in AHLTA were reviewed with patient in detail.

Taking medication and no contraindications to live vaccine were noted on medication reconciliation.

Physical findings

Patient monitored 15 minutes for adverse reaction/complications.

Counseling/Education

Education appropriate to the patient's needs was provided regarding the care/treatment/services provided. The patient or guardian voiced understanding and all questions were answered.

Appropriate Vaccine Information Statements were given. Patient was identified using two forms of identification (name and prefix and sponsor's social security number)

Pain control was discussed.

The patient or guardian was instructed to wait for 15 minutes in the waiting room after vaccines were administered.

Tobacco Use: No, Alcohol Use: No, Pain Scale: 0 Pain Free

SO Note Written by BRUMWELL,ERIC @ 27 Jul 2011 0852 CDT**Chief complaint**

The Chief Complaint is: F/U PHOT OR HEAT INDUCED FOLLICULITIS-- PT HAD PROBLEM LAST YEAR AND RECENTLY HAD RECURRENCE 2 WEEKS AGO AFTER WORKING IN YARD--TNTC SMALL PUSTULES ON FACE/NECK AND UPPER BACK THAT LASTED A FEW DAYS THEN WENT AWAY--NO TOPICALS USED OTHER THAN VASELINE LOTION, NO MEDS TAKEN.

Reason for Visit

Visit for: screening for dermatological disorders.

Referred here

From Primary Care.

History of present illness

The Patient is a 26 year old male.

He reported: Military service.

Concerns about cosmetic appearance.

Allergies

An allergy to drugs.

Current medication

current medication [Use for free text].

Past medical/surgical history**Reported History:**

Reviewed.

Reported medications: Taking medication MEDICINE RECONCILIATION PERFORMED.

Review of systems

Systemic symptoms: No systemic symptoms and not feeling tired (fatigue). No chills.

Gastrointestinal symptoms: No nausea and no vomiting.

Physical findings**Vital signs:**

• Pain level (0-10) 0.

Neurological:

Speech: ° Normal.

Psychiatric Exam:

Affect: ° Congruent with the mood.

Skin:

° Normal except as noted EXAM ESSENTIALLY NORMAL--NO ACTIVE SKIN DISEASE. ° No lesions on the scalp. ° No lesions on the ear. ° No lesions on the face. ° No lesions on the neck. ° No lesions on the shoulders. ° No lesions on the upper extremities.

A/P Written by BRUMWELL,ERIC @ 27 Jul 2011 0857 CDT

1. FOLLICULITIS: PREVIOUSLY BIOPSY AND DIAGNOSIS C/W PITYROSPORUM FOLLICULITIS HOWEVER HISTORY SEEMS MUCH BETTER FOR MILIARIA

ADVISED PT TO START TOPICAL KETOCONAZOLE AGAIN FOR PITYROSPORUM AND WILL ADD LAC HYDRIN AND CLINDA TOPICALLY TO TREAT CONCURRENTLY FOR MILIARIA AND BACTERIAL FOLLICULITIS. ADVISED PT TO WEAR LOOSE SUN PROTECTIVE CLOTHING AND TO COOL OFF IMMEDIATELY AFTER HOT ACTIVITY

WILL F/U W/ NEXT EPISODE FOR REPEAT BIOPSY/CULTURE WHEN ABLE

Medication(s):	-AMMONIUM LACTATE--TOP 12% LOTN - AAA TRUNK AND NECK DAILY #2 RF4 Qt: 2 Rf: 4 -CLINDAMYCIN--TOP 1% SOLN - APPLY TO UPPER TRUNK AND NECK DAILY-- THIS IS THE ANTIBIOTIC #2 RF3 Qt: 2 Rf: 3
Patient Instruction(s):	-Anticipatory Guidance: Outdoor Safety Avoiding Sun Exposure -Avoid Exposure Bright Sunlight -Education And Counseling -Instructions For Patient

The Chief Complaint is: Follow up PFTs.

History of present illness

The Patient is a 26 year old male.

He reported: Feeling fine, Excellent, Very Good or Good.

Pain Severity 0 / 10.

Pt is a 26 yo male who presents for follow up of pulmonary function tests. He was last seen in March 2011. Since that time he has done well. He exercises regularly without difficulty. He will have occasional chest tightness when around cats, but otherwise is asymptomatic. He presents today for routine follow up.

Patient feels safe at home.

Allergies

General appearance:

° Well-appearing. ° Awake. ° Alert. ° In no acute distress.

Tests**Laboratory studies:****Pulmonary Function Tests:**

Pulmonary function tests were performed on 17MAR11 and revealed normal spirometry, very mild decrease in TLC, and a normal DLCO. Following the administration of 16mg/ml of methacholine there was a significant decrease in FEV1 consistent with a positive methacholine challenge.

A/P Written by LEWIS,CHRISTOPHER T @ 26 Jul 2011 1135 CDT

1. ASTHMA(ASTHMA, UNSPECIFIED, MILD): Pt with a symptom complex and positive high dose methacholine challenge test consistent with mild intermittent asthma. Hls symptoms are confined to allergen exposure, particularly to cats. Given the mild intermittent nature of his disease, he does not require a controller medicine, and will be treated with prn albuterol alone. He was counseled on allergen avoidance. No further workup is required. He is FIT FOR FULL DUTY WITHOUT RESTRICTIONS, and FIT FOR WORLD WIDE DEPLOYMENT WITHOUT RESTRICTIONS. Follow up in 6 months.

A/P Written by ROPP, CORBY D @ 29 Mar 2011 1446 CDT**1. visit for: preoperative exam:** The risks and benefits and CRS alternatives eligible for this patient were discussed including PRK/LASIK options.

PRK was discussed as use of a brush to create a large abrasion like defect which will take several days to heal with aid of a CL. Potential of pain/discomfort was mentioned. Risks of haze which may cause loss of best vision was discussed. Significantly slower visual recovery than LASIK (up to 6 months) worsening of dry eye or causing dry eye, and infection were discussed. Glare and

halos, new dry eye that may persist for 6 months or longer was mentioned. The use of MMC as surgeon preference in order to minimize risk of corneal haze development was discussed as well as it's unknown long -term affects on the cornea and that it is not FDA approved for CRS. It was mentioned that the Navy has a long history of successful application of MMC with much less haze formation and minimal side effects.

The LASIK option was discussed as creation of a corneal flap which establishes a thinner corneal structure than PRK, but faster and less painful visual recovery. The lesser risk of haze was mentioned. The potential for re-lifting the flap if necessary for debri, folds, or re-treatment and risk for epithelial down-growth was discussed. The risk of flap dislocation although small was discussed. The risk for flap infection although small was discussed. The risk of worsening or creation of dry eye symptoms due to the corneal incision, as well as glare and halos at night during the healing process were discussed. The risk of worsened dry eye with age was also discussed, and that its long-term affects not known. The risk for multiple suction loss events, even during flap creation w/ potential for resultant aberrations was discussed.

It was mentioned that people who have either PRK or LASIK are generally happy and most would recommend to a friend w/ a few exceptions

After a discussion of the risks and benefits the patient elected to have PRK with MMC application.

Procedure(s):
 -Ophthalmological New Patient Start Comprehensive Care x 1
 -Determination Of Refractive State x 1
 -Corneal Pachymetry Both Eyes x 1
 -Scanning Computerized Ophthalmic Diagnostic Imaging Anterior Segment, Unilateral x 2 (50-BILATERAL PROCEDURE) - Wavescan, low RMS, okay for Allegretto
 PentaCam - nl A/P floats and Belin-Ambrosio scans ou - Hard copy on file on system - no printer ink
 -Computerized Corneal Topography x 1

Comments:
 Patient is being evaluated for history of difficulty breathing. ATS standards met: initial SpO2 99% at rest and HR at 75 bpm. Good cooperation and good effort. Patient was initially given a control trial of 5 breaths of 0.9% NaCl with 0.4% Phenol solution via dosimeter nebulizer. Testing continued with administration of 5 breaths each of increasing dosages of ipratropium 0.065, 0.25, 1.0 mg/ml consecutively, using 0.9% NaCl with 0.4% Phenol as diluent. Test was discontinued due to decrease in FEV1 of 20% of predicted value or greater. Post bronchodilator administered via 0.5cc Albuterol in 0.2cc NaCl via nebulizer. Patient advised of possible side effects of ipratropium and albuterol. No known predisposition for hypersensitivities to these medications, no adverse reactions.

Interpretation:
 Pulmonary function test obtained to evaluate baseline lung functions. Normal baseline spirometry. The flow volume loop is normal. Lung Volumes are consistent with mild restrictive disease. The diffusing capacity for carbon monoxide is normal. Positive Methacholine Challenge.

Robert Merzies, CPT, MC, USN, Pulmonologist/ Internal Medicine

The Chief Complaint is: Chest tightness.

History of present illnessThe Patient is a 26 year old male.
He reported: General overall feeling Good

No military duty-related information - (Not on PRP/SCI/PSP). No depression Screen: Negative PHQ-2 (Score < 3).
Pt is a 26 yo male with a history of allergies and childhood asthma. He notes a history of asthma in childhood which was associated with allergic symptoms. He remarks on 1 hospitalization for his asthma as a child but none since. Since the age of 8 he has been doing well and was not maintained on any inhalers. He is very active and is an active marathoner. Recently he has noted increased symptoms of chest tightness associated with exposure to cats and dogs. He was briefly treated with advair, but is currently being maintained on zyrtec and flonase as well as allergen avoidance with excellent control of his symptoms. He will have one weekly chest tightness and albuterol use, but is otherwise doing well, and recently completed a marathon. He presents for routine follow up.

Pain Severity 0 / 10.

Past medical/surgical history**Reported History:**

Past Medical History:

- 1) childhood asthma
- 2) allergies.

A/P Written by LEWIS, CHRISTOPHER T @ 16 Feb 2011 0930 CST

1. difficulty breathing (dyspnea): Pt is a 26 yo male with a history of childhood asthma and allergy type symptoms. His clinical history is suggestive of mild intermittent asthma, and his symptoms are under excellent control with control of his allergies with zyrtec and flonase. He will continue on these medications and prn albuterol for now, and will be referred for baseline PFTs and methacholine challenge study to definitive rule in/out asthma. Even with a positive study, his symptoms are under excellent control on his current therapy, and if needed he can be successful controlled with an inhaled steroid. He is highly functional, and even if a diagnosis of asthma is established this in no way should impact upon his fitness for duty. He is currently fit for duty and fit for world wide deployment. He will follow up in 3-4 weeks to review the results of his PFTs.

Consult(s): -Referred To: PULMONARY FUNCTION STUDIES (Routine) Specialty: PULMONARY DISEASE Clinic:
PULMONARY FUNCTION LAB Primary Diagnosis: difficulty breathing (dyspnea)

Disposition Written by LEWIS, CHRISTOPHER T @ 16 Feb 2011 0931 CST**Released w/o Limitations****Administrative Options:** Consultation requested**Note Written by AEPPLI, CAROL @ 16 Feb 2011 0755 CST****Consult Order****Referring Provider:** BROWN, TRAVIS S**Date of Request:** 08 Feb 2011**Priority:** Routine**Provisional Diagnosis:**

ASTHMA EXTRINSIC

Reason for Request:

LVM ON CELL PHONE 25 yo AD male has a history of childhood asthma, with improvement in symptoms as he reached adulthood. However he continues to have problems with tightness in his chest on occasion. States some things in the environment (dogs and cats for example) trigger his symptoms and may last for days. Denies any problems with routine exercise. He has been taking Zyrtec and Flonase daily however do not seem to be very effective. He was recently given Albuterol and Advair inhaler which he uses prn with good results. Please evaluate, treat and let me know his deployment status. Are there other environmental factors that could be an issue while on deployment. thank you. contact phone # 850 292 7149

SO Note Written by BROWN,TRAVIS SCOTT @ 08 Feb 2011 1027 CST**Chief complaint**

The Chief Complaint is: PHA.

History of present illness

The Patient is a 25 year old male.

Barriers to learning were identified as: None

Barriers considered were, social, cultural, emotional, motivational, physical, religious, cognitive and language.

Problem list reviewed.

Member has a history of childhood asthma, with improvement in symptoms as he reached adulthood. However he continues to have problems with tightness in his chest on occasion. States some things in the environment (dogs and cats for example) trigger his symptoms and may last for days. Denies any problems with routine exercise. He has been taking Zyrtec and Flonase daily however do not seem to be very effective. He was recently given Albuterol and Advair inhaler which he uses prn with good results.

Current medication

Albuterol HFA inhaler prn

Advair prn

Zyrtec

Flonase

Past medical/surgical history**Reported History:**

when dating and individual with cats and recently a roommate attained a dog. Pt was aggressively tx with albuterol and high dose advair for resp sx. At the time he was on antihistamines for a dermatologic condition. Over time he was only using one puff of advair daily for sx that occurred only when reclining for the evening. Pt denies any wheezing sx. Pt is s/p tonsilectomy (has adenoids) as a child.

Alert AF NAD VSS

Heent sinus nt tms wnl nares pale boggy clear drainage

OP healed tonsilectomy no edema

neck supple

skin type one red hair/blue eyes.

Described constellation and continuum of allergy, atopy, asthma. Pt seems to have very good control of sx when not around critters. To rule out severe asthma and possible medical DQ pt will be managed on oral antihistamines and intranasal steroids. If there is further difficulty breathing, pt had albuterol and should report to medical. Consider methacholine challenge and allergen testing if sx are not controlled. Consider Adenoidectomy as sx are worst when reclining. Pt understands and agrees with plan. Pt will f/u as needed.

1. **Pre-procedural verification:** Patient states name and DOB which is compared to the following (as appropriate):
- Documents- History & Physical, Nursing Assessment
 - Consent Form
 - Diagnostic Test Results
 - Blood Products, implants, devices, Special Equipment

YES ☒

2. **Site Marking:** (patient involvement if possible)
- By provider doing the procedure

YES ☒ N/A ☒

"TIME OUT" CONDUCTED AUDIBLY w/team

YES ☒ N/A ☒

Antibiotics/fluid for irrigation (if needed)

☒

Patient- 2 identifiers (name and DOB)

☒

Procedure- correct procedure documented on consent

☒

Laterality- Surgical site marked

☒

Equipment- if needed

☒

Position- Verified

☒

Implants- if needed

☒

Exams- Diagnostic tests (radiographs etc.)

☒

Safety Precautions- Based upon outpatient history and profile

☒

The Chief Complaint is: Possible allergic reaction.

History of present illness

The Patient is a 25 year old male.

25yo ADM arrived to medical with allergies to cats and dogs which makes it hard for the pt to breathe. If he's in the same room with these animals, the pt feels tightness in chest. and becomes short of breath. He has to remove him self and uses an OTC epinephrine inhaler. pt states that when he does have an onset it can take up to 2days for the symptoms to go away completely. He had severe childhood asthma but no symptoms for years since 11 or 12.

In the Navy and currently on active duty. Visit is not deployment-related and visit is not GWOT-related.

Itching of the eyes.

Dyspnea, paroxysmal nocturnal dyspnea, orthopnea: sleeping upright or with extra pillows, and wheezing.

Current medication

Current medications reviewed and reconciled.

fexofenadine HCL 100mg, ceraphil/aquanil.

Past medical/surgical history**Reported History:**

1. ASTHMA EXTRINSIC (EXTRINSIC ASTHMA, UNSPECIFIED, MILD PERSISTENT): exposure to cats and dogs. DC Primatine Mist. Patient is already on daily Claritin per Dermatology for skin rash - 1 week so far. Is supposed to follow up with Derm after 1 month and if no improvement will get skin biopsies. He's to continue on the Claritin. Will add a long acting B agonist and Albuterol for rescue inhaler in case he has any acute exacerbations of his symptoms. I have advised him to practice avoidance - not be around cats and dogs as much as possible. he has none in his home but does visit with people that have pets. If the Claritin, avoidance and Advair are not effective will refer to Allergist.

History of present illness

The Patient is a 25 year old male Source of patient information was patient.
 Barriers to learning were identified as: None
 Possible barriers include cultural; religious; emotional; motivational; physical; and cognitive.
 In the Navy, currently on active duty, and paygrade E5.

Presents in follow-up. He was seen for a papular follicular-based rash that appeared to occur when exposed to sunlight, primarily on the weekends. After his last visit he stopped using his soaps and use Cetaphil for two weeks. He also switched to a nonchemical sunscreen but did not notice any improvement in his symptoms overall. He has subsequently returned to using his antibacterial soap or old spice, and has used a chemical sunscreen (baby sunscreen SPF 70) and states that this weekend he did not have a breakout at all, in spite of being in the sun 11 to two.
 He states that the rash has characteristically only lasted for about two to 3 days before going away without sequelae. It is tender but not necessarily itchy. He has pictures of his breakout which occurred primarily on his neck face and upper chest.

Allergies

History of present illness

The Patient is a 25 year old male Source of patient information was patient.

Barriers to learning were identified as: None. Barriers considered were social; cultural; emotional; motivational; physical; religious; cognitive and language.

In the Navy and currently on active duty. Visit is not deployment-related /deployment-related. Paygrade E5.

Presents for evaluation of her recurrent rash that has been occurring over the past two summers. He states that when he spends time in the sun and especially in the water he will develop crops of pustules across his forehead, cheeks, and somewhat on his back and chest. These are typically painful and he tends to puncture these or pick them. He did that this morning and does not have any significant acute lesions. He denies breakouts on other sun exposed areas of his skin.

He has tried many different types of sunscreens, but most recently used a baby sunscreen that one time helped prevent a breakout and the other time did not.

He does not take medications regularly, though occasionally takes Aleve.

He does relate that he had MRSA 3 times, and has been using an antibacterial soap on all of his skin since April of 2009.

Allergies

Allergy information in Autocite area was reviewed and verified with patient.

Current medication

Pt is not taking meds at this time.

Education appropriate to the patients needs was provided regarding the care/treatment/services provided. The patient voices understanding and all questions were answered.

A/P Last Updated by SMITH,ERIC P @ 20 Jul 2010 1643 CDT

1. FOLLICULITIS: Appears to developing pustules of unclear etiology. The sudden onset following sun exposure may point towards a photosensitive reaction which could be photo drug or photo toxic or photoallergic. He only takes Aleve occasionally, and this could be a potential cause of pseudo-porphyrria though he has no lesions on the back of his hands and no milia. It would be atypical for acne, even though he complains of blackheads, as the sun tends to be more immunosuppressive rather than causing acne breakouts.

He may have a reaction to sunscreen products, though states that he is broken out even when not wearing sunscreen. There does not appear to be a likely interaction between water in his skin. These lesions are not urticarial.

There may be a relationship to him starting his antibacterial soap and the onset of this rash. Discussed the importance of good skin care without damaging the surface.

Pityrosporum folliculitis is also in the differential diagnosis.

Recommended:

Stop antibacterial soap.

Start Dove or Cetaphil for washing his body.

They tried different sunscreens on his skin to see if there is a relationship between outbreaks.

Return 3 to 6 weeks for reevaluation

Medication(s): -CETAPHIL (AQUANIL)CLNSR 240ML --TOP SOAP - INSTEAD OF SOAP UD (BUT THE BEST SOAP IS NO SOAP) #2 RF6 Qt: 2 Rf: 6

Disposition Written by SMITH,ERIC P @ 20 Jul 2010 1645 CDT**Released w/o Limitations**

Follow up: 2 to 6 week(s) in the DERMATOLOGY CLINIC clinic or sooner if there are problems.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding.

Note Written by NEWTON,TYLER JEROME @ 20 Jul 2010 0916 CDT**Consult Order**

Referring Provider: GUNTER, ROGER WILLIAM

Date of Request: 14 Jun 2010

Priority: Routine

Provisional Diagnosis:

ROSACEA

Reason for Request:

1ST L/M ON VM25 yo male active duty member with 9 months of facial break outs - pustules, papules on forehead, nose and cheeks with any sun exposure. Patient has tried every sun screen he knows but every time he goes out to the beach or has any outdoor time for 4 or more hours he'll break out. Clears after about 2-4 days but comes back every time he gets sun exposure. It has some features of Rosacea but a very unusual onset and resolution. Please evaluate and treat definitively.

The Chief Complaint is: Allergic reaction.

History of present illness

The Patient is a 25 year old male.

25yo ADM arrived to medical with complaints of allergic reaction x1year. pt stated that when he first arrived to florida he was fine for x2months. now every time he goes outside he breaks out with pustules all over his face. pt has tried using sunscreen with no success. pt denies taking any medication to treat the reaction.pt does notice more pustules when in the sun but he still gets them when its cloudy outside. No problems with alcohol or hot beverages. No history of Rosacea though he's had acne since he was a teen - that's cleared for the most part and hasn't had any problems of this kind until he got to floriday about 9 months ago. Originally from California and has spent his whole life out doors in the sun.

In the Navy and currently on active duty. Visit is not deployment-related and visit is not GWOT-related.

Current medication

Current medications reviewed and reconciled.

S/O Note Written by HANGEMANOLE,DESPINA C @ 10 Aug 2017 0742 EDT

bodybodyHistory of present illness g2

The Patient is a 32 year old male.

Focus Of Session: Depressive Symptoms

S) SM reported that he spent the weekend watching movies and sleeping. SM stated that he did talk with his sister and his mother and examined with them some of the reasons for living. SM stated he has hopes of moving down to where they live and buying a plot of land to live on together. Sm stated that his MEB is moving forward for his IBS. SM denied having an intake date with PCS right now. SM reported that he is still depressed and often thinks about his reasons for living. SM reported he went to one AA meeting but didn't really like it because there was "drama" and he didn't feel he got anything out of it. SM reported that he was triggered to drink one time after hearing people talk about craft beer on the radio. SM stated that he turned the radio off and the feeling passed. He stated that he thought about suicide over the weekend but did not have a plan or intent to harm himself. SM denied any alcohol use or thoughts about drinking. SM denied being in pain.

O) SM reported to session on time and was dressed in uniform. His mood was euthymic in session, affect congruent. SM's thoughts and behavior were appropriate.

A) SM was cooperative and friendly. SM appears to have significant mental health issues that would be best addressed through PCS IOP. SM would benefit from continuing to engage in community recovery.

Alcohol Use D/O, Severe

P) Case will be reviewed with treatment team. SM will follow up with social worker in two weeks.

A/P Last Updated by DIBLASI,DANIEL R @ 16 Jun 2017 1247 EDT

1. Anogenital (venereal) warts: 32 y/o male with genital warts. Did not improve with topical or destructive therapies in the past. Recommended repeat treatment with LN2 and then regular follow up every 4-6 weeks for repeat treatment until clear. Patient verbalized understanding.

Seen and staffed with Dr. Nicholas

Procedure(s): -Destruction Of Benign Lesion By Cryosurgery x 1 - After discussion of risks, benefits, and alternatives, verbal consent received, and cryo applied to lesions in standard fashion. Therapy was applied in a pulsed fashion to minimize collateral tissue injury. Patient was instructed to use Vaseline ointment to the area(s) until healed. Patient tolerated the procedure well and left in stable condition.

2. Epidermal cyst: Multiple scrotal EICs. Can schedule for excision. AHLTA and Outlook calendar unavailable at the time of encounter, so will contact patient to schedule.

32 yo M who presents for skin testing.

Patient with significant PMH for anxiety and IBS was previously seen for evaluation of SOB on exposure to animals and grass. As a child pt states that he had breathing issues required treatment with inhalers until age 18-19. He even required a PICU stay at the age of 3 (no intubation) for these issues. Prior to joining the navy his symptoms had completely resolved but 5 years ago when he moved back to MD he noted symptoms of chest tightness and difficulty getting air in when around cats, dogs and doing PT in the grass. His symptoms are not exacerbated during exercise or URIs. He uses albuterol which improves his symptoms. He has not gone to the ER for these symptoms or taken oral steroids in the past year. Over the past month he has required use of albuterol 4-5 times but none at night. When around grass he also develops pruritus and sometimes small red bumps but no symptoms or rhinorrhea or congestion. He recently started taking zyrtec for these symptoms.

No history of food/medication/venom allergies, eczema, or history of anaphylaxis.

Medication list reviewed with patient, reconciliation completed.

Allergies

Merwin, Daniel Dennis

DOB: [REDACTED] 1985 SSN: ***-**-**** DoD ID: 1286180538

Created: 16 Aug 2017

Cavity: Nasal septum normal. Nasal mucosa normal. Nasal turbinate not erythematous. Nasal turbinate not swollen.

Sinus Tenderness: No sinus tenderness.

Oral Cavity:

Lips: Showed no abnormalities.

Buccal Mucosa: Examination showed no abnormalities.

Pharynx:

Oropharynx: Normal. Tonsils showed no abnormalities.

Lymph Nodes:

Cervical lymph nodes were not enlarged. Submandibular lymph nodes were not enlarged. Supraclavicular lymph nodes were not enlarged.

Lungs:

Respiration rhythm and depth was normal. Exaggerated use of accessory muscles for inspiration was not observed. Clear to auscultation. No wheezing was heard. No rhonchi were heard. No rales/crackles were heard.

Cardiovascular:

Heart Rate And Rhythm: Normal.

Heart Sounds: Normal S1 and S2. No gallop was heard. No click was heard. No pericardial friction rub heard.

Murmurs: No murmurs were heard.

Neurological:

Oriented to time, place, and person.

Balance: Normal.

Gait And Stance: Normal.

Psychiatric:

Mood: Euthymic.

Skin:

Showed no ecchymosis. Temperature was normal. No skin lesions.

Allergic rhinitis: 32 yo M with skin testing only positive to Cat. No significant symptoms of rhinorrhea but he intermittently has developed a pruritic rash on exposure to grass (picture of back shown to me by patient today is c/w large urticaria on back). Exam today WNL.

-Cont treatment with albuterol prn symptoms

-Discussed acute urticaria and rhinitis. Plan for daily Zyrtec to prevent urticaria and prevent symptoms in the presence of cats. Discussed avoidance measures.

-Would avoid Singulair use in this patient due to behavioral health issues (Singulair has a black box warning regarding SI)

-All questions addressed, patient/parent express understanding of the above, and have no further concerns

A/P Written by PETERSEN, MAUREEN M @ 10 Jun 2017 1418 EDT

1. Allergic rhinitis due to animal (cat) (dog) hair and dander: See above.

Procedure(s): -Allergy Percutaneous tests - allergenic extracts x 45

ADDITIONAL PROVIDER(S): ACKERMAN, JOI D -

Benefits and risks of skin testing discussed to include the risk of discomfort, bleeding/bruising, and allergic reactions. Patient agreed to proceed and consent signed. Positive and negative controls were placed along with a full aeroallergen panel. Test was read at 15 minutes and results were recorded.

Disposition Written by PETERSEN, MAUREEN M @ 10 Jun 2017 1418 EDT

Released w/o Limitations

Follow up: as needed with PCM. - Comments: f/u prn; meds reconciled.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding.

A/P Last Updated by HERNANDEZ,CAMELLIA L @ 25 May 2017 1055 EDT

1. Dyspnea, unspecified: 32 yo M without significant PMH presents with symptoms of chest tightness and difficulty getting air in on exposure to cats, dogs and grass. No significant symptoms of rhinorrhea but he intermittently has developed a pruritic rash on exposure to grass. Exam today WNL. Spirometry performed today also WNL. History and symptoms could be consistent with allergic asthma, however, could also be due to VCD.

-Could not perform SPT today due to recent antihistamine use, however, Pt will follow up on June 7th at 10:15 for SPT to the aeroallergens. Pt will discontinue Zyrtec 5 days prior to next apt.

-Cont treatment with albuterol prn symptoms

-If SPT negative, would consider referral to pulmonology for consideration of MCCT vs laryngoscopy to evaluate for asthma and VCD

-All questions addressed, patient/parent express understanding of the above, and have no further concerns

Procedure(s): -Spirometry Pre-bronchodilator x 1 ADDITIONAL PROVIDER(S):

BANKS,TAYLOR ALLEN - Interpretation: The patient has normal baseline spirometry.

Disposition Last updated by BANKS,TAYLOR ALLEN @ 25 May 2017 2031 EDT

Released w/o Limitations

Follow up: as needed with PCM.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding.

Note Written by HERNANDEZ,CAMELLIA L @ 25 May 2017 0953 EDT

Consult Order

Referring Provider:RODAK, COLLEEN M

Date of Request:17 May 2017

Priority:Routine

Provisional Diagnosis:

Encounter for other general examination

Reason for Request:

This is a 32 yo male with a HX of developing pruritic rash when coming into contact with grass during PT in addition to severe reaction to animal dander --> wheezing /bronchospasm / cough please evaluate to determine antigens and if possible desensitization thank you

Note Written by BANKS,TAYLOR ALLEN @ 25 May 2017 2031 EDT

I saw and evaluated the patient. Discussed with resident/fellow and reviewed the history/PE and assessment and plan as documented in the note and agree.

bodybodyHistory of present illness g2

The Patient is a 32 year old male.

32 y/o AD male returns to the GI clinic for f/u regarding IBS manifested by chronic intermittent abdominal pain. He reports a long history of GI symptoms, dating back to childhood, but symptoms have been more disruptive over the past few years. Notes generalized sharp, crampy abdominal pain about every 1-2 days, that peaks prior to defecation and is relieved after bowel movements. Typically has 1-2 soft or liquid stools per day, infrequently with urgency. Symptoms may be worse with intake of insoluble fibers. Also worse during physical activity and with increased anxiety/stress. He reports minimal improvement since starting a low-FODMAP diet and is not following this strictly currently. He denies any benefit from avoiding dairy, caffeine, and sugar-substitutes.

Of note, patient underwent CT A&P in 2012 for the same abdominal pain, which showed focal wall-thickening at the hepatic flexure with proximal stool retention. Colonoscopy (McNally) in 2012 showed mild congestion in the sigmoid, but biopsies were unremarkable. A subsequent MRE was completely normal.

He was also previously noted to have a +serum AB to H.pylori. He was treated with triple therapy, and a stool test confirmed eradication in 2016.

A/P Last Updated by HALL,NOAH M. @ 13 Apr 2017 1746 EDT

1. Irritable bowel syndrome with diarrhea:

32 y/o male with IBS-D reports minimal benefit with dietary modification.

Predominant symptom is abdominal pain and episodes are closely associated with anxiety.

- Will start trial of Metamucil for stool bulking
- If bloating/flatulence becomes an issue, consider transition to a non-fermentable fiber (citrucel OTC)
- Will also provide Levsin SL for symptomatic relief
- Recommended continued f/u with Behavioral Health provider, and could discuss a trial of a low-dose TCA at bedtime as a centrally-acting pain modulator
- F/u in GI clinic in 3-4 months
- Could consider a trial of Rifaximin in the future if no benefit

Medication(s): -PSYLLIUM/SUCROSE--PO 3.4GM/SCOOP POWD - TAKE ONE SCOOP EVERY DAY MIXED IN LIQUID. AFTER TWO WEEKS INCREASE TO TWICE EVERY DAY #2 RF3

Ordered By: HALL,NOAH M. Ordering Provider: HALL, NOAH MONTGOMERY

-HYOSCYAMINE IR--PO 0.125MG TBSL - DISSOLVE 1 TABLET UNDER TONGUE EVERY EIGHT HOURS AS NEEDED FOR ABDOMINAL PAIN #30 RF3 Ordered By: HALL,NOAH M.

Ordering Provider: HALL, NOAH MONTGOMERY

Disposition Last Updated by HALL,NOAH M. @ 13 Apr 2017 1747 EDT

Released w/o Limitations

Follow up: as needed in 3 to 4 month(s) in the GI CL BE clinic or sooner if there are problems.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding.

Dx Interview

Appointment Comments:

CAC

Note Written by BENTON, JIKESHA R @ 10 Feb 2017 1406 EST

SM Merwin is as 31 year old, single, Caucasian, male, AD USN E-6
 Cryptologist. SM was seen for a 1 hour clinical interview by LT Martinez on
 02FEB17 under Dr. Benton's supervision. This writer engaged in 2 hours of
 chart review and 5 hours of psychological report preparation and writing. A
 1 hour feedback session was scheduled after the conclusion of the clinical
 interview. LT Martinez administered the MCMI-III, MMPI-2, and RISB on
 02FEB17.

Initial Impressions

Psychological testing results were consistent with the established diagnoses
 of Generalized Anxiety Disorder. SM Merwin does not meet criteria for
 Borderline Personality Disorder. SM Merwin endorsed anxious ruminative
 thoughts and stress caused by feelings of guilt. SM Merwin's pattern of
 unstable relationships appears to be more in line with Schizoid personality
 traits that may have been adaptive at a young age in the context of his
 childhood physical and emotional abuse. SM Merwin exhibits a lack of interest
 in social relationships, a tendency towards a solitary lifestyle, emotional
 coldness, and apathy. Individuals with Schizoid traits may also demonstrate a
 rich, elaborate and exclusively internal fantasy world. SM Merwin indicated
 he enjoys the fantasy world of movies and frequently finds himself
 daydreaming.

Mental Status Exam

Mental status examination revealed an alert, fully oriented, appropriately
 dressed and groomed male who appeared his stated age. SM Merwin presented
 with a pleasant mood and congruent affect. Throughout the session, SM
 Merwin's mood and affect appeared unchanged, even when discussing difficult
 or emotional topics. SM Merwin maintained appropriate eye contact throughout
 the session. SM Merwin was engaged in the interview and testing. His speech
 was normal in tone and rate. Cognition was grossly intact and abstraction was
 adequate. Recent and remote memory was intact. Thought process was clear and
 goal oriented. SM Merwin did not exhibit ideas of reference, paranoia, or
 delusions. There was no evidence of mania. Judgment and impulse control were
 good. No indication of psychomotor retardation or agitation. SM Merwin denied
 current suicidal or homicidal ideation, plans, or intent.

Risk Assessment

SM Merwin has a history of suicidal ideation occurring approximately once a
 month since adulthood. His protective factors include his job, his hobby of
 creating video games, and wanting to find purpose in his life. SM Merwin has
 low social support, but this does not seem to be a significant stressor. SM
 Merwin does not have a history of attempts and denies access to lethal means.
 He denied current ideation, plan, or intent. SM Merwin is currently assessed
 at a mild risk for suicide, and should continue to be monitored by his
 healthcare providers.

Note Written by BENTON, JIKESHA R @ 07 Feb 2017 1531 EST

Reason for Visit

Visit for: Psychological Testing. Assessment time 5.5 hrs. PT denied any physical pain. He c/o'ed of issues w/ interpersonal relationships. PT discussed his history of physical and emotional abuse by his father. He was cooperative and no management problem. The raw data can be found in room 7131. The report will be uploaded once complete.

History of present illness

The Patient is a 31 year old male.

He reported: Feeling numb; he appeared apathetic w/ a flat affect. Not thinking about suicide. No homicidal thoughts, no hallucinations, and not hearing voices when no one is talking.

Compliant with testing: Y /

Oriented X4 Y /

Risks reported to patient treatment team NA/ none at this time

Provider follow-up scheduled Y /

If yes date is: ___ scheduled for the Dx interview w/ 2 LT Hannah Martinez; the feedback session is pending.

Subjective

The patient was seen to discuss participation in a psychological evaluation requested by his provider. The purpose, nature and limits of confidentiality were explained to the patient and all questions were answered.

Tests

He completed the RISB and the LNA.

Laboratory Studies:**Psychometric:**

Minnesota Multiphasic Personality Inventory (MMPI), Millon clinical multi-axial inventory, and projective administration of psychologic test.

bodybodyReason for Visit g27

Visit for: Abdominal pain.eg

History of present illness g2

The Patient is a 31 year old male.

31 yo M here for abdominal pain. Reports a long history of GI symptoms, dating back to childhood. Symptoms have been more disruptive over the past few years. Notes generalized sharp abdominal pain about every other day, that peaks prior to defecation and is relieved after bowel movements. Typically has 1-2 soft-liquid stools per day, infrequently with urgency. Symptoms may be worse with intake of insoluble fibers. Also worse during physical activity and with increased anxiety/stress. Reports he has never been formally diagnosed and has not been on treatment for these symptoms. Does consume cheese several times per week, and splenda on a daily basis.

Of note, patient underwent CT A&P in 2012 for the same abdominal pain, which showed focal colitis at the hepatic flexure with proximal stool retention. Colonoscopy (McNally) in 2012 showed mild congestion in the sigmoid, but biopsies were unremarkable. A subsequent MRE was completely normal. He saw GI earlier this year after he was noted to have a +serum AB to H.pylori. He was treated with triple therapy, and a stool test confirmed eradication in June.

Patient: MERWIN, DANIEL DENNIS

Specimen #: NS12-23631

Accessioned: 10/18/12

Pathologist: Ross Barner, COL MC USA

SPECIMEN:

A: ascending colon B: sigmoid colon

=====

==

-==

FINAL DIAGNOSIS:

A. ASCENDING COLON, BIOPSY:

- BENIGN COLONIC MUCOSA WITH LYMPHOID AGGREGATE.

B. SIGMOID COLON, BIOPSY:

- BENIGN COLONIC MUCOSA WITH LYMPHOID AGGREGATES.

Comment: There is no evidence of acute cryptitis, architectural distortion, or dysplasia.

rx/10/19/12

** Report Electronically Signed Out **

Ross Barner, COL MC USA

ADDITIONAL HISTORY: CT examination with right-sided colonic thickening
 and

equalization of small bowel. Recent colonoscopy and without lesion the
 terminal

ileum a concern stenosis or inflammation of the distal ileum.

TECHNIQUE: Standard MR enterocleisis protocol; Three plane localizer,
 coronal

FIESTA, axial T2 SS FSE, axial and coronal T2 SS FSE, axial and coronal
 FIESTA

fat sat, axial SPGR in and out of phase, axial and coronal LAVA pre-and
 postcontrast MRI of the abdomen.

COMPARISONS: CT abdomen/pelvis 10/11/12

FINDINGS:

Bowel loops are adequately distended without focal stenosis, stricturing,
 or

luminal narrowing. There is normal bowel peristalsis and motion observed
 on the

cinematic images. Minimal mural thickening of the mid jejunum observed at
 the

left upper quadrant without corresponding abnormal mucosal enhancement,
 stricturing or stenosis.

The liver and gallbladder are normal without intra-or extrahepatic biliary
 ductal dilatation. The spleen, pancreas, adrenals, and kidneys are
 normal.

No intra-abdominal mass or fluid collection. No enlarged abdominal or
 pelvic

lymph nodes.

Osseous marrow signal is nonpathologic.

IMPRESSION:

No abnormal areas of enhancement or mural thickening within the
 gastrointestinal

system, specifically evidence of active inflammation at the site of

ADDITIONAL HISTORY: Abdominal pain.

TECHNIQUE: CT of the abdomen and pelvis was performed under standard
abdomen/pelvis CT protocol with 5 mm axial helically acquired images
obtained

from the level of the diaphragm to the level of the pubic symphysis after
the

intravenous administration of 110 mL Isovue 370 and oral contrast.

Coronal and

sagittal reformatted images were also obtained.

COMPARISONS: Acute abdominal series 10/10/12.

FINDINGS:

Lung bases are clear.

Liver parenchyma and vasculature is unremarkable. Normal biliary tree
without

intra-or extrahepatic biliary ductal dilatation. Pancreas, spleen,
adrenals,

and kidneys are normal. No identifiable ureteral abnormalities.

Fluid-filled

urinary bladder is unremarkable.

Enteric contrast visualized to the level of the mid ileum. Stomach is
normal.

There is fecal material and air noted within the distal ileum extending to a mildly distended stool filled cecum. The appendix is identified and is normal.

There is a focal area of vascular prominence involving the mesentery at the

level of the hepatic flexure. The colon wall at this level appears mildly thickened but otherwise decompressed. The colon distal to the hepatic flexure

is decompressed and normal in appearance.

Shotty subcentimeter mesenteric lymph nodes about the upper abdomen. No intra-abdominal mass or fluid collection. Vascular structures are normal in

configuration.

Pelvic organs are unremarkable. No free pelvic fluid. No pelvic or inguinal lymphadenopathy.

Soft tissues, muscles, and osseous structures are unremarkable.

IMPRESSION:

Focal colitis at the level of the hepatic flexure with proximal stool retention

and fecalization of small bowel. Findings are nonspecific and may be representative of an acute infection or inflammatory etiology such as Crohn's

disease. Clinical correlation is recommended.

Note: Findings above were discussed with Dr. Hardware, via telephone at 0450

hours on 10/11/12.

A/P Written by COPSEY,HELEN C @ 04 Oct 2016 1623 EDT

1. Irritable bowel syndrome with diarrhea: Clinical history is consistent with IBS-D. This diagnosis was discussed with the patient in detail and all questions were answered. Goals of management were reviewed including options such as natural interventions/ dietary change/ stress management, all the way to low dose TCA therapy. He v/u and opts to proceed as detailed below.

PLAN:

1. Celiac panel.
2. Strict dairy free trial x 2 weeks.
3. Stop Splenda.
4. Pending progress, consider 2 week course of Xifaxan.
5. F/u with me directly via phone/email/relay health with updates.

Disposition Written by COPSEY,HELEN C @ 04 Oct 2016 1623 EDT

Released w/o Limitations

Follow up: as needed .

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding.

45 minutes face-to-face/floor time. >50% of appointment time spent counseling and/or coordinating care.

bodybodyChief complaint g1

The Chief Complaint is: 31 active duty navy from Ft Meade referred by colleague (dr David Thompson) for dysgusia of approximately 8 months duration. Specifically, patient indicates that on 16 Oct 2015, he was making pizza and noticed the alteration in taste. He presented to his nurse practitioner on 9 Nov 2015 and was referred to ENT. Smell is fine. NO tobacco (social smoker about 9 years ago). Patient does have a h/o alcohol dependence requiring counseling (notes in AHLTA indicate that therapy began in Aug 2014). MRI Brain (15 April 2016) = Normal olfactory eloquent structures.eg

History of present illness g2

The Patient is a 31 year old male.

He reported: Past medical history reviewed, problem list reviewed, medication list reviewed, family history reviewed, and surgical history reviewed.eg

Past medical/surgical history g4

Reported:

Recent Events: An active illness Longstanding history of irritable bowel syndrome. History of H. Pylori and GERD (followed by GI).eg

Physical findings g8

Neck:

? Neck: No palpable adenopathy.

Nose:

Right Side Of Nose:

? Examined.

Left Side Of Nose:

? Examined Moderate nasal septal deflection to the left with fracture / dislocation at the bony cartilagenous junction. No infectious, inflammatory nor obstructive pathology noted.

Oral Cavity:

General condition was good S/p tonsillectomy. + discoloration and brownish/green film noted on posterior 1/3 of the tongue. Mucosa otherwise pale pink and moist. + discoloration of the teeth.

Tongue: ? Mucositis scale.eg

A/P Written by XYDAKIS,MICHAEL S @ 07 Jun 2016 1356 EDT

1. Unspecified disturbances of smell and taste

2. Glossitis

3. Gastro-esophageal reflux disease without esophagitis: Sniffen extended battery 16 panel odorant test performed. Patient scored 16/16 with rapid, crisp reliable responses. Olfactory threshold testing performed. Patient scored 8/16 which is normal for age. Olfactory discrimination was normal. Burghart taste strips and sprays administered. Patient was able to discern tastes (sweet, salty, sour, bitter) at even the lowest concentrations. Hence, completely normal taste. A/P: Dysgusia due to mild glossitis which is due to GERD up to the level of the hypopharynx and base of tongue. Patient is scheduled to see GI in the next week or so. Likely his symptomatology will resolve once his acid reflux is under control and the tongue is no longer inflamed. Would consider Nystatin or mycelex oral troches. However, it would be preferable to address the underlying cause of the problem (i.e. Acid reflux) and see if the tongue inflammation resolves. Patient understands and agrees with this approach. He will send me an e-mail to assess interval change.

bodybodyChief complaint g1

The Chief Complaint is: + h pylori test.eg

History of present illness g2

The Patient is a 31 year old male.

<<Note accomplished in TSWF-CORE>>

31 year old male referred from ENT when during w/u of dysgeusia was found to + serum H pylori Ab and presents for further management. Patient states he has never been treated for h pylori.

He also states that he has had 'ibs pain' since age 15. The pain is in the upper abdomen described as sharp and does not radiate. The pain can last minutes to longer and resolves once he goes to the bathroom having a soft stool; bristol type 5-6. Episodes occur weekly and are triggered by certain foods (spicy foods/fiber filled foods).

Of note, he went to the ED a few years ago for similar abdominal pain, he was then seen in the GI clinic and found to have a normal MRE after initial colonoscopy was concerning for thickened folds. He was lost to follow up.

Heartburn burning sensation - 2x per month, abdominal pain, and diarrhea.eg

Allergies g24

A/P Last Updated by SHAH,NISHA A @ 11 May 2016 1553 EDT

1. Helicobacter pylori [H. pylori] as the cause of diseases classified elsewhere B96.81: 31 year old male with incidental finding of h pylori, unlikely related to dysguesia but would be interested at follow up to see if treatment affects symptoms. As it is a carcinogen, would recommend therapy.

No exposure to antibiotics in last 6-8 months, will do triple therapy.

Patient counseled on importance of compliance as well as confirmation of eradication two weeks after stopping PPI therapy.

Medication(s): -PANTOPRAZOLE--PO 40MG TBDR - TAKE ONE TABLET BY MOUTH TWICE A DAY FOR TWO WEEKS #28 RF0 Ordered By: SHAH,NISHA A Ordering Provider: SHAH, NISHA AMISH

-AMOXICILLIN--PO 500MG CAP - TAKE TWO CAPSULE BY MOUTH TWICE A DAY FOR TWO WEEKS #56 RF0 Ordered By: SHAH,NISHA A Ordering Provider: SHAH, NISHA AMISH

-CLARITHROMYCIN--PO 500MG TAB - TAKE ONE TABLET BY MOUTH TWICE A DAY FOR FOURTEEN DAYS #28 RF0 Ordered By: SHAH,NISHA A Ordering Provider: SHAH, NISHA AMISH

Laboratory(ies): -H PYLORI AG, EIA (Routine): to be done two weeks after stopping protonix Ordered By: SHAH,NISHA A Ordering Provider: SHAH, NISHA AMISH

2. Irritable bowel syndrome with diarrhea K58.0: No red flags and triggers seem to be primarily food/stress. Will first focus on understanding triggers with food diary and assess if high fodmap (sheet given), After two week of obeservation, asked that he eliminate one food a week from his triggers. Plan to see back in 6-8 weeks and decide next step in management.

bodybodyHistory of present illness g2

The Patient is a 31 year old male.

He reported: Encounter Background Information: SUBJECTIVE: Pt is a 31 yo
 WM who injured his left ankle 1.5 years ago while sprinting. The MRI showed
 a thickening of his ligament. He was treated in PT here. His pain has been
 off and on until two months ago when his foot was plantarflexed. He has had
 no recent injury. He reports that his pain is 2-3/10 at rest, 4-5/10 with
 activity. Mild swelling noted laterally. Pain increases with walking and
 the pushing off of his foot and going up and down stairs. Pain decreases
 with foot into the neutral position. He states he uses no meds--see AHLTA
 for medication reconciliation. He works with computers, exercises
 moderately running/walking 3-11 miles. He had new xrays three days ago which
 appear WNL. He learns without preference. His goal is to have a pain free
 ankle. No BTL. ~OBJECTIVE: FROM ankle left, strength in ankle
 dorsiflexors, plantarflexors, everters, inverters 5/5. negative drawer.
 Mild tenderness along lateral malleolus on left. Mild swelling noted. No
 heat or warmth or discoloration noted. Gait WNL, heel and toe walk within
 normal limits. ~ASSESSMENT: Pt has chronic left ankle pain which will
 benefit from skilled physical therapy program. ~PLAN: Home program of
 eccentric heel lowering and calf stretches for three weeks and then followup.
 ~GOAL: Decrease pain 75% in three weeks STG. Increase running without
 pain to four miles in 2 months. Pt educated on exercises and given handouts.
 ~PROGNOSIS: good. TODAY'S INTERVENTION: Pt reports that his pain is

CC: Genital warts

HPI: 31 yo man who was referred here by PCM for further evaluation and/or management of warts on penis not responsive to topical Aldara.

Hx of skin cancer: None ? BCC ? SCC ? MM ?

Family Hx of melanoma: None

Drug Allergies: None

Medication list reviewed ?

Pain (10-pt scale): 0

Tobacco Use: Y ? N?

Alcohol Use: Y ? N ?

OBJECTIVE:

Fitzpatrick Type: I ? II ? III ? IV ? V ? VI ?

Standby: N/A

A focused skin exam was notable for the following:

1.Scattered (~10) skin-colored, verrucous papules on the dorsal penis.

A/P Last Updated by LAM,THOMAS KIN @ 24 Feb 2016 1330 EST

1. Anogenital (venereal) warts: Lesions on exam c/w warts. Treated today with LN2. Will give Condylox for continued Tx at home. Also counseled Pt on wart clinic on Thursday mornings. Pt voiced understanding and agreement.

Procedure(s): -Destruction Of Benign Lesion By Cryosurgery x 1 - After discussion of risks, benefits, and alternatives, verbal consent was received and cryo applied to lesions in standard fashion. Tx was applied in a pulsed fashion to minimize collateral tissue injury. Pt was instructed to use Vaseline ointment to the area(s) until healed. Pt tolerated the procedure well and left in stable condition.

Locations: DORSAL PENIS x8

Medication(s): -PODOFILOX--TOP 0.5% SOLN - APPLY TWICE A DAY FOR 3 DAYS THEN STOP FOR 4 DAYS, REPEAT WEEKLY AS NEEDED #1 RF2

S/O Note Written by BAH,ROBERT J. @ 19 Feb 2016 0912 EST

bodybodyHistory of present illness g2

The Patient is a 31 year old male.

He reported: Encounter Background Information: SUBJECTIVE: Pt is a 31 yo
 WM who injured his left ankle 1.5 years ago while sprinting. The MRI showed
 a thickening of his ligament. He was treated in PT here. His pain has been
 off and on until two months ago when his foot was plantarflexed. He has had
 no recent injury. He reports that his pain is 2-3/10 at rest, 4-5/10 with
 activity. Mild swelling noted laterally. Pain increases with walking and
 the pushing off of his foot and going up and down stairs. Pain decreases
 with foot into the neutral position. He states he uses no meds--see AHLTA
 for medication reconciliation. He works with computers, exercises
 moderately running/walking 3-11 miles. He had new xrays three days ago which
 appear WNL. He learns without preference. His goal is to have a pain free
 ankle. No BTL. ~OBJECTIVE: FROM ankle left, strength in ankle
 dorsiflexors, plantarflexors, everters, inverters 5/5. negative drawer.
 Mild tenderness along lateral malleolus on left. Mild swelling noted. No
 heat or warmth or discoloration noted. Gait WNL, heel and toe walk within
 normal limits. ~ASSESSMENT: Pt has chronic left ankle pain which will
 benefit from skilled physical therapy program. ~PLAN: Home program of
 eccentric heel lowering and calf stretches for three weeks and then followup.
 ~GOAL: Decrease pain 75% in three weeks STG. Increase running without
 pain to four miles in 2 months. Pt educated on exercises and given handouts.

bodybodyChief complaint g1

The Chief Complaint is: Rash.eg

Reason for Visit g27

Visit for: STAFFED WITH DR. [] HANDFIELD [] GRATRIX [] GREEN [] LACKEY [] KENTOSH [x] MARQUART [] MEYERLE [] STEARNS [] SPERLING [] DARLING

30 yo M with 1 month hx of painful eroded papules in the groin and on the penis, STD workup negative per PCM and previous course of valtrex did not improve. Has hx of multiple sexual partners. Here for further evaluation, notes he does have hx of genital warts and uses aldara on them but has not been using it on the areas in question. Partner currently does not have any STD or similar rash. Uses condoms. Has recently had bronchitis with subjective fevers which began before the papules appeared. HIV testing recently negative.eg

History of present illness g2

The Patient is a 30 year old male.

He reported: Past medical history reviewed and updated dermatology problem list.

No previous history of skin symptoms. Rash:

Visit is not deployment-related.eg

Past medical/surgical history g4

Reported:

Surgical / Procedural: Surgical / procedural history reviewed and updated in patient's Problem List.

Medications: Medication history was reviewed and updated in patient medication list as needed.

Diagnoses:

No eczema

No psoriasis.

No malignant skin neoplasm

No basal cell carcinoma of the skin

No squamous cell carcinoma of the skin.

No malignant melanoma of the skin

Final report

A/P Last Updated by CUNNINGHAM,RACHEL E @ 29 Sep 2015 1037 EDT

1. SKIN NEOPLASM GROIN: Given punched out erosions on groin hx of multiple sexual partners, will get DFA today to rule out HSV infection. Previous tests showed non acute phase of HSV (IgG positive, IgM negative). Has had course of valtrex 500 twice daily for 10 days 1 month ago but did not resolve, may not have been correct treatment or may represent atypical presentation of another herpetic infection. Rest of STD workup negative.

Laboratory(ies): -HERPES DFA ~ (Routine) Ordered By: CUNNINGHAM,RACHEL E

Ordering Provider: CUNNINGHAM, RACHEL ELIZABETH; VARICELLA DFA (Routine)

Ordered By: CUNNINGHAM,RACHEL E Ordering Provider: CUNNINGHAM, RACHEL ELIZABETH

2. FOLLICULITIS DECALVANS: Tufted folliculitis in the past on biopsy with scarring alopecia from inflammation and manipulation. Continued reports of itching, flaking and occasional pustules. Will use topical steroid solution daily as needed with antifungal shampoo.

Medication(s): -FLUOCINOLONE--TOP 0.01% SOLN - APPLY TO SCALP EVERY DAY AS NEEDED #1 RF3 Ordered By: CUNNINGHAM,RACHEL E Ordering Provider: CUNNINGHAM, RACHEL ELIZABETH

A/P Last Updated by TAYLOR,BRADLEY M @ 23 Jun 2015 1135 EDT

1. Alopecia: Tufted, scarring alopecia on scalp after reported infection about 6 years ago. Patient feels it is slowly progressing. Mild erythema and some scale which feel most likely represents overlying mild seb derm but cannot completely rule out active scarring process. Discussed options with patient to include treating for seb derm and monitoring response vs biopsy for further evaluation. Patient elected to proceed with biopsy. Two punch biopsies completed today. Perilesional and normal posterior scalp. Tolerated well. Wound care discussed. Follow up in 10 to 14 days for suture removal and biopsy results. Sooner for concerns. Ddx includes mature scar w/overlying seb derm v folliculitis decalvans v LPP v other scarring etiologies.

Seen and d/w Dr. Stearns.

Procedure(s): -Biopsy Skin x 1 - Universal protocol requirements were met per WRNMMC Policy. Patient's identification was checked (name & birthdate). procedure and site, side matches the consent form. the lesion was prepped with alcohol. local anesthesia was provided by local injection with a 30g

S/O Note Written by ZEMBRZUSKA,HANNA DOMINIKA @ 23 Apr 2015 1113 EDT

bodybodyHistory of present illness g2

The Patient is a 30 year old male.

<<Note accomplished in Tri-Service Behavioral Health AIM>>

30 y/o single Caucasian man E-6/AD/USN, with approximately 9 ? years continuous active duty service, currently assigned to Navy Information Operations Command (NIOC) at Fort Meade, Maryland with a past psychiatric history of GAD and Alcohol Use Disorder. Pt initially presented to Integrative Care on 16JUN2014 and was diagnosed with GAD and neurotic excoriation (scalp picking when anxious). He was then referred to a LCSW at WRNMMC for therapy and attended therapy sessions until 30OCT2014. He was then command referred to SARP on 17MAR2015 and diagnosed with Alcohol Use Disorder, moderate to severe. SARP referred pt to a 28 day inpatient alcohol rehab at Ft. Belvoir from which the pt was discharged yesterday. SARP would like psychiatrist to evaluate pt for psychotropic medication for his depressed mood, anxiety, and sleep symptoms. Pt reports that every day he experiences either a depressed mood or apathy. He does have moments of happiness when he works on his computer game or cooks, but these moments don't last long. He often wonders what the point of life is and what his purpose in life is. He often worries about the future and tasks he has to complete. He feels that he is always planning and runs through scenarios (good version, bad version) of things in his head. He is frequently irritable, impatient, and judgmental of others. His anxious ruminations lead to initial insomnia. He did sleep well last night, but in rehab he was using Melatonin at bedtime. He has been started on Zoloft, but has not noticed a benefit yet. Denies side effects.

From SARP note: The SM self-referred for SARP evaluation due to his growing concern about his drinking and inability to stop. According to the SM, his alcohol of choice is vodka. He prefers to drink alone at home. His drinking frequency is daily. He reported an increase in his drinking, over the past 8 months, to daily drinking. He described drinking 2 ? 3 self-poured drinks, which has an estimated 4 ounces of alcohol per drink. He described the appeal in terms of the calming effect on his mind, specifically to dampen his anxious ruminations and ?obsessing.? He further reported that drinking helps prepare him for sleep onset (he has had problems with initial insomnia). Clinical interview further revealed evidence for marked tolerance, significant spending on alcohol (\$400 - \$500 per month), hangovers (every other week), being told that he drinks too much (past girlfriends), drinking despite the consistent worsening of his negative mood state, and unsuccessful efforts to reduce/quit drinking. In his personal reflection, he indicated that he does not like himself relative to his drinking and desires to stop. He recognizes that there are multiple triggers to his drinking and usually these involve longstanding feelings of disappointment, frustration, and loneliness. It should be noted that the SM indicated that he has been engaging in painful introspection, particularly regarding his childhood and family life.

Medication list reviewed with patient, reconciliation completed, and list given to patient.

Visit is not deployment-related.

Pain Severity 0 / 10.eg

Allergies g24

Current Allergies Reviewed. NKDA.eg

Current medication g3

Zoloft 50mg daily started on 26MAR2015

Melatonin for insomnia.eg

Past medical/surgical history g4

Reported:

Recent Events: Medication compliance.

Medical: Reported medical history Neurotic excoriation (scalp picking when anxious)

Asthma during childhood

Allergic response to pets

Recurrent intestinal pain (possibly lactose intolerance)

PRK (2011)

and psychiatric history

* THERAPY: multiple visits with clinical social worker, Linda Nilsen, at WRNMMC, between August 2014 and October 2014. She documented Anxiety Disorder, NOS. The SM indicated that he discontinued his participation in treatment due to the limited impact of these visits.

* MEDS: Denies other medication trials

* INPATIENT/RESIDENTIAL CARE: Denies psychiatric hospitalizations. Completed 28 day inpatient alcohol rehab at Ft. Belvoir.

* SELF HARM OR MUTILATION/SUICIDE ATTEMPTS: Attempted suicide at 16 y/o by overdosing on Aspirin and Alcohol in context of conflict with father. Did not seek care. Attempted suicide (?) at 17 y/o by consuming a large quantity of alcohol and blacking out. Did not seek care. Denies self-injurious behavior.

Family history:

F: Alcohol use disorder

M: depression

Sister#1: depression, hx of suicide attempts

Sister#2: bipolar disorder, hx of suicide attempts, unknown drug abuse which led to loss of custody of 2 children

Maternal grandmother: bipolar

.eg

Personal history g5

Social history Pt is the oldest of 3 children from a Sacramento, California home, broken by divorce when the SM was a toddler (3-6 y/o). He and his two sisters were raised by their father, whose employment challenges qualified them for welfare. There was also a tumultuous home environment. Father was not involved with his children and was emotionally/physically abusive. Pt felt that he was an inconvenience to his father. Growing up pt had few friends because he would isolate himself. He left his family abruptly, upon graduation from high school, in 2003. Moved out of state and enrolled in college. He found himself 'bored' with college. He enlisted in the Navy in October, 2005, after dropping out of college, working two jobs, and being on the verge of 'living on the street.' There were mounting debts (rent, college tuition, basic apartment furniture) also at the time. He started as an Aviation Boatswain's Mate, then cross-rated in 2009 to Cryptologic Technician - Network. His duty stations have included USS ESSEX, Pensacola, and NIOC Maryland. He has been very successful in his enlisted service thus far, but has been disenchanted at his current Command because everyone is physically separated and it is not a tight knit command.

Pt was engaged to a Filipino girl he met while stationed overseas, but he ended the engagement in 2010 because she was 'crazy.' No kids.

Alcohol: Not using alcohol Not currently. Discharged yesterday from Ft.

Belvoir 28 day Residential Alcohol Treatment.eg

Subjective g6

Additional Screening Questions:

Are you having any thoughts about harming another person? Denies

Do you feel like you are at risk for workplace violence? Denies

PTSD CHECKLIST (PCL-C)

[2] Repeated, disturbing memories, thoughts, or images of a stressful experience from the past?

[0] Repeated, disturbing dreams of a stressful experience from the past?

[0] Suddenly acting or feeling as if a stressful experience were happening again (as if you were reliving it)?

[2] Feeling very upset when something reminded you of a stressful experience from the past?

[2] Having physical reactions (e.g., heart pounding, trouble breathing, or sweating) when something reminded you of a stressful experience from the past?

[1] Avoid thinking about or talking about a stressful experience from the past or avoid having feelings related to it?

[1] Avoid activities or situations because they remind you of a stressful experience from the past?

[0] Trouble remembering important parts of a stressful experience from the past?

[0] Loss of interest in things that you used to enjoy?

[0] Feeling distant or cut off from other people?

[2] Feeling emotionally numb or being unable to have loving feelings for those close to you?

[0] Feeling as if your future will somehow be cut short?

[0] Trouble falling or staying asleep?

[1] Feeling irritable or having angry outbursts?

[1] Having difficulty concentrating?

[1] Being 'super alert' or watchful on guard?

[0] Feeling jumpy or easily startled?

Add point values from each response. Total Score = 13 DATE:

IF you had a positive score on any of the above problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people? [] Not difficult [X] Somewhat difficult

[] Very difficult [] Extremely difficult

During the last 2 weeks have you had thoughts that you would be better off dead, or of hurting yourself in some way? [] Yes [X] No

If 'Yes', how often? [] Several days [] More than half the days []

Almost everyday.

Depression Screening:

[1] 1. Little Interest or pleasure in doing things

[1] 2. Feeling down depressed or hopeless

[0] 3. Trouble sleeping or sleeping too much

[1] 4. Feeling tired or little energy

[0] 5. Poor appetite or overeating

[0] 6. Feeling bad about self

[0] 7. Trouble concentrating on things

[1] 8. Moving or speaking slowly or being restless

[0] 9. Thoughts that you would be better off dead

Discussion of assessment and intervention

Tx Plan cont'd:

Diagnosis

Generalized Anxiety Disorder

Alcohol Use Disorder, moderate to severe

Active Problem List:

1. Anxiety, worry, irritability
2. Depressed/apathetic mood
3. Insomnia

Long-Term Goals:

1. Improve relationship/increase social support from mother and sister
2. Improve financial knowledge/pay off debts

Discussion of risk of assessment and intervention

Interventions Provided at this session:

Objective 1 (Corresponds to Goal #): Anxiety, worry, irritability

-

Interventions:

1. Increase Zoloft from 50mg to 75mg daily. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next session.
4. R/o OCD.

Objective 2 (Corresponds to Goal #): Depressed/apathetic mood

-

Interventions:

1. Increase Zoloft from 50mg to 75mg daily. Discussed r/b/se.
2. Continue SARP.
3. Will discuss pt being referred for individual therapy for CBT at next

Note Written by LAI, PHILOMENA C @ 24 Sep 2014 1547 EDT

Chief complaint

The Chief Complaint is: L ankle sprain

Visit for: Re- Evaluation

(9/24/2014)

Subjective: Patient presents to clinic reporting continue L ankle pain since his return doing PT as he has been walking, running, jumping a lot, L ankle swelling resurface, now pain on L ankle even walking for long distance. Patient states he will be doing his PFT in 2 weeks but will not be able to do the running portion of PT.

(8/8/2014)

Subjective: Patient reports he has no ankle pain with walking, he has done 2-mile walking, doing stairs with no pain, noticed bruising on L ankle and

Created: 16 Aug 2017

some swelling, L ankle looks slightly different from R, L ankle popping/cracking with movement and there is pain when that happens. Patient reports he has not tried running yet and he will be doing his PFT (1.5 m run) in Oct.

Objective: Observation: very mild swelling L ankle ROM: L ankle DF 10 deg, PF 45 deg, EV 15 deg, IV 35 deg Strength: L ankle 5/5 throughout.

Flexibility: mod tightness hamstrings, mild/mod tightness calf

Assessment/Plan: Improved L ankle ROM with full strength, bilateral hamstrings and calf tightness continue. Patient was instructed on continue with ankle ROM, emphasized importance of daily stretching, proper running gait. Patient will gradual progress to jog/run on his own Follow up in 4 weeks to re-assess.

History of present illness: INITIAL EVALUATION (6/27/2014): Patient is a 29 y/o M referred to physical therapy for evaluation and treatment of L ankle sprain. Patient initially injured L ankle in April 2014 while he was sprinting during softball game when his L foot went into the hole.

Since onset, symptoms have unchanged

Meds: reviewed in AHLTA.

Pain scale 72 hrs: current 0/10 best 0/10 worst 3/10

Description of pain: comes and goes

Aggravating factors: motion

Mitigating factors: rest, elevation, ice

Day pattern: episodic

Recent/previous treatment: none

Functional limitations: no running at this time, increased throbbing sensation after prolonged walking

Patient goals: to run again (patient used to run 5 miles per day 4-5 time per week).

Past medical/surgical history

Reported:

Past medical history reviewed and discussed. Co-morbidities: none

Diagnostics: x-ray L ankle in AHLTA

Medical precautions: none

Job duties: desk primarily.

Objective

Observation: genu and tibial varus, normal calcaneus alignment, mild swelling L lateral malleolus area

palpation: TTP lateral L ankle anterior to lateral malleolus

flexibility: mod tightness hamstrings, calf

Joint Mobility: normal L ankle joint mobility

Sensation/Reflex: intact

ROM: ankle: DF L15 deg R 13 deg, PF L 44 deg R 50 deg, IV L 35 deg R 35 deg, EV L12 deg R 15 deg, 1st ray ext L 50 deg R 70 deg, flex L 12 deg R 30 deg

Strength: DF - 5/5 bil, PF 5/5 bil, IV L 5/5 R 5/5, EV L 5/5 R 5/5

Special Tests: thompson - neg, talar tilt - neg, ant/post drawer

function: gait - no significant deviations, SLS EO - L/R = 30 sec, good ankle stability bil, SLHR L 25/25 R 25/25, no instability noted but fatigue quickly L with pain

Tests

Re-evaluation (9/24/2014): Patient with recurrent ankle pain, most likely repeated strain from excessive impact activities. Recommend patient hold off from jumping, squatting and running activities at this time to allow sufficient time for healing. Patient will need to continue strengthening and stretching program. Provided prescription for ankle brace to provide support.

Assessment (6/27/2014): Patient presented with decreased L ankle ROM s/p

ankle sprain, mild weakness of ankle IV and EV with no instability. Patient would benefit from physical therapy home based ex program to improve ROM and strength.

Rehab prognosis: good

Physical Therapy goals:

STG to be achieved in 3 weeks

Patient to be independent with HEP- met

Patient to increase ROM to: L ankle DF 10 deg, PF 40 deg, IV 35 deg EV 10 deg - met

LTG to be achieved in 6-8 weeks

Decrease pain to: 0/10

Increase MMT to: 5/5 - met

Improve function to: tolerate long distance walking without increased in symptoms

running 1 mile 50% pace with no increased in symptoms

Patient education: Patient educated on his/her condition in reference to pertinent anatomy and biomechanics using anatomical models and illustrations, self care, physical therapy and POC.

HEP instructions and performance (8/8/2014): stretch - hamstrings, calf, joint mobilization for DF/PF, ROM, alphabets

Plan of Care: Continue HEP for stretching and strengthening. Follow up in 5-6 weeks for re-evaluation.

re-assess.

History of present illness: INITIAL EVALUATION (6/27/2014): Patient is a 29 y/o M referred to physical therapy for evaluation and treatment of L ankle sprain. Patient initially injured L ankle in April 2014 while he was sprinting during softball game when his L foot went into the hole.

Since onset, symptoms have unchanged

Meds: reviewed in AHLTA.

Pain scale 72 hrs: current 0/10 best 0/10 worst 3/10

Description of pain: comes and goes

Aggravating factors: motion

Mitigating factors: rest, elevation, ice

Day pattern: episodic

Recent/previous treatment: none

Functional limitations: no running at this time, increased throbbing sensation after prolonged walking

Patient goals: to run again (patient used to run 5 miles per day 4-5 times per week).eg

Past medical/surgical history g4

Reported:

Past medical history reviewed and discussed. Co-morbidities: none

Diagnostics: x-ray L ankle in AHLTA

Medical precautions: none

Job duties: desk primarily.eg

Objective g9

Observation: genu and tibial varus, normal calcaneus alignment

palpation: no TTP

flexibility: mod tightness hamstrings, calf

Joint Mobility: decreased L TC ant/post mob, STJ med/lat mob

Sensation/Reflex: intact

ROM: ankle: DF L 3 deg R 13 deg, PF L 28 deg R 50 deg, IV L 24 deg R 35 deg,

EV L 6 deg R 15 deg, 1st ray ext L 56 deg R 70 deg, flex L 25 deg R 30 deg

Strength: DF - 5/5 bil, PF 5/5 bil, IV L 4+/5 R 5-/5, EV L 4+/5 R 5/5

Special Tests: thompson - neg, talar tilt - neg, ant/post drawer - neg

function: gait - no significant deviations, SLS EO - L/R = 30 sec, good ankle

stability bil, SLHR L 25/25 R 25/25, no instability noted.eg

Tests g10

Assessment (6/27/2014): Patient presented with decreased L ankle ROM s/p ankle sprain, mild weakness of ankle IV and EV with no instability. Patient would benefit from physical therapy home based ex program to improve ROM and strength.

Rehab prognosis: good

Physical Therapy goals:

STG to be achieved in 3 weeks

Patient to be independent with HEP

Patient to increase ROM to: L ankle DF 10 deg, PF 40 deg, IV 35 deg EV 10 deg

LTG to be achieved in 6-8 weeks

Decrease pain to: 0/10

Increase MMT to: 5/5

Improve function to: tolerate long distance walking without increased in symptoms

running 1 mile 50% pace with no increased in symptoms

Patient education: Patient educated on his/her condition in reference to pertinent anatomy and biomechanics using anatomical models and illustrations, self care, physical therapy and POC.

HEP instructions and performance (15 min): stretch - hamstrings, calf, joint

 SO Note Written by COPSEY,HELEN C @ 24 Oct 2012 0936 EDT

Reason for Visit

Visit for: R/O of IBD.

History of present illness

The Patient is a 27 year old male.

This is a WM, AD PO2, who presents for R/O of IBD. He reports a long history
 of presumed IBS presenting with intermittent lower abdominal cramping that
 occurs several times per week, and is triggered by dairy intake, anxiety, and
 physical activity. This can be associated with looser stool and mild urgency,
 although in general he reports a soft stool each day. An evaluation for these
 symptoms along with isolated BRBPR in 2005 (IL) includes a CT scan showing
 moderate stool retention in the colon, and a flex sig that was reportedly
 limited d/t patient discomfort. He denies any rectal bleeding since that
 time. He does endorse occasional oral aphthi but otherwise denies any
 additional complaints. His weight has been stable.

Earlier this month he experienced worsening of his baseline abdominal pain,
 possibly precipitated by consuming a milk-shake. A CT in the ER showed focal
 colitis at the right colon (hepatic flexure) with fecalization of the small
 bowel, concerning for IBD. CRP was 1.2, labs otherwise nl. A follow-up

colonoscopy with Dr. McNally showed clogged appearing mucosa in the left colon. Images of the right colon/ cecum are limited due to liquid stool, and the TI was not intubated per report. Biopsies are pending. The patient reports self-resolution of the pain, and has since been feeling back to baseline.

Allergies

ASA- (nausea).

Past medical/surgical history

Reported:

Past medical history

- Allergic asthma (cats); Headache, NOS

Surgical / Procedural: Prior surgery

- PRK, Tonsillectomy

Medications: Medication history

- Albuterol, Aleve prn (less than once per week)

(I personally reviewed the medication history, allergy history and compliance with medications with this patient)

Surgical:

Pre-op ASA class 1

Previous therapy

History of possible limitations and risks do not include complications from anesthesia

Personal history

Tob: (-)

Etoh: (2 drinks every other day)

Drug use: (-)

Family history

No chronic liver disease

No malignant neoplasm of the large intestine

No malignant neoplasm of the gastrointestinal tract

No known FH of IBD, autoimmune diseases.

Review of systems

Systemic: Not feeling tired (fatigue). No fever, no chills, no night sweats, and no recent weight loss.

Head: No headache.

Eyes: No vision problems.

Otolaryngeal: No hoarseness, no lump in the throat, and no mouth sores.

Cardiovascular: No chest pain or discomfort and no palpitations.

Pulmonary: No dyspnea and no cough.

Gastrointestinal: No dysphagia, no pain on swallowing, no heartburn, no regurgitation, no early satiety, no nausea, no vomiting, no hematemesis, no hematemesis ('coffee grounds'), no abdominal swelling, no jaundice, no recent increase in bowel frequency, and not decrease. No tenesmus, no melena, no hematochezia, no acholic stools, no steatorrhea, and stool diameter is not smaller. No change in consistency of stool and no nocturnal diarrhea. No rectal pain.

Genitourinary: No urinary symptoms.

Endocrine: No endocrine symptoms.

Hematologic: No tendency for easy bruising.

Musculoskeletal: No arthralgias, new. No nonspecific pain, swelling, and stiffness.

Skin: No pruritus, no change in skin texture, new, and no rash, new.

Physical findings

Vital Signs:

Current vital signs reviewed.

Standard Measurements:

Patient was not observed to be obese.

General Appearance:

Awake. Alert. Oriented to time, place, and person. Well developed.

Well nourished. In no acute distress. Patient did not appear uncomfortable. Not acutely ill. Not chronically ill.

Neck:

Appearance: Of the neck was normal.

Eyes:

General/bilateral:

Sclera: Showed no icterus.

Oral Cavity:

Normal OP clear, Mallampati score = 1.

Chest:

Visual inspection revealed no abnormalities.

Lungs:

Normal CTA B.

Cardiovascular:

System: normal RRR, no M or G.

Abdomen:

Normal soft, NT/ND, +BS.

Neurological:

Level of consciousness was normal.

Speech: Normal.

Gait And Stance: Normal.

Psychiatric:

Mood: Euthymic.

Affect: Normal.

Thought Processes: Not impaired.

Skin:

General appearance was normal. No jaundice. No skin lesions.

Therapy

Medical regimen review -- medication reconciliation performed.

ba/DICTATION DATE: 23 November 2005

CT SCAN OF THE ABDOMEN AND PELVIS WITH CONTRAST:

Technique: 7.5 mm cross-sectional images of the abdomen and pelvis were
 obtained following oral and intravenous introduction of contrast.

Findings: There is a normal appearance of the liver, spleen, and
 pancreas.

There is no gallstones. No dilatation of biliary ducts or pancreatic
 duct

identified. There is no enlargement of the adrenal glands. There is no

Supervised By: BERNARD, JACQUELINE, MD, CDR, USN

Supervised By Date: 11-Oct-2012 08:16:00

Amended Report Text:

ADDITIONAL HISTORY: Abdominal pain.

TECHNIQUE: CT of the abdomen and pelvis was performed under standard abdomen/pelvis CT protocol with 5 mm axial helically acquired images obtained

from the level of the diaphragm to the level of the pubic symphysis after the

intravenous administration of 110 mL Isovue 370 and oral contrast.

Coronal and

sagittal reformatted images were also obtained.

COMPARISONS: Acute abdominal series 10/10/12.

FINDINGS:

Lung bases are clear.

Liver parenchyma and vasculature is unremarkable. Normal biliary tree without

intra-or extrahepatic biliary ductal dilatation. Pancreas, spleen, adrenals,

and kidneys are normal. No identifiable ureteral abnormalities.

Fluid-filled

urinary bladder is unremarkable.

Enteric contrast visualized to the level of the mid ileum. Stomach is normal.

There is fecal material and air noted within the distal ileum extending

to a

mildly distended stool filled cecum. The appendix is identified and is normal.

There is a focal area of vascular prominence involving the mesentery at the

level of the hepatic flexure. The colon wall at this level appears mildly

thickened but otherwise decompressed. The colon distal to the hepatic flexure

is decompressed and normal in appearance.

Shotty subcentimeter mesenteric lymph nodes about the upper abdomen. No intra-abdominal mass or fluid collection. Vascular structures are normal in

configuration.

Pelvic organs are unremarkable. No free pelvic fluid. No pelvic or inguinal

lymphadenopathy.

Soft tissues, muscles, and osseous structures are unremarkable.

IMPRESSION:

Focal colitis at the level of the hepatic flexure with proximal stool retention

and fecalization of small bowel. Findings are nonspecific and may be representative of an acute infection or inflammatory etiology such as Crohn's

disease. Clinical correlation is recommended.

Note: Findings above were discussed with Dr. Hardware, via telephone at 0450

hours on 10/11/12.

A/P Last Updated by COPSEY,HELEN C @ 24 Oct 2012 1002 EDT

1. Imaging Studies Nonspecific Abnormal Findings: CT concerning for colitis and fecalization of SB ? radiographic artifact, constipation, acute vs. chronic inflammation, stenosis. Colonoscopy with limited evaluation of right colon, ICV, distal ileum. Recommend MRE for further evaluation of small bowel as d/w Dr. Kikendall. He may ultimately require repeat colonoscopy, however will await biopsy results prior to determining next steps. Patient voices understanding/ agreement.

2. abdominal pain: Patient with long history of intermittent abdominal pain ? due to IBS vs. dietary intolerance vs. inflammatory. Will proceed with evaluation to r/o IBD, however if negative encouraged patient to continue f/u with GI for management of chronic symptoms.

Disposition Last Updated by COPSEY,HELEN C @ 24 Oct 2012 1003 EDT Released w/o Limitations

Follow up: in the GI INFLAM BOWEL DIS BE clinic. - Comments: Will call pt 850-602-8501 after obtaining pathology and discussing need for repeat colonoscopy with IBD staff.

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient who indicated understanding. - Comments: 45 minutes face-to-face/floor time. >50% of appointment time spent counseling and/or coordinating care.

Date of Birth:	[REDACTED] 1985	Admit Type:	Inpatient
Age:	27	Note Status:	Finalized
Attending MD:	Michael McNally, MD		

Procedure: Colonoscopy**Indications:** Generalized abdominal pain**Providers:** Michael McNally, MD (Doctor), Tiffany Cox, MD (Fellow), Stephanie R. Raskulnec, RN, Nickole R. Hooks, Technician**Patient Profile:** This is a 27 year old patient.**Referring MD:****Medicines:** Fentanyl 150 mcgs, Versed 4 mgs**Complications:** No immediate complications.**Requesting Provider:****Procedure:**

Pre-Anesthesia Assessment:

- Prior to the procedure, a History and Physical was performed, and patient medications and allergies were reviewed. The patient is competent. The risks and benefits of the procedure and the sedation options and risks were discussed with the patient. All questions were answered and informed consent was obtained. Patient identification and proposed procedure were verified by the physician in the pre-procedure area. Mental Status Examination: alert and oriented. Airway Examination: normal oropharyngeal airway and neck mobility. Respiratory Examination: clear to auscultation. CV Examination: normal. Prophylactic Antibiotics: The patient does not require prophylactic antibiotics. Prior

Anticoagulants: The patient has taken no previous anticoagulant or antiplatelet agents. ASA Grade Assessment: II - A patient with mild systemic disease. After reviewing the risks and benefits, the patient was deemed in satisfactory condition to undergo the procedure. The anesthesia plan was to use moderate sedation / analgesia (conscious sedation). Immediately prior to administration of medications, the patient was re-assessed for adequacy to receive sedatives. The heart rate, respiratory rate, oxygen saturations, blood pressure, adequacy of pulmonary ventilation, and response to care were monitored throughout the procedure. The physical status of the patient was re-assessed after the procedure.

After the risks of infection, bleeding, and perforation were explained to the patient, informed consent was obtained. A procedure team TIME OUT consisting of correct patient name, FMP and complete social security number, date of birth and procedure was conducted prior to the scope being passed under direct visualization. Throughout the procedure, the patient's blood pressure, pulse, and oxygen saturations were monitored continuously. Medication reconciliation was performed. The colonoscopy was performed without difficulty. The patient tolerated the procedure well. The quality of the bowel preparation was good.

Post Anesthesia Evaluation: No apparent anesthetic complications. The Colonoscope was introduced through the anus and advanced to.

**Findings:**

The perianal and digital rectal examinations were normal.

An area of congested mucosa was found in the descending colon. This was biopsied with a cold forceps for histology.

A/P Written by ROPP,CORBY D @ 29 Mar 2011 1446 CDT

1. visit for: preoperative exam: The risks and benefits and CRS alternatives eligible for this patient were discussed including PRK/LASIK options.

PRK was discussed as use of a brush to create a large abrasion like defect which will take several days to heal with aid of a CL. Potential of pain/discomfort was mentioned. Risks of haze which may cause loss of best vision was discussed. Significantly slower visual recovery than LASIK (up to 6 months) worsening of dry eye or causing dry eye, and infection were discussed. Glare and halos, new dry eye that may persist for 6 months or longer was mentioned. The use of MMC as surgeon preference in order to minimize risk of corneal haze development was discussed as well as it's unknown long -term affects on the cornea and that it is not FDA approved for CRS. It was mentioned that the Navy has a long history of successful application of MMC with much less haze formation and minimal side effects. The LASIK option was discussed as creation of a corneal flap which establishes a thinner corneal structure than PRK, but faster and less painful visual recovery. The lesser risk of haze was mentioned. The potential for re-lifting the flap if necessary for debri, folds, or re-treatment and risk for epithelial down-growth was discussed. The risk of flap dislocation although small was discussed. The risk for flap infection although small was discussed. The risk of worsening or creation of dry eye symptoms due to the corneal incision, as well as glare and halos at night during the healing process were discussed. The risk of worsened dry eye with age was also discussed, and that its long-term affects not known. The risk for multiple suction loss events, even during flap creation w/ potential for resultant aberrations was discussed.

It was mentioned that people who have either PRK or LASIK are generally happy and most would recommend to a friend w/ a few exceptions

After a discussion of the risks and benefits the patient elected to have PRK with MMC application.

Procedure(s):

-Ophthalmological New Patient Start Comprehensive Care x 1

CONSULT REPORT

Order Request for MERWIN, DANIEL

Requesting HCP: BROWN, TRAVIS SCOTT
 Requesting Location: DEPLOYMENT HEALTH CLINIC
 Order ID number: 110208-01279
 MCP Referral #: 20110041136
 No. of Visits: 1

Referral Authorized Until: 10 Mar 2011

Reason for Consult:

25 yo AD male has a history of childhood asthma, with improvement in symptoms as he reached adulthood. However he continues to have problems with tightness in his chest on occasion. States some things in the environment (dogs and cats for example) trigger his symptoms and may last for days. Denies any problems with routine exercise. He has been taking Zyrtec and Flonase daily however do not seem to be very effective. He was recently given Albuterol and Advair inhaler which he uses prn with good results. Please evaluate, treat and let me know his deployment status. Are there other environmental factors that could be an issue while on deployment. thank you. contact phone # 850 292 7149

Chief complaint

The Chief Complaint is: Chest tightness.

History of present illness

The Patient is a 26 year old male.

He reported: General overall feeling Good

No military duty-related information - (Not on PRP/SCI/PSP). No depression Screen: Negative PHQ-2 (Score < 3).

Pt is a 26 yo male with a history of allergies and childhood asthma. He notes a history of asthma in childhood which was associated with allergic symptoms. He remarks on 1 hospitalization for his asthma as a child but none since. Since the age of 8 he has been doing well and was not maintained on any inhalers. He is very active and is an active marathoner. Recently he has noted increased symptoms of chest tightness associated with exposure to cats and dogs. He was briefly treated with Advair, but is currently being maintained on Zyrtec and Flonase as well as allergen avoidance with excellent control of his symptoms. He will have one weekly chest tightness and albuterol use, but is otherwise doing well, and recently completed a marathon. He presents for routine follow up.

Pain Severity 0 / 10.

Past medical/surgical history

Reported History:

Past Medical History:

1) childhood asthma

2) allergies.

Medical: Reported medical history N/A.

Surgical / procedural: Surgical / procedural history 1) T&A.

Reported medications: Medication history Zyrtec t1 tab po qd

Flonase.

Personal history

-Tob: none

-EtOH: none

Originally from California. Lived in PA and NJ. USN for 5 years. Works as a cryptologist. Deployed to Japan recently, but no other travel or occupational exposure. .

Behavioral history: Never a smoker / Never Used Tobacco Products.

Alcohol: No consumption of alcohol.

Habits: Exercising regularly (Engaged in Routine / Regular Activity to Improve Your Health)

Review of systems

Military service: Visit is not deployment-related Location:

Date:

Systemic symptoms: Not feeling tired or poorly, not tiring easily, and no lethargy. No fever and no chills.

Pulmonary symptoms: No dyspnea, not coughing up sputum, no hemoptysis, and no wheezing.

Gastrointestinal symptoms: No heartburn, no nausea, and no vomiting.

Physical findings

Vital signs:

Current vital signs reviewed.

General appearance:

Well-appearing. Awake. Alert. In no acute distress.

Neck:

Palpation: Of the neck revealed no abnormalities.

Nose:

General/bilateral:

Nasal Discharge: No nasal discharge seen.

Sinus Tenderness: No sinus tenderness.

Pharynx:

Oropharynx: Uvula was not enlarged. Tonsils were not enlarged.

Lymph Nodes:

Cervical lymph nodes were not enlarged. Supraclavicular lymph nodes were not enlarged.

Lungs:

No wheezing was heard. No rhonchi were heard. No prolonged expiratory time. No rales/crackles were heard.

Cardiovascular system:

Jugular Venous Pressure: JVP was normal.

Jugular Venous Distention: JVD not increased.

Heart Rate And Rhythm: Normal.

Heart Sounds: S1 normal. S2 normal. No S3 heard. No S4 heard.

No pericardial friction rub heard.

Murmurs: No murmurs were heard.

Abdomen:

Palpation: Abdomen was not soft. No abdominal tenderness.

Skin:

No generalized cyanosis.

A/P Written by LEWIS, CHRISTOPHER T @ 16 Feb 2011 0930 CST

1. difficulty breathing (dyspnea): Pt is a 26 yo male with a history of childhood asthma and allergy type symptoms. His clinical history is suggestive of mild intermittent asthma, and his symptoms are under excellent control with control of his allergies with zyrtec and flonase. He will continue on these medications and prn albuterol for now, and will be referred for baseline PFTs and methacholine challenge study to definitive rule in/out asthma. Even with a positive study, his symptoms are under excellent control on his current therapy, and if needed he can be successful controlled with an inhaled steroid. He is highly functional, and even if a diagnosis of asthma is established this in no way should impact upon his fitness for duty. He is currently fit for duty and fit for world wide deployment. He will follow up in 3-4 weeks to review the results of his PFTs.

Chief complaint

The Chief Complaint is: Rosacea.

Referred here

Referred by:

History of present illness

The Patient is a 25 year old male Source of patient information was patient.

Barriers to learning were identified as: None. Barriers considered were social; cultural; emotional; motivational; physical; religious; cognitive and language.

In the Navy and currently on active duty. Visit is not deployment-related /deployment-related. Paygrade E5.

Presents for evaluation of her recurrent rash that has been occurring over the past two summers. He states that when he spends time in the sun and especially in the water he will develop crops of pustules across his forehead, cheeks, and somewhat on his back and chest. These are typically painful and he tends to puncture these or pick them. He did that this morning and does not have any significant acute lesions. He denies breakouts on other sun exposed areas of his skin.

He has tried many different types of sunscreens, but most recently used a baby sunscreen that one time helped prevent a breakout and the other time did not.

He does not take medications regularly, though occasionally takes Aleve.

He does relate that he had MRSA 3 times, and has been using an antibacterial

soap on all of his skin since April of 2009.

Allergies

Allergy information in Autocite area was reviewed and verified with patient.

Current medication

Pt is not taking meds at this time.

Past medical/surgical history**Reported History:**

Reported medications: Medication history including current prescription medications; over-the-counter medications; nutraceuticals; herbals;

supplements and medications not included in AHLTA were reviewed with patient in detail.

Personal history

: Reviewed.

Behavioral history: Caffeine use. No tobacco use.

Alcohol: Alcohol use.

Drug use: Not using drugs.

Habits: Exercising regularly.

Physical findings**Vital signs:**

Pain level (0-10): Reviewed.

Current vital signs reviewed.

General appearance:

Well-appearing. Alert. Oriented to time, place, and person. Well nourished. Well hydrated.

Skin:

Lesions: See add note for details.

Also noted to have very fair skin and fairly moderate photo damage with hundreds of ephelids. General appearance was normal.

Therapy

No herbal medicines.

Counseling/Education

Education appropriate to the patients needs was provided regarding the care/treatment/services provided. The patient voices understanding and all questions were answered.

A/P Last Updated by SMITH,ERIC P @ 20 Jul 2010 1643 CDT

1. FOLLICULITIS: Appears to developing pustules of unclear etiology. The sudden onset following sun exposure may point towards a photosensitive reaction which could be photo drug or photo toxic or photoallergic. He only takes Aleve occasionally, and this could be a potential cause of pseudo-porphyrria though he has no lesions on the back of his hands and no milia. It would be atypical for acne, even though he complains of blackheads, as the sun tends to be more immunosuppressive rather than causing acne breakouts.

He may have a reaction to sunscreen products, though states that he is broken out even when not wearing sunscreen. There does not appear to be a likely interaction between water in his skin. These lesions are not urticarial.

There may be a relationship to him starting his antibacterial soap and the onset of this rash. Discussed the importance of good skin care without damaging the surface.

Pityrosporum folliculitis is also in the differential diagnosis.

Recommended:

Stop antibacterial soap.

PRIVACY ACT STATEMENT - HEALTH CARE RECORDS*THIS FORM IS NOT A CONSENT FORM TO RELEASE OR USE HEALTH CARE INFORMATION PERTAINING TO YOU.***1. AUTHORITY FOR COLLECTION OF INFORMATION INCLUDING SOCIAL SECURITY NUMBER (SSN)**

Sections 133, 1071-87, 3012, 5031 and 8012, title 10, United States Code and Executive Order 9397.

2. PRINCIPAL PURPOSES FOR WHICH INFORMATION IS INTENDED TO BE USED

This form provides you the advice required by The Privacy Act of 1974. The personal information will facilitate and document your health care. The Social Security Number (SSN) of member or sponsor is required to identify and retrieve health care records.

3. ROUTINE USES

The primary use of this information is to provide, plan and coordinate health care. As prior to enactment of the Privacy Act, other possible uses are to: Aid in preventive health and communicable disease control programs and report medical conditions required by law to federal, state and local agencies; compile statistical data; conduct research; teach; determine suitability of persons for service or assignments; adjudicate claims and determine benefits; other lawful purposes, including law enforcement and litigation; conduct authorized investigations; evaluate care rendered; determine professional certification and hospital accreditation; provide physical qualifications of patients to agencies of federal, state, or local government upon request in the pursuit of their official duties.

4. WHETHER DISCLOSURE IS MANDATORY OR VOLUNTARY AND EFFECT ON INDIVIDUAL OF NOT PROVIDING INFORMATION

In the case of military personnel, the requested information is mandatory because of the need to document all active duty medical incidents in view of future rights and benefits. In the case of all other personnel/beneficiaries, the requested information is voluntary. If the requested information is not furnished, comprehensive health care may not be possible, but CARE WILL NOT BE DENIED.

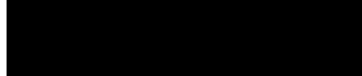

This all inclusive Privacy Act Statement will apply to all requests for personal information made by health care treatment personnel or for medical/dental treatment purposes and will become a permanent part of your health care record.

Your signature merely acknowledges that you have been advised of the foregoing. If requested, a copy of this form will be furnished to you.

X REVIEWED (H&P) PRIOR TO SURGERY/PROCEDURE **Required for ALL patients**

Patient assessed/re-examined and history and physical reviewed prior to surgery/procedure requiring anesthesia services. The changes found in patient's condition since history and physical exam were completed are listed below: PT had root canal started on #12 which currently has IRM in it. Pre op pt reports 5/10 pain after RCT started. Pt to have RCT completed after surgery. Comfortable proceeding with surgery as no s/s of infection feel pain is post extirpation tenderness. Ortho set up ran by COL Terp discussed right posterior opening (right posterior molars are not in contact as per set up).

X PATIENT DISCHARGE INSTRUCTIONS

X Discharge Instructions:

The patient was admitted to the APU and taken to the operating room for a lefort osteotomy of the maxilla. They tolerated the procedure well. There were no complications during surgery. The patient was extubated in the OR and transported to the PACU in stable condition where they made an uneventful recovery overnight and obtained radiographic imaging. The following morning the patient was transferred to the APU for routine post operative care. Before discharge the patient's pain was well controlled with oral pain medications, they were voiding spontaneously without issue, tolerating oral intake, and ambulating safely. The patient remained afebrile with stable, normal vital signs and was discharged home with appropriate follow up.

MEDICATIONS: Continue all home medications. New medications listed below. Be sure to eat soft nutritious food prior to taking any medications (see DIET below). This will decrease the chances of post surgical nausea.

Discharge Meds:
-As listed above

SINUS PRECAUTIONS: Due to the nature of the surgical procedure in relation to your maxillary sinus cavity it is essential you follow the guidelines below to maximize your chances for a successful and uneventful healing process:

- Take the medications your surgeon prescribed, as prescribed.
- Do not blow your nose for two-weeks. It is best to wipe away nasal secretions carefully. After 2 weeks, if you must blow your nose, blow gently through both sides at the same time. Do not pinch your nose; do not blow just one side at a time.
- Do not pinch your nose and forcefully clear ears.
- If you must sneeze, keep your mouth open while doing so without pinching your nose.
- Avoid sucking. Do not drink through a straw. Do not smoke.
- Avoid blowing. Do not play a wind instrument. Do not blow up balloons. No forceful or projectile spitting.
- Do not lift or push objects weighing more than 20 pounds.
- No bending over - Keep your head above the level of your heart. Sleep with your head slightly elevated with two pillows.

WHAT TO EXPECT: The first 2-3 days after surgery, are generally the most uncomfortable and there is usually significant swelling. After the first week, you should be more comfortable. For the first 14 days it is normal to experience a little amount of everything. This includes swelling, bleeding, soreness, tightness, bruising/yellowing and a little pain or discomfort. Your nose may feel stiff, congested and mildly ooze with blood, use gauze to gently dab this away. With taking your prescribed medications and strictly following recommendations, this should all be tolerable. It is not uncommon for the anesthesia team to nasally intubate (place a tube through your nose and into your trachea) for oral surgical procedures. This can cause your nose to be sore and even bleed a little after the surgery for the first few days. Dark red-brown blood may come out of nose after 1 week, this is normal. If bleeding is bright red and heavy, this is abnormal, notify your surgical team. Saline nasal rinses (over the counter) can be used to help with nasal congestion as needed. The remainder of your postoperative course should consist of gradual, steady improvement.

DODID:

MERWIN, DANIEL DENNIS

FMPL6SSN: [REDACTED]

??? ???

WRNMMC Bethesda 27Apr2017

PERSONAL/PRIV ACT 1974

Clinical Notes

ACTIVITY RESTRICTIONS: Please do not drive for 24 hours after your surgery. Until that time, you will still be affected by the anesthesia medications you were given during your surgery, and it is not safe for you to drive. Starting 24 hours after surgery you may drive limited amounts. Avoid heavy lifting and mildly strenuous activity/exercises that will significantly elevate blood pressure and heart rate for at least three days. You should limit yourself to light activity for one week following the surgery. However, spending as much time as comfortably possible out of bed sitting up and moving around the house helps speed recovery to daily activities.

SLEEPING: Please keep your head elevated while sleeping. This will minimize swelling and discomfort and reduce pain while allowing you to breathe more easily. One or two pillows may be placed beneath your mattress at the head of the bed to prop the bed into a more vertical position.

SWELLING: Swelling is common after surgery for two weeks. For the first 48 hours place an ice pack (or frozen peas/corn) on your face near the surgical site for 10-20 minutes every 2-3 hours. (Do not put ice in direct contact with the skin). 48 hours after surgery, we suggest switching to warm moist heat to decrease swelling (use a clean facecloth and tap water).

DIET: In the past, but very unusual at the present time, teeth were wired together after jaw surgery. This allows the bones to heal while they are being held still. In the majority of cases today, we use small bone plates and screws to hold the bones still to assist in healing. Support is also given by the splint and elastic traction (elastic bands placed onto your teeth.) This allows the jaw to move and function during the healing period of 8-12 weeks. It must be remembered, however, that the bones are not completely healed and are being stabilized only by the screws and plates. Therefore, we encourage a gradual progression of movement and use of the jaws, keeping in mind that adequate healing does not take place until approximately 6-8 weeks. **REMEMBER:** Your jaws are weakest at 10 days after your surgery. No alcoholic beverages should be consumed for at least twenty-four hours following general anesthesia or as long as you are taking narcotic pain medications.

Initially, it will be difficult to eat adequate amounts of food in only three meals per day. Try to eat five or six times a day, eating smaller portions each time. The following guidelines may be of help to you:

DIET: IMMEDIATELY FOLLOWING SURGERY UNTIL OTHERWISE INSTRUCTED (USUALLY 6 WEEKS)

During this period the diet should be essentially non-chewing. This will minimize the stress on the plates and screws. This may consist of either blenderized food or fluids that don't require chewing. This can include soups, milkshakes, baby food, or any blenderized food just avoid hot food/liquids that could injure/irritate your surgical sites. Some sort of diet supplement such as Ensure, Boost, protein shakes, smoothies or similar liquid meal replacements may be used once or twice a day to increase calorie intake. Plenty of clear fluids, water, etc. will help clean the thicker fluids from your mouth and throat. **REMEMBER:** It is very important to eat as much as possible to help your wounds heal properly. No straws!!

DIET: 6 - 8 WEEKS AFTER SURGERY

Chewing can start during this period of time. Initially begin with soft foods that require minimal chewing. This can consist of mashed potatoes, scrambled eggs, soft pasta that is cut into small pieces, soft rice dishes, or soft sandwiches that are cut into small pieces. One can also eat the foods that were eaten during the initial period. **SLOWLY** advance your diet, progressing into softer meats such as hamburger and soft chicken. The portions should be small so as not to place too much force on the healing bones. Soft fish dishes are also excellent. You will find that your jaw will tire easily. This will continue for the first 2-3 months until your jaw muscles have accommodated for your new jaw position. Avoid eating food which requires chewing for prolonged periods of time.

INTRAORAL SUTURES/STITCHES: Your sutures dissolve on their own. You may notice that they are loose after the swelling of your gum tissue decreases. This is completely normal. They commonly dissolve within the first month following surgery.

WOUND CARE FOR EXTRA-ORAL SURGICAL SITE: You may shower beginning 24 hours after the surgery.

SURGICAL SITES WITH GLUE/TAPE: The extraoral incision site has a dressing affixed in place with glue that will eventually come off on its own. If the edges peel up simply trim them with scissors. You may remove the dressing once it has loosened but do not attempt to remove early. The dressing will be removed at one of your scheduled follow up appointments.

SURGICAL SITES WITH SUTURES ONLY: The extraoral incision site was closed with sutures or "stitches." These will stay in place until the surgeon removes them, do not attempt to remove them on your own. It is important to keep the incision site clean. Wash your hands thoroughly with antibacterial soap, or use hand sanitizer, before cleaning the site. To clean, dilute a 1:1 solution of hydrogen peroxide and water, using a Q-tip gently clean the surgical site. Using a soft clean cloth, gently pad the area dry and apply a thick amount of Vaseline or the prescribed ointment.

Report to an emergency room or OMFS clinic immediately if you have any of the following:

1) Temperature greater than 101.5 F

Informed Consent for Anesthesia

Walter Reed National Military Medical Center Anesthesia Department

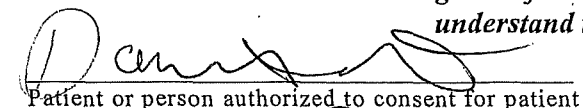

Information: There are several ways to administer anesthesia. **Local Anesthesia** is administered by the surgeon in the procedure area and is combined with **Monitored Anesthesia Care (MAC)** provided by an anesthetist. **MAC** involves the presence of a credentialed anesthetist, for monitoring purposes, who may provide a spectrum of sedation and analgesia ranging from light sedation to deep sedation. Usually light sedation does not affect ventilator or cardiovascular function; whereas individuals treated with deep sedation may require assistance in maintaining a patent airway and adequate ventilation—cardiovascular function is usually not affected. **Regional Anesthesia** refers to nerve block, epidural, and spinal anesthesia and involves the injection of a local anesthetic near major nerves to “numb” specific areas of the body and may be combined with **MAC**. **General Anesthesia** is a technique using intravenous medications and gases to keep you deeply asleep. This technique is often combined with medications to relax muscles and methods such as a breathing tube to provide adequate oxygenation.

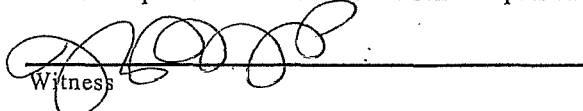

Complications and Risks: In addition to the risks of surgery, anesthesia of any type carries its own risks. More common complications that may arise include, but are not limited to the following: Sore throat, Nausea and Vomiting, Headache, and Dental damage. Less common complications that may arise include but are not limited to the following: Damage to blood vessels, Back pain, Damage to eyes / nose / skin, Vocal cord injury, Windpipe injury, Respiratory problems, Drug reaction, Infection, Nerve injury, Paralysis, Kidney damage, Brain damage, Heart injury, Awareness during surgery, Damage to baby if pregnant, and Death.

Understanding: I understand that my anesthetic plan will be GENERAL ANESTHESIA. I have been given an explanation of the proposed anesthetic plan and have been given the opportunity to ask questions about it as well as alternative forms of anesthesia; the risks and hazards have been explained to me to my satisfaction, and I feel I have sufficient information to give informed consent. I understand that my anesthetic will be given by or under the supervision of a staff WRNMMC Anesthesiologist or Certified Registered Nurse Anesthetist. Realizing that this is a teaching facility, I understand that other personnel such as residents, interns, medical students, and student registered nurse anesthetists may be involved in my anesthetic care and will be supervised by a credentialed staff member. I understand that during my procedure invasive monitoring may be necessary; the risks and benefit of this type of special monitoring have been fully explained to me. I understand that during the administration of my anesthetic, conditions may arise which require modification or extension of the anesthetic plan; I therefore authorize modification or extension of this consent as indicated by the professional judgment of my anesthesia team. I understand that during the procedure a transfusion of blood or blood products may become necessary and have been informed of the possible risks involved and understand these risks.

Consent: I consent to have anesthesia provided by appropriate medical personnel. I further consent to procedures that good medical judgment considers wise and prudent if it is medically undesirable to delay the procedure until after my further written consent has been obtained.

*Please do not sign this form unless you have read it or had it read to you,
understand it, and agree with what it says.*

The alternatives to transfusion include: (1) not receiving a transfusion, (2) pre-surgical autologous donation, and (3) intraoperative red cell salvage. If you have any questions about transfusion risks, benefits, complications, or alternatives, please discuss them with your doctor **BEFORE** you agree to have any blood transfusion.

1. COUNSELING PROVIDER OR DENTIST: I have counseled this patient as to the proposed procedure(s), attendant risks involved, the expected need for transfusion, and the use of intraoperative red cell salvage (if appropriate).

 Provider/Dentist Signature Date 2/28/2017 Time 0640

2. PATIENT: I understand the risks associated with blood transfusion and the reasons why my doctor(s) may wish to transfuse me. Should my doctor(s) deem a transfusion necessary, I agree to be transfused. For surgical patients only - I understand that intraoperative red cell salvage will / will not (initial one) be used.

 Date Time
  Date 4/27/17 Time 0643

3. PARENT/LEGAL REPRESENTATIVE: (When a patient is a minor or unable to give consent)
 I, _____, parent/legal representative of _____, understand the nature of the proposed procedure(s), attendant risks involved, and the expected need for transfusion and red cell salvage (if appropriate). I hereby request that such procedure(s) be performed. Should the doctor(s) taking care of this patient deem a transfusion necessary, I agree with their decision.

BLOOD TRANSFUSION PATIENT INFORMATION AND CONSENT FORM

Dear Patient,

During the course of treatment you may need to receive blood or blood products. You should feel free to ask your doctor why you may need a transfusion. Benefits of transfusion include: (1) to improve oxygen delivery to your organs, (2) to replace factors or cells that help stop bleeding, or (3) to provide proteins (called globulins) to help your immune system, or (4) other reasons your doctor will explain. While many precautions are taken to make blood products safe, there are some well-known risks, including but not limited to, those listed below.

1. Transmission of infectious diseases: All blood for transfusion in the U.S. is tested for the following infectious diseases: HIV 1 & 2, HTLV I & II, Hepatitis B & C, syphilis, Chagas, and West Nile Virus. Only units that are negative for all of these tests are allowed to be transfused. Although these tests are extremely sensitive, on very rare occasions, a unit will contain a low level of virus that cannot be detected with current testing methods. There are diseases for which no approved test yet exists or there may be infectious risks, as yet unknown to us, that could be transfusion-transmitted. There is no way to guarantee a zero-risk transfusion, however, research and development of more sensitive tests are ongoing. As better testing methods are introduced into the blood banking industry, it is possible that transfusion recipients could be contacted in the future by their blood bank for follow-up information or blood samples. Your cooperation, should this occur, would be completely voluntary, and your participation could contribute to improvement in the safety of the nation's blood supply.

2. Fever: Transfused blood products can cause fever in some individuals.

3. Allergic reactions: After blood transfusion a person may occasionally experience wheezing, itching, low blood pressure, swelling in the throat, or breathing problems.

4. Hemolytic reactions: A potentially serious reaction can occur if you receive a unit of blood that is of a different ABO type from your own. Even when ABO-compatible blood is given, delayed hemolytic reactions can occur if the transfused red blood cells stimulate your immune system to make antibodies against them a few days to weeks following transfusion. This usually causes the transfused red blood cells to be destroyed in your spleen, resulting in a mild temporary jaundice (yellowing of the skin).

5. Transfusion-related acute lung injury (TRALI): A potentially fatal reaction involving lung damage has been reported in some recipients of cellular blood products and fresh frozen plasma. This reaction is not well understood and is being actively studied. It is believed the reaction is related to either an agent in the blood of certain donors, particularly females who have been pregnant in the past, or an agent that accumulates in some units of blood as they age. TRALI is manifested by difficulty breathing and fever within 1 to 6 hours after transfusion. Most victims fully recover, but in some cases the reaction is severe enough to cause death.

The above complications are rare, but potentially life-threatening. The estimated risks of these complications are shown in the table on the next page.

6. For surgical patients: Under special circumstances, your surgeon may determine that it is necessary or desirable to use a technique called Intraoperative Red Cell Salvage. This technique uses specialized equipment that harvests and washes your lost surgical blood and prepares it for transfusion. Use of this blood is an effective means to reduce the use of banked blood, decreasing the likelihood of transfusion reactions and spread of infectious disease. Drawbacks to this method include the need for anticipated large blood loss volumes, non-applicability to all types of surgery, and the potential spread for certain types of malignancy.

Medical Record	WRNMMC Request for Administration of Anesthesia and for Performance of Operations and Other Procedures
----------------	--

1. OPERATION or PROCEDURE (Describe)

A. IDENTIFICATION

SIDE (MARK ONE)

Lefort osteotomy, possibly segmental, possible maxillo-mandibular fixation and any other indicted procedures

☐ Right ☐ Bilateral
☐ Left ☐ Not Applicable

B. STATEMENT OF REQUEST

2. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be (describe operation or procedure in layman's language):

Under general anesthesia the surgeons will cut the gums of my upper jaw then cut and separate the bone, possibly into multiple pieces. They will then reposition my upper jaw into a proper relationship and it with plates and screws. Risks to surgery include facial and jaw swelling, bleeding which may sometimes be severe enough to require blood transfusion, allergic reaction to medications, delayed healing of the bony segments; rarely requiring a second surgery and/or bone graft to repair, relapse, bruising and discoloration of the skin around the jaws, eyes and nose, diminished sense of smell and a change in my cosmetic appearance.

which is to be performed by or under the direction of Dr. Jensen and associates

3. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgment of the professional staff of the below named medical facility, during the course of the above-named operation or procedure.

4. I request the administration of such anesthesia as may be considered necessary or advisable in the judgment of the professional staff of the below-named medical facility.

5. Exceptions to surgery or anesthesia, if any, are (if "none", so state): none

6. I request the disposal by authorities of the below-named medical facility of any tissue or parts which it may be necessary to remove.

7. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and the observation of the operation by authorized personnel, subject to the following conditions:

- The name of the patient and his/her family is not used to identify said pictures.
- Said pictures be used only for purposes of medical/dental study or research.

8. I understand that as indicated a Health Care Industry Representative or other authorized personnel may be present.
(Cross out any parts above which are not appropriate)

C. SIGNATURES (Appropriate items in parts A & B must be completed before signing.)

9. COUNSELING Provider: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above. I have also discussed potential problems related to recuperation, possible results of non-treatment, and significant alternative therapies.

Patient escorts must have transportation arranged for themselves and the patient (either they drive you home or they have arranged for a reliable form of transportation prior to surgery date). **FAILURE TO HAVE AN ESCORT MAY RESULT IN CANCELLATION OF YOUR PROCEDURE!!**

- **** Patients from Building 62 will still require an escort prior to being discharged to Building 62.**
- DO NOT bring any jewelry (including wedding bands), cash, credit cards, or other items of high value on your day of surgery. The APU and its staff are not responsible for lost or misplaced belongings.
- Please wear appropriate and comfortable clothing suitable for the procedure you will have. Children having surgery may wear their pajamas to the APU and Operating room, unless otherwise indicated.
- Do not wear make-up, lotions, perfumes, deodorants, or fingernail polish.
- All piercings, adornments, dentures, hearing aids, contact lenses/ glasses must be removed prior to going to the OR.
- Do not shave or wax, on or near, your surgery site 24 hours prior to your procedure.

On the day of surgery, please bring the following items:

- ☒ Military or government issued picture ID
- ☐ "Prep Check" Sticker sheet if directed to perform surgical skin wipes from surgeon.
- ☐ Crutches if required
- ☐ CPAP Machine if required
- ☐ Any inhalers, if prescribed. Otherwise please do not bring your home medications.
- ☐ Additional assistive devices that will be needed after surgery, such as walkers, canes, or wheelchairs
- ☐ **Copy of Advance directive, living will, 5 Wishes, or power of attorney (Optional)
- ☐ **Females of child bearing age: Urine specimen cup with urine sample; or be prepared to provide a sample in APU.
- ☐ Other: _____

Post-Operative Instructions:

- Anesthetics may affect your sense of balance for a short time. Please ask for assistance when you get out of bed/chair for the first time after surgery.
- ****For Patients receiving block anesthesia (i.e. knee or hip surgery), please DO NOT attempt to get out of bed/chair without the assistance of a nurse or any health care provider.** During your entire stay in the APU you are at a much higher risk for falling post-surgery.

IF YOU ARE STAYING IN THE APU OVERNIGHT:

- Patients who will be staying overnight in APU will be discharged by 0800.
- Please ensure your escort/ride is in the APU no later than 0745 to facilitate a prompt discharge time.
- Family and other visitors are not permitted to stay overnight with patients. Visiting hours end at 2200.

GUESTS AND VISITORS:

- This is the President's hospital so guest/visitors/escorts without base access must accompany the patient in their vehicle the day of surgery and remain with the patient until discharge, or be pre-vetted through security 3-4 days before surgery date.
- Contact your surgeon's clinical nurse coordinator ASAP if they will not be accompanying you in your car the day of surgery to get the access request in. Please note: Security has the right to refuse entry to any non-ID'd individual.

INCLEMENT WEATHER INFORMATION:

- During adverse weather condition, please check the Walter Reed Bethesda website to verify operating status.
- If the clinics are CLOSED all non-emergent surgeries are cancelled for that day. Please call your clinic the next business day to reschedule your elective surgery date and/or prescreen appointment.
- If there is a DELAYED opening, please report to your APU Prescreen appointment or your surgery appointment on time as scheduled.

All information on this form has been reviewed by the patient. The patient has verbalized understanding of all instructions given on this form.

Staff Name JoAnn Highsmith Staff Signature JoAnn Highsmith, R.N. Date 24 APR 2017
 Patient Name X Daniel Moeun Patient Signature Daniel Moeun Date X 04/27/17

WRNMMC APU STANDARDIZED PRE-PROCEDURE TEACHING SHEET**BEFORE LEAVING WRNMMC THE DAY YOU HAVE YOUR PRE-PROCEDURAL APPOINTMENT:**

- Turn in completed package to APU Prescreen Area (Building 9, 3rd floor, across from the Stone Center).
- Pick up pre-procedural medications or prep materials if ordered by your physician.
- Complete labs, EKG, or X-rays as ordered by your doctor. Complete all paperwork **before** your appointment.

ADHERE TO YOUR MEDICATION REGIME AS OUTLINED BY YOUR DOCTOR OR MODIFIED BY ANESTHESIA

- Medication instructions also include the following, unless otherwise directed:
- Do not take aspirin-containing medications, or Motrin/Aleve/Advil/Ibuprofen type medications, including over the counter, for **2 weeks prior to and 2 weeks after your surgery**, unless otherwise instructed.
- Do not take herbal/dietary supplements such as ginkgo biloba, garlic, ginger, fish oil, or vitamin E. These can prevent blood from clotting and have been associated with prolonged bleeding.
- Tylenol is OK, however, please make staff aware if you have taken it for cold symptoms or fever.

THE BUSINESS DAY PRIOR TO YOUR SURGERY:Date: 26 APR 2017

- Call the APU Chart Manager at **301-295-2563** in the afternoon between **1:30pm-4:00pm** for your Arrival. Arrival times are approximately **2 hours** before your SCHEDULED Surgery time and are determined by the main operating room, **not** the surgeon. Please do not come any earlier than your scheduled Arrival Time.
 - If you were not scheduled to be seen by a nurse during your APU Prescreen appointment, **one of our TCON Nurses will call you for a telephone consultation within 72 hours prior to your surgery date.** If our TCON Nurse has not called you by 1000 on the day before your surgery, please call the APU Prescreen at **301-295-2319**.
- If you wish to cancel your procedure, contact your physician in their respective clinic. If after hours, please call the CDO desk at **301-295-4611** to have the surgeon on call paged to speak with you.
- Emergencies and wounded warriors take priority in the operating room. Please keep this in mind if there is a delay or cancellation to your procedure. Your patience is appreciated.
- Patients scheduled as "time and space available (TSA)" are given times based on estimated surgery time. These times can vary dramatically, and we kindly ask for your patience.

THE EVENING BEFORE YOUR PROCEDURE:Date: 26 APR 2017

- Unless otherwise directed, **DO NOT EAT OR DRINK ANYTHING AFTER MIDNIGHT** on the night before your procedure. *This includes water, coffee, tea, toast, ice chips, candy, or gum.*
- If instructed to take oral medication on the morning of your procedure, please do so with a small sip of plain water.
- Do not consume any alcohol 24 hours prior to your procedure.
- Do not use any tobacco products after midnight the night before your surgery.
- Complete surgical skin preparation the night before and the morning of surgery as directed.
- ****For GI Patients**:** Complete your entire bowel preparation (Moviprep) if ordered by your physician.

FOR CHILDREN LESS THAN 13 YEARS OLD ONLY:

1. No solid food after midnight the evening prior to the procedure.
2. Clear liquids up to two hours prior to arrival time.
3. Breast milk up to four hours prior to arrival time.
4. Infant formula up to six hours prior to arrival time.
5. All Non-human milk up to six hours prior to arrival time.

20 [REDACTED] DENNIS
 MERWIN, DA [REDACTED] 985 AGE: 32
 SEX: M DOB: [REDACTED]
 USN N11 PO1 NRP

**THE DAY OF THE SURGERY:**

- Please report to Main APU Day of Surgery "Check In" in Building 10, Eagle Building, 3rd Floor (3 East). It is recommended that you park in the Arrowhead Patient Parking Garage across Building 10.
- **A responsible adult, age 18 or older, must accompany you when you arrive at APU Check In on the day of surgery and must accompany you home after discharge (unless you are pre-scheduled to be admitted to inpatient ward).**

Patient Needs Assessment Form

Answering the questions will help us provide you the best possible care both before and after your procedure. All information is confidential and will only be used to contact you with regards to your procedure.

Please check or circle the most appropriate answer:

1. Who is providing this information today? Patient/Self Other: _____
(Please provide name and relationship)
2. Primary language: English Other: _____
3. Do you have any difficulty: Hearing Reading Both
4. Do you learn best by: Vision Hearing Doing or a Combination
5. What is your highest level of education? Some COLLEGE
6. Describe your current level of anxiety: None Mild Moderate Severe
7. Are you familiar with *The Patient Bill of Rights*? Yes No
8. Do you wish to see the Chaplain on the day of your procedure? Yes No
9. Are you familiar with the *Pain Assessment Scale*? Yes No

It is very important that we have legibly written phone numbers so that we can complete the pre-screen process.

If you do NOT have an escort on the day of your procedure or the day you are to be discharged from the APU, your procedure will be cancelled or delayed.

Your escort home will be: Name: JESSICA RUPP ✓

Telephone Number [REDACTED]

I give my permission for you to leave a message regarding information about my procedure on my: (Please circle choices.)

Home phone

Cell phone

Email address

Work phone

(If you do not circle any choice and we are unable to contact you, your surgery may be delayed or cancelled.)

AUTHORIZED FOR LOCAL REPRODUCTION

Medical Record	WRNMMC Request for Administration of Anesthesia and for Performance of Operations and Other Procedures
----------------	--

1. OPERATION or PROCEDURE (Describe)	A. IDENTIFICATION	SIDE (MARK ONE)
Extraction of Teeth # RETAINED H / EXPOSE + BOND #11 And all necessary procedures		<input type="checkbox"/> Right <input type="checkbox"/> Bilateral <input checked="" type="checkbox"/> Left <input checked="" type="checkbox"/> Not Applicable

2. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be (describe operation or procedure in layman's language):

Doctor will numb my mouth, gums, and teeth. Doctor may cut my gums, bone, and/or teeth. Doctor will remove my specified teeth. Doctor may place sutures to close.

It has been explained to me that during the course of the procedure(s) unforeseen conditions may be revealed which will necessitate extension of the original procedure(s) or different procedure(s) form set forth on this form. I authorize my doctor(s) and their staff to perform those procedure(s) deemed necessary and desirable in the exercise of professional judgment.

Your extracted teeth may be used for research or other teaching purposes.

which is to be performed by or under the direction of **JACKS**

3. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgment of the professional staff of the below named medical facility, during the course of the above-named operation or procedure.

4. I request the administration of such anesthesia as may be considered necessary or advisable in the judgment of the professional staff of the below-named medical facility.

5. Exceptions to surgery or anesthesia, if any, are (if "none", so state):

NONE

6. I request the disposal by authorities of the below-named medical facility of any tissue or parts which it may be necessary to remove.

7. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and the observation of the operation by authorized personnel, subject to the following conditions:

- The name of the patient and his/her family is not used to identify said pictures.
- Said pictures be used only for purposes of medical/dental study or research.

8. I understand that as indicated a Health Care Industry Representative or other authorized personnel may be present.
(Cross out any parts above which are not appropriate)

C. SIGNATURES (Appropriate items in parts A & B must be completed before signing.)

9. COUNSELING Provider: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above. I have also discussed potential problems related to recuperation, possible results of non-treatment, and significant alternative therapies.

Provider's Signature:

20/ MERWIN, DANIEL DENNIS SEX: M DOB: 1985 AGE: 29 USN N11 PO1 NRP STAFF _____ PATIENT _____ 		REQUEST FOR ADMINISTRATION OF ANESTHESIA AND FOR PERFORMANCE OF OPERATIONS AND OTHER PROCEDURES Medical Record LOCAL FORM 622 (Rev. 2/2012) Prescribed by GSA/ICMR FMR (41 CFR) 102-193.30(i) DoD Exception to OF 622 approved by GSA	

Taking teeth out is a permanent procedure. Whether the procedure is easy or difficult, it is still a surgical procedure. All surgeries have some risks. They include the following, and others:

1. Swelling, bruising and pain. Stretching of the corners of the mouth that may lead to cracking or bruising.
2. Possible infection that might need more treatment.
3. Dry socket - jaw pain that begins a few days after surgery, that may need more care.
4. Possible damage to other teeth close to the ones being taken out, more often those with large fillings or caps.
5. Numbness, pain, or changed feelings in the teeth, gums, lip, chin and/or tongue (including possible loss of taste). This is due to the closeness of tooth roots (mainly with wisdom teeth) to the nerves which can be injured or damaged. Usually the numbness or pain goes away, but in some cases, it may need more treatment or may be permanent.
6. Trismus - you can only open your mouth a little. This is most common after wisdom teeth are taken out. Sometimes it happens because of jaw joint (TMJ) problems already there. Damage can occur to the ligaments of the jaw joint (TMJ) from having your mouth open wide and/or for a period of time. This is more common if you already have symptoms or signs. This may need separate additional treatment.
7. Bleeding - oozing can often happen for several hours, but a lot of bleeding is not common.
8. Sharp ridges or bone splinters may form later at the edge of the hole where the tooth was taken out. These may need another surgery to smooth or remove.
9. Sometimes tooth roots may be left in to avoid harming important things such as nerves or a sinus (a hollow place above your upper back teeth).
10. The roots of the upper back teeth are often close to the sinus and sometimes a piece of root can get into the sinus. An opening may occur from the sinus into the mouth that may need more treatment (medications or surgery.)
11. It is very rare that the jaw will break, but it is possible in cases where the teeth are buried very deep in their sockets.
12. When donated, processed, or artificial bone substitutes are placed to preserve a socket the pieces might not join together with the natural bone and could be lost.
13. FEMALE PATIENTS ONLY: I have told my doctor that I use birth control pills. My doctor has told me that some antibiotics and other medications may reduce the preventive effect of birth control pills, and I could conceive and become pregnant. I agree to discuss with my personal doctor using other forms of birth control during my treatment, and to continue those methods until my personal doctor says that I can stop them and use only oral birth control pills.

ANESTHESIA:

1. The anesthetic I have chosen for my surgery is:
- ☐ Local Anesthesia
 - ☐ Nitrous Oxide/Oxygen Analgesia with Local Anesthesia
 - ☒ Intravenous Sedation with Local Anesthesia
 - ☐ General Anesthesia with Local Anesthesia

2. ANESTHETIC RISKS include: pain, swelling, bruising, or infection of the vein area where the anesthesia or sedation was given. This could last a long time or make it hard for you to use your arm. This might need special care. There might be numbness that lasts a long time and allergic reactions. You might have nausea and vomiting from the IV Sedation or General Anesthesia, but this doesn't happen often. IV Sedation and General Anesthesia are serious medical procedures.

They are safe, but the rare risks of heart irregularities, heart attack, kidney damage, stroke, brain damage or death are present. I also understand there is a risk of an unintentional deep plane of anesthesia might be obtained that may require interventions to maintain my respiratory and cardiovascular status.

3. YOUR OBLIGATIONS FOR IV SEDATION OR GENERAL ANESTHESIA ARE:

- A. Because anesthetic medications cause prolonged drowsiness, you **MUST** be accompanied by a responsible adult to drive you home and stay with you until you are sufficiently recovered to care for yourself. This may be up to 24 hours.
- B. During recovery time you should not drive, operate complicated machinery or devices, or make important decisions.
- C. You must have a completely empty stomach. IT IS VITAL THAT YOU HAVE NOTHING TO EAT OR DRINK FOR SIX (6) HOURS PRIOR TO YOUR ANESTHETIC. TO DO OTHERWISE MAY BE LIFE-THREATENING!
- D. However, it is important to take any regular medications (high blood pressure, antibiotics, etc.) or any medications directed by us, with only a small sip of water.

I understand that my doctor can't promise that everything will be perfect. I have read and understand the above and give my consent to surgery. I have given a complete and truthful medical history, including all medicines, drug use, pregnancy, etc. I certify that I speak, read and write English. All of my questions have been answered before signing this form.

WRNMMCB NARRATIVE SUMMARY & DISCHARGE INSTRUCTIONS

ADMISSION DATE: 11Oct2012
 DISCHARGE DATE: 12Oct2012
 Primary Care Manager: UDE, ASSUMPTA O
 ADMITTING DIAGNOSIS: COLON MASS
 DISCHARGE DIAGNOSIS:
 1. colonic inflammation

CONDITION AT DISCHARGE

Comment on the physical and cognitive function of patient:

The patient was afebrile with normal and stable vital signs, tolerating regular diet, ambulating without problems and pain was well controlled on oral pain medicine.

ADMISSION DATA				
HISTORY: <p>HPI: 27 yo M with recent URI symptoms presents to ER last evening after sharp attack of epigastric abdominal pain after eating 3 slices of pizza. He reports feeling back pain early this afternoon, which he treated with a nap. Last evening, he ate 3 slices of pizza and took a shower when he experienced severe epigastric, sharp, throbbing abdominal pain that caused him to become nauseated. He drove himself to the ER describing that the position of sitting up made the pain worse. He did not vomit, reports passing flatus, last BM was just prior to this at 2100 last night, which was non-bloody and normal.</p> <p>He reports intermittent abdominal pain throughout his life. The pain was as frequent as daily, when he exercised regularly, but has since tapered to twice a week vague abdominal pain that resolves. Family physicians have told him he has "IBS" without any other diagnosis. Most notably, he had an attack of abdominal pain with 1 bloody bowel movement during boot camp at Great Lakes for which he was admitted, CT scanned and underwent sigmoidoscopy to transverse colon, which could not be completed due to discomfort. Demonstrated normal findings with internal hemorrhoids. He has soft regular bowel movements once a day.</p> <p>PMH: childhood asthma, internal hemorrhoids; intermittent sun-related rash PSH: PRK, tonsillectomy Allergy: cats MEDs: non, aleve and Dayquil this weekends</p>

Colitis at the level of the hepatic flexure with stool filled cecum and fecalization of small bowel. Findings are nonspecific and may be representative of an acute infection or inflammatory etiology such as Crohn's disease or ulcerative colitis. Clinical correlation is recommended.

HOSPITAL COURSE

HOSPITAL COURSE:

The PT presented to the ER with abdominal pain on the evening of 10 OCT 12 - 11 OCT 12. He initially had an acute abdominal series, which revealed nonspecific, nonobstructive bowel gas pattern. He then had an abdominal CT, which revealed non-specific focal colitis at the level of the hepatic flexure with proximal stool retention and fecalization of small bowel. The Pt was admitted for further evaluation. On 11 OCT, he was placed on a clear liquid diet and started bowel prep. On 12 OCT he underwent a colonoscopy, which was normal. Biopsies were obtained and results are pending. Pt was discharged home in stable condition with appropriate follow-up.

Fall Prevention Interventions:

Basic Fall Risk interventions (ALL PATIENTS):

Direct Care:

1. Obtain patient history of falls and mobility impairments in a language the patient understands.
2. Assess the patient's coordination and balance before assisting with transfer and mobility activities.
3. Orient patient to surroundings, include bathroom, location, use of bed and call light.
4. Ensure call light and frequently used items are within reach of patient.
5. Use non-slip footwear.
6. Answer call lights promptly.
7. Saline lock all IV's, except if infusion is in progress.
8. Display special instructions signs for vision and hearing devices. Encourage patients to wear eyeglasses and hearing devices.

1. Noted: Above measures were implemented

Education:

1. Instruct patient about medication that may affect balance or cause orthostatic hypotension.
2. Encourage patient an family to call staff when assistance is needed.

1. Noted: Above measures were implemented

Equipment:

1. Request for the family to bring in home mobility assist devices as appropriate.
2. Keep bed in lowest possible position.
3. Keep top two side rails up on wards and all side rails up in ICU.
4. Secure locks on bed, stretcher, and wheelchair.

1. Noted: Above measures were implemented

Environment:

1. Provide adequate lighting, especially at night.
2. Remove excess equipment, supplies, furniture from rooms and hallways. Keep floors clutter and obstacle free. (Special attention to path between bed and bathroom or bedside commode.)
3. Coil and secure excess electrical and telephone wires.

1. Noted: Above measures were implemented

WRNMMCB ADMISSION HISTORY & PHYSICAL EXAMINATION

DATE/TIME INITIATED: 0615 11Oct2012

Is this a readmission within the past 30 days? Yes No

Service: GENERAL SURGERY

Note By: O'DONNELL, MARY T CPT 1687

HISTORY:

HPI: 27 yo M with recent URI symptoms presents to ER last evening after sharp attack of epigastric abdominal pain after eating 3 slices of pizza. He reports feeling back pain early this afternoon, which he treated with a nap. Last evening, he ate 3 slices of pizza and took a shower when he experienced severe epigastric, sharp, throbbing abdominal pain that caused him to become nauseated. He drove himself to the ER describing that the position of sitting up made the pain worse. He did not vomit, reports passing flatus, last BM was just prior to this at 2100 last night, which was non-bloody and normal.

He reports intermittent abdominal pain throughout his life. The pain was as frequent as daily, when he exercised regularly, but has since tapered to twice a week vague abdominal pain that resolves. Family physicians have told him he has "IBS" without any other diagnosis. Most notably, he had an attack of abdominal pain with 1 bloody bowel movement during boot camp at Great Lakes for which he was admitted, CT scanned and underwent sigmoidoscopy to transverse colon, which could not be completed due to discomfort. Demonstrated normal findings with internal hemorrhoids. He has soft regular bowel movements once a day.

PMH: childhood asthma, internal hemorrhoids; intermittent sun-related rash

PSH: PRK, tonsillectomy

Allergy: cats

MEDs: non, aleve and Dayquil this weekends

Family: no history of colon cancer, IBS/IBD or Crohn's disease; DM and Heart dz

Social: no tobacco use, occasional alcohol use; runs 20-30 miles per day, this has decreased over the last month.

Tobacco Screening

Tobacco use in last 12 months? Yes/No No

Colitis at the level of the hepatic flexure with stool filled cecum and fecalization of small bowel.
 Findings are nonspecific and may be representative of an acute infection or inflammatory etiology
 such as Crohn's disease or ulcerative colitis. Clinical correlation is recommended.

Disease Management

Was the patient admitted with a new diagnosis or a suspicion of the following?

NO Acute MI/Coronary Syndrome
 No CHF Exacerbation
 NO Pneumonia

DVT Prophylaxis

Please assess the need for pharmacological and/or mechanical prophylaxis.

Does the patient need DVT prophylaxis? Yes X

Thrombosis Risk Factor Assessment Score See assessment scale:

Patient is low risk

DIAGNOSTIC ASSESSMENT & PLAN

A/P: 27 yo M with intermittent abdominal pain throughout his life with acute exacerbation last evening with no flatus and BM since yesterday evening. CT scan suggestive of inflammation in right colon. Needs colonoscopy and further lab work up to rule out malignancy.

- Admit to 5E, NPO, IVF
- Moviprep
- Colonoscopy later today
- CEA, pANCA, ANCA, ASCA

X REVIEWED (H&P) PRIOR TO SURGERY/PROCEDURE **Required for ALL patients**

Patient assessed/re-examined and history and physical reviewed prior to surgery/procedure requiring anesthesia services. The changes found in patient's condition since history and physical exam were completed are listed below: PT had root canal started on #12 which currently has IRM in it. Pre op pt reports 5/10 pain after RCT started. Pt to have RCT completed after surgery. Comfortable proceeding with surgery as no s/s of infection feel pain is post extirpation tenderness. Ortho set up ran by COL Terp discussed right posterior opening (right posterior molars are not in contact as per set up.

X PATIENT DISCHARGE INSTRUCTIONS

X Discharge Instructions:

The patient was admitted to the APU and taken to the operating room for a lefort osteotomy of the maxilla. They tolerated the procedure well. There were no complications during surgery. The patient was extubated in the OR and transported to the PACU in stable condition where they made an uneventful recovery overnight and obtained radiographic imaging. The following morning the patient was transferred to the APU for routine post operative care. Before discharge the patient's pain was well controlled with oral pain medications, they were voiding spontaneously without issue, tolerating oral intake, and ambulating safely. The patient remained afebrile with stable, normal vital signs and was discharged home with appropriate follow up.

MEDICATIONS: Continue all home medications. New medications listed below. Be sure to eat soft nutritious food prior to taking any medications (see DIET below). This will decrease the chances of post surgical nausea.

Discharge Meds:
-As listed above

SINUS PRECAUTIONS: Due to the nature of the surgical procedure in relation to your maxillary sinus cavity it is essential you follow the guidelines below to maximize your chances for a successful and uneventful healing process:
-Take the medications your surgeon prescribed, as prescribed.
-Do not blow your nose for two-weeks. It is best to wipe away nasal secretions carefully. After 2 weeks, if you must blow your nose, blow gently through both sides at the same time. Do not pinch your nose; do not blow just one side at a time.
-Do not pinch your nose and forcefully clear ears.
-If you must sneeze, keep your mouth open while doing so without pinching your nose.
-Avoid sucking. Do not drink through a straw. Do not smoke.
-Avoid blowing. Do not play a wind instrument. Do not blow up balloons. No forceful or projectile spitting.
-Do not lift or push objects weighing more than 20 pounds.
-No bending over - Keep your head above the level of your heart. Sleep with your head slightly elevated with two pillows.

WHAT TO EXPECT: The first 2-3 days after surgery, are generally the most uncomfortable and there is usually significant swelling. After the first week, you should be more comfortable. For the first 14 days it is normal to experience a little amount of everything. This includes swelling, bleeding, soreness, tightness, bruising/yellowing and a little pain or discomfort. Your nose may feel stiff, congested and mildly ooze with blood, use gauze to gently dab this away. With taking your prescribed medications and strictly following recommendations, this should all be tolerable. It is not uncommon for the anesthesia team to nasally intubate (place a tube through your nose and into your trachea) for oral surgical procedures. This can cause your nose to be sore and even bleed a little after the surgery for the first few days. Dark red-brown blood may come out of nose after 1 week, this is normal. If bleeding is bright red and heavy, this is abnormal, notify your surgical team. Saline nasal rinses (over the counter) can be used to help with nasal congestion as needed. The remainder of your postoperative course should consist of gradual, steady improvement.

DODID:

MERWIN, DANIEL DENNIS

FMPL6SSN: [REDACTED]

??? ???

WRNMMC Bethesda 27Apr2017

PERSONAL/PRIV ACT 1974

Clinical Notes

CliniComp, Intl.

AR 3172

ACTIVITY RESTRICTIONS: Please do not drive for 24 hours after your surgery. Until that time, you will still be affected by the anesthesia medications you were given during your surgery, and it is not safe for you to drive. Starting 24 hours after surgery you may drive limited amounts. Avoid heavy lifting and mildly strenuous activity/exercises that will significantly elevate blood pressure and heart rate for at least three days. You should limit yourself to light activity for one week following the surgery. However, spending as much time as comfortably possible out of bed sitting up and moving around the house helps speed recovery to daily activities.

SLEEPING: Please keep your head elevated while sleeping. This will minimize swelling and discomfort and reduce pain while allowing you to breathe more easily. One or two pillows may be placed beneath your mattress at the head of the bed to prop the bed into a more vertical position.

SWELLING: Swelling is common after surgery for two weeks. For the first 48 hours place an ice pack (or frozen peas/corn) on your face near the surgical site for 10-20 minutes every 2-3 hours. (Do not put ice in direct contact with the skin). 48 hours after surgery, we suggest switching to warm moist heat to decrease swelling (use a clean facecloth and tap water).

DIET: In the past, but very unusual at the present time, teeth were wired together after jaw surgery. This allows the bones to heal while they are being held still. In the majority of cases today, we use small bone plates and screws to hold the bones still to assist in healing. Support is also given by the splint and elastic traction (elastic bands placed onto your teeth.) This allows the jaw to move and function during the healing period of 8-12 weeks. It must be remembered, however, that the bones are not completely healed and are being stabilized only by the screws and plates. Therefore, we encourage a gradual progression of movement and use of the jaws, keeping in mind that adequate healing does not take place until approximately 6-8 weeks. **REMEMBER:** Your jaws are weakest at 10 days after your surgery. No alcoholic beverages should be consumed for at least twenty-four hours following general anesthesia or as long as you are taking narcotic pain medications.

Initially, it will be difficult to eat adequate amounts of food in only three meals per day. Try to eat five or six times a day, eating smaller portions each time. The following guidelines may be of help to you:

DIET: IMMEDIATELY FOLLOWING SURGERY UNTIL OTHERWISE INSTRUCTED (USUALLY 6 WEEKS)

During this period the diet should be essentially non-chewing. This will minimize the stress on the plates and screws. This may consist of either blenderized food or fluids that don't require chewing. This can include soups, milkshakes, baby food, or any blenderized food just avoid hot food/liquids that could injure/irritate your surgical sites. Some sort of diet supplement such as Ensure, Boost, protein shakes, smoothies or similar liquid meal replacements may be used once or twice a day to increase calorie intake. Plenty of clear fluids, water, etc. will help clean the thicker fluids from your mouth and throat. **REMEMBER:** It is very important to eat as much as possible to help your wounds heal properly. No straws!!

DIET: 6 - 8 WEEKS AFTER SURGERY

Chewing can start during this period of time. Initially begin with soft foods that require minimal chewing. This can consist of mashed potatoes, scrambled eggs, soft pasta that is cut into small pieces, soft rice dishes, or soft sandwiches that are cut into small pieces. One can also eat the foods that were eaten during the initial period. **SLOWLY** advance your diet, progressing into softer meats such as hamburger and soft chicken. The portions should be small so as not to place too much force on the healing bones. Soft fish dishes are also excellent. You will find that your jaw will tire easily. This will continue for the first 2-3 months until your jaw muscles have accommodated for your new jaw position. Avoid eating food which requires chewing for prolonged periods of time.

INTRAORAL SUTURES/STITCHES: Your sutures dissolve on their own. You may notice that they are loose after the swelling of your gum tissue decreases. This is completely normal. They commonly dissolve within the first month following surgery.

WOUND CARE FOR EXTRA-ORAL SURGICAL SITE: You may shower beginning 24 hours after the surgery.

SURGICAL SITES WITH GLUE/TAPE: The extraoral incision site has a dressing affixed in place with glue that will eventually come off on its own. If the edges peel up simply trim them with scissors. You may remove the dressing once it has loosened but do not attempt to remove early. The dressing will be removed at one of your scheduled follow up appointments.

SURGICAL SITES WITH SUTURES ONLY: The extraoral incision site was closed with sutures or "stitches." These will stay in place until the surgeon removes them, do not attempt to remove them on your own. It is important to keep the incision site clean. Wash your hands thoroughly with antibacterial soap, or use hand sanitizer, before cleaning the site. To clean, dilute a 1:1 solution of hydrogen peroxide and water, using a Q-tip gently clean the surgical site. Using a soft clean cloth, gently pad the area dry and apply a thick amount of Vaseline or the prescribed ointment.

Report to an emergency room or OMFS clinic immediately if you have any of the following:

1) Temperature greater than 101.5 F

WALTER REED-BETHESDA BEHAVIORAL HEALTH CLINIC

LIMITS OF CONFIDENTIALITY

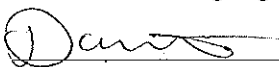

Authority: DoD 6025.18-R, "Health Information Privacy Regulation"

Limitations of Confidentiality: As part of your healthcare team, our goal is to provide you with quality care as well as protect the privacy of your personal information. The care we provide you may include, but is not limited to, assessment, referral, individual therapy, couples therapy, family therapy, group therapy, and psychiatric evaluation and medications. As your providers, we will document information about your visits in your military health record (written and electronic) to ensure continuity of care. Your health record is maintained as the property of the U.S. Government. In the majority of cases, we will not disclose any of your personal information nor confirm/deny that we have met with you unless you provide us with written authorization to disclose your personal information. There are exceptions, however, under which we may be required to release your personal information without obtaining your prior authorization. For example:

1. **Safety:** If you threaten to harm yourself, we may seek hospitalization and/or contact others to ensure your safety. If you threaten serious bodily harm to another, we are required to take protective actions, such as contacting the victim, police, chain of command, or seeking your hospitalization.
2. **Abuse:** If we believe that a child or vulnerable adult is being abused, we are required to file a report with the appropriate protective agency. We may also be required to Report spousal abuse under certain circumstances.
3. **Court Orders and Subpoenas:** If you are involved in legal actions/proceedings, your records may be subject to subpoena or lawful directive from a court. Under the Uniform Code of Military Justice (UCMJ), we have a limited "privileged communication" that may prevent your records from being disclosed in legal proceedings. This privilege is not absolute and there may be situations involving some violations of the UCMJ, civil, or criminal law where we may be required to divulge that information to your Commanding Officer (CO) and/or other authorities. If you have any concerns related to this, please contact an attorney.
4. **Command Consultations:** For service members, your Commanding Officer or Command Element (CO) is entitled to limited information, as pertinent to any duty limitation or restriction, security clearance, or treatment that might affect duty performance or jeopardize the safety of yourself, co-workers, or the unit's mission. Your CO or chain of command is not authorized to view your medical record through informal means. Information that impacts your duty status may be provided to your CO in writing, such as through service-specific documentation. We do not practice routine disclosure to commands. When we must disclose information, it is the minimum necessary and will only be to your CO unless you give written permission otherwise. This applies even if you are command-referred here. For information on command referred evaluations, see Department of Defense Instruction 6490.4.
5. **Care Coordination:** Because we operate as a team with other healthcare staff to provide you the best possible services, we may disclose your information to other providers or care managers to facilitate your continued care. These members of the health care team are permitted access to your records in their treatment of you. In most cases, your information will not be discussed outside the clinic or hospital setting without your written permission.
6. **Legal:** Medical care providers may be required to report information disclosed about the intent to violate a military regulation or a law.
7. **Quality Care Reviews:** Quality assurance personnel may review your record to ensure that care standards are being met. If this occurs, the reviewer is required to keep your identity confidential.
8. **Third-Party Insurance:** If you have health insurance besides TRICARE, limited information may be released to your insurance company.
9. **Email and Other Electronic Contact:** As per The Health Information Technology for Economic and Clinical Health Act (HITECH Act) that is part of the American Recovery and Reinvestment Act of 2009 (ARRA), we can only communicate with you electronically through encrypted technologies. Because of these restrictions, our ability to contact you electronically is limited to an encrypted method that you and your provider might establish.

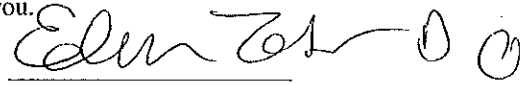

If you have any questions or concerns, please feel free to discuss them with us. Our intent is to discuss our limitations with you now and throughout your treatment as they may arise. We shall approach your care in the spirit of advocacy for you and in accordance with our hospital's vision of providing patient and family-centered care.

Acknowledgment of Privacy Act Rights and Limitations: Your signature merely acknowledges that you have been advised of the foregoing. If requested, a copy of this form will be furnished to you.

07 AUG 2015

Dear Valued Beneficiary,

Thank you for choosing this clinic for your mental health care. We strive to provide patient-centered care, and that includes continual efforts to improve access to care by minimizing missed appointments.

Missed appointments: These are documented as "no show" in the electronic medical record and you may receive a "wellness check" call from the clinic. Greater than one missed "new" appointment will not be rescheduled except through a discussion with the Clinic Manager or Service Chief. A pattern of missing follow-up appointments (greater than two) will trigger similar intervention by clinic leadership, as these negatively impact providers' ability to deliver care safely and accessibly. A pattern of missed appointments may also warrant contacting the patient's Commanding Officer (for active duty), or making referrals elsewhere and closing an episode of care here.

Same day appointment cancellation: These often go unused because they are almost impossible to re-book with other patients on such short notice. They negatively impact our clinic's access to care. These late cancellations are also documented as "no-show," and if this becomes a pattern (greater than two), clinic leadership may intervene as noted above.

Please try to attend the appointments you schedule with us, or change the appointment in advance. If you need to cancel, please do so during business hours prior to the day your appointment occurs. You can expect our providers and the clinic leadership to look for ways to help our patients problem-solve appointment attendance issues, and actively intervene if missing appointments becomes a pattern.

Questions or concerns may be discussed with your provider, the Clinic Manager, or Service Chief.

Bithiah R. Reed

I acknowledge receipt of the above letter and understand that I am responsible for adhering to this policy.

Patient Radiology Report

MERWIN, DANIEL 20[REDACTED] 31y M

Priority: Exam#: 0067-16227558

Procedure: CHEST PA/LAT Exam date: 6/22/2016 12:38:00 PM

Reason for exam: r/o abnormality

Order comment:

Result code: SEE RADIOLOGIST'S REPORT

Finding:

HISTORY: r/o abnormality

TECHNIQUE: Upright, PA and lateral chest radiographs. Two views.

COMPARISON: None.

FINDINGS:

Lungs: Lungs are clear.

Pleura: No pleural effusion or visible pneumothorax.

Heart / Mediastinum: Within normal limits.

Upper Abdomen: Within normal limits.

Bones and Soft Tissues: No acute osseous abnormality.

IMPRESSION:

Normal chest radiographs.

Patient Radiology Report

MERWIN, DANIEL 20[REDACTED] 31y M

Priority: Exam#: 0067-16131283

Procedure: MRI, BRAIN W W/O CON Exam date: 4/15/2016 4:48:00 AM

Reason for exam: SM with acute onset distortion taste, Please evaluate olfactory nerves for pathology, and brain for possible pathology, please use gad

Order comment: Please use gad

Result code: SEE RADIOLOGIST'S REPORT

Finding:

Brain MRI without and with gadolinium: 04/15/16 04:48:00.

History: 31 y/o M with acute onset distortion taste, Please evaluate olfactory nerves for pathology, and brain for possible pathology, please use gad.

Technique: Sagittal T1, axial and coronal T2, axial T2 FLAIR, axial DWI, axial GRE, axial T1, axial post T1 FS, coronal post 3D SPGR of the brain. A total of 16 mL of ProHance was given intravenously as part of the study.

FINDINGS: No focal mass lesion or abnormal enhancement along the expected course of either olfactory bulb or groove is seen. There is normal appearance of both olfactory bulb and nerves.

Acute: No hemorrhage, herniation, or hydrocephalus. No evidence of acute ischemia.

Brain: Brain parenchyma is within normal limits in signal and volume for age.

Vessels: No abnormal intravascular signal to suggest thrombosis. There is note of a tubular enhancing structure posteriorly in the left cerebellar hemisphere compatible with an incidental developmental venous anomaly

Bones: No suspicious lesion in the calvarium or skull base.

Other: Extracranial soft tissues are unremarkable.

IMPRESSION:

1. No enhancing mass lesions along the expected course of either olfactory bulb or groove is seen. Both olfactory bulbs and nerves appear to be normally developed.

2. No intracranial pathology. No abnormal enhancement.

DISCHARGE DATE: 22APR2015

PRIMARY CARE MANAGER:

ADMITTING DIAGNOSIS: ALCOHOL ABUSE

ADMISSION DATA

HISTORY:

HPI: 30 y.o. male admitted to 4 North for "drinking a lot." Pt began drinking at age 12 with his older, high school age friends for fun. He drank every other weekend for the next few years until he turned 18, at which point he began drinking 4-6 mixed drinks 3-4 days each week until 2012. During that period, he drank when he was sad, and when he was out at parties. In 2012, he had a major break-up from a 2-yr relationship, and began consuming 4-6 vodka or rum mixed drinks daily. Pt states that he drinks when he is sad, has relationship problems, or needs to fall asleep. He has very few friends, so he drinks alone. He attributes his lack of friends to his poor relationship with his father growing up. Pt states that he does not drink as much as he does at home when he goes out because he does not want others to see him like that. Says that alcohol makes him forget what is bothering him, but believes that it is not actually fixing his problems. Pt attempted to stop drinking on 18-19 March 2015, but was not able to maintain abstinence and started drinking again on 20 March. He had his last drink on 24 March. Pt denies visual, auditory, olfactory hallucinations, but states that his thoughts seem to race and he speeds through everything that he does feels like he is always moving fast.

Suicidal Ideation: Pt admits to SI three days ago. He thought of a plan to use a helium hood because it is less painful and no one would know if he died. Pt did not have the means to complete this action, and said he doesn't think he would have done it. Says he often thinks of committing suicide. The thought comes and goes, and is due to a mixture of sadness and alcohol. In the past, he has never thought through a plan in that much detail.

He has attempted suicide twice in the past. He does not possess of firearms.

Grief, Abandonment, Abuse: Pt states that as a child his father would punish him and his sisters by spanking them with his hands hard enough to leave marks. States that his father seemed to take out his anger on them as he spanked them, and that his father yelled a lot. For a few weeks pt was placed in foster care while his father was investigated for child abuse, but he was soon returned to his father. Father spanked pt and his siblings until they were late teens, and once punched pt in face. Pt states that when he was 17, his father forcefully grabbed and shaved off his hair one day. Father drank alcohol every day, but pt does not know if he had a substance abuse problem. Pt believes that his problems maintaining friendships stems from his lack of relationship with his father. Says there was no real relationship between the two and that he had to work for everything he wanted. No sexual abuse history.

Medications: Multivitamin

Allergies: Cats; pt's throat closes and he itches

Pain: 2/10 today because he recently got his braces tightened

Social Hx: Pt states he doesn't really have any friends, and if not at work programming, he spends most of his time alone. No smoker, no illicit drugs, no supplements, drinks up to 16oz coffee per day, single.

Past psychiatric Hx: Pt has no psychiatric diagnoses. Pt has anxiety that keeps him up at night. He anxiously thinks about a lot of things at night, which results in his inability to fall asleep for a while. When he cannot fall asleep, he uses alcohol to help. When he eventually does fall asleep, he wakes up a few times to use the restroom in the night. He usually gets 5-7 hr of sleep a night, but says he does not sleep well, and does not feel rested in the morning. He naturally wakes up between 0700-0800 every day, no matter how late he goes to bed. He says that he often cannot stay awake during the day and has to take naps.

Prior Suicide attempts: Pt attempted to commit suicide twice in high school. First attempt he swallowed a whole bottle of aspirin. Said he just got sick, but was not hospitalized and told very few people. Second attempt was also in high school, and he tried to drink a lot of alcohol, but that also was to no avail.

Hx of Violent behavior: Pt got into a few fights in high school, and got into two fights when he was deployed on a Navy ship from 2006-2009. One fight was in 2006 and the other was in 2007.

Hx of firearms in home: Pt does not possess any firearms. Were at house when he lived with a significant other in the past, but none of his own.

Hx of pending legal issues: Pt does not have any legal issues.

Financial: Pt says finances cause him much stress and worry. He is in debt, and is getting closer to paying off his debt, but it still worries him quite a lot.

Education: Pt states he did not do well in high school; graduated with 2.2 GPA. Worked as much as possible during the week, he said legal max was 20hr and worked 40hr during summer. Currently pt has 60 credit hours towards his Computer Science degree, but says he hates school. In the future, he does not know exactly what he wants to do, but has always wanted to be a chef and open his own restaurant.

PMX: Inflammatory colon; has been tested for Crohns and other GI conditions, but none found yet. Since age 15, has had stabbing pain and inflammation (as seen on imaging) caused by eating spicy and fiber-rich foods. Has been hospitalized for this.

Family Hx: Pt has a younger sister with depression. His other sister, maternal grandmother and possibly his mother have bipolar disorder. Pt does not know much about his father's side of the family.

Military hx: Pt is in a Navy cryptologic tech.

Deployment hx: Pt did tour on Navy ship from 2006-2009.

TBI hx: Denies.

PTSD hx: Denies.

SIGECAPS:

Sleep: 5-7 hrs of poor quality sleep, uses alcohol to fall asleep

Interest: No change; never really had much interest in anything, recently purchased snow-board gear to try this hobby

Guilt: No change, says maybe sometimes he feels guilty about lying so much as a child

Energy: No change

Connections: Does not enjoy the fact that he has no friends

Appetite: No change, eating normally recommended portions

Psychomotor: agitated +

Suicide/Homicide: SI three days ago (See above); denies homicidal ideation

Sex: No change in libido, usually high

PERTINENT PHYSICAL EXAM FINDINGS ON ADMISSION:

Exam Date: 0025 25 Mar 2015

Vital Signs: SBP: 131 DBP: 80 HR: 80 RR: 16 TEMP: 98.3

Comments: alert and cooperative and agreeable to exam

Head/Neck: Normocephalic. Supple without masses

Eyes: PERLA

Ears: Clear TMS, normal canals

Nose/Sinuses: No nasal/tender discharge, no tender Sinuses, patent nares

Throat/Mouth/Teeth: Normal

Female Breast: N/A

Chest/Lungs: Equal BS, no rales, rhonchi, wheezes or rubs

Heart: No gallops, rubs or murmurs

Abdomen: Soft, nontender, normal BS, no organomegaly

Male Genitalia: Not observed

Rectal/Prostate: offered and pt declined

Genitalia/Rectal (F): Not observed

Pelvic: Not observed

Back: Standing: Cervical exam:
Sidebending: 30 degrees b/l
Rotation: 60 degrees b/l
Flexion: 30 degrees
Extension: 10 degrees

Lumbar exam:
Flexion: 120 degrees
Extension: 20 degrees

Pulses: Posterior Tibial and Dorsalis Pedis 2

Extremities: No clubbing, cyanosis or edema

Skin: Lesions noted on back of head, three hairless spots with dry, flaky skin

Lymphatics: No palpable or enlarged nodes

Neurologic:

 Discharge Narrative Summary

Patient: Merwin, Daniel

Admission Date: 25th March 2015

Discharge Date: 22nd April 2015

Treatment Progress Summary:

Reason for Admission: Alcohol Use disorder

Reason for Discharge: Patient has successfully completed 28 days of inpatient addiction treatment.

Physical Condition: Patient has been medically cleared for discharge by his treating physician.

Educational Progress: Patient has gained a basic understanding of the educational topics covered during the course of treatment, including the following: addiction as a disease; stages of change as they apply to substance use; defense mechanisms in substance use; anger and stress management; relaxation techniques; the association of depression and anxiety with substance use; identification and modification of maladaptive beliefs; effective communication skills; utilization of social support; identification of substance use triggers; crisis management; and, relapse prevention. The

PERSONAL DATA/PRIV ACT 1974

SF-509

CliniComp, Intl.

patient participated in group and individual therapy, art therapy, creative writing, and recreational activities, and participated in individual goal-setting and completed individual homework assignments.

Community Adjustment: Patient adjusted well to the community environment. He was self-motivated and accepted responsibility for his treatment by actively engaging in the treatment modalities offered and completing individual assignments. He was an active contributor to the group process as well.

Art therapist input ~ (quoted): "Patient participated in group art therapy sessions 3-4 times weekly during his inpatient treatment. Art therapy sessions integrate both creative and traditional psychotherapeutic interventions to increase insight, provide an outlet for challenging emotions, manage resistance, and address treatment goals holistically."

This patient was an active and engaged participant in art therapy. His identified art therapy specific goals included expressing, understanding, and managing emotions; improving insight through creative exploration; and building social/relational skills through shared experiences and giving/receiving feedback. Patient responded particularly well to interventions focusing on group cohesion and social support, and took on an active leadership role within art therapy sessions during his time in treatment. . Patient responded particularly well to insight- and product-oriented art therapy interventions, and was able to effectively utilize the creative process as a way of expressing himself and connecting with others. Patient was a willing and engaged participant in art therapy and effectively developed a foundational process for containing and managing difficult emotions related to family of origin issues and self-concept. It is recommended that ongoing outpatient treatment for this patient incorporate opportunities for creative work to continue building positive self-concept as well as insight into behavioral patterns related to his substance abuse, and this writer has provided the patient with area resources for veteran- and military-led therapeutic art and writing opportunities, as well as available art therapy services".

E.A. McKee, LCPAT, ATR-BC.

Licensed, Registered and Board-Certified Art Therapist.

Peer (12-Step) counselor input ~ (quoted) "The patient acquired the foundation of Steps of 1-3, evidenced by daily reconnection to spirituality. Patient acknowledged being powerless over their substance abuse and the humility to ask for help when life gets unmanageable. Patient was open-minded of the need of lifestyle changes. Patient expressed a leap of faith in self, evidence by shared humiliations in group(s) of and the willingness to explore positive lifestyles outcome changes needed to live without substance abuse. This patient came to writers' group appalled that he was confronted on his very first day. While in group this patient disclosed emotions of anger that increase entitlement issues that sustain affixed to the past and now used for insight by realizing that was holding on to the past for the use of sympathy to manipulated others. This was evidenced by patient expressing in group the need to forgive others, also the need to be accepted by others, while bonding with peers to better understand shortcomings or character flaws they could do harm in the end. It is the writers' position that this patient has a very good sobriety outlook toward recovery. It was my honor to have served this Service Member".

Eugene Allen

Peer Counselor

Recreational therapist input ~ (quoted) "Patient participated in recreation therapy group 3-4x per week during inpatient stay at RTC. Recreation therapy focuses on improving patient's affect, reducing depression, enhance self-sufficiency, and identify new positive leisure opportunities and interest, as well as recreation participation by using different recreational modalities such as archery, bowling and nutrition cooking class. Patient did a great job in recreation therapy. Patient was able to stay on task without encouragement from staff. Patient was open-minded in trying new unfamiliar activities. Patient learned new positive coping skills through recreation participation. Patient is now able to identify 3 positive leisure activities to use as coping skills. Patient will be giving a list of volunteer community resources to continue to build positive leisure skills."

Jeremy Johnson CTRS

Recreation Therapist

Understanding for Disease Process: Patient demonstrated an understanding of substance addiction as a disease and verbalized the need for abstinence to maintain improvements to his physical health and emotional health, as well as to improve interpersonal relationships and overall quality of life.

Commitment to Treatment Needs: Patient attended Alcoholics Anonymous (AA) and sought information on self-help groups available within his community. Patient understands the need to find and maintain a permanent sponsor when he returns home. The patient appears to be committed to participating in self-help groups after discharge. He has agreed to follow through with all outpatient treatment recommendations.

Command/Family Involvement: Patient's command team appeared fully engaged with treatment. Patient and family members communicated via phone.

PERSONAL DATA/PRIV ACT 1974

SF-509

CliniComp, Intl.

Patient's Assessment of Progress: Patient reported that he has benefited from treatment, has developed insight into his problematic substance use, and has gained an understanding of effective methods of maintaining sobriety and coping with life stressors in an adaptive fashion.

Discharge Assessment of Functioning:

Treatment Program Assessment of Continuing Treatment Needs: On a daily basis, the patient needs to continue employing behaviors and strategies that support total abstinence from all mood- and mind-altering substances. It recommended that patient follow up with Washington Navy Yard for outpatient aftercare for treatment and also attends AA/NA meetings or Smart Recovery (12-Step groups; minimum of weekly communication with a sponsor with several years of sobriety; weekly individual and group substance abuse counseling; ongoing mental health therapy/medication management, as needed.

Patient Assessment of Continuing Needs: Patient acknowledges that he needs continued treatment to address his substance use disorder and mental health. It is recommended that patient follow-up with Washington NY to manage substance use disorder and WRNMMC for behavioral health. Patient will follow-up with Washington NY on the 22 of April 2015 at 1000. Patient was referred to behavioral health at WRNMMC for continuum of care and appointment is with Major Zembrzuska on the 23rd of April, 2015 at 0900.

Family Assessment of Continuing Needs: Patient's family was not directly involved in treatment.

Goals Completed During Treatment:

- 1). List and discuss negative consequences resulting from or exacerbated by alcohol use.
Therapeutic Intervention- Pt. will make a list of the ways chemical use has negatively impacted his life; substance abuse negative impact versus sobriety positive impact. Pt. will acknowledge how he has used denial to minimize the severity and negative consequences of alcohol use. Pt. will also acknowledge the need to stay in treatment. (Completed)
- 2). Patient will verbalize recognition that mood altering chemicals were used as the primary coping mechanism to escape from stress.
Therapeutic Intervention- Explore how addiction was used to escape from stress. Pt. will learn and develop alternatives to drinking that will help him manage his anxiety. (Completed)
- 3). Pt. will meet with an AA member who has been working the 12-Step program for several years and find out specifically how the program has helped him/her stay sober afterward.
Therapeutic Intervention- Pt. will attain a temporary sponsor while in treatment. (Completed)
- 4). Identify triggers and cues for alcohol use and also learn basic coping skills and healthy alternatives to keep his mind of drinking.
Therapeutic Intervention- Patient will identify projects, and recreational activities free from substance/alcohol use. (Completed)
- 5). Pt. will utilize cognitive methods to control trigger thoughts and reduce impulsive reactions to those thoughts.
Therapeutic Intervention- Pt. will identify dysfunctional thoughts that lead to impulsivity; then replace each thought with a thought that is accurate, positive, self-enhancing, and adaptive. (Completed)

Goals to be completed after Treatment:

Continued treatment/ assessment to stabilize condition medically, behaviorally, emotionally, cognitively and return to functioning within normal parameters.

Discharge Mental Status Exam:

Patient was well-groomed and appropriately dressed in the uniform of the day. He was alert and oriented to person, place, time, and circumstance, with no evidence of disorder of perception or thought process or content during the interview. Speech was of normal rate, tone, and rhythm. Expressive and receptive communication skills were intact. Memory appeared intact. Affect was full-range and mood was euthymic. He denied current suicidal or homicidal ideation, plan, or intent. Insight (e.g., the ability to identify and understand how psychological symptoms are affecting functioning) and judgment (e.g., the ability to determine right from wrong) appeared intact. Intelligence was clinically estimated as within the average range based on use of vocabulary, syntax, and semantics. He neither demonstrated nor reported difficulties with self-care.

Discharge Risk Assessment:

RISK ASSESSMENT

Suicide Risk

Suicide Risk

After considering variables that influence suicide risk, including prior suicide attempts, psychiatric diagnoses that alleviate risk, age, gender, family background, interpersonal relationships, physical health, suicide risk variables regarding lethality/access/planning, affective control, degree of hope, family history of completed suicide, degree of willingness to seek help, connection with therapist, and degree of psychosocial support for dealing with current

CliniComp, Intl.

life stressors, current suicide risk is judged to be: Low.

Homicide Risk (using TIPM, Rosenberg, 1997)

Is patient having homicidal Thoughts (T)? Patient denied.

Is patient Intending (I) to attempt homicide? Patient denied.

Does patient have a homicide Plan (P)? Patient denied.

Does patient have the Means (M)? Patient denied.

Summary of risk assessment: Patient denies any current thoughts or ideation about suicide, and denies any history or current homicidal ideation, plan, or intent. He has displayed future orientation. Patient appears to be at low risk for self-harm or harm to others at present. Protective factors include future orientation, and a desire to continue his military career.

DIAGNOSES

1. Alcohol Use Disorder, Severe (in a controlled environment)
2. Generalized Anxiety Disorder

Final Recommendations:

1. Abstinence from alcohol (including non-alcoholic beer & cold medications) and all mood-altering substances.
2. Follow-up with Washington NY on the 22nd of April at 1000.
3. Appointment with Behavioral Health, Major Zembruuska on the 23rd of April, 2015 at 0900.
4. Participate in 12-Step meetings and/or Smart Recovery for 90 days and maintain a minimum of weekly contact with sponsor (if possible).
5. Continue medications as prescribed (see discharge medication list).

Olusola Edwards, LPC, LMFT, LCDC
21st April 2015

DID AN ADVERSE DRUG REACTION OCCUR DURING THIS PATIENT STAY? No

Was the patient physically restrained during this admission? No

DISCHARGE DIAGNOSIS:

1. Alcohol Use Disorder X
2. Intermittent headaches since childhood-Required P/u by PCN, PC instructed to f/u with PCN X
3. Anxiety-on Zoloft 50mg qhs

Patient Radiology Report

MERWIN, DANIEL 20[REDACTED] 29y M

Priority: Exam#: 0067-14327819

Procedure: MRI, FOOT LT W OR W/O CON Exam date: 10/5/2014 2:43:00 PM

Reason for exam: Pt had and ankle sprain in april and continues to have pain, discomfort and swelling despite conservative treatment

Order comment:

Result code: SEE RADIOLOGIST'S REPORT

Finding:

HISTORY: Continuous pain following injury

COMPARISONS: Left foot and ankle radiographs dated 5/6/14

TECHNIQUE: WRNMMC MRI of the left ankle was performed utilizing standard imaging sequences (3 plane localizer, axial T1, axial PD fat-sat, coronal T1, coronal PD fat-sat, sagittal T1, sagittal PD fat-sat). No intravenous or intra-articular contrast was administered. Subsequently, MRI of the forefoot was obtained to include 3 plane localizer, coronal T1, coronal PD fat-sat, axial T1, sagittal T1, axial PD fat-sat, sagittal PD fat-sat.

FINDINGS:

ANKLE:

A skin marker was placed along the anterolateral aspect of the lower leg at the site of symptoms.

Plantar aponeurosis: within normal limits.

Tendons

Achilles' tendon: within normal limits.

Peroneal tendons: within normal limits.

Flexor tendons: Apart from minimal fluid accumulation at the knot of Henry, the flexor tendons about the ankle are otherwise within normal limits.

Extensor tendons: within normal limits.

Ligaments:

Syndesmotic ankle ligaments: within normal limits.

Low lateral ankle ligaments: The anterior talofibular ligament appears thickened. Calcaneofibular and posterior talofibular ligaments are within normal limits.

Deltoid ligamentous complex: within normal limits.

Spring ligamentous complex: within normal limits.

Lisfranc ligament: within normal limits.

Sinus tarsi and tarsal tunnel: within normal limits.

Muscle morphology and signal intensity: within normal limits.

Bone morphology and signal intensity: within normal limits.

Chondral surfaces: within normal limits.

FOREFOOT:

Tendons:

Distal peroneal tendons: within normal limits.

Distal flexor tendons: within normal limits.

Distal extensor tendons: within normal limits.

Ligaments:

Intermetatarsal ligaments: within normal limits.

Lisfranc ligament: within normal limits.

The plantar plate and capsular ligamentous structures about the metatarsal phalangeal and interphalangeal joints of the forefoot are within normal limits.

Recesses and Bursae: No evidence of Morton's neuroma or intermetatarsal bursitis.

Muscle morphology and signal intensity: within normal limits.

Bone morphology and signal intensity: Mild degenerative changes are seen at the 1st metatarsophalangeal joint.

IMPRESSION:

Findings suggestive of prior lateral ankle sprain.

WRNMMC BEHAVIORAL HEALTH CLINIC
LIMITS OF CONFIDENTIALITY

Authority: DoD 6025.18-R, "Health Information Privacy Regulation"

Limitations of Confidentiality: As part of your healthcare team, our goal is to provide you with quality care as well as protect the privacy of your personal information. The care we provide you may include, but is not limited to, assessment, referral, individual therapy, couples therapy, family therapy, group therapy, and psychiatric evaluation and medications. As your providers, we will document information about your visit in your military health record (written and electronic) to ensure continuity of care. Your health record is maintained as the property of the U.S. Government. In the majority of cases, we will not disclose any of your personal information nor confirm/deny that we have met with you unless you provide us with written authorization to disclose your personal information. There are exceptions, however, under which we may be required to release your personal information without obtaining your prior authorization. For example:

1. **Safety:** If you threaten to harm yourself, we may seek hospitalization and/or contact others to ensure your safety. If you threaten serious bodily harm to another, we are required to take protective actions, such as contacting the victim, police, chain of command, or seeking your hospitalization.
2. **Abuse:** If we believe that a child or vulnerable adult is being abused, we are required to file a report with the appropriate protective agency. We may also be required to report spousal abuse under certain circumstances.
3. **Court Orders and Subpoenas:** If you are involved in legal actions/proceedings, your record may be subject subpoena or lawful directive from a court. Under the Uniform Code of Military Justice (UCMJ), we have a limited "privileged communication" that may prevent your records from being disclosed in legal proceedings. This privilege is not absolute and there may be situations involving some violations of the UCMJ, civil, or criminal law where we may be required to divulge that information to your Commanding Officer (Co) and/or other authorities. If you have any concerns related to this, please contact an attorney.
4. **Command Consultations:** For service members, your Commanding Officer or Command Element (CO) is entitled to limited information, as pertinent to any duty limitations or restriction, security clearance, or treatment that might affect duty performance or jeopardize the safety of yourself, co-workers, or the unit's mission. Your CO or chain of command is not authorized to view your medical records through informal means. Information that impacts your duty status may be provided to your CO in writing, such as through service-specific documentation. We do not practice routine disclosure to commands. When we must disclose information, it is the minimum necessary and will only be to your CO unless you give written permission otherwise. This applies even if you are command-referred here. For information on command referred evaluations, see Department of Defense Instruction 6490.4.
5. **Care Coordination:** Because we operate as a team with other healthcare staff to provide you the best possible services, we may disclose your information to other providers or care managers to facilitate your continued care. These members of the health care team are permitted access to your records in their treatment of you. In most cases, your information will not be discussed outside the clinic or hospital setting without your written permission.
6. **Legal:** Medical care providers may be required to report information disclosed about the intent to violate a military regulation or law.
7. **Quality Care Reviews:** Quality assurance personnel may review your record to ensure that care standards are being met. If this occurs, the reviewer is required to keep your identity confidential.
8. **Third-Party Insurance:** If you have health insurance besides TRICARE, limited information may be released to your insurance company.
9. As per the Health Information Technology for Economic and Clinical Health Act (HITECH act) that is part of the American Recovery and Reinvestment Act of 2009 (ARRA), we can only communicate with you electronically through encrypted technologies. Because of these restrictions, our ability to contact you electronically is limited to an encrypted method that you and your provider might establish.

If you have any questions or concerns, please feel free to discuss them with us. Our intent is to discuss our limitations with you now and throughout your treatment as they may arise. We shall approach your care in the spirit of advocacy for you and in accordance with our hospital's vision of providing patient and family-centered care.

Acknowledgement of Privacy Act Rights and Limitations: Your signature merely acknowledges that you have been advised of the foregoing. If requested, a copy of this form will be furnished to you.

Medical Center**

Russell B. Carr, M.D.
Commander, Medical Corps, United States Navy
Service Chief
Adult Behavioral Health Clinic
Walter Reed National Military Medical Center
8901 Wisconsin Ave., Bethesda, MD 20889-5600

2 January 2013

From: CDR Russell B. Carr, MC, USN, Service Chief, Adult Behavioral Health Clinic
To: All Patients of Adult Behavioral Health Clinic

SUBJECT: CHANGE IN CLINIC'S POLICY ON FAILURE TO KEEP APPOINTMENTS

1. I want to thank all of you for choosing our clinic for your mental health care. We take pride in providing Patient and Family-Centered Care. So our patients can have better access to our providers, I am implementing policies to help make sure that Wounded Warriors and others who need and want to be seen in our clinic can get the care they need.

2. One aspect of these changes involves our "No-Show" policy. These are instances when patients have appointments scheduled but do not come for them. Here is how our new policies will affect you:

a. Any appointment you cancel on the same day as the appointment will be documented as a "No-Show." This helps us and our patients by having time to open the appointment for other patients to use it.

b. The missed appointment will be documented in your electronic medical record (AHLTA). Your provider may call you. This is typically done to ensure the patient is safe.

c. Initial Appointments: Patients will be allowed one rescheduling for a missed appointment for a new referral. After missing two appointments for the initial evaluation, the patient will need to discuss the situation with either the Clinic Manager or Service Chief to reschedule a third new appointment. Otherwise, the referral for this episode of care will be closed. For active duty patients, we will consider if the missing of these two appointments warrants contact with the service member's Commanding Officer.

d. Follow-Up Appointments: Nothing will change if you miss one follow-up appointment with a provider. You will also be allowed to reschedule after two in a row missed follow-up appointments. But after two in a row missed follow-up appointments, any appointments regularly reserved for you at a set time with a provider will be opened for other patients. After three in a row follow-up appointments are missed, you will need to discuss the situation with either the Clinic Manager or Service Chief to schedule another appointment. Otherwise, care with that particular provider will be considered closed, and the situation will be discussed with any other providers you have in the clinic. For active duty patients, we will consider if the missing of three appointments in a row warrants contact with the service member's Commanding Officer.

e. If a provider feels that missed appointments are directly due to the patient's mental health issues, then the patient's current care may not be closed. However, the provider will address with the patient the reasons for the missed appointments and problem-solve with him or her ways to address any problems.

f. Patients will not be refused care due to this policy. Non-active duty patients will be offered care through the TRICARE network. Active duty patients can get care after either talking to CDR Carr or other clinic personnel. Clinic leadership may discuss the situation with the service member's Commanding Officer.

g. If you have questions or concerns, please contact me, CDR Carr. My office phone number is 301-319-4376. You may also contact the hospital's Patient Advocate Office at 301-295-0156.

R. B. CARR
CDR MC USN

I have read this policy, discussed it with a clinic staff member, and understand it.

 Date 24 AUG 14

What provides you with strength and hope: UNSURE... ESCAPING INTO MY HEAD AND

Do you have unmet spiritual needs? SOLICITING PRAYER

What have you been doing to help yourself so far? BREATHE EXERCISE

☐ I have an illness or condition that made me change the kind or amount of food I eat, or make it hard for me to eat.

☐ I eat fewer than 2 meals per day. ☐ Without wanting to, I have lost or gained 10 or more pounds in the last 6 months.

What are the top 3 goals you would like to address?

1. ANXIETY
2. PAST ISSUE - FAMILY ABUSE (VERBAL - PARTIALLY PHYSICAL)
3. NEW WAY OF HANDLING ISSUES RATHER THAN IGNORE

Thank you for completing this questionnaire. You may add extra information you'd like us to know on the reverse side.

AUDIT-C Questionnaire

Patient Name: DANIEL MERWIN

Date of Visit: 04 AUG 11

1. How often do you have a drink containing alcohol?

- ☐ a.) Never
- ☐ b.) Monthly or less
- ☒ c.) 2-4 times a month
- ☒ d.) 2-3 times a week
- ☐ e.) 4 or more

VARIES - IF I KEEP BUSY 2-4 TIMES A MONTH

2. How many standard drinks containing alcohol do you have on a typical day?

- ☒ a.) 1 or 2
- ☒ b.) 3 or 4 *VARIES*
- ☐ c.) 5 or 6
- ☐ d.) 7 to 9
- ☐ e.) 10 or more

3. How often do you have six or more drinks on one occasion?

- ☐ a.) Never
- ☒ b.) Less than monthly
- ☐ c.) Monthly
- ☐ d.) Weekly
- ☐ e.) Daily or almost daily

Generalized Anxiety Disorder 7-item (GAD-7) scale

Over the last 2 weeks, how often have you been bothered by the following problems?	Not at all sure	Several days	Over half the days	Nearly every day			
1. Feeling nervous, anxious, or on edge	0	1	2	③			
2. Not being able to stop or control worrying	0	①	2	3			
3. Worrying too much about different things	0	1	②	3			
4. Trouble relaxing	0	1	②	3			
5. Being so restless that it's hard to sit still	0	①	2	3			
6. Becoming easily annoyed or irritable	0	1	2	③			
7. Feeling afraid as if something awful might happen	①	1	2	3			
Add the score for each column							
	0	+	2	+	4	+	6
Total Score (add your column scores) =					12		

If you checked off any problems, how difficult have these made it for you to do your work, take care of things at home, or get along with other people?

Not difficult at all _____

Somewhat difficult _____

Very difficult X _____

Extremely difficult _____

Insomnia Severity Index

The Insomnia Severity Index has seven questions. The seven answers are added up to get a total score. When you have your total score, look at the 'Guidelines for Scoring/Interpretation' below to see where your sleep difficulty fits.

For each question, please CIRCLE the number that best describes your answer.

Please rate the *CURRENT* (i.e. *LAST 2 WEEKS*) *SEVERITY* of your insomnia problem(s).

Insomnia Problem	None	Mild	Moderate	Severe	Very Severe
1. Difficulty falling asleep	0	1	(2)	3	4
2. Difficulty staying asleep	0	(1)	2	3	4
3. Problems waking up too early	(0)	1	2	3	4

4. How SATISFIED/DISSATISFIED are you with your CURRENT sleep pattern?

Very Satisfied Satisfied Moderately Satisfied Dissatisfied Very Dissatisfied
 0 1 (2) 3 4

5. How NOTICEABLE to others do you think your sleep problem is in terms of impairing the quality of your life?

Not at all A Little Somewhat Much Very Much Noticeable
 Noticeable (1) 2 3 4
 0

6. How WORRIED/DISTRESSED are you about your current sleep problem?

Not at all A Little Somewhat Much Very Much Worried
 Worried (1) 2 3 4
 0

7. To what extent do you consider your sleep problem to INTERFERE with your daily functioning (e.g. daytime fatigue, mood, ability to function at work/daily chores, concentration, memory, mood, etc.) CURRENTLY?

Not at all A Little Somewhat Much Very Much Interfering
 Interfering (1) 2 3 4
 0

Guidelines for Scoring/Interpretation:

Add the scores for all seven items (questions 1 + 2 + 3 + 4 + 5 + 6 + 7) = 9 your total score

Total score categories:

0-7 = No clinically significant insomnia

8-14 = Subthreshold insomnia

15-21 = Clinical insomnia (moderate severity)

22-28 = Clinical insomnia (severe)

hard to get to sleep
 wakes up when something
 is on his mind
 a rain/storm helps.

PTSD CheckList – Military Version (PCL-M)

Patient's Name: DANIEL MCBROWN

Instruction to patient: Below is a list of problems and complaints that veterans sometimes have in response to stressful life experiences. Please read each one carefully, put an "X" in the box to indicate how much you have been bothered by that problem *in the last month*.

No.	Response	Not at all (1)	A little bit (2)	Moderately (3)	Quite a bit (4)	Extremely (5)
1.	Repeated, disturbing <i>memories, thoughts, or images</i> of a stressful military experience from the past?	X				
2.	Repeated, disturbing <i>dreams</i> of a stressful military experience from the past?	X				
3.	Suddenly <i>acting or feeling</i> as if a stressful military experience were <i>happening</i> again (as if you were reliving it)?	X				
4.	Feeling <i>very upset</i> when <i>something</i> reminded you of a stressful military experience from the past?	X				
5.	Having <i>physical reactions</i> (e.g., heart pounding, trouble breathing, or sweating) when <i>something</i> reminded you of a stressful military experience from the past?	X				
6.	Avoid <i>thinking about or talking about</i> a stressful military experience from the past or avoid <i>having feelings</i> related to it?	X				
7.	Avoid <i>activities or situations</i> because they remind you of a stressful military experience from the past?	X				
8.	Trouble <i>remembering important parts</i> of a stressful military experience from the past?	X				
9.	Loss of <i>interest in things that you used to enjoy</i> ?	X				
10.	Feeling <i>distant or cut off</i> from other people?	X				
11.	Feeling <i>emotionally numb</i> or being unable to have loving feelings for those close to you?	X				
12.	Feeling as if your <i>future</i> will somehow be <i>cut short</i> ?	X				
13.	Trouble <i>falling or staying asleep</i> ?	X				
14.	Feeling <i>irritable</i> or having <i>angry outbursts</i> ?	X				
15.	Having <i>difficulty concentrating</i> ?	X				
16.	Being " <i>super alert</i> " or watchful on guard?	X				
17.	Feeling <i>jumpy</i> or easily startled?	X				

PCL-M for DSM-IV (11/1/94) Weathers, Litz, Huska, & Keane National Center for PTSD - Behavioral Science Division

This is a Government document in the public domain.

PATIENT HEALTH QUESTIONNAIRE-9 (PHQ-9)

Over the last 2 weeks, how often have you been bothered by any of the following problems?
(Use "✓" to indicate your answer)

	Not at all	Several days	More than half the days	Nearly every day
1. Little interest or pleasure in doing things	0	1	2	3
2. Feeling down, depressed, or hopeless	0	1	2	3
3. Trouble falling or staying asleep, or sleeping too much	0	1	2	3
4. Feeling tired or having little energy	0	1	2	3
5. Poor appetite or overeating	0	1	2	3
6. Feeling bad about yourself — or that you are a failure or have let yourself or your family down	0	1	2	3
7. Trouble concentrating on things, such as reading the newspaper or watching television	0	1	2	3
8. Moving or speaking so slowly that other people could have noticed? Or the opposite — being so fidgety or restless that you have been moving around a lot more than usual	0	1	2	3
9. Thoughts that you would be better off dead or of hurting yourself in some way	0	1	2	3

FOR OFFICE CODING 0 + 3 + 4 + 0
=Total Score: 7/27

If you checked off any problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people?

Not difficult at all <input type="checkbox"/>	Somewhat difficult <input checked="" type="checkbox"/>	Very difficult <input type="checkbox"/>	Extremely difficult <input type="checkbox"/>

Patient Radiology Report

MERWIN, DANIEL 20[REDACTED] 29y M

Priority: Exam#: 0067-14130311

Procedure: FOOT, LT 3 VIEWS Exam date: 4/19/2014 3:42:00 PM

Reason for exam: Running and stepped in hole c/o left ankle/foot pain and swelling. R/o fx

Order comment:

Result code: SEE RADIOLOGIST'S REPORT

Finding:

History: Running and stepped in hole c/o left ankle/foot pain and swelling.
R/o fx

Technique: Frontal, oblique, and lateral radiographs of the left foot and ankle

Comparison: None available

Findings:

No acute fracture or dislocation. Osseous alignment and mineralization is normal. Joint spaces are preserved. The ankle mortise and talar dome are intact. A small developing plantar calcaneal spur is identified. No significant degenerative or erosive changes are seen. There is mild soft tissue edema overlying the lateral malleolus.

Impression:

Mild soft tissue edema overlying the lateral malleolus without evidence of acute osseous abnormality.

B6-D-3 Appendix B

Enclosure (1)

n. Any other symptoms that you think may be related to lung problems:

Yes/No

5. Have you ever any of the following cardiovascular or heart problems?

a. Heart attack:

b. Stroke: Yes/No

c. Angina: Yes/No

d. Heart failure:

e. Swelling in your arms or feet (not caused by walking): Yes/No

f. Heart arrhythmia (heart beating irregularly): Yes/No

g. High blood pressure: Yes/No

h. Any other heart problem that you've been told about: Yes/No

6. Have you ever had any of the following cardiovascular or heart symptoms?

a. Frequent pain or soreness in your chest: Yes/No

b. Pain or tightness in your chest during physical activity:

Yes/No

c. Pain or tightness in your chest that interferes with your job:

Yes/No

d. In the past 2 years have you noticed your heart skipping or missing a beat: Yes/No

e. Heartburn or indigestion that is not related to eating: Yes/No

f. Any other symptom that you think may be related to heart or circulation problems: Yes/No

7. Do you currently take medication for any of the following problems?

a. Breathing or lung problems: Yes/No

b. Heart trouble: Yes/No

c. Blood pressure: Yes/No

d. Seizures (fits): Yes/No

8. If you've used a respirator, have you ever had any of the following problems?

(If you've never used a respirator, check the following space and go to question 9:)

a. Eye irritation: Yes/No

b. Skin allergies or rash: Yes/No

c. Anxiety: Yes/No

d. General weakness or fatigue: Yes/No

REQUEST FOR ADMINISTRATION OF ANESTHESIA
AND FOR PERFORMANCE OF OPERATIONS AND OTHER PROCEDURES

A. IDENTIFICATION

1. OPERATION OR PROCEDURE

INGROWN TOENAIL REMOVAL

B. STATEMENT OF REQUEST

1. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be REMOVAL OF HALF OF
(Description of operation or procedure in layman's language)

LEFT BIG TOE NAIL. Removal after proper anesthesia

Risks: bleeding, infection, recurrence.

which is to be performed by or under the direction of Dr. Sutton

2. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgment of the professional staff of the below-named medical facility, during the course of the above-named operation or procedure.

3. I request the administration of such anesthesia as may be considered necessary or advisable in the judgment of the professional staff of the below-named medical facility.

4. Exceptions to surgery or anesthesia, if any, are: None

(If "none", so state)

5. I request the disposal by authorities of the below-named medical facility of any tissues or parts which it may be necessary to remove.

6. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and observation of the operation by authorized personnel, subject to the following conditions:

- The name of the patient and his/her family is not used to identify said pictures.
- Said pictures be used only for purposes of medical/dental study or research.

(Cross out any parts above which are not appropriate)

C. SIGNATURES

(Appropriate items in Parts A and B must be completed before signing)

1. COUNSELING PHYSICIAN/DENTIST: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above.

(Signature of Counseling Physician/Dentist)

2. PATIENT: I understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

(Signature of Witness, excluding members of operating team)

(Signature of Patient)

18 JUNE 2006 10:10

(Date and Time)

3. SPONSOR OR GUARDIAN: (When patient is a minor or unable to give consent) I, _____ sponsor/guardian of _____ understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

(Signature of Witness, excluding members of operating team)

(Signature of Sponsor/Legal Guardian)

(Date and Time)

PATIENT'S IDENTIFICATION (For typed or written entries give: Name—last, first, middle; grade; date; hospital or medical facility)

Hearing Conservation Program

HEARING CAN BE PERMANENTLY LOST BY PHYSICAL DAMAGE, ILLNESS, AGE, TOXIC REACTION TO DRUGS OR CHEMICALS, AND LONG EXPOSURE TO HIGH NOISE LEVELS. NOISE LEVELS WHICH ARE HAZARDOUS TO HEARING MAY BE ENCOUNTERED ABOARD NAVAL VESSELS. LONG EXPOSURE TIMES TO HIGH NOISE LEVELS PRODUCE DAMAGE TO NERVE CELLS IN THE INNER EAR. HEARING IMPAIRMENT FROM NOISE (NO MATTER HOW INTENSE THE SOUND LEVEL) DOES NOT HAVE TO OCCUR IF PROPER HEARING PROTECTION IS UTILIZED.

A HEARING CONSERVATION PROGRAM IS IN EFFECT AT THIS COMMAND. THE PROGRAM INCLUDES MONITORING AND LABELING OF NOISE HAZARD AREAS, HEARING TESTING, THE USE OF PROTECTIVE DEVICES, AND TRAINING AS REQUIRED BY OPNAVINST 5100.19 SERIES. YOU ARE AN IMPORTANT PART OF THIS PROGRAM AS IT IS DESIGNED TO SAVE YOUR HEARING. NOISE HAZARDOUS AREAS MUST BE OBSERVED AND HEARING PROTECTION MUST BE WORN IN THESE AREAS. ANNUAL AUDIOGRAMS ARE REQUIRED TO MONITOR PERSONNEL IN THE HEARING CONSERVATION PROGRAM.

84 DB OR GREATER OF CONTINUOUS NOISE= (SINGLE HEARING PROTECTION)

104 DB OR GREATER OF IMPACT NOISE= (DOUBLE HEARING PROTECTION)

GOOD EAR CARE INCLUDES NOT PLACING FOREIGN OBJECTS INTO EARS TO CLEAN THEM (IT USUALLY RESULTS IN PACKING OF EAR WAX), AND EARLY MEDICAL EVALUATION IF DRAINAGE, PAIN OR HEARING DIFFICULTY DEVELOP. THE EAR PLUGS SHOULD BE WASHED FREQUENTLY WITH SOAP AND WATER, AIR DRIED AND STOWED IN PLASTIC EAR PLUG CASES. REPLACEMENTS MAY BE OBTAINED AT ANY TIME FROM THE MEDICAL DEPARTMENT REPRESENTATIVE.

MEMBER COUNSELED ON THE PROVISIONS OF THE HEARING CONSERVATION PROGRAMS AS TO THE EFFECTS OF HAZARDOUS NOISE AND THE NEED TO WEAR PROTECTION WHEN EXPOSED TO HAZARDOUS NOISE LEVELS.

MEMBER PLACED NOT PLACED IN THE HEARING CONSERVATION PROGRAM

EAR PLUGS ISSUED THIS DATE: 4/8/06 FORMIES.

OPERATIVE PROCEDURE REPORT - 11/21/2005

PATIENT: **Merwin, Daniel**
BIRTHDATE: [REDACTED] 985
AGE: 20

GENDER: 20 [REDACTED]
male

ENDOSCOPIST: Winnie M. Polen, LT/MC
ASSISTANT: Nastarsha N. Bishop, HM3/USN

PROCEDURE: **Flexible Sigmoidoscopy, diagnostic**

INDICATIONS: hematochezia

MEDICATIONS: None

DESCRIPTION OF PROCEDURE: After the risks benefits and alternatives of the procedure were thoroughly explained, informed consent was obtained. Digital rectal exam was performed and revealed no abnormalities. The Pentax ES-3830 endoscope was introduced through the anus and advanced to the proximal transverse colon. The quality of the prep was excellent. The instrument was then slowly withdrawn as the mucosa was fully examined.

The examination was normal with no endoscopic findings. Retroflexed views in the rectum revealed hemorrhoids. Mild grade I internal hemorrhoids. The scope was then completely withdrawn from the patient and the procedure terminated.

COMPLICATIONS: None

ENDOSCOPIC IMPRESSION:

- 1) Normal sigmoidoscopy otherwise
- 2) Internal hemorrhoids

RECOMMENDATIONS:

- 1) fiber rich diet
 - 2) follow-up: primary MD PRN
- Needs work-up for thrombocytopenia

REPEAT EXAM: No

MEDICAL RECORD

REQUEST FOR ADMINISTRATION OF ANESTHESIA
AND FOR PERFORMANCE OF OPERATIONS AND OTHER PROCEDURES

A. IDENTIFICATION

1. OPERATION OR PROCEDURE

Flexible sigmoidoscopy, possible biopsy

B. STATEMENT OF REQUEST

2. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be

(Description of operation or procedure in layman's language)

place a scope into my colon to look for disease

which is to be performed by or under the direction of Dr.

Bacaner / Kamdar / Polen

3. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgement of the professional staff of the below-named medical facility, during the course of the above-named operation or procedure.

4. I request the administration of such anesthesia as may be considered necessary or advisable in the judgement of the professional staff of the below-named medical facility.

5. Exceptions to surgery or anesthesia, if any are:

OBSERVATION

(If "none", so state)

6. I request the disposal by authorities of the below-named medical facility of any tissue or parts which may be necessary to remove.

7. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and observation of the operation by authorized personnel, subject to the following conditions:

a. The name of the patient and his/her family is not used to identify said pictures.

b. Said pictures be used only for purposes for medical/dental study or research.

(Cross out any parts above which are not appropriate)

C. SIGNATURES

(Appropriate items in parts A and B must be completed before signing)

8. COUNSELING PHYSICIAN/DENTIST: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above:

(Signature of Counseling Physician/Dentist)

9. PATIENT: I understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

(Signature of Witness, excluding members of operating team)

(Signature of Patient)

(Date and Time)

10. SPONSOR OR GUARDIAN: (When patient is a minor or unable to give consent) I,

sponsor/guardian of

understand the nature of the proposed procedure(s), attendant risks involved,

and expected results, as described above, and hereby request such procedure(s) be performed.

(Signature of Witness, excluding members of operating team)

(Signature of Sponsor/Legal Guardian)

**USS RED ROVER BRANCH MEDICAL CLINIC
RECRUIT TRAINING COMMAND, GREAT LAKES**

IMMUNIZATIONS: RECRUIT WAS PROVIDED INFORMATION ON: MEASLES, MUMPS, & RUBELLA (MMR), BICILLIN, HEPATITIS-A, MENINGOCOCCAL, YELLOW FEVER, TETANUS-DIPHTHERIA, AND INACTIVATED POLIOVIRUS VACCINES. RECRUIT WAS GIVEN THE OPPORTUNITY TO ASK QUESTIONS AND DISCLOSE KNOWN ALLERGIES AND ADVERSE REACTIONS TO PREVIOUS IMMUNIZATIONS.

WELLNESS TRAINING: RECRUIT ATTENDED TRAINING ON GENDER SPECIFIC SELF-EXAMINATIONS (i.e. BREAST, PAP & TESTICULAR EXAMINATIONS). VIDEOS AND TEACHING AIDS WERE USED FOR DEMONSTRATIONS. TOBACCO CESSATION, BASIC NUTRITION, CONTRACEPTION, SEXUALLY TRANSMITTED DISEASES (i.e. AIDS), GENDER SPECIFIC INFECTIONS, HYGIENE AND GENERAL HEALTH TOPICS WERE DISCUSSED. VARICELLA TITER INDICATES NON IMMUNE. VARICELLA WAS GIVEN. INDIVIDUAL WAS ADVISED TO AVOID PREGNANCY FOR ONE MONTH AFTER RECEIVING VARICELLA & THREE MONTHS AFTER RECEIVING ALL OTHER LIVE VIRUSES. QUESTIONS WERE ENCOURAGED THROUGHOUT THE CLASS.

NOV 07 2005

RECORD REVIEW: RECRUIT MEDICAL SCREENING AND REVIEW OF MEDICAL HISTORY CONDUCTED IAW: MANUAL OF THE MEDICINE, CHAPTER 15, ARTICLE 26. SIGNIFICANT FINDINGS AND DEFECTS, IF ANY, ARE NOTED BELOW.
BICILLIN 1.2MU WAS/ WAS NOT GIVEN ON THIS DATE.

REPORT OF MEDICAL HISTORY (This information is for official and medically confidential use only and will not be released to unauthorized persons.)		OMB No. 0704-0413 OMB approval expires Mar 31, 2010
The public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services Directorate (0704-0413). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.		
PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ORGANIZATION. RETURN COMPLETED FORM AS INDICATED ON PAGE 2.		
PRIVACY ACT STATEMENT		
AUTHORITY: 10 USC 504, 505, 507, 532, 978, 1201, 1202, and 4346; and E.O. 9397 (SSAN). PRINCIPAL PURPOSE(S): To obtain medical data for determination of medical fitness for enlistment, induction, appointment and retention for applicants and members of the Armed Forces. The information will also be used for medical boards and separation of Service members from the Armed Forces. ROUTINE USE(S): None. DISCLOSURE: Voluntary; however, failure by an applicant to provide the information may result in delay or possible rejection of the individual's application to enter the Armed Forces. For an Armed Forces member, failure to provide the information may result in the individual being placed in a non-deployable status.		
WARNING: The information you have given constitutes an official statement. Federal law provides severe penalties (up to 5 years confinement or a \$10,000 fine or both), to anyone making a false statement. If you are selected for enlistment, commission, or entrance into a commissioning program based on a false statement, you can be tried by military courts-martial or meet an administrative board for discharge and could receive a less than honorable discharge that would affect your future.

REPORT OF MEDICAL HISTORY			Form Approved OMB No. 0704-0413 Expires Oct 31, 2006
(This information is for official and medically confidential use only and will not be released to unauthorized persons.)			
The public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services and Communications Directorate (0704-0413). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.			
PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ORGANIZATION. RETURN COMPLETED FORM AS INDICATED ON PAGE 2.			
PRIVACY ACT STATEMENT			
AUTHORITY: 10 USC 504, 505, 507, 532, 978, 1201, 1202, and 4346; and E.O. 9397 (SSAN). PRINCIPAL PURPOSE(S): To obtain medical data for determination of medical fitness for enlistment, induction, appointment and retention for applicants and members of the Armed Forces. The information will also be used for medical boards and separation of Service members from the Armed Forces. ROUTINE USE(S): None. DISCLOSURE: Voluntary; however, failure by an applicant to provide the information may result in delay or possible rejection of the individual's application to enter the Armed Forces. For an Armed Forces member, failure to provide the information may result in the individual being placed in a non-deployable status. WARNING: The information you have given constitutes an official statement. Federal law provides severe penalties (up to 5 years confinement or a \$10,000 fine or both), to anyone making a false statement. If you are selected for enlistment, commission, or entrance into a commissioning program based on a false statement, you can be tried by military courts-martial or meet an administrative board for discharge and could receive a less than honorable discharge that would affect your future.

PART I

Medical Screening. Completed by the medical provider to identify special needs and determine if a service or family member is suitable for an overseas, remote duty, or operational assignment. Complete the Report of Medical History (SF 93) and attach to this form.

Yes	No	N/A	ITEM
✓			1. All health records (military and civilian) reviewed?
✓			2. Physical examinations are current?
✓			3. G-6P-D, PPD and Sickle Cell trait test and Blood Type completed & documented?
✓			4. Immunizations are up-to-date and meet destination country requirements?
✓			5. Reference audiogram documented on DD 2215?
✓			6. Latest audiogram (DD 2216) reviewed?
✓			7. HIV testing completed or drawn?
✓			8. DNA testing completed and documented?
	✓		9. Are there pending consults or tests that have a bearing on assignment suitability?
	✓		10. Any past limited duty or medical board(s)? (document on SF 93)
		✓	11. Pap smear and pelvic/breast examination within past year?
		✓	12. Mammogram current (based on age)?
		✓	13. Pregnancy screening (verbal inquiry)?
		✓	14. If pregnant? (EDC:)
	✓		15. If a Special Duty assignment, is there a condition, which by MANMED, chapter 15, section IV, is disqualifying?
			16. Are there any conditions requiring ongoing care in the following areas? (document on SF 93)
	✓	✓	a. Orthopedic conditions (e.g., chronic back, knee, joint pain or weakness)
	✓	✓	b. Cardiovascular conditions (e.g., chest pain/angina, arrhythmia, valve disease, infarction)
	✓		c. Gynecologic conditions (e.g., chronic pelvic pain, abnormal PAP, breast mass)
	✓		d. Neurologic conditions (e.g., seizure, pinched nerve, migraine, neuropathy)
	✓		e. Respiratory conditions (e.g., asthma, RAD, chronic sinus, allergies)
	✓		f. Mental health or behavioral conditions (e.g., depression, adjustment/personality disorder, ADD/ADHD)
	✓		g. Recurrent or frequent medications (list on SF 93)
	✓		h. Alcohol abuse or dependence
	✓		i. Developmental concerns (e.g., motor, cognitive, communication, social/emotional, or adaptive development)
	✓		j. Other conditions or concerns? (explain):
		✓	17. For service/family members requiring medication in excess of 90 days: (if not applicable, check block and skip to #18)
			a. Is the patient in the maintenance phase of treatment?
			b. Should medication use cease, could the underlying condition become life threatening, pose a risk for dangerous or disruptive behavior or result in a limited duty, MEDEVAC, or early return situation?
			c. Is the medical staff at the gaining MTF/operational platform competent to manage the medication manipulation(s) if the underlying condition exacerbates?
			d. Can the pharmacy at the gaining MTF/operational platform obtain the medication for the duration of the assignment? Non-authorized medical allowance list (AMAL) medications may be provided by the supporting MTF for up to 180 days or obtained through the national mail order pharmacy program.

REPORT OF MEDICAL HISTORY

(This information is for official and medically confidential use only and will not be released to unauthorized persons.)

Form Approved
OMB No. 0704-0413
Expires Oct 31, 2006

The public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate of Information Operations and Reports (0704-0413), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no persons shall be subject to any penalty for failing to comply with a collection of information if it does not display a current valid OMB control number.

PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS. RETURN COMPLETED FORM AS INDICATED ON PAGE 2.

PRIVACY ACT STATEMENT

AUTHORITY: 10 USC 504, 505, 507, 532, 978, 1201, 1202, and 4346; and E.O. 9397.

PRINCIPAL PURPOSE(S): To obtain medical data for determination of medical fitness for enlistment, induction, appointment and retention for applicants and members of the Armed Forces. The information will also be used for medical boards and separation of Service members for the Armed Forces.

ROUTINE USE(S): None.

DISCLOSURE: Voluntary; however, failure by an applicant to provide the information may result in delay or possible rejection of the individual's application to enter the Armed Forces. For an Armed Forces member, failure to provide the information may result in the individual being placed in a non-deployable status.

WARNING: The information you have given constitutes an official statement. Federal law provides severe penalties (up to 5 years confinement or a \$10,000 fine or both), to anyone making a false statement. If you are selected for enlistment, commission, or entrance into a commissioning program based on a false statement, you can be tried by military courts-martial or meet an administrative board for discharge and could receive a less than honorable discharge that would affect your future.

SERUM

STAT

Hcp: DINKEL, TROY A

Req Loc: EMERGENC

Interpretations: (Cont'd)

Reference Values:

≥ 90 = Normal GFR
 60-89 = Mildly decreased GFR
 30-59 = Moderately decreased GFR
 15-29 = Severely decreased GFR
 < 15 = Kidney Failure

This is an estimated GFR only. The value has been derived from the modified MDRD equation: $GFR = 270 \times \text{serum creatinine}^{-1.007} \times \text{age}^{-0.180} \times \text{BUN}^{-0.169} \times 0.755$ if female). Values for African Americans should be adjusted by multiplying by 1.18. As with all estimations, results may not be valid for certain sub-groups including: pediatric patients (0-17 years old), severely hypoalbuminemic patients, patients not in steady state (including acute renal failure), dialysis patients, and patients with atypical body habitus. If a more accurate estimation is required, consider obtaining a Nuclear Medicine GFR determination or Nephrology consultation.

Reason for Order:

20y/o male dot 2-5 with intermittent abdominal pain x 4-5 years with rectal bleeding on 19th of NOV.Had normal sigmoidoscopy to proximal transverse colon and mild int hemorrhoids done on Nov 21.

Order Comment:

Result Code: SEE RADIOLOGIST'S REPORT

Report:

ba/DICTATION DATE: 23 November 2005

CT SCAN OF THE ABDOMEN AND PELVIS WITH CONTRAST:

Technique: 7.5 mm cross-sectional images of the abdomen and pelvis were obtained following oral and intravenous introduction of contrast.

Findings: There is a normal appearance of the liver, spleen, and pancreas. There is no gallstones. No dilatation of biliary ducts or pancreatic duct identified. There is no enlargement of the adrenal glands. There is no hydronephrosis. No renal stones are seen. There is no lymphadenopathy. No abnormal collection of fluid in the abdomen or pelvis identified. Moderate amount of fecal material noted throughout the colon. There is no changes of appendicitis. No aneurysmal dilatation of the abdominal aorta noted. There is no signs of bowel obstruction.

IMPRESSION: NORMAL COMPUTED TOMOGRAPHY OF THE ABDOMEN AND PELVIS.

MODERATE AMOUNT OF FECAL MATERIAL THROUGHOUT THE COLON.

Report:

djk/Dictated 11-19-2005

CT OF THE ABDOMEN AND PELVIS:

Examination is limited due to lack of IV or oral contrast.

As visualized, the liver, spleen, pancreas, abdominal aorta and both kidneys are intact. No evidence of renal stones or hydronephrosis is seen. The gallbladder is moderately distended.

Substantial amount of fecal matter is noted in the colon. No obvious inflammatory changes, masses or abnormal fluid collections are seen in the abdomen.

Imaging into the pelvic shows a large amount of fecal matter within the distal colon. The urinary bladder is intact.

IMPRESSION:

NO CLEAR INDICATION OF ACUTE INTRA-ABDOMINAL ABNORMALITY.

SIGNIFICANT AMOUNT OF FECAL MATTER IS NOTED IN THE COLON.

OTHER FINDINGS AS DESCRIBED.

PRIVACY ACT STATEMENT***THIS FORM IS NOT A CONSENT FORM TO RELEASE OR USE HEALTH CARE INFORMATION PERTAINING TO YOU*****AUTHORITY FOR COLLECTION OF INFORMATION INCLUDING SOCIAL SECURITY NUMBER (SSN).**

Sections 133, 1071.87, 3012, 5031 and 8012, title 10, United States Codes and Executive Order 9397.

PRINCIPLE PURPOSES FOR WHICH INFORMATION IS INTENDED TO BE USED

This form provides you the advice required by The Privacy Act of 1974. The personal information will facilitate and document your health care. The Social Security Number (SSN) is required to identify and retrieve health records.

ROUTINE USES

The primary use of this information is to provide, plan, and coordinate health care. As prior to enactment of the Privacy Act, other possible uses are to: Aid in preventive health and communicable disease control programs and report medical conditions required by law to federal, state and local agencies; compile statistical data; conduct research; teach; determine suitability of persons for service or assignments; adjudicate claims and determine benefits; other lawful purposes, including law enforcement and litigation; conduct authorized investigations; evaluate care rendered; determine professional certification and hospital accreditation; provide physical qualifications of patients to agencies of federal, state or local government upon request in the pursuit of their official duties.

WHETHER DISCLOSURE IS MANDATORY OR VOLUNTARY AND EFFECT ON INDIVIDUAL OF NOT PROVIDING INFORMATION

In the case of military personnel, the requested information is mandatory because of the need to document all active duty medical incidents in view of future rights and benefits. In the case of all other personnel/beneficiaries, the requested information is voluntary. If the information is not furnished, comprehensive health care may not be possible, but CARE WILL.

This all inclusive Privacy Act Statement will apply to all requests for personal information made by health care treatment personnel or for medical/dental treatment purposes and will become a permanent part of your health care record.

(THIS FORM IS SUBJECT TO THE PRIVACY ACT OF 1974)

By printing and placing in the medical record, providers are verifying that the vaccines annotated were administered and current CDC published Vaccine Information Sheets (VIS) or Important Information Sheet was given to the parent, legal guardian or patient. This form complies with all federal record keeping requirements of the National Childhood Vaccine Injury Act of 1986 as amended 14 December 1993. Parent, guardian, or patient signature is not required unless state law mandates a guardian signature and proof of informed consent. Local VIS's may be developed for vaccines not covered by CDC Publications. This document complies with article 80 of the WHO International health regulations and can be used in place of the PHS 731 when traveling outside the United States.

VACCINE ADMINISTRATION RECORD**(THIS FORM IS SUBJECT TO THE PRIVACY ACT OF 1974)**

This document complies with Article 36 and Annex 6 of the World Health Organization International Health Regulations (IHR) of 2005. International Health Regulations call for this document to be accepted in lieu of the International Certificate of Vaccination (PHS Form 731) when traveling outside the United States. In accordance with the IHR, this automated record is an equivalent document issued by the United States Armed Forces.

By inserting the Vaccine Information Statement (VIS) version date in the applicable field, providers verify that the vaccine(s) annotated were administered and current VISs were given to the parent, legal guardian or patient. This form complies with federal record-keeping requirements of the National Childhood Vaccine Injury Act of 1986 as amended 14 December 1993. Parent, guardian, or patient signature is not required unless state law mandates a guardian signature and proof of informed consent.

PRIVACY ACT STATEMENT

THIS FORM IS NOT A CONSENT FORM TO RELEASE OR USE HEALTH CARE INFORMATION PERTAINING TO YOU

AUTHORITY FOR COLLECTION OF INFORMATION INCLUDING SOCIAL SECURITY NUMBER (SSN).

Sections 133, 1071.87, 3012, 5031 and 8012, title 10, United States Codes and Executive Order 9397.

PRINCIPLE PURPOSES FOR WHICH INFORMATION IS INTENDED TO BE USED

This form provides you the advice required by The Privacy Act of 1974. The personal information will facilitate and document your health care. The Social Security Number (SSN) is required to identify and retrieve health records.

ROUTINE USES

The primary use of this information is to provide, plan, and coordinate health care. As prior to enactment of the Privacy Act, other possible uses are to: Aid in preventive health and communicable disease control programs and report medical conditions required by law to federal, state and local agencies; compile statistical data; conduct research; teach; determine suitability of persons for service or assignments; adjudicate claims and determine benefits; other lawful purposes, including law enforcement and litigation; conduct authorized investigations; evaluate care rendered; determine professional certification and hospital accreditation; provide physical qualifications of patients to agencies of federal, state or local government upon request in the pursuit of their official duties.

WHETHER DISCLOSURE IS MANDATORY OR VOLUNTARY AND EFFECT ON INDIVIDUAL OF NOT PROVIDING INFORMATION

In the case of military personnel, the requested information is mandatory because of the need to document all active duty medical incidents in view of future rights and benefits. In the case of all other personnel/beneficiaries, the requested information is voluntary. If the information is not furnished, comprehensive health care may not be possible, but CARE WILL.

This all inclusive Privacy Act Statement will apply to all requests for personal information made by health care treatment personnel or for medical/dental treatment purposes and will become a permanent part of your health care record.

Anthrax Vaccine Dosing

Basic vaccination series consists of 6 shots over 18 months, given as indicated above. The following intervals between doses must be maintained: the 2nd dose is given 2 weeks after the 1st dose; the 3rd dose is given 2 weeks after the 2nd dose; the 4th dose is given 5 months after the 3rd dose; the 5th dose is given 6 months after the 4th dose; and the 6th dose is given 6 months after the 5th dose. If one is late for a dose, or strays from the established schedule, the next dose due should be given, with the intervals for the remaining doses maintained. A booster dose should be administered every 12 months. If an adverse reaction occurs following an anthrax vaccination, note in "comments" block above and on a SF 600. If a severe reaction occurs, further administration of anthrax vaccine should be discontinued.

Unless otherwise indicated, the manufacturer of Anthrax Vaccine, Adsorbed, is Michigan Biologic Products Institute.

I have been briefed on the Anthrax Vaccination

INSTRUCTIONS*(Refer to DoD Component Instructions for additional guidance)*

PURPOSE: This form is used to record the results of periodic and followup audiometry for individuals routinely exposed to hazardous noise. Before this form is used, a DD Form 2215, "Reference Audiogram," must already be filed in the individual's health record.

1. **ZIP CODE/APO/FPO/PAS.** Enter nine digit ZIP Code/APO/FPO/ PAS of where audiometric test is conducted.
2. **DOD COMPONENT.** Enter letter in box of major organizational subdivision of DoD to which military or civilian individual is assigned. Enter "1" if DoD component is not listed.
3. **SERVICE COMPONENT.** Enter letter in box corresponding to primary subdivision of separate military service in which military is assigned (e.g., Regular (R) - standing military component of armed forces in peace and war; Reserve (V) - component of ready trained personnel for military service when needed, etc.; National Guard (G) - component of National Guard personnel in full-time or part-time status). Enter "1" for all others not listed.
4. **SOCIAL SECURITY NUMBER.** Enter nine digit social security number. If foreign national, enter "FN" in middle two blocks.
5. **NAME.** Enter surname, given name and middle initial of individual being tested.
6. **DATE OF BIRTH.** Enter year, month, day.
7. **SEX.** Enter "M" if male, "F" if female.
8. **PAY GRADE, UNIFORMED SERVICES.** For military personnel only, enter military personnel class and pay level serial number as follows:
 - O11 - General of the Army/General of the Air Force/Fleet Admiral
 - O10 - General/Admiral
 - O09 - Lieutenant General/Vice Admiral
 - O08 - Major General/Rear Admiral (Upper Half)
 - O07 - Brigadier General/Rear Admiral (Lower Half)/Commodore
 - O06 - Colonel (A,F,M)/Captain (N)
 - O05 - Lieutenant Colonel/Commander
 - O04 - Major/Lieutenant Commander
 - O03 - Captain (A,F,M)/Lieutenant (N)
 - O02 - First Lieutenant/Lieutenant Junior Grade
 - O01 - Second Lieutenant/Ensign
 - W05 - Chief Warrant Officer, W-5
 - W04 - Chief Warrant Officer, W-4
 - W03 - Chief Warrant Officer, W-3
 - W02 - Chief Warrant Officer, W-2
 - W01 - Warrant Officer, W-1
 - C00 - Cadet/Midshipman
 - E09 - Sergeant Major/Chief Master Sergeant/Master Chief Petty Officer
 - E08 - Master Sergeant (A,M)/Senior Chief Petty Officer/Senior Master Sergeant/First Sergeant(A)
 - E07 - Sergeant First Class/Gunnery Sergeant/Chief Petty Officer/Master Sergeant (F)/Platoon Sergeant (A)/Specialist-7
 - E06 - Staff Sergeant/Technical Sergeant/Petty Officer First Class/Specialist-6
 - E05 - Sergeant (A,M)/Staff Sergeant/Petty Officer Second Class/Specialist-5
 - E04 - Corporal/Sergeant (F)/Petty Officer Third Class/Specialist-4
 - E03 - Private First Class (A)/Airman First Class/Lance Corporal/Seaman
 - E02 - Private (PV1)/Airman/Private First Class (M)/Seaman Apprentice
 - E01 - Private (PV2)/Private (M)/Airman Basic/Seaman Recruit
9. **GRADE, CIVILIAN.** Enter two letters and two numbers of Federal civilian employee rank (e.g., WG05, GS11, etc.). Letter entries will be WG, WL, WS, WN, WD or GS. Number entries will be 01 to 18. Enter "1111" if other (e.g., foreign national, contractor, etc.).
10. **SERVICE DUTY OCCUPATION CODE.** Enter code to which military member's duty occupation is assigned (e.g., MOS, SSI, NEC/Rating, NOBC or AFSC in which individual is actually working). Enter number code of civilian job series in which civilian member is actually working (e.g., for a carpenter enter "4607").
11. **MAILING ADDRESS OF ASSIGNMENT.** Enter installation name (and street address for Navy and Marines), unit, office symbol, and ZIP Code/APO/ FPO/PAS of individual's current duty assignment.
12. **LOCATION - PLACE OF WORK.** Enter specific location where individual is routinely exposed to hazardous noise including building number (e.g., Corpus Christi, NAS, Building 1571, Carpenter Shop). For Air Force personnel, enter 12-digit Workplace Identifier Code per AFOSH Std. 161-17.
13. **MAJOR COMMAND.** Enter authorized abbreviation of military major command to which individual is assigned.
14. **DUTY TELEPHONE.** Enter individual's duty telephone number.
15. **AUDIOMETRY.**
 - a. **Purpose.** Enter number in box for reason to complete audiogram. "1" - First periodic test given 90 days after beginning duties in noise-hazardous area or operation; "2" - Periodic test given at yearly intervals; "3" - Last test given, regardless of noise exposure history, before termination of active duty or employment; "4" - Test at interval for reason not listed above.
 - b. **Current Audiogram Date.** Enter year, month, day (e.g., If January 31, 2000, enter 20000131) that audiometric test is given and current threshold levels determined for this individual at six frequencies in each ear. Results are entered in 5 dB increments (e.g., 0, 5, 10, 15, etc.). If responses exceed maximum limits of audiometer, enter that limit with plus sign (e.g., 110+).

15.c. **Reference Audiogram Date.** Enter year, month, and day reference test results were obtained. See DD Form 2215, "Reference Audiogram," or other appropriate source. Enter threshold levels in 5 dB increments from reference audiogram.

d. **Significant Threshold Shift (STS).** Enter "1" if no STS is present; enter "2" if STS is present.

STS - NO: See DoD component specific manuals for detailed guidance.

STS - YES: Outlines procedures required when a significant threshold shift present: "Notify Supervisor" - Notify individual's supervisor that significant threshold shift has been found and followup audiogram must be done. "Followup No. 1 After Minimum 14 Hours Noise Free" - Schedule individual for first followup audiogram. They must be instructed to stay in a noise free environment (not to exceed 75 dBA or 120 dBp) for at least 14 hours prior to test. They must be told to avoid environments in which noise levels make it necessary to use raised voice to talk at 1 meter (3 feet) distance. If examinee has obvious ear problem (e.g., earache, draining ear, excessive cerumen buildup), he/she should be examined by physician and followup postponed until after any necessary treatment.

e. **Threshold Shift.** Enter difference between current and most recent reference audiogram for 1000, 2000, 3000 and 4000 Hz. Refer to DoD component manuals for established criteria. Enter "+" to indicate positive shift (poorer hearing) or "-" to indicate negative shift (better hearing) on current audiogram.

f. **Remarks.** Print any information considered pertinent. Include the individual's 8-hour TWA noise exposure, when available.

g. **Type of Personal Hearing Protection Used.** Enter number for type of hearing protection that is routinely used by individual.

h. **Examiner Name.** Enter surname, given name and middle initial of individual operating audiometer.

i. **Training Certificate Number.** Enter audiometric technician training certificate number.

j. **Service Duty Occupation Code.** Enter examiner's service duty occupation code (see item 10).

k. **Office Symbol.** Enter complete office symbol where examiner is performing the test.

l. **Audiometer Type.** Enter number for type of audiometer used (e.g., "1" for manual type, etc.).

m. **Model.** Enter manufacturer's designation of audiometer.

n. **Manufacturer.** Enter name of company that produced audiometer.

o. **Serial Number.** Enter manufacturer's serial number of audiometer.

p. **Last Electroacoustic Calibration Date.** Enter year, month and day (see item 15.b.) of last electroacoustic determination of this audiometer's performance specifications.

16. **FOLLOWUP NO. 1.** If significant threshold shift determined on periodic test, record results of first followup audiogram in this section. Mark (X) box to certify "Minimum 14 Hours Noise Free Since Current Audiogram (see item 15.b.)."

b., c., and e., "Current Audiogram," "Reference Audiogram," and "Threshold Shift" completed in same format as above. Note: Hearing threshold levels entered in 16.c. are the same values as those used in 15.c.

d. "STS - NO" - If no STS noted, enter "1" in box and follow steps in "STS - NO" section.

"STS - YES" - If STS remains following this examination (Followup No. 1), follow service component instructions (e.g., supervisor is notified for the second time, individual is scheduled for Followup No. 2 audiogram, and individual is instructed to stay in a noise free environment (not to exceed 75 dBA or 120 dBp) for a minimum of 14 hours of auditory rest since current audiogram (item 15.b.)).

e. through m. Enter the required information according to guidelines for entries on periodic audiogram.

17. **FOLLOWUP NO. 2.** If significant threshold shift determined on Followup No. 1, record results of Followup No. 2 in this section. Mark (X) box to certify "Minimum 14 Hours Noise Free Since Current Audiogram (see item 15.b.)."

b., c., and e., "Current Audiogram," "Reference Audiogram," and "Threshold Shift" completed in same format as above. Note: Hearing threshold levels entered in 17.c. are the same values as those used in 15.c.

d. "STS - NO" - If no STS noted, enter "1" in box and follow steps in "STS - NO" section.

"STS - YES" - If STS remains following this examination (Followup No. 2), enter "2" in box. Refer to DoD component instructions for appropriate patient disposition.

e. through m. Enter the required information according to guidelines for entries on periodic audiogram.

See specific DoD component manuals regarding followup procedures required in addition to those listed above. For example, if the annual test indicates a "negative" threshold shift and is confirmed on the first followup, the reference audiogram may be reestablished at this time without any further followup testing for DA personnel.

CORRU

INTERIM TUBERCULOSIS EXPOSURE RISK ASSESSMENT

FOR THE PATIENT (Check the correct response)

1. Since your last tuberculosis risk assessment, were you exposed to anyone known to have or suspected of having active tuberculosis (i.e., individuals with persistent cough, weight loss, night sweats, and/or fever)? ☐ Yes ☒ No ☐ Don't Know
If Yes, test the patient.

2. Since your last Tuberculosis Exposure Risk Assessment or Post-Deployment Health Assessment (DD Form 2796), did you have direct and prolonged contact with any individuals of the following groups: refugees or displaced persons; hospitalized patients, prisoners, or homeless shelter populations? ☐ Yes ☒ No
If Yes, test the patient.

3a. Check any countries where you have traveled or deployed to since your last tuberculosis risk assessment.

- | | | | |
|--------------------------------------|-------------------------------------|---|--------------------------------------|
| <input type="checkbox"/> Bangladesh | <input type="checkbox"/> India | <input type="checkbox"/> Pakistan | <input type="checkbox"/> UR Tanzania |
| <input type="checkbox"/> Brazil | <input type="checkbox"/> Indonesia | <input type="checkbox"/> Philippines | <input type="checkbox"/> Viet Nam |
| <input type="checkbox"/> Cambodia | <input type="checkbox"/> Kenya | <input type="checkbox"/> Russian Federation | <input type="checkbox"/> Zimbabwe |
| <input type="checkbox"/> China | <input type="checkbox"/> Mozambique | <input type="checkbox"/> South Africa | |
| <input type="checkbox"/> DR Congo | <input type="checkbox"/> Myanmar | <input type="checkbox"/> Thailand | |
| <input type="checkbox"/> Ethiopia | <input type="checkbox"/> Nigeria | <input type="checkbox"/> Uganda | |
| <input type="checkbox"/> Other _____ | | | |

If any of these listed countries are selected, test the patient.

If "other" is checked, write in the name of the country or countries and describe further in number 6.

3b. During this travel, did you have prolonged direct contact with the local population? ☐ Yes ☐ No If Yes, test the patient.

3c. Have you traveled to Afghanistan for a reason not part of a deployment that required completion of a Post Deployment Health Assessment (PDHA)? ☐ Yes ☐ No If Yes, test the patient.

3d. Have you recently had any of the following symptoms:

- ☐ Fever ☐ Cough ☐ Weight Loss ☐ Chills ☐ Night Sweats

If any are checked, see the medical officer for evaluation.

FOR THE PROVIDER

(If the answer to questions 1, 2, or 3b is a YES, test the patient. If a country is selected in 3a, test the patient.)

4. Tuberculosis risk assessment, based on above responses ☐ Minimal Risk ☐ Increased Risk

5. Recommend Latent Tuberculosis Infection (LTBI) Testing ☐ Yes ☒ No

6. Provider Comments

ADULT SCREENING AND IMMUNIZATION DOCUMENTATION FORM**Influenza Vaccination Program**

The following questions will help us determine if we should give you the intranasal or the injectable influenza vaccination today. If you answer "yes" to any question, we will ask additional questions to determine which vaccine, if any, you will receive. Please speak to your healthcare provider, if you have any questions.

CIRCLE ANSWERS TO QUESTIONS 1-12

What is your age? <u>26</u>		
1	Do you currently feel sick or have a fever?	<input checked="" type="radio"/> NO YES
2	Are you taking any prescription medications to prevent or treat influenza? Have you taken any antivirals in the last 48 hours?	<input checked="" type="radio"/> NO YES
3	Are you pregnant or planning to become pregnant in the next month?	<input checked="" type="radio"/> NO YES
4	Have you ever had a serious reaction to a flu vaccine?	<input checked="" type="radio"/> NO YES
5	Do you have any allergy to any of the following: eggs, chicken or egg protein, gentamycin, gelatin, arginine, neomycin, polymycin B, thimerosal, formaldehyde, or other vaccine components?	<input checked="" type="radio"/> NO YES
6	Do you have a chronic health problem such as: heart disease, lung disease, asthma, kidney disease, metabolic disease (e.g. diabetes), anemia, or other blood disorder?	<input checked="" type="radio"/> NO YES
7	Do you have an active neurological disease?	<input checked="" type="radio"/> NO YES
8	Do you have a history of Guillain-Barre Syndrome (GBS)?	<input checked="" type="radio"/> NO YES
9	Has your doctor ever told you that you have an immune system disorder? Are you taking long-term steroid treatment or immunosuppressants?	<input checked="" type="radio"/> NO YES
10	Do you have HIV, AIDS, cancer, or have you received an organ transplant?	<input checked="" type="radio"/> NO YES
11	Do you live with or have close contact with severely immunocompromised individuals or someone who must be in a protective environment (such as transplant recipients)?	<input checked="" type="radio"/> NO YES
12	Have you received any vaccines within the last 30 days or do you plan to receive any vaccines in the next four weeks?	<input checked="" type="radio"/> NO YES

If you are 49 years of age or younger, please list below all the medications you are currently taking (for medication reconciliation):

I have read, or have had explained to me the information in the Influenza Vaccine Information Statement (VIS). I have also had a chance to ask questions and they were answered to my satisfaction. I understand the benefits and risks of the influenza vaccine.

CORRY JC JBR

Commander's Authorization USAF Refractive Surgery (USAF-RS) Program

I, DANIEL D. MERWIN (COTN2), a member in your command, request to have laser vision correction surgery at a DoD Refractive Surgery Center. The policy letter "**USAF REFRACTIVE SURGERY (USAF-RS) PROGRAM**" dated 21 May 2007 should be reviewed prior to completion of this authorization. Refer to <https://kx.afins.mil/USAF-RS>, it outlines the purpose of this program, issues to consider before authorizing an individual to enter the program and procedures to be followed. Your signature on this form acknowledges an understanding of the policy and willingness to ensure compliance with the requirements of the program.

Access to the DoD laser centers is prioritized according to the Chapter 1, para 1.13 of the policy letter. In your best judgment, indicate which prioritization category applies to this individual:

Priority 1 2 3 Job Title ANALYST
Air Force Personnel: AFSC _____ Branch of Service NAVY

To ensure a return on investment for the Air Force, individuals in the Aviation and Aviation-Related Special Duty Management Group must have one year retainability on active duty from the date of surgery and personnel in the Warfighter Management Group must have a minimum of 6 months retainability on active duty from the date of surgery according to Chapter 3, para 3.2.3.

Current projected separation / end of service commitment / retirement date. Provide which ever is the earliest.
(Date) OCT 2015 *do not specify indefinite*

Is member scheduled to deploy or PCS during the next 6 months? NO

Participation in this program requires a considerable investment of time by the individual resulting in absences from duty. These are the minimum requirements:

- Initial Consultation (1 ½ hr) Mass Consent Briefing (2 ½ hrs.)
- Surgery – up to 8 day of convalescent leave off work
- MANDATORY - Post-operative exams (at local MTF) up to 7 visits in the first year. Int'l _____

****All follow-up visits must be performed by your local RS-certified military eye care provider. ****

***Commander:** recovery from surgery will impact the individual's activities. Expect some limitations on routine duties for up to one month depending on vision standards applicable to individual's AFSC. The wear of sunglasses outdoors for the first year is required to prevent complications. The individual **WILL NOT** be World-Wide Qualified (non-deployable and not eligible to PCS) for up to 4 months while on steroid eye drops. A 4T profile will be issued to cover/prevent both situations. Flight Surgeon (FS) will manage the appropriate grounding actions and profile for AASD personnel. Primary Care Manager (PCM) in conjunction with local optometry will manage the profile for Warfighter personnel.

This original command authorization form must be received in our clinic before we move forward with the RS surgery. This authorization form is valid for 90 days only. Individuals will be required to re-accomplish this authorization letter if on their date of surgery it has expired.

Squadron Commander	(stamp or print) Signature	Date	Phone Number

Applicant signature [Signature] Date 17 FEB 11
Your signature states that you agree and commit to the minimum requirements and have the required AD service commitment remaining.

*No surgery will be performed until your Commander signs and dates this form.

MANDATORY QUESTIONS (APPLICANT MUST INITIAL)					
Initials: DM	I am responsible for reading the policy and guidelines of USAF-RS Program available at https://www.afms.mil/USAF-RS and I am committed to comply with these guidelines				
Initials: DM	I understand I am NOT authorized to undergo refractive surgery until I have received "Permission to Proceed" from the USAF-RS Registry. If granted "Permission to Proceed", the final treatment decision is not guaranteed, but will be made by the surgeon.				
Initials: DM	I understand that the Command Authorization expires 6 months from the date my commander signed. In addition, if this occurs, I understand I must re-accomplish a new one and present the original copy before I will get treated at this center.				
Initials: DM	I must inform my flight surgeon, primary care provider, and eye care provider of surgery, follow-up care, and any complications. I must accomplish all follow-up examinations as required by policy or I may be restricted from duty or be DNIF until in compliance.				
Initials: DM	I understand that during my evaluation at a DoD RS center, I may be disqualified as a RS candidate and will not be treated. The final decision will be made by my surgeon.				
Initials: DM	If I am disqualified as a RS candidate, I am not eligible for reimbursement of expenses incurred for travel to/from the DoD RS center, including, but not limited to travel, meals, and lodging. (This does not apply if I am unit-funded.)				
Initials: DM	I understand that I may require or continue to require reading and/or distance prescription correction for best vision after surgery. I understand that RS will create a permanent change in my vision and even with an optimal outcome may change over time.				
Initials: DM	Furthermore, I understand there is a chance I cannot be fit with contact lenses after RS.				
Initials: DM	I understand my vision may take time to fully recover following RS Surgery and there is a risk of not meeting relevant vision standards after RS. Therefore, I may be disqualified from certain careers, duties, or even continued military service.

PATIENT AGREEMENT

DDM I request to be returned to my local eye clinic for post-operative care following refractive surgery at the DoD Refractive Surgery Center listed above. The staff on the Refractive Surgery Center will be available for additional consultation as needed.

DDM I will contact my local Optometry Clinic to schedule my first follow-up appointment as soon as I am notified of my surgery date.

DDM I understand that I must bring the package of copied exams given to me by the Refractive Surgery Center to the local Optometry Clinic at my first follow-up appointment.

DDM I am aware that I will be placed on a 4T profile after surgery and can not deploy or PCS up to 4 months after surgery.

AASD: 1, 3, 6, 12, and 24 months, 4 years and then every 5 years

Warfighter: 1, 3, 6, 12 months

Note: ASA (PRK, LASEK, Epi-LASIK, WFG-PRK) requires a 2 month pressure check

REFERRING DOCTOR'S AGREEMENT

I certify that I have gone through the USAF Refractive Surgery Co-Management Course. I will manage this patient and accept responsibility for his/her post-operative care. I agree to refer this patient promptly if a condition arises post-operatively that will require further treatment by the Refractive Surgery Center.

REFRACTIVE SURGERY MEETING INFORMED CONSENT

Please read and initial each line. Sign where indicated.

DPM	1 I have read the Patient Information Booklet (downloaded from the website)
OPM	2 I understand the Surgery process and what will occur the day of surgery.
DPM	3 I understand what my responsibilities are the day of surgery. a Remember to bring Medications and dark sunglasses b No Mascara, perfumes, or colognes
DPM	4 I understand that I will need a driver on the day of surgery, my one day post op, and my five day post op appointments.
DPM	5 I understand my medication directions.
DPM	6 I have received a 2 page Pre & Post Op Instruction sheet.
DPM	7 I have read and signed my informed consents.
DPM	8 My questions have been answered to my satisfaction.
DPM	9 I understand I have an obligation and agree to meet my monthly follow-ups as required by my eye care provider. I also understand that I must book these exams myself; they are not booked for me.
DPM	10 I understand that if I am to PCS to any location at anytime prior to my 12 month post operative visit I must have an express written letter from a PRK/LASIK certified Optometrist or Ophthalmologist stating I will be accepted as a post PRK/LASIK patient at their clinic. I also understand I am not allowed to PCS nor do a TDY for 1 month after the procedure.
DPM	11 I affirm I do have proper retainability, and intend to remain active for the length required to have surgery, i.e. 6 months for Air Force, 12 months for Navy, Marines, and Coast Guard, and 18 months for Army. Date of Separation? <u>31 OCT '15</u>
DPM	12 I affirm that I have NOT received the smallpox vaccination with in the last 21 days. I will NOT receive a smallpox vaccination until the steroid taper is completed.

CORREY gcs

**INFORMED CONSENT FOR EXCIMER LASER
PHOTOREFRACTIVE KERATECTOMY**

I, DANIEL MERWIN, agree to have my surgeon, DR ROBO, M.D., perform the U.S. Food and Drug Administration (FDA) approved laser procedure called PHOTOREFRACTIVE KERATECTOMY (PRK). The excimer laser will be used to reshape the front of the cornea (the clear front part of the eye) to reduce or eliminate the need for glasses or contact lenses. I understand that this procedure is permanent and irreversible. I also understand that this is an elective procedure and that there is no government requirement for me to have this procedure done.

PROCEDURE (RIGHT - LEFT - BOTH)

My eye(s) being treated will receive topical anesthetic drops to reduce or eliminate discomfort associated with the procedure. I will be lying on my back under the laser and will be asked to look up into the operative microscope at the flashing red light. The laser will remove a calculated amount of tissue from the cornea in an attempt to reshape the cornea to reduce my dependence on glasses or contact lenses.

During the laser procedure, a popping or cracking sound will be heard. After the procedure, a bandage soft contact lens will be placed on my eye(s) along with antibiotic and anti-inflammatory drops. I realize that I may experience discomfort or pain in the hours following treatment as well as light sensitivity, tearing, irritation, and redness. Additional drops and instructions will be provided.

RISKS:

DDM (Initials) 1. I understand that, as with all surgical procedures, the results cannot be guaranteed. There is also no guarantee that I will eliminate my reliance on glasses or contact lenses. It is possible that the treatment could result in under-correction (residual nearsightedness or myopia), over-correction (farsightedness or hyperopia), or astigmatism, any of which may require glasses or contact lenses. It is also possible that this treatment may increase my dependence on reading glasses, or that I may require reading glasses at an earlier age. I understand that further treatment may be necessary, including the use of eyedrops, the wearing of glasses or contact lenses, or an additional laser treatment.

DDM (Initials) 2. I understand that if I currently wear reading glasses, I will likely still need them after this treatment. I also understand that if I currently do not need reading glasses, I will most likely need them at some point in time.

N/A (Initials) 3. (Female only) I am not pregnant nor have I been pregnant in the past 12 months. I am not nursing nor have I been nursing in the past 6 months. If it is possible that I am pregnant, I will obtain a pregnancy test to ascertain that I am not pregnant since pregnancy could adversely affect the treatment results. Also, I will notify my doctor immediately if I become pregnant within the six months following treatment. I understand that the use of oral contraceptive agents may increase certain risks associated with the procedure.

DDM (Initials) 4. I understand that I should make the doctor aware of any vascular or autoimmune disease I may have, or of any drug therapy that may suppress the immune system.

DDM (Initials) 5. I understand that the FDA has not specifically approved the use of a bandage soft contact lens immediately after the procedure. The contact lens is used to reduce postoperative pain or discomfort that can be severe. The contact lens however can increase the risk of corneal infection or inflammation. I will inform my doctor if I do not want a contact lens used after the procedure.

DDM (Initials) 6. I have been informed that complications can occur which, although usually temporary, may be permanent, and include:

- Decrease in best-corrected visual acuity.* A decrease in best-corrected visual acuity (vision with eyeglasses or contact lenses) may occur.
- Glare and halos.* Glare from bright lights or halos around lights may be experienced especially at night. The glare may be severe enough to cause difficulty driving at night or under low-light conditions.
- Decrease in contrast sensitivity.* A decrease in the *quality* of vision may occur even with excellent visual acuity as measured on a standard eye chart.
- Corneal scarring and haze.* A scar dense enough to affect vision may occur after the procedure.

PATIENT'S IDENTIFICATION (For typed or written entries give: Name – last, first, middle; grade; rank; rate; hospital or medical facility)

REGISTER NO.

WARD NO.

CTN² MERWIN, DANIEL
20/ [REDACTED]
DOB: [REDACTED] 1985

MEDICAL RECORD REPORT
Medical Record

OPTIONAL FORM 275

81 MDG/DREF-FORMS Approved Overprint 10/04 – PRK Consent

- e. *Elevated intraocular pressure.* High pressure in the eye, which may reduce vision, may occur while taking eye drops after the procedure. This condition is treated with additional drops, or rarely surgery.
- f. *Delayed healing.* Delayed healing of the skin on the surface of the cornea may extend the discomfort.

DM (Initials) 7. Other complications which have been reported include: cataract, corneal ulceration, infection, inflammation in the eye, corneal inflammation, double vision, drooping eyelid, shadow images, ghost images, and allergic reactions to the prescribed medications. Since it is impossible to state every complication of PRK, it is understandable that the above list is not complete or exhaustive. Fortunately, most complications are rare, temporary, or mild. Since each person is unique and responds differently to surgery and the healing process that follows, there can be no guarantee made to me regarding the results of PRK on my eye(s).

DDM (Initials) 8. I give permission for the medical data concerning my operation and any subsequent treatment to be submitted for outcome data analysis. I understand that my identity will be kept strictly confidential in any reports or journal articles.

DDM (Initials) 9. I understand that PRK treatment requires follow-up care at prescribed intervals for one year after treatment, and I agree to return for required examinations as requested.

DDM (Initials) 10. **SPECIAL MILITARY CONSIDERATIONS:** I understand that there is a risk of having complications such as loss of best corrected vision after the laser procedure which, in spite of additional treatment, may cause me to be no longer world wide qualified for continued active duty service, and may result in a change in my primary Air Force Specialty Code (AFSC), disqualification from flying duties, or in administrative separation from the U.S. Air Force.

Notes:

BENEFITS AND ALTERNATIVES TO TREATMENT:

The benefit of the procedure is to reduce my dependence on glasses or contact lenses and to reduce my blurriness when not wearing glasses or contact lenses (uncorrected visual acuity).

Non-surgical alternatives to treatment include continued wear of glasses or contact lenses. Surgical alternatives to PRK include, but are not limited to, radial keratotomy (RK), automated lamellar keratectomy (ALK), and laser in-situ keratomileusis (LASIK). RK uses a special knife to make incisions on the cornea and ALK uses a motorized blade to remove a small amount of tissue from the center of the cornea. LASIK combines the use of a motorized blade and a laser to reshape the cornea.

Notes:

ADVANCED DIRECTIVES:

DDM (Initials) I understand that by hospital policy, a **DO NOT RESUSICATE** order is temporarily suspended for the period surrounding conscious sedation or surgery. Any suspended advance directive may be re-instituted by me or my designated surrogate upon completion of the procedure.

AGREEMENT:

My signature indicates that I have read and understand the information provided and have discussed the risks, benefits, and alternatives of the procedure with an eye care provider. I have had an opportunity to ask my physician questions and would like to proceed with the treatment. I have received and read the FDA-mandated patient information booklet entitled "Facts You Need to Know about Photorefractive Keratectomy (PRK) Surgery". I agree that I will follow postoperative instructions and go to the required follow-up evaluations.

SO Note Written by LEWIS, CHRISTOPHER T @ 16 Feb 2011 0905 CST

Chief complaint

The Chief Complaint is: Chest tightness.

History of present illness

The Patient is a 26 year old male.
 He reported: General overall feeling Good

No military duty-related information - (Not on PRP/SCI/PSP). No depression Screen: Negative PHQ-2 (Score < 3).
 Pt is a 26 yo male with a history of allergies and childhood asthma. He notes a history of asthma in childhood which was associated with allergic symptoms. He remarks on 1 hospitalization for his asthma as a child but none since. Since the age of 8 he has been doing well and was not maintained on any inhalers. He is very active and is an active marathoner. Recently he has noted increased symptoms of chest tightness associated with exposure to cats and dogs. He was briefly treated with Advair, but is currently being maintained on Zyrtec and Flonase as well as allergen avoidance with excellent control of his symptoms. He will have once weekly chest tightness and albuterol use, but is otherwise doing well, and recently completed a marathon. He presents for routine follow up.

Pain Severity 0 / 10.

Past medical/surgical history**Reported History:**

Past Medical History:
 1) childhood asthma
 2) allergies.
 Medical: Reported medical history N/A.
 Surgical / procedural: Surgical / procedural history 1) T&A.
 Reported medications: Medication history Zyrtec 1 tab po qd
 Flonase.

Personal history

-Tob: none
 -EtOH: none
 Originally from California. Lived in PA and NJ. USN for 5 years. Works as a cryptologist. Deployed to Japan recently, but no other travel or occupational exposure.
 Behavioral history: Never a smoker / Never Used Tobacco Products.
 Alcohol: No consumption of alcohol.
 Habits: Exercising regularly (Engaged in Routine / Regular Activity to Improve Your Health)

Family history

Family medical history N/A.

Review of systems

Military service: Visit is not deployment-related Location:

Date:

Systemic symptoms: Not feeling tired or poorly, not tiring easily, and no lethargy. No fever and no chills.

Pulmonary symptoms: No dyspnea, not coughing up sputum, no hemoptysis, and no wheezing.

Gastrointestinal symptoms: No heartburn, no nausea, and no vomiting.

Physical findings**Vital signs:**

° Current vital signs reviewed.

General appearance:

° Well-appearing. ° Awake. ° Alert. ° In no acute distress.

Neck:

Palpation: ° Of the neck revealed no abnormalities.

Nose:

General/bilateral:

Nasal Discharge: ° No nasal discharge seen.

Sinus Tenderness: ° No sinus tenderness.

Pharynx:

Oropharynx: ° Uvula was not enlarged. ° Tonsils were not enlarged.

Lymph Nodes:

° Cervical lymph nodes were not enlarged. ° Supraclavicular lymph nodes were not enlarged.

Lungs:

° No wheezing was heard. ° No rhonchi were heard. ° No prolonged expiratory time. ° No rales/crackles were heard.

Cardiovascular system:

Jugular Venous Pressure: ° JVP was normal.

Jugular Venous Distention: ° JVD not increased.

Heart Rate And Rhythm: ° Normal.

Heart Sounds: ° S1 normal. ° S2 normal. ° No S3 heard. ° No S4 heard. ° No pericardial friction rub heard.

Murmurs: ° No murmurs were heard.

Abdomen:

Palpation: ° Abdomen was not soft. ° No abdominal tenderness.

Skin:

° No generalized cyanosis.

A/P Written by LEWIS, CHRISTOPHER T @ 16 Feb 2011 0930 CST

1. difficulty breathing (dyspnea): Pt is a 26 yo male with a history of childhood asthma and allergy type symptoms. His clinical history is suggestive of mild intermittent asthma, and his symptoms are under excellent control with control of his allergies with zyrtec and flonase. He will continue on these medications and prn albuterol for now, and will be referred for baseline PFTs and methacholine challenge study to definitive rule in/out asthma. Even with a positive study, his symptoms are under excellent control on his current therapy, and if needed he can be successfully controlled with an inhaled steroid. He is highly functional, and even if a diagnosis of asthma is established this in no way should impact upon his fitness for duty. He is currently fit for duty and fit for world wide deployment. He will follow up in 3-4 weeks to review the results of his PFTs.

Consult(s):

-Referred To: PULMONARY FUNCTION STUDIES (Routine) Specialty: PULMONARY DISEASE Clinic: PULMONARY FUNCTION LAB Primary Diagnosis: difficulty breathing (dyspnea)

LVM ON CELL PHONE 25 yo AD male has a history of childhood asthma, with improvement in symptoms as he reached adulthood. However he continues to have problems with tightness in his chest on occasion. States some things in the environment (dogs and cats for example) trigger his symptoms and may last for days. Denies any problems with routine exercise. He has been taking Zyrtec and Flonase daily however do not seem to be very effective. He was recently given Albuterol and Advair inhaler which he uses prn with good results. Please evaluate, treat and let me know his deployment status. Are there other environmental factors that could be an issue while on deployment. thank you. contact phone # 850 292 7149

Requested Date of Consult:

Reason for Request:

25 yo AD male has a history of childhood asthma, with improvement in symptoms as he reached adulthood. However he continues to have problems with tightness in his chest on occasion. States some things in the environment (dogs and cats for example) trigger his symptoms and may last for days. Denies any problems with routine exercise. He has been taking Zyrtec and Flonase daily however do not seem to be very effective. He was recently given Albuterol and Advair inhaler which he uses prn with good results. Please evaluate, treat and let me know his deployment status. Are there other environmental factors that could be an issue while on deployment. thank you. contact phone # 850 292 7149

Provisional Diagnosis: ASTHMA EXTRINSIC

<input checked="" type="checkbox"/>	OPERATION OR PROCEDURE	SEDATION
<input checked="" type="checkbox"/>	ANESTHESIA	TRANSFUSION

1b. DESCRIBE

Punch biopsy

① Chest ② Back

B. STATEMENT OF REQUEST

2. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be (describe operation or procedure in layman's language)

After cleaning and local anesthesia, a plug of tissue will be removed using a punch

instrument and then stitched closed. A scar will form. Risks also include bleeding,

infection and damage to adjacent structures.

which is to be performed by or under the direction of Dr. Smith Brunwell

3. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgment of the professional staff of the below-named medical facility, during the course of the above-named operation or procedure.

4. I request the administration of such anesthesia as may be considered necessary or advisable in the judgment of the professional staff of the below-named medical facility.

5. Exceptions to surgery or anesthesia, if any are:

NONE

(If "none", so state)

6. I request the disposal by authorities of the below-named medical facility of any tissues or parts which it may be necessary to remove.

7. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and observation of the operation by authorized personnel, subject to the following conditions:

a. The name of the patient and his/her family is not used to identify said pictures.

b. Said pictures be used only for purposes for medical/dental study or research.

8. I understand that as indicated a Health Care Industry Representative or other authorized personnel may be present.

(Cross out any parts above which are not appropriate)

C. SIGNATURES

(Appropriate items in parts A and B must be completed before signing)

9. COUNSELING PHYSICIAN/DENTIST: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above. I have also discussed potential problems related to recuperation, possible results of non-treatment, and significant alternative therapies.

(Signature of Counseling Physician/Dentist)

10. PATIENT: I understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

MEDICAL RECORD

REQUEST FOR ADMINISTRATION OF ANESTHESIA
AND FOR PERFORMANCE OF OPERATIONS AND OTHER PROCEDURES

A. IDENTIFICATION

1. OPERATION OR PROCEDURE

Cloned Reductu

B. STATEMENT OF REQUEST

1. The nature and purpose of the operation or procedure, possible alternative methods of treatment, the risks involved, and the possibility of complications have been fully explained to me. I acknowledge that no guarantees have been made to me concerning the results of the operation or procedure. I understand the nature of the operation or procedure to be _____

(Description of operation or procedure in layman's language)

Risk Infectio Bleeding

which is to be performed by or under the direction of Dr. _____

2. I request the performance of the above-named operation or procedure and of such additional operations or procedures as are found to be necessary or desirable, in the judgment of the professional staff of the below-named medical facility, during the course of the above-named operation or procedure.

3. I request the administration of such anesthesia as may be considered necessary or advisable in the judgment of the professional staff of the below-named medical facility.

4. Exceptions to surgery or anesthesia, if any, are: _____

(If "none", so state)

5. I request the disposal by authorities of the below-named medical facility of any tissues or parts which it may be necessary to remove.

6. I understand that photographs and movies may be taken of this operation, and that they may be viewed by various personnel undergoing training or indoctrination at this or other facilities. I consent to the taking of such pictures and observation of the operation by authorized personnel, subject to the following conditions:

a. The name of the patient and his/her family is not used to identify said pictures.

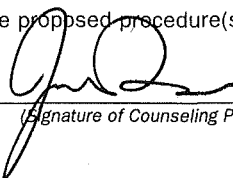

b. Said pictures be used only for purposes of medical/dental study or research.

(Cross out any parts above which are not appropriate)

C. SIGNATURES

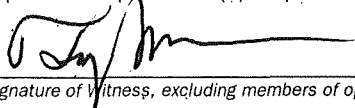

(Appropriate items in Parts A and B must be completed before signing)

1. COUNSELING PHYSICIAN/DENTIST: I have counseled this patient as to the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above.

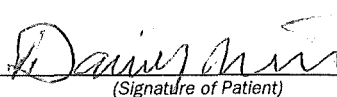

(Signature of Counseling Physician/Dentist)

2. PATIENT: I understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

(Signature of Witness, excluding members of operating team)

(Signature of Patient)

10 FEB 07

(Date and Time)

3. SPONSOR OR GUARDIAN: (When patient is a minor or unable to give consent) I, _____ sponsor/guardian of _____ understand the nature of the proposed procedure(s), attendant risks involved, and expected results, as described above, and hereby request such procedure(s) be performed.

MEDICAL QUESTIONNAIRE FOR POTENTIAL RESPIRATOR USERS

Part 1

1. Today's date:

05/07/06

2. Your name:

MERWIN, DANIEL D

3. Your age (to nearest year):

21

4. Your sex (circle one): ☒ Male ☐ Female

5. Your height (Feet and Inches):

5'8"

6. Your weight (Pounds):

136

7. Your job title/rate:

ABHAN

8. A phone number where you can be reached by the health care professional

who reviews this questionnaire (include the Area Code):

9. Circle the type of respirator you will use (you can check more than one category):

a. N, R, or P disposable respirator (filter-mask, non-cartridge type only)

b. N, R, or P non-disposable respirator (filter-mask, with cartridges)

☒ c. Other type of cartridge respirators (for example, dust, fume, mist, or organic vapor respirators)

d. Other types of respirators (for example, powered-air purifying, supplied-

air, or self-contained breathing apparatus).

10. Have you ever/previously worn a respirator (circle one): Yes ☐ No ☒

If yes, what type(s):

Part 2

Questions 1 through 9 below must be answered by every person who has been selected

to use any type of respirator (please circle yes or no).

1. Do you currently smoke tobacco, or have you smoked tobacco in the last

month: Yes ☐ No ☒

2. Have you ever had any of the following conditions?

a. Seizures (fits): Yes ☐ No ☒b. Diabetes (sugar disease): Yes ☐ No ☒c. Allergic reactions that interfere with your breathing: Yes ☐ No ☒ PETS HAIR AL AS REL PTd. Claustrophobia (fear of closed-in places): Yes ☐ No ☒e. Trouble smelling odors: Yes ☐ No ☒

OPNAVINST 5100.19D

B6-D-7 Appendix B6-D

Enclosure (1)

b. Moderate: Yes/No Examples of moderate work effort are sitting while nailing or filing; driving a truck or bus in urban traffic; standing while drilling, nailing, performing assembly work, or transferring a moderate load (about 35 lbs..) at trunk level; walking on a level surface about 2 mph or down a 5-degree grade about 3 mph; or pushing a wheelbarrow with a heavy load (about 100 lbs..) on a level surface.
If yes, how long does this period last during the average shift (number of hours):

c. Heavy: Yes/No Examples of heavy work are lifting a heavy load (about 50 lbs..) from the floor to your waist or shoulder; working on a loading dock; shoveling; standing while bricklaying or chipping castings; walking up an 8-degree grade about 2 mph; climbing stairs with a heavy load (about 50 lbs..).
If yes, how long does this period last during the average shift (number of hours):

13. Will you be wearing protective clothing and/or equipment (other than the respirator) when you're using your respirator: Yes/No

If "yes," describe this protective clothing and/or equipment:

14. Will you be working under hot conditions (temperature exceeding 90 deg. F): Yes/No

15. Will you be working under humid conditions: Yes/No

16. Describe the work you'll be doing while you're using your respirator(s):

17. Provide the following information, if you know it, for each toxic substance that you'll be exposed to when you're using your respirator(s):

OPNAVINST 5100.19D

05 October 2000

Appendix B6-D B6-D-8

Name of the first toxic substance: PAINT

Estimated maximum exposure level per shift: VARIOUS

Duration of exposure per shift

Name of the second toxic substance:

Estimated maximum exposure level per shift:

Duration of exposure per shift:

Name of the third toxic substance:

Estimated maximum exposure level per shift:

Duration of exposure per shift:

The name of any other toxic substances that you'll be exposed to while using

your respirator:

18. Describe any special or hazardous conditions you might encounter when

you're using your respirator(s) (for example, confined spaces, lifethreatening gases): NONE

19. Describe any special responsibilities you'll have while using your respirator(NONE

s) that may affect the safety and well-being of others (for example, rescue, security): NONE

OPNAVINST 5100.19D

05 October 2000

Appendix B6-D B6-D-6

Enclosure (1)

5. List any second jobs or side businesses you have: *NONE*

6. List your previous occupations: *CUSTOMER SERVICE REP*

7. List your current and previous hobbies: *NONE*

8. Have you been in other military services? Yes/*NO*

Do you suspect that you were you exposed to biological or chemical agents

while in the military or in a military operation: Yes/*NO*

9. Other than medications for breathing and lung problems, heart trouble,

blood pressure, and seizures mentioned earlier in this questionnaire, are you

taking any other medications for any reason (including over-the-counter medications):

Yes/*NO*

If yes, name the medications if you know them:

10. Will you be using any of the following items with your respirator(s)?

a. HEPA Filters: Yes/*NO*

b. Canisters (for example, gas masks): Yes/*NO*

c. Cartridges: Yes/*NO*

11. How often are you expected to use the respirator(s) (circle yes or no for

all answers that apply to you)?:

a. Escape only (no rescue): Yes/*NO*

b. Emergency rescue only: Yes/*NO*

c. Less than 5 hours per week: Yes/*NO*

d. Less than 2 hours per day: Yes/*NO*

e. 2 to 4 hours per day: Yes/*NO*

f. Over 4 hours per day: Yes/*NO*

12. During the period you are using the respirator(s), is your work effort

(circle):

a. Light: Yes/*NO* Examples of a light work effort are sitting while writing, typing, drafting, or performing light assembly work; or standing

while operating a drill press (1-3 lbs..) or controlling machines.

If yes, how long does this period last during the average shift (number of hours):

OPNAVINST 5100.19D

Appendix B6-D B6-D-4

Enclosure (1)

e. Any other problem that interferes with your use of a respirator:
Yes/No

9. Would you like to talk to the health care professional who will review this questionnaire about your answers to this questionnaire: Yes/No

Part 3

Questions 10 to 15 below must be answered by every employee who has been selected

to use either a full-facepiece respirator or a self-contained breathing apparatus (SCBA). For employees who have been selected to use other types of

respirators, answering these questions is voluntary.

10. Have you ever lost vision in either eye (temporarily or permanently):

Yes/No

11. Do you currently have any of the following vision problems?

a. Wear contact lenses: Yes/No

b. Wear glasses: Yes/No

c. Color blind: Yes/No

d. Any other eye or vision problem: Yes/No

e. Any other eye or vision problem: Yes/No

12. Have you ever had an injury to your ears, including a broken ear drum:

Yes/No

13. Do you currently have any of the following hearing problems?

a. Difficulty hearing: Yes/No

b. Wear a hearing aid: Yes/No

c. Any other hearing or ear problem: Yes/No

14. Have you ever had a back injury: Yes/No

15. Do you currently have any of the following musculoskeletal problems?

a. Weakness in any of your arms, hands, legs, or feet: Yes/No

b. Back pain: Yes/No

c. Difficulty fully moving your arms and legs: Yes/No

d. Pain or stiffness when you lean forward or backward at the waist:

Yes/No

e. Difficulty fully moving your head up or down: Yes/No

f. Difficulty fully moving your head side to side: Yes/No

g. Difficulty bending at your knees: Yes/No

h. Difficulty squatting to the ground: Yes/No

OPNAVINST 5100.19D

B6-D-5 Appendix B6-D

Enclosure (1)

i. Climbing a flight of stairs or a ladder carrying more than 25 lbs.:

Yes/No

j. Any other muscle or skeletal problem that interferes with using a respirator: Yes/No

Part 4

(Any of the following questions, and other questions not listed, may be added

to the questionnaire at the discretion of the health care professional who

will review the questionnaire)

1. In your present job, are you working at high altitudes (over 5,000 feet)

or in a place that has lower than normal amounts of oxygen: Yes/No

If yes, do you have feelings of dizziness, shortness of breath, pounding in

your chest, or other symptoms when you're working under these conditions:

Yes/No

2. At work or at home, have you ever been exposed to hazardous solvents, hazardous

airborne chemicals (e.g., gases, fumes, or dust), or have you come into skin contact with hazardous chemicals: Yes/No

If yes, name the chemicals if you know them:

3. Have you ever been a member of a HAZMAT spill response team, or a member

of a HAZMINCEN: Yes/No

4. Have you ever worked with any of the materials, or under any of the conditions,

listed below:

a. Asbestos: Yes/No

b. Silica (e.g., in sandblasting): Yes/No

c. Tungsten/cobalt (e.g., grinding or welding this material):

Yes/No

d. Beryllium: Yes/No

e. Aluminum: Yes/No

f. Coal (for example, mining): Yes/No

g. Iron: Yes/No

h. Tin: Yes/No

i. Dusty environments: Yes/No

j. Any other hazardous exposures: Yes/No

If yes, describe these exposures:

N/A

To: Command for Petty Officer Third Class Daniel D. Merwin
Subj: Clarification of/ Addendum to NAVMED 6100/5 dated 13 June 2017
PO3 Daniel D. Merwin
Ref: Participation in PT

1. I am the Primary Care Manager at WRNMMC for this SM. I saw him on 27 July 2017 and again on 07 August 2017. His diagnoses include Generalized Anxiety Disorder, Major Depressive Disorder, and Irritable Bowel Syndrome with Diarrhea.
2. PO3 Merwin should be excused from and not participate in Company Level PT, marching, or standing. He should participate in PT at his own pace. He may stand for up to 30 minutes. He must be excused to use sanitary bathroom facilities if necessary.

If you have any questions, please contact me directly at martin.r.linker.ctr@mail.mil.

20. NAME (Last, First, Middle Initial) MERWIN DANIEL DENNIS				21. SOCIAL SECURITY NUMBER [REDACTED]	
SECTION III - OTHER PERSONAL DATA					
22. EDUCATION					
a. List all high schools and colleges attended. (List dates in YYYYMM format.)					(5) GRADUATE
(1) FROM	(2) TO	(3) NAME OF SCHOOL	(4) LOCATION	YES	NO
199909	200306	HACKETTSTOWN HIGH SCHOOL	HACKETTSTOWN, NJ	X	
b. Have you ever been enrolled in ROTC, Junior ROTC, Sea Cadet Program or Civil Air Patrol?				YES	NO
					DDM
23. MARITAL/DEPENDENCY STATUS AND FAMILY DATA					
(If "Yes," explain in Section VI, "Remarks.")					
a. Is anyone dependent upon you for support?					DDM
b. Is there any court order or judgment in effect that directs you to provide alimony or support for children?					DDM
c. Do you have an immediate relative (father, mother, brother, or sister) who: (1) is now a prisoner of war or is missing in action (MIA); or (2) died or became 100% permanently disabled while serving in the Armed Services?					DDM
d. Are you the only living child in your immediate family?					DDM
24. PREVIOUS MILITARY SERVICE OR EMPLOYMENT WITH THE U.S. GOVERNMENT					
(If "Yes," explain in Section VI, "Remarks.")					
a. Are you now or have you ever been in any regular or reserve branch of the Armed Forces or in the Army National Guard or Air National Guard?					DDM
b. Have you ever been rejected for enlistment, reenlistment, or induction by any branch of the Armed Forces of the United States?					DDM
c. Are you now or have you ever been a deserter from any branch of the Armed Forces of the United States?					DDM
d. Have you ever been employed by the United States Government?					DDM
e. Are you now drawing, or do you have an application pending, or approval for: retired pay, disability allowance, severance pay, or a pension from any agency of the government of the United States?					DDM
25. ABILITY TO PERFORM MILITARY DUTIES					
(If "Yes," explain in Section VI, "Remarks.")					
a. Are you now or have you ever been a conscientious objector? (That is, do you have, or have you ever had, a firm, fixed, and sincere objection to participation in war in any form or to the bearing of arms because of religious belief or training?)					DDM
b. Have you ever been discharged by any branch of the Armed Forces of the United States for reasons pertaining to being a conscientious objector?					DDM
c. Is there anything which would preclude you from performing military duties or participating in military activities whenever necessary (i.e., do you have any personal restrictions or religious practices which would restrict your availability)?					DDM
26. DRUG USE AND ABUSE (If "Yes," explain in Section VI, "Remarks.")					
Have you ever tried, used, sold, supplied, or possessed any narcotic (to include heroin or cocaine), depressant (to include quaaludes), stimulant, hallucinogen (to include LSD or PCP), or cannabis (to include marijuana or hashish), or any mind-altering substance (to include glue or paint), or anabolic steroid, except as prescribed by a licensed physician?					
					DDM

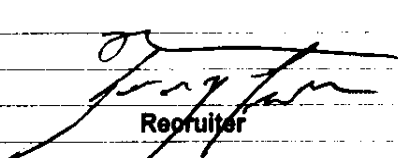

27. NAME (Last, First, Middle Initial) MERWIN DANIEL DENNIS		28. SOCIAL SECURITY NUMBER <div style="background-color: black; width: 100px; height: 20px;"></div>	
SECTION IV - CERTIFICATION			
29. CERTIFICATION OF APPLICANT (Your signature in this block must be witnessed by your recruiter.)			
a. I certify that the information given by me in this document is true, complete, and correct to the best of my knowledge and belief. I understand that I am being accepted for enlistment based on the information provided by me in this document; that if any of the information is knowingly false or incorrect, I could be tried in a civilian or military court and could receive a less than honorable discharge which could affect my future employment opportunities.			
b. TYPED OR PRINTED NAME (Last, First, Middle Initial) MERWIN DANIEL DENNIS		c. SIGNATURE 	
		d. DATE SIGNED (YYYYMMDD) 20051012	
30. DATA VERIFICATION BY RECRUITER (Enter description of the actual documents used to verify the following items.)			
a. NAME (X one) <input checked="" type="checkbox"/> (1) BIRTH CERTIFICATE <input type="checkbox"/> (2) OTHER (Explain)		b. AGE (X one) <input checked="" type="checkbox"/> (1) BIRTH CERTIFICATE <input type="checkbox"/> (2) OTHER (Explain)	
d. SOCIAL SECURITY NUMBER (SSN) (X one) <input checked="" type="checkbox"/> (1) SSN CARD <input type="checkbox"/> (2) OTHER (Explain)		e. EDUCATION (X one) <input checked="" type="checkbox"/> (1) DIPLOMA <input type="checkbox"/> (2) OTHER (Explain)	
		c. CITIZENSHIP (X one) <input checked="" type="checkbox"/> (1) BIRTH CERTIFICATE <input type="checkbox"/> (2) OTHER (Explain)	
		f. OTHER DOCUMENTS USED SEE SECTION VI	
31. CERTIFICATION OF WITNESS			
a. I certify that I have witnessed the applicant's signature above and that I have verified the data in the documents required as prescribed by my directives. I further certify that I have not made any promises or guarantees other than those listed and signed by me. I understand my liability to trial by courts-martial under the Uniform Code of Military Justice should I effect or cause to be effected the enlistment of anyone known by me to be ineligible for enlistment.			
b. TYPED OR PRINTED NAME (Last, First, Middle Initial) LEVAN, TERRY W.		c. PAY GRADE E-6	
		d. RECRUITER I.D. <div style="background-color: black; width: 100px; height: 20px;"></div>	
		e. SIGNATURE 	
		f. DATE SIGNED (YYYYMMDD) 20051012	
32. SPECIFIC OPTION/PROGRAM ENLISTED FOR, MILITARY SKILL, OR ASSIGNMENT TO A GEOGRAPHICAL AREA GUARANTEES			
a. SPECIFIC OPTION/PROGRAM ENLISTED FOR (Completed by Guidance Counselor, MEPS Liaison NCO, etc., as specified by sponsoring service.) (Use clear text English) FOUR YEAR OBLIGATOR AVIATION BOATSWAINMATE (HANDLING) CLASS "A" SCHOOL GUARANTEE (4YO/SG-ABH); ACTIVE DUTY DATE: 2005NOV01			
b. I fully understand that I will not be guaranteed any specific military skill or assignment to a geographic area except as shown in item 32.a. above and annexes attached to my Enlistment/Reenlistment Document (DD Form 4).			c. APPLICANT'S INITIALS DDM
33. CERTIFICATION OF RECRUITER OR ACCEPTOR			
a. I certify that I have reviewed all information contained in this document and, to the best of my judgment and belief, the applicant fulfills all legal policy requirements for enlistment. I accept him/her for enlistment on behalf of the United States (Enter Branch of Service) NAVY and certify that I have not made any promises or guarantees other than those listed in item 32.a. above. I further certify that service regulations governing such enlistments have been strictly complied with and any waivers required to effect applicant's enlistment have been secured and are attached to this document.			
b. TYPED OR PRINTED NAME (Last, First, Middle Initial) BROWN, BRYAN C.		c. PAY GRADE E-6	
		d. RECRUITER I.D. OR ORGANIZATION <div style="background-color: black; width: 100px; height: 20px;"></div>	
		e. SIGNATURE 	
		f. DATE SIGNED (YYYYMMDD) 20051012	
SECTION V - RECERTIFICATION			
34. RECERTIFICATION BY APPLICANT AND CORRECTION OF DATA AT THE TIME OF ACTIVE DUTY ENTRY			
a. I have reviewed all information contained in this document this date. That information is still correct and true to the best of my knowledge and belief. If changes were required, the original entry has been marked "See Item 34" and the correct information is provided below.			
b. ITEM NUMBER		c. CHANGE REQUIRED	
		<div style="font-size: 2em; transform: rotate(-15deg); opacity: 0.5;">NO CHANGES</div>	
d. APPLICANT (1) SIGNATURE 		e. WITNESS (1) TYPED OR PRINTED NAME (Last, First, Middle Initial) WILLIAMSON, John	
(2) DATE SIGNED (YYYYMMDD) 20051012		(2) RANK/ GRADE GS-09	
		(3) SIGNATURE 	

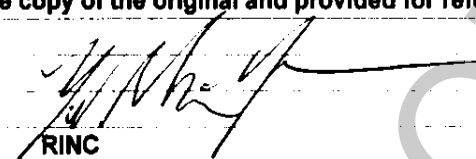

35. NAME (Last, First, Middle Initial) MERWIN DANIEL DENNIS	36. SOCIAL SECURITY NUMBER <div style="background-color: black; width: 100px; height: 20px;"></div>

REPORT OF MEDICAL HISTORY

(This information is for official and medically confidential use only and will not be released to unauthorized persons.)

Form Approved
OMB No. 0704-0413
Expires Oct 31, 2006

The public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate of Information Operations and Reports (0704-0413), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no persons shall be subject to any penalty for failing to comply with a collection of information if it does not display a current valid OMB control number.

PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS. RETURN COMPLETED FORM AS INDICATED ON PAGE 2.**PRIVACY ACT STATEMENT****AUTHORITY:** 10 USC 504, 505, 507, 532, 978, 1201, 1202, and 4346; and E.O. 9397.**PRINCIPAL PURPOSE(S):** To obtain medical data for determination of medical fitness for enlistment, induction, appointment and retention for applicants and members of the Armed Forces. The information will also be used for medical boards and separation of Service members for the Armed Forces.**ROUTINE USE(S):** None.**DISCLOSURE:** Voluntary; however, failure by an applicant to provide the information may result in delay or possible rejection of the individual's application to enter the Armed Forces. For an Armed Forces member, failure to provide the information may result in the individual being placed in a non-deployable status.**WARNING:** The information you have given constitutes an official statement. Federal law provides severe penalties (up to 5 years confinement or a \$10,000 fine or both), to anyone making a false statement. If you are selected for enlistment, commission, or entrance into a commissioning program based on a false statement, you can be tried by military courts-martial or meet an administrative board for discharge and could receive a less than honorable discharge that would affect your future.**1. Privacy Act Statement

AUTHORITY:

10 USC 1475 to 1480 and 2771, 38 USC 770, 44 USC 3101, and EO 9397, November 1943 (SSN).

PRINCIPAL PURPOSES:

This form is used to designate beneficiaries for certain benefits in the event of the servicemember's death. It is a guide for the disposition of that member's pay and allowances if captured, missing or interned. It also shows names and addresses of the person(s) the servicemember desires to be notified in case of emergency or death. The purpose of soliciting the SSN is to provide positive identification.

ROUTINE USES:

This form is a component in the Casualty Notification file series appropriate to each branch of the Military Services. It is to be used by casualty offices to notify a servicemember's next of kin of that member's injury, illness, or death. The member designates the person(s) to receive any unreceived pay and allowances and death gratuity benefits. Additional information concerning wills, insurance policies, and other personal data to be used in settling personal affairs in the event of the member's death may be included on this form. Release of personal identifier information to the member's finance office is required for appropriate distribution of pay and allowance benefits to designated beneficiaries of missing or interned servicemembers. This form is strictly for internal Service record purposes.

DISCLOSURE:

Voluntary; however, failure to provide personal identifier information may delay notification of the servicemember's status or may handicap processing of benefits to designated beneficiaries.

INSTRUCTIONS TO SERVICEMEMBER:

This extremely important form is to be used by you to show the names and addresses of your spouse, children, parents, and any other person(s) you would like notified if you become a casualty, and, to designate beneficiaries for certain benefits if you die. IT IS YOUR RESPONSIBILITY to keep your Record of Emergency Data up to date to show your desires as to beneficiaries to receive certain death payments, and to show changes in your family or other dependents listed; for example, as a result of marriage, civil court action, death, or address change. Regarding your designation in Item 11, "Allotment if Missing" (if used by your Service), please read the following statement carefully, and sign on the line provided.

I fully understand that, if I am captured, missing, or interned, my designation of allotments to dependents from my pay and allowances serves only as a guide to the Secretary of my Service. The Secretary may alter my designated allotment in the best interests of myself, my dependents, or the United States Government.

Daniel Dennis Merritt
SIGNATURE OF SERVICEMEMBER

ENLISTMENT/REENLISTMENT DOCUMENT ARMED FORCES OF THE UNITED STATES

PRIVACY ACT STATEMENT

AUTHORITY: 5 USC 3331; 32 USC 708; 44 USC 708 and 3101; 10 USC 133, 265, 275, 504, 508, 510, 591, 672(d), 678, 837, 1007, 1071 through 1087, 1168, 1169, 1475 through 1480, 1553, 2107, 2122, 3012, 5031, 8012, 8033, 8496, and 9411; 14 USC 351 and 632; and Executive Order 9397, November 1943 (SSN).

PRINCIPAL PURPOSE(S): To record enlistment or reenlistment into the U.S. Armed Forces. This information becomes a part of the subject's military personnel records which are used to document promotion, reassignment, training, medical support, and other personnel management actions. The purpose of soliciting the SSN is for positive identification.

ROUTINE USE(S): This form becomes a part of the Service's Enlisted Master File and Field Personnel File. All uses of the form are internal to the relevant Service.

DISCLOSURE: Voluntary; however, failure to furnish personal identification information may negate the enlistment/reenlistment application.

A. ENLISTEE/REENLISTEE IDENTIFICATION DATA

		a. TOTAL ACTIVE MILITARY SERVICE	
		b. TOTAL INACTIVE MILITARY SERVICE	

B. AGREEMENTS

8. I am enlisting/reenlisting in the United States (list branch of service) NAVAL RESERVE
this date for 8 years and 00 weeks beginning in pay grade E-1.
The additional details of my enlistment/reenlistment are in Section C and Annex(es)
A

a. FOR ENLISTMENT IN A DELAYED ENTRY/ENLISTMENT PROGRAM (DEP):

I understand that I will be ordered to active duty as a Reservist unless I report to the place shown in item 4 above by (list date (YYYYMMDD)) 0600 20051101 for enlistment in the Regular component of the United States (list branch of service) NAVY for not less than 4 years and 00 weeks. My enlistment in the DEP is in a nonpay status. I understand my period of time in the DEP is **NOT** creditable for pay purposes upon entry into a pay status. However, I also understand that this time is counted toward fulfillment of my military service obligation or commitment. I must maintain my current qualifications and keep my recruiter informed of any changes in my physical or dependency status, moral qualifications, and mailing address.

b. REMARKS: (If none, so state.) **NONE**

c. The agreements in this section and attached annex(es) are all the promises made to me by the Government.
ANYTHING ELSE ANYONE HAS PROMISED ME IS NOT VALID AND WILL NOT BE HONORED.

(Initials of Enlistee/Reenlistee) JDM

(Continued on reverse side.)

C. PARTIAL STATEMENT OF EXISTING UNITED STATES LAWS

9. FOR ALL ENLISTEES OR REENLISTEES: Many laws, regulations, and military customs will govern my conduct and require me to do things a civilian does not have to do. The following statements are not promises or guarantees of any kind. They explain some of the present laws affecting the Armed Forces which I cannot change but which Congress can change at any time.

a. My enlistment is more than an employment agreement. As a member of the Armed Forces of the United States, I will be:

(1) Required to obey all lawful orders and perform all assigned duties.

(2) Subject to separation during or at the end of my enlistment. If my behavior fails to meet acceptable military standards, I may be discharged and given a certificate for less than honorable service, which may hurt my future job opportunities and my claim for veteran's benefits.

(3) Subject to the military justice system, which means, among other things, that I may be tried by military courts-martial.

(4) Required upon order to serve in combat or other hazardous situations.

(5) Entitled to receive pay, allowances, and other benefits as provided by law and regulation.

b. Laws and regulations that govern military personnel may change without notice to me. Such changes may affect my status, pay, allowances, benefits, and responsibilities as a member of the Armed Forces **REGARDLESS** of the provisions of this enlistment/reenlistment document.

c. In the event of war, my enlistment in the Armed Forces continues until six (6) months after the war ends, unless my enlistment is ended sooner by the President of the United States.

10. MILITARY SERVICE OBLIGATION FOR ALL MEMBERS OF THE ACTIVE AND RESERVE COMPONENTS, INCLUDING THE NATIONAL GUARD.

a. **FOR ALL ENLISTEES:** If this is my initial enlistment, I must serve a total of eight (8) years. Any part of that service not served on active duty must be served in a Reserve Component unless I am sooner discharged.

b. If I am a member of a Reserve Component of an Armed Force at the beginning of a period of war or national emergency declared by Congress, or if I become a member during that period, my military service may be extended without my consent until six (6) months after the end of that period of war.

c. As a member of a Reserve Component, in time of war or national emergency declared by the Congress, I may be required to serve on active duty (other than for training) for the entire period of the war or emergency and for six (6) months after its end.

d. As a member of the Ready Reserve I may be required to perform active duty or active duty for training without my consent (other than as provided in item 8 of this document) as follows:

(1) In time of national emergency declared by the President of the United States, I may be ordered to active duty (other than for training) for not more than 24 consecutive months.

(2) I may be ordered to active duty for 24 months, and my enlistment may be extended so I can complete 24 months of active duty, if:

(a) I am not assigned to, or participating satisfactorily in, a unit of the Ready Reserve; and

(b) I have not met my Reserve obligation; and

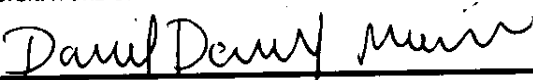

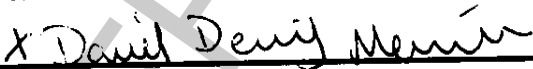

(c) I have not served on active duty for a total of 24 months.

(3) I may be ordered to perform additional active duty training for not more than 45 days if I have not fulfilled my military service obligation and fail in any year to perform the required training duty satisfactorily. If the failure occurs during the last year of my required membership in the Ready Reserve, my enlistment may be extended until I perform that additional duty, but not for more than six months.

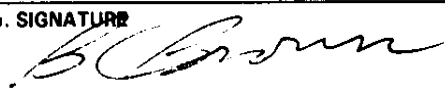

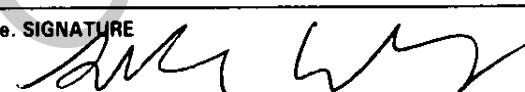

(4) When determined by the President that it is necessary to support any operational mission, I may be ordered to active duty as prescribed by law, if I am a member of the Selected Reserve.

11. FOR ENLISTEES/REENLISTEES IN THE NAVY, MARINE CORPS, OR COAST GUARD: I understand that if I am serving on a naval vessel in foreign waters, and my enlistment expires, I will be returned to the United States for discharge as soon as possible consistent with my desires. However, if essential to the public interest, I understand that I may be retained on active duty until the vessel returns to the United States. If I am retained under these circumstances, I understand I will be discharged not later than 30 days after my return to the United States; and, that except in time of war, I will be entitled to an increase in basic pay of 25 percent from the date my enlistment expires to the date of my discharge.

12. FOR ALL MALE APPLICANTS: Completion of this form constitutes registration with the Selective Service System in accordance with the Military Selective Service Act. Incident thereto the Department of Defense may transmit my name, permanent address, military address, Social Security Number, and birthdate to the Selective Service System for recording as evidence of the registration.

ENLISTMENT GUARANTEES

MERWIN DANIEL DENNIS

NAME (LAST, FIRST, MIDDLE JR.ETC)

SSN

1. **ACKNOWLEDGEMENT:** In connection with my enlistment into the United States Navy, I hereby acknowledge that:

a. I am enlisting into the U.S. Navy for an active duty period of four years and, at the same time, I agree to extend my enlistment for N/A months to meet the obligations of the N/A program.

I am enlisting with the following guarantees and understandings:

b. Upon enlistment, I will be enlisting under the provisions of Commander, Navy Recruiting Command Instruction 1130.8 option or options as indicated below:

Option (1) AVIATION BOATSWAIN'S MATE (HANDLING) CLASS "A" SCHOOL GUARANTEE (4YO/SG-ABH)

Option (2) N/A

Option (3) N/A

Option (4) N/A

2. I understand that I must be fully qualified at all times throughout my obligated service for all security, professional, military, physical, psychological and academic requirements of the options guaranteed in section 1b and that my eligibility will be rechecked during recruit training and periodically throughout my enlistment.

3. The Navy will enroll me in the training specified above. If during the periodic reviews of my eligibility, I am found no longer eligible for the options listed in 1b above because of information I provided in my enlistment application; because of a physical or psychological disqualification, or because of some reason that is not due to my fault, negligence, or conduct, I may only choose one of the following options:

- a. Reassignment to an "A" school for which I am qualified and a vacancy exists, or
- b. Navy apprentice training for which I am qualified and a vacancy exists.

In any event, the Navy may, at its option, choose to discharge me.

4. If I am not enrolled in the training guarantee specified in section 1b above because of some reason that is due to my own fault, negligence or conduct or if I am disenrolled from it for and other reason not specified in paragraph 3, then I lose that guarantee and at the Navy's option remain subject to continued naval service. I also understand:

- a. If I am retained, I may be required to serve the rest of my enlistment. If given accelerated advancement, post-apprentice training, or an enlistment/reenlistment bonus, I may incur additional service as required by regulation.
- b. The Navy may, at its option, discharge me in accordance with law and regulation.

5. I certify that I have read and received a copy of the Classifier Rating/Program Fact Sheet for the Rating/Program for which I am enlisting, and the Statement of Understand required for Option(s) (1). I understand the obligations for the Options and training that I will receive DDM.

Service members' Group Life Insurance Election and Certificate

Use this form to: (check all that apply)
☐ Name or update your beneficiary
☐ Reduce the amount of your insurance coverage
☐ Decline insurance coverage

Important: This form is for use by Active Duty and Reserve members. This form does not apply to and cannot be used for any other Government Life Insurance.

Last name NEBWIN	First name DANIEL	Middle name DENNIS	Rank, title or grade E-1	Social Security Number [REDACTED]
Branch of Service (Do not abbreviate) UNITED STATES NAVY			Current Duty Location RECRUIT TRAINING COMMAND, GREAT LAKES, IL 60088	

Amount of Insurance

By law, you are automatically insured for \$250,000. If you want \$250,000 of insurance, skip to Beneficiary(ies) and Payment Options. If you want less than \$250,000 of insurance, please check the appropriate block below and write the amount desired and your initials. Coverage is available in increments of \$10,000. If you do not want any insurance*, check the appropriate block below and write (in your own handwriting), "I do not want insurance at this time."

Declining SGLI coverage also cancels all family coverage under the SGLI program.

☒ I want coverage in the amount of \$ 400,000 Your initials DDM
☐ _____

(Write "I do not want insurance at this time.")

*Note: Reduced or refused insurance can only be restored by completing form SGLV 8285 with proof of good health and compliance with other requirements. Reduced or refused insurance will also affect the amount of VGLI you can convert to upon separation from service.

Beneficiary(ies) and Payment Options

I designate the following beneficiary(ies) to receive payment of my insurance proceeds. I understand that the principal beneficiary(ies) will receive payment upon my death. If all principal beneficiaries predecease me, the insurance will be paid to the contingent beneficiary(ies).

Complete Name (first, middle, last) and Address of each beneficiary	Social Security Number (if known)	Relationship to you	Share to each beneficiary (Use %, \$ amounts or fraction)	Payment Option (Lump sum or 36 equal monthly payments)
Principal				
1. [REDACTED] BETHLEHEM, PA		STEP MOTHER	100%	LUMP SUM
2.				
3.				
4.				

☐ Additional Principals on page 5 (check if applicable)

Contingent

1. NO CONTINGENT				
2.				
3.				
4.				

☐ Additional Contingents on page 5 (check if applicable)

I HAVE READ AND UNDERSTAND the instructions on pages 2 and 3 of this form. I ALSO UNDERSTAND that:

- This form cancels any prior beneficiary or payment instructions.
- The proceeds will be paid to beneficiaries as stated in #6 on page 3 of this form, unless otherwise stated above.
- If I have legal questions about this form, I may consult with a military attorney at no expense to me.
- I cannot have combined SGLI and VGLI coverages at the same time for more than \$250,000.

MERWIN, DANIEL D

b. SOCIAL SECURITY NUMBER (SSN)

[REDACTED]

2. STATEMENT OF UNDERSTANDING FOR INELIGIBLE MEMBERS

I am **NOT** eligible for the MGIB because (a) I am a service academy graduate, or (b) I am an ROTC scholarship graduate who received more than the current minimum amount allowed for enrollment in MGIB, or (c) I am a prior service member who disenrolled during my previous term of active duty.

a. SERVICE MEMBER SIGNATURE**b. RANK/GRADE****c. DATE SIGNED (YYYYMMDD)****3. STATEMENT OF UNDERSTANDING FOR ALL ELIGIBLE MEMBERS**

- (1) I am automatically enrolled unless I exercise the option to **DISENROLL** by signing item 5 below.
- (2) **UNLESS I DISENROLL** from the MGIB, my basic pay will be reduced \$100 per month, or the current monthly rate until \$1,200 has been deducted; this basic pay reduction **CANNOT** be **REFUNDED, SUSPENDED OR STOPPED**, this is an **IRREVOCABLE DECISION**.
- (3) I must complete 36 months of active duty service (24 months if my enlistment is for less than 36 months) before I am entitled to the current rate of monthly benefits. The MGIB provides benefits for a period of 36 months.
- (4) I understand I am eligible for an increased monthly benefit by contributing an additional amount, not to exceed \$800 while on active duty. Once I separate, I cannot contribute.
- (5) I must receive an **HONORABLE** discharge for service establishing entitlement to the MGIB. This **DOES NOT** include "under honorable conditions".
- (6) I must complete the requirements of a secondary school diploma or equivalency certification, or successfully complete the equivalent of 12 semester hours in a program of education leading to a standard college degree before applying for benefits with the Department of Veterans' Affairs.
- (7) I have 10 years from date of last discharge from active duty to use MGIB benefits.
- (8) If I die while on active duty, or within one year after discharge or release from active duty if service related, my designated beneficiary(ies) will receive the unused balance of the money reduced from my basic pay for the MGIB. This death benefit will be paid by the Department of Veterans' Affairs (DVA).
- (9) I cannot receive any combination of DVA educational benefits in excess of 48 months.
- (10) I must complete at least 24 months of a 3 year active duty service obligation and if my obligation is 2 years I may join and serve honorably in the Selected Reserve for a minimum of 48 months to qualify for the current active duty benefit rate. A (one) period of service **CANNOT** qualify me for both active and reserve MGIB benefits.

HIV ANTIBODY TESTING ACKNOWLEDGMENT FORM

For use of this form, see USMEPCOM Reg 40-8

FOR OFFICIAL USE ONLY

1. I acknowledge I have been informed by verbal briefing and this document that all statements apply to my medical processing.
2. Medical examinations include blood tests for the presence of antibodies to the Human Immunodeficiency Virus (HIV).
3. This virus causes Acquired Immune Deficiency Syndrome (AIDS).
4. This is not a test for AIDS. Positive tests mean persons have contracted the virus and built antibodies in their blood. Positive tests do not mean those persons have AIDS.
5. HIV tests are conducted by serum testing at contract laboratories.
6. Negative tests mean there are no detectable antibodies, but do not guarantee against future positive tests.
7. Positive tests are rechecked by different laboratory tests to confirm results.
8. Confirmed positive HIV tests are permanently disqualifying for entry into the Armed Forces.
9. MEPS physician will tell me personally if my test is positive and offer a second test to double check the accuracy of the first test.
10. MEPS physician will also tell my parents or legal guardians if my test is positive and I am a minor.
11. MEPS commander will notify my chain of command of all test results if I am a member of the Armed Forces.
12. All tests results are recorded on my medical examination and in MEPS computer records. MEPS will not remove either positive or negative results from computer records or medical forms, regardless of circumstances.
13. As part of my processing, I must give a current, correct address for notification.
14. Some states require by-name reporting of positive HIV results by the MEPS' higher headquarters. Those states are Alabama, Arizona, Colorado, Florida, Idaho, Illinois, Indiana, Minnesota, Nevada, Oklahoma, South Carolina, Tennessee, Virginia, West Virginia, and Wisconsin.
15. If a needlestick (or needlestick injury) occurs while my blood is being drawn, I understand that I will be required to provide a second blood specimen to continue processing.
16. My signature in this block indicates that I understand the HIV testing requirement, consequences of positive results, and use of all results.

A vital asset to the department! Essential to administrative success! Self starter. A dependable Petty Officer who aggressively seeks greater responsibilities. Completes tasks ahead of schedule with little to no supervision. - Administrative professional. Innovative techniques in database management tracked, maintained, and accounted for over 4,000 pieces of correspondence. Sought after by peers and seniors alike for advice and counsel in administrative matters. - Emerging leader. Supervises and trains three divisional Yeoman, to ensure all correspondence is submitted in accordance with the department's high standards. Team builder. As a member of the Command Assessment Team he created and maintained multiple training syllabuses in support of retention efforts. **Has my strongest recommendation for advancement and paths leading to a Commission!**

CLASSIFIED INFORMATION NONDISCLOSURE AGREEMENT**AN AGREEMENT BETWEEN****MERWIN, DANIEL D****AND THE UNITED STATES***(Name of Individual - Printed or typed)*

1. Intending to be legally bound, I hereby accept the obligations contained in this Agreement in consideration of my being granted access to classified information. As used in this Agreement, classified information is marked or unmarked classified information, including oral communications, that is classified under the standards of Executive Order 12958, or under any other Executive order or statute that prohibits the unauthorized disclosure of information in the interest of national security; and unclassified information that meets the standards for classification and is in the process of a classification determination as provided in Sections 1.2, 1.3, and 1.4(e) of Executive Order 12958, or under any other Executive order or statute that requires protection for such information in the interest of national security. I understand and accept that by being granted access to classified information, special confidence and trust shall be placed in me by the United States Government.

2. I hereby acknowledge that I have received a security indoctrination concerning the nature and protection of classified information, including the procedures to be followed in ascertaining whether other persons to whom I contemplate disclosing this information have been approved for access to it, and that I understand these procedures.

3. I have been advised that the unauthorized disclosure, unauthorized retention, or negligent handling of classified information by me could cause damage or irreparable injury to the United States or could be used to advantage by a foreign nation. I hereby agree that I will never divulge classified information to anyone unless: (a) I have officially verified that the recipient has been properly authorized by the United States Government to receive it; or (b) I have been given prior written notice of authorization from the United States Government Department or Agency (hereinafter Department or Agency) responsible for the classification of the information or last granting me a security clearance that such disclosure is permitted. I understand that if I am uncertain about the classification status of information, I am required to confirm from an authorized official that the information is unclassified before I may disclose it, except to a person as provided in (a) or (b), above. I further understand that I am obligated to comply with laws and regulations that prohibit the unauthorized disclosure of classified information.

4. I have been advised that any breach of this Agreement may result in the termination of any security clearances I hold; removal from any position of special confidence and trust requiring such clearances; or the termination of my employment or other relationships with the Departments or Agencies that granted my security clearance or clearances. In addition, I have been advised that any unauthorized disclosure of classified information by me may constitute a violation, or violations, of United States criminal laws, including the provisions of Sections 641, 793, 794, 798, *952 and 1924, Title 18, United States Code, * the provisions of Section 783(b), Title 50, United States Code, and the provisions of the Intelligence Identities Protection Act of 1982. I recognize that nothing in this Agreement constitutes a waiver by the United States of the right to prosecute me for any statutory violation.

5. I hereby assign to the United States Government all royalties, remunerations, and emoluments that have resulted, will result or may result from any disclosure, publication, or revelation of classified information not consistent with the terms of this Agreement.

6. I understand that the United States Government may seek any remedy available to it to enforce this Agreement including, but not limited to, application for a court order prohibiting disclosure of information in breach of this Agreement.

7. I understand that all classified information to which I have access or may obtain access by signing this Agreement is now and will remain the property of, or under the control of the United States Government unless and until otherwise determined by an authorized official or final ruling of a court of law. I agree that I shall return all classified materials which have, or may come into my possession or for which I am responsible because of such access: (a) upon demand by an authorized representative of the United States Government; (b) upon the conclusion of my employment or other relationship with the Department or Agency that last granted me a security clearance or that provided me access to classified information; or (c) upon the conclusion of my employment or other relationship that requires access to classified information. If I do not return such materials upon request, I understand that this may be a violation of Section 793 and/or 1924, Title 18, United States Code, a United States criminal law.

8. Unless and until I am released in writing by an authorized representative of the United States Government, I understand that all conditions and obligations imposed upon me by this Agreement apply during the time I am granted access to classified information, and at all times thereafter.

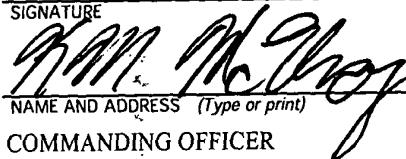

9. Each provision of this Agreement is severable. If a court should find any provision of this Agreement to be unenforceable, all other provisions of this Agreement shall remain in full force and effect.

(Continue on reverse.)

10. These restrictions are consistent with and do not supersede, conflict with or otherwise alter the employee obligations, rights or liabilities created by Executive Order 12958; Section 7211 of Title 5, United States Code (governing disclosures to Congress); Section 1034 of Title 10, United States Code, as amended by the Military Whistleblower Protection Act (governing disclosure to Congress by members of the military); Section 2302(b)(8) of Title 5, United States Code, as amended by the Whistleblower Protection Act (governing disclosures of illegality, waste, fraud, abuse or public health or safety threats); the Intelligence Identities Protection Act of 1982 (50 U.S.C. 421 et seq.) (governing disclosures that expose confidential Government agents), and the statutes which protect against disclosure that may compromise the national security, including Sections 641, 793, 794, 798, 952 and 1924 of Title 18, United States Code, and Section 4(b) of the Subversive Activities Act of 1950 (50 U.S.C. Section 783(b)). The definitions, requirements, obligations, rights, sanctions and liabilities created by said Executive Order and listed statutes are incorporated into this Agreement and are controlling.

11. I have read this Agreement carefully and my questions, if any, have been answered. I acknowledge that the briefing officer has made available to me the Executive Order and statutes referenced in this Agreement and its implementing regulation (32 CFR Section 2003.20) so that I may read them at this time, if I so choose.

Amount of Insurance

By law, you are automatically insured for \$400,000. *If you want \$400,000 of insurance*, skip to *Beneficiary(ies) and Payment Options*. *If you want less than \$400,000 of insurance*, please check the appropriate block below and write the amount desired and your initials. Coverage is available in increments of \$50,000. *If you do not want any insurance**, check the appropriate block below and write (in your own handwriting), "I do not want insurance at this time."

Declining SGLI coverage also cancels all family coverage and traumatic injury protection under the SGLI program.

- ☐ I want coverage in the amount of \$ _____ Your initials _____
☐ _____

(Write "I do not want insurance at this time.")

*Note: Reduced or refused insurance can only be restored by completing form SGLV 8285 with proof of good health and compliance with other requirements. Reduced or refused insurance will also affect the amount of Veterans' Group Life Insurance you can convert to upon separation from service.

Beneficiary(ies) and Payment Options

I designate the following beneficiary(ies) to receive payment of my insurance proceeds. I understand that the principal beneficiary(ies) will receive payment upon my death. If all principal beneficiaries predecease me, the insurance will be paid to the contingent beneficiary(ies).

Complete Name (first, middle, last) and Address of each beneficiary	Social Security Number (if known)	Relationship to you	Share to each beneficiary (Use %, \$ amounts or fractions)	Payment Option (Lump sum or 36 equal monthly payments)
Principal				
1. [REDACTED] Effort, PA [REDACTED]		Father	25%	Lump sum
2. [REDACTED] Lexington, SC [REDACTED]		Mother	25%	Lump sum
3. [REDACTED] Bethlehem, PA [REDACTED]		Step Mother	50 %	Lump sum
4. NO CONTINGENCY				
<input type="checkbox"/> Additional Principals on page 4 (check if applicable)				
Contingent				
1. [REDACTED] Lexington SC [REDACTED]		Sister	100 %	Lump sum
2. NO CONTINGENCY				
3. NO CONTINGENCY				
4. NO CONTINGENCY				
<input type="checkbox"/> Additional Contingents on page 4 (check if applicable)				

I HAVE READ AND UNDERSTAND the instructions on pages 2 and 3 of this form. I ALSO UNDERSTAND that:

- This form cancels any prior beneficiary or payment instructions.
- The proceeds will be paid to beneficiaries as stated in #6 on page 3 of this form, unless otherwise stated above.
- If I have legal questions about this form, I may consult with a military attorney at no expense to me.
- I cannot have combined SGLI and VGLI coverages at the same time for more than \$400,000.
- If I am married or if I get married after completing this form, **my spouse is automatically covered under Family SGLI for which premiums will be deducted from my pay**, unless I decline Family SGLI coverage by completing SGLV 8286A. For Family SGLI premium deductions, my spouse **MUST** be registered in DEERS. **Failure to do so will result in debts owed for unpaid premiums.**

AGREEMENT TO EXTEND ENLISTMENT

NAME: MERWIN, DANIEL DENNIS

SSN: [REDACTED]

BR/CL: USN

Having enlisted in the X UNITED STATES NAVY NAVAL RESERVE on 11/01/2005 for 4 years, I do voluntarily agree to (further) extend my enlistment for 34 month(s) (REASON: SCHOOL OTHER X) subject to the provisions and obligations of my enlistment contract. I acknowledge that the provisions of 10 USC 5540 relating to an increase in basic pay do not apply to this agreement. I understand my new contract expiration date to be 08/31/2012. This agreement has been fully explained to me, I understand it. I understand that extensions of enlistment totaling 24 months or greater require a physical examination prior to the extension becoming operative. No promises of any kind have been made to me except as indicated:

TO INCUR SUFFICIENT OBLISERV FOR BUPERS ORDER 0909. I UNDERSTAND THAT THIS EXTENSION BECOMES BINDING UPON EXECUTION AND CANNOT BE CANCELLED EXCEPT FOR AS SET FORTH IN MILPERSMAN 1160-040.
THIS IS MY FIRST EXTENSION THIS ENLISTMENT.

ENLISTMENT/REENLISTMENT DOCUMENT ARMED FORCES OF THE UNITED STATES

PRIVACY ACT STATEMENT

AUTHORITY: 5 USC 3331; 32 USC 708; 44 USC 708 and 3101; 10 USC 133, 265, 275, 504, 508, 510, 591, 672(d), 678, 837, 1007, 1071 through 1087, 1168, 1169, 1475 through 1480, 1553, 2107, 2122, 3012, 5031, 8012, 8033, 8496, and 9411; 14 USC 351 and 632; and Executive Order 9397, November 1943 (SSN).

PRINCIPAL PURPOSE(S): To record enlistment or reenlistment into the U.S. Armed Forces. This information becomes a part of the subject's military personnel records which are used to document promotion, reassignment, training, medical support, and other personnel management actions. The purpose of soliciting the SSN is for positive identification.

ROUTINE USE(S): This form becomes a part of the Service's Enlisted Master File and Field Personnel File. All uses of the form are internal to the relevant Service.

DISCLOSURE: Voluntary; however, failure to furnish personal identification information may negate the enlistment/reenlistment application.

A. ENLISTEE/REENLISTEE IDENTIFICATION DATA

1. NAME (Last, First, Middle) MERWIN DANIEL DENNIS		2. SOCIAL SECURITY NUMBER [REDACTED]		
3. HOME OF RECORD (Street, City, State, ZIP Code) [REDACTED] BETHLEHEM, PA [REDACTED]		4. PLACE OF ENLISTMENT/REENLISTMENT (Mil. Installation, City, State) HARRISBURG MEPS MECHANICSBURG, PA 17055-4843		
5. DATE OF ENLISTMENT/ REENLISTMENT (YYYYMMDD) 20051013	6. DATE OF BIRTH (YYYYMMDD) 1985 [REDACTED]	7. PREV MIL SVC UPON ENL/REENLIST	YEARS	MONTHS
		a. TOTAL ACTIVE MILITARY SERVICE		
		b. TOTAL INACTIVE MILITARY SERVICE		

B. AGREEMENTS

8. I am enlisting/reenlisting in the United States (list branch of service) NAVAL RESERVE
this date for 8 years and 00 weeks beginning in pay grade E-1.
The additional details of my enlistment/reenlistment are in Section C and Annex(es)
A

a. FOR ENLISTMENT IN A DELAYED ENTRY/ENLISTMENT PROGRAM (DEP):

I understand that I will be ordered to active duty as a Reservist unless I report to the place shown in item 4 above by (list date (YYYYMMDD)) 0600 20051101 for enlistment in the Regular component of the United States (list branch of service) NAVY for not less than 4 years and 00 weeks. My enlistment in the DEP is in a nonpay status. I understand my period of time in the DEP is **NOT** creditable for pay purposes upon entry into a pay status. However, I also understand that this time is counted toward fulfillment of my military service obligation or commitment. I must maintain my current qualifications and keep my recruiter informed of any changes in my physical or dependency status, moral qualifications, and mailing address.

b. REMARKS: (If none, so state.) **NONE**

c. The agreements in this section and attached annex(es) are all the promises made to me by the Government. ANYTHING ELSE ANYONE HAS PROMISED ME IS NOT VALID AND WILL NOT BE HONORED.

(Initials of Enlistee/Reenlistee) DDM

(Continued on reverse side.)

C. PARTIAL STATEMENT OF EXISTING UNITED STATES LAWS

9. FOR ALL ENLISTEES OR REENLISTEES: Many laws, regulations, and military customs will govern my conduct and require me to do things a civilian does not have to do. The following statements are not promises or guarantees of any kind. They explain some of the present laws affecting the Armed Forces which I cannot change but which Congress can change at any time.

a. My enlistment is more than an employment agreement. As a member of the Armed Forces of the United States, I will be:

(1) Required to obey all lawful orders and perform all assigned duties.

(2) Subject to separation during or at the end of my enlistment. If my behavior fails to meet acceptable military standards, I may be discharged and given a certificate for less than honorable service, which may hurt my future job opportunities and my claim for veteran's benefits.

(3) Subject to the military justice system, which means, among other things, that I may be tried by military courts-martial.

(4) Required upon order to serve in combat or other hazardous situations.

(5) Entitled to receive pay, allowances, and other benefits as provided by law and regulation.

b. Laws and regulations that govern military personnel may change without notice to me. Such changes may affect my status, pay, allowances, benefits, and responsibilities as a member of the Armed Forces **REGARDLESS** of the provisions of this enlistment/reenlistment document.

c. In the event of war, my enlistment in the Armed Forces continues until six (6) months after the war ends, unless my enlistment is ended sooner by the President of the United States.

10. MILITARY SERVICE OBLIGATION FOR ALL MEMBERS OF THE ACTIVE AND RESERVE COMPONENTS, INCLUDING THE NATIONAL GUARD.

a. **FOR ALL ENLISTEES:** If this is my initial enlistment, I must serve a total of eight (8) years. Any part of that service not served on active duty must be served in a Reserve Component unless I am sooner discharged.

b. If I am a member of a Reserve Component of an Armed Force at the beginning of a period of war or national emergency declared by Congress, or if I become a member during that period, my military service may be extended without my consent until six (6) months after the end of that period of war.

c. As a member of a Reserve Component, in time of war or national emergency declared by the Congress, I may be required to serve on active duty (other than for training) for the entire period of the war or emergency and for six (6) months after its end.

d. As a member of the Ready Reserve I may be required to perform active duty or active duty for training without my consent (other than as provided in item 8 of this document) as follows:

(1) In time of national emergency declared by the President of the United States, I may be ordered to active duty (other than for training) for not more than 24 consecutive months.

(2) I may be ordered to active duty for 24 months, and my enlistment may be extended so I can complete 24 months of active duty, if:

(a) I am not assigned to, or participating satisfactorily in, a unit of the Ready Reserve; and

(b) I have not met my Reserve obligation; and

(c) I have not served on active duty for a total of 24 months.

(3) I may be ordered to perform additional active duty training for not more than 45 days if I have not fulfilled my military service obligation and fail in any year to perform the required training duty satisfactorily. If the failure occurs during the last year of my required membership in the Ready Reserve, my enlistment may be extended until I perform that additional duty, but not for more than six months.

(4) When determined by the President that it is necessary to support any operational mission, I may be ordered to active duty as prescribed by law, if I am a member of the Selected Reserve.

11. FOR ENLISTEES/REENLISTEES IN THE NAVY, MARINE CORPS, OR COAST GUARD: I understand that if I am serving on a naval vessel in foreign waters, and my enlistment expires, I will be returned to the United States for discharge as soon as possible consistent with my desires. However, if essential to the public interest, I understand that I may be retained on active duty until the vessel returns to the United States. If I am retained under these circumstances, I understand I will be discharged not later than 30 days after my return to the United States; and, that except in time of war, I will be entitled to an increase in basic pay of 25 percent from the date my enlistment expires to the date of my discharge.

12. FOR ALL MALE APPLICANTS: Completion of this form constitutes registration with the Selective Service System in accordance with the Military Selective Service Act. Incident thereto the Department of Defense may transmit my name, permanent address, military address, Social Security Number, and birthdate to the Selective Service System for recording as evidence of the registration.

NAME OF ENLISTEE/REENLISTEE (Last, First, Middle)

MERWIN DANIEL DENNIS

SOCIAL SECURITY NO OF ENLISTEE/REENLISTEE

D. CERTIFICATION AND ACCEPTANCE

13a. My acceptance for enlistment is based on the information I have given in my application for enlistment. If any of that information is false or incorrect, this enlistment may be voided or terminated administratively by the Government or I may be tried by a Federal, civilian, or military court and, if found guilty, may be punished.

I CERTIFY THAT I HAVE CAREFULLY READ THIS DOCUMENT. ANY QUESTIONS I HAD WERE EXPLAINED TO MY SATISFACTION. I FULLY UNDERSTAND THAT ONLY THOSE AGREEMENTS IN SECTION B OF THIS DOCUMENT OR RECORDED ON THE ATTACHED ANNEX(ES) WILL BE HONORED. ANY OTHER PROMISES OR GUARANTEES MADE TO ME BY ANYONE ARE WRITTEN BELOW: (If none, X "NONE" and initial.)

ENLISTMENT GUARANTEES

MERWIN DANIEL DENNIS

NAME (LAST, FIRST, MIDDLE JR.ETC)

SSN

1. **ACKNOWLEDGEMENT:** In connection with my enlistment into the United States Navy, I hereby acknowledge that:

- a. I am enlisting into the U.S. Navy for an active duty period of four years and, at the same time, I agree to extend my enlistment for N/A months to meet the obligations of the N/A program.
I am enlisting with the following guarantees and understandings:
- b. Upon enlistment, I will be enlisting under the provisions of Commander, Navy Recruiting Command Instruction 1130.8 option or options as indicated below:

Option (1) AVIATION BOATSWAIN'S MATE (HANDLING) CLASS "A" SCHOOL GUARANTEE (4YO/SG-ABH)

Option (2) N/A

Option (3) N/A

Option (4) N/A

2. I understand that I must be fully qualified at all times throughout my obligated service for all security, professional, military, physical, psychological and academic requirements of the options guaranteed in section 1b and that my eligibility will be rechecked during recruit training and periodically throughout my enlistment.
3. The Navy will enroll me in the training specified above. If during the periodic reviews of my eligibility, I am found no longer eligible for the options listed in 1b above because of information I provided in my enlistment application; because of a physical or psychological disqualification, or because of some reason that is not due to my fault, negligence, or conduct. I may only choose one of the following options:
- a. Reassignment to an "A" school for which I am qualified and a vacancy exists, or
b. Navy apprentice training for which I am qualified and a vacancy exists.

In any event, the Navy may, at its option, choose to discharge me.

4. If I am not enrolled in the training guarantee specified in section 1b above because of some reason that is due to my own fault, negligence or conduct or if I am disenrolled from it for and other reason not specified in paragraph 3, then I lose that guarantee and at the Navy's option remain subject to continued naval service. I also understand:
- a. If I am retained, I may be required to serve the rest of my enlistment. If given accelerated advancement, post-apprentice training, or an enlistment/reenlistment bonus, I may incur additional service as required by regulation.
b. The Navy may, at its option, discharge me in accordance with law and regulation.
5. I certify that I have read and received a copy of the Classifier Rating/Program Fact Sheet for the Rating/Program for which I am enlisting, and the Statement of Understand required for Option(s) (1). I understand the obligations for the Options and training that I will receive DDM.

CLASSIFIED INFORMATION NONDISCLOSURE AGREEMENT**AN AGREEMENT BETWEEN**

Daniel D. Merwin

AND THE UNITED STATES*(Name of Individual - Printed or typed)*

1. Intending to be legally bound, I hereby accept the obligations contained in this Agreement in consideration of my being granted access to classified information. As used in this Agreement, classified information is marked or unmarked classified information, including oral communications, that is classified under the standards of Executive Order 12958, or under any other Executive order or statute that prohibits the unauthorized disclosure of information in the interest of national security; and unclassified information that meets the standards for classification and is in the process of a classification determination as provided in Sections 1.2, 1.3, and 1.4(e) of Executive Order 12958, or under any other Executive order or statute that requires protection for such information in the interest of national security. I understand and accept that by being granted access to classified information, special confidence and trust shall be placed in me by the United States Government.

2. I hereby acknowledge that I have received a security indoctrination concerning the nature and protection of classified information, including the procedures to be followed in ascertaining whether other persons to whom I contemplate disclosing this information have been approved for access to it, and that I understand these procedures.

3. I have been advised that the unauthorized disclosure, unauthorized retention, or negligent handling of classified information by me could cause damage or irreparable injury to the United States or could be used to advantage by a foreign nation. I hereby agree that I will never divulge classified information to anyone unless: (a) I have officially verified that the recipient has been properly authorized by the United States Government to receive it; or (b) I have been given prior written notice of authorization from the United States Government Department or Agency (hereinafter Department or Agency) responsible for the classification of the information or last granting me a security clearance that such disclosure is permitted. I understand that if I am uncertain about the classification status of information, I am required to confirm from an authorized official that the information is unclassified before I may disclose it, except to a person as provided in (a) or (b), above. I further understand that I am obligated to comply with laws and regulations that prohibit the unauthorized disclosure of classified information.

4. I have been advised that any breach of this Agreement may result in the termination of any security clearances I hold; removal from any position of special confidence and trust requiring such clearances; or the termination of my employment or other relationships with the Departments or Agencies that granted my security clearance or clearances. In addition, I have been advised that any unauthorized disclosure of classified information by me may constitute a violation, or violations, of United States criminal laws, including the provisions of Sections 641, 793, 794, 798, *952 and 1924, Title 18, United States Code, * the provisions of Section 783(b), Title 50, United States Code, and the provisions of the Intelligence Identities Protection Act of 1982. I recognize that nothing in this Agreement constitutes a waiver by the United States of the right to prosecute me for any statutory violation.

5. I hereby assign to the United States Government all royalties, remunerations, and emoluments that have resulted, will result or may result from any disclosure, publication, or revelation of classified information not consistent with the terms of this Agreement.

6. I understand that the United States Government may seek any remedy available to it to enforce this Agreement including, but not limited to, application for a court order prohibiting disclosure of information in breach of this Agreement.

7. I understand that all classified information to which I have access or may obtain access by signing this Agreement is now and will remain the property of, or under the control of the United States Government unless and until otherwise determined by an authorized official or final ruling of a court of law. I agree that I shall return all classified materials which have, or may come into my possession or for which I am responsible because of such access: (a) upon demand by an authorized representative of the United States Government; (b) upon the conclusion of my employment or other relationship with the Department or Agency that last granted me a security clearance or that provided me access to classified information; or (c) upon the conclusion of my employment or other relationship that requires access to classified information. If I do not return such materials upon request, I understand that this may be a violation of Section 793 and/or 1924, Title 18, United States Code, a United States criminal law.

8. Unless and until I am released in writing by an authorized representative of the United States Government, I understand that all conditions and obligations imposed upon me by this Agreement apply during the time I am granted access to classified information, and at all times thereafter.

9. Each provision of this Agreement is severable. If a court should find any provision of this Agreement to be unenforceable, all other provisions of this Agreement shall remain in full force and effect.

(Continue on reverse.)

10. These restrictions are consistent with and do not supersede, conflict with or otherwise alter the employee obligations, rights or liabilities created by Executive Order 12958; Section 7211 of Title 5, United States Code (governing disclosures to Congress); Section 1034 of Title 10, United States Code, as amended by the Military Whistleblower Protection Act (governing disclosure to Congress by members of the military); Section 2302(b)(8) of Title 5, United States Code, as amended by the Whistleblower Protection Act (governing disclosures of illegality, waste, fraud, abuse or public health or safety threats); the Intelligence Identities Protection Act of 1982 (50 U.S.C. 421 et seq.) (governing disclosures that expose confidential Government agents), and the statutes which protect against disclosure that may compromise the national security, including Sections 641, 793, 794, 798, 952 and 1924 of Title 18, United States Code, and Section 4(b) of the Subversive Activities Act of 1950 (50 U.S.C. Section 783(b)). The definitions, requirements, obligations, rights, sanctions and liabilities created by said Executive Order and listed statutes are incorporated into this Agreement and are controlling.

11. I have read this Agreement carefully and my questions, if any, have been answered. I acknowledge that the briefing officer has made available to me the Executive Order and statutes referenced in this Agreement and its implementing regulation (32 CFR Section 2003.20) so that I may read them at this time, if I so choose.

33. PROFESSIONAL KNOWLEDGE: Technical knowledge and practical application NOB <input type="checkbox"/>	- Marginal knowledge of rating, specialty or job. - Unable to apply knowledge to solve routine problems. - Fails to meet advancement/PQS requirements.	-	- Strong working knowledge of rating, specialty and job. - Reliably applies knowledge to accomplish tasks. - Meets advancement/PQS requirements on time.	-	- Recognized expert, sought out by all for technical knowledge. - Uses knowledge to solve complex technical problems. - Meets advancement/PQS requirements early/with distinction					
34. QUALITY OF WORK: Standard of work; value of end product. NOB <input type="checkbox"/>	- Needs excessive supervision. - Product frequently needs rework. - Wasteful of resources.	-	- Needs little supervision. - Produces quality work. Few errors and resulting rework. - Uses resources efficiently.	-	- Needs no supervision. - Always produces exceptional work. No rework required. - Maximizes resources.					
35. COMMAND OR ORGANIZATIONAL CLIMATE/EQUAL OPPORTUNITY: Contributing to growth and development, human worth, community. NOB <input type="checkbox"/>	- Actions counter to Navy's retention/reenlistment goals. - Uninvolved with mentoring or professional development of subordinates. - Actions counter to good order and discipline and negatively affect Command/Organizational climate. - Demonstrates exclusionary behavior. Fails to value differences from cultural diversity.	-	- Positive leadership supports Navy's increased retention goals. Active in decreasing attrition. - Actions adequately encourage/support subordinates' personal/professional growth. - Demonstrates appreciation for contributions of Navy personnel. Positive influence on Command climate. - Values differences as strengths. Fosters atmosphere of acceptance/inclusion per EO/EEO policy.	-	- Measurably contributes to Navy's increased retention and reduced attrition objectives. - Proactive leader/exemplary mentor. Involved in subordinates' personal development leading to professional growth/sustained commitment. - Initiates support programs for military, civilian, and families to achieve exceptional Command and Organizational climate. - The model of achievement. Develops unit cohesion by valuing differences as strengths.					
36. MILITARY BEARING/CHARACTER: Appearance, conduct physical fitness, adherence to Navy Core Values. NOB <input type="checkbox"/>	- Consistently unsatisfactory appearance. - Poor self-control; conduct resulting in disciplinary action. - Unable to meet one or more physical readiness standards. - Fails to live up to one or more Navy Core Values: HONOR, COURAGE, COMMITMENT.	-	- Excellent personal appearance. - Excellent conduct conscientiously complies with regulations. - Complies with physical readiness program. - Always lives up to Navy Core Values: HONOR, COURAGE, COMMITMENT.	-	- Exemplary personal appearance. - Model of conduct, on and off duty. - A leader in physical readiness. - Exemplifies Navy Core Values: HONOR, COURAGE, COMMITMENT.					
37. PERSONAL JOB ACCOMPLISHMENT/INITIATIVE: Responsibility, quantity of work. NOB <input type="checkbox"/>	- Needs prodding to attain qualification or finish job. - Prioritizes poorly. - Avoids responsibility.	-	- Productive and motivated. Completes tasks and qualifications fully and on time. - Plans/prioritizes effectively. - Reliable, dependable, willingly accepts responsibility.	-	- Energetic self-starter. Completes tasks or qualifications early, far better than expected. - Plans/prioritizes wisely and with exceptional foresight. - Seeks extra responsibility and takes on the hardest jobs.					

1. Name (Last, First MI Suffix) MERWIN, DANIEL D		2. Rate CTN2		3. Desig SW/AW		4. SSN [REDACTED]									
PERFORMANCE TRAITS		1.0* Below Standards		2.0 Pro- gressing		3.0 Meets Standards		4.0 Above Standards		5.0 Greatly Exceeds Standards					
38. TEAMWORK: Contributions to team building and team results NOB <input type="checkbox"/>		- Creates conflict, unwilling to work with others, puts self above team. - Fails to understand team goals or teamwork techniques. - Does not take direction well.		- <input type="checkbox"/>		- Reinforces others' efforts, meets commitments to team. - Understands goals, employs good teamwork techniques. - Accepts and offers team direction.		- <input type="checkbox"/>		- Team builder, inspires cooperation and progress. - Focuses goals and techniques for teams - The best at accepting and offering team direction.					
39. LEADERSHIP: Organizing, motivating and developing others to accomplish goals. NOB <input type="checkbox"/>		- Neglects growth/development or welfare of subordinates. - Fails to organize, creates problems for subordinates. - Does not set or achieve goals relevant to command mission and vision. - Lacks ability to cope with or tolerate stress. - Inadequate communicator. - Tolerates hazards or unsafe practices		- <input type="checkbox"/>		- Effectively stimulates growth/development in subordinates. - Organizes successfully, implementing process improvements and efficiencies. - Sets/achieves useful, realistic goals that support command mission. - Performs well in stressful situations - Clear, timely communicator. - Ensures safety of personnel and equipment.		- <input type="checkbox"/>		- Inspiring motivator and trainer, subordinates reach highest level of growth and development. - Superb organizer, great foresight, develops process improvements and efficiencies. - Leadership achievements dramatically further command mission and vision. - Perseveres through the toughest challenges and inspires others. - Exceptional communicator. - Makes subordinates safety-conscious, maintains top safety record. - Constantly improves the personal and professional lives of others.					
40. Individual Trait Avg. total of trait scores divided by number of graded traits. 3.43		41. I recommend this individual for (maximum of two): Assignment in Rating, Sea Special Programs, Shore Special Programs, Commissioning Programs, Special Warfare Programs, Rating Instructor Duty, Other. (Be specific) EIDWS				42. Signature of Rater (Typed Name & Rate): I have evaluated this member against the above performance standards and have forwarded written explanation of marks 1.0 and 5.0.  SCHRAMM, J R, CTNC Date: 15 MAR 10									
43. COMMENTS ON PERFORMANCE: * All 1.0 marks, three 2.0 marks, and 2.0 marks in Block 35 must be specifically substantiated in comments. Comments must be verifiable. Font must be 10 or 12 Pitch (10 or 12 point) only. Use upper and lower case. Petty Officer Merwin has excellent technical abilities and consistently produces exceptional work. - Devoted 30 hours performing research, analysis, and mapping of two high interest targets, accounting for three percent of the Command's reporting for 2009. Efforts supported the execution of enhanced interactive operations, enabled defined target development in support of National agencies and enhanced COCOM's ability to combat chemical, biological, and nuclear proliferation. - Dedicated 75 working days to qualifying on three operational JQRs; completing all three ahead of schedule, and resulted in an eight percent increase in division readiness. - Recognized expert. Hand selected to participate in the Command's inaugural Enlisted Information Dominance Warfare Specialist (EIDWS) qualification group. - Dedicated five hours towards one fundraising event supporting the Command Holiday Party. Efforts helped raise over \$530 and reduced ticket prices for this annual event. Petty Officer Merwin is off to a good start for a promising young CTN2!															
44. QUALIFICATIONS/ACHIEVEMENTS - Education, awards, community involvement, etc., during this period. Awarded NA. Completed three operational JQRs. Earned 9305 NEC.

IMMEDIATE REENLISTMENT CONTRACT

NAME: **MERWIN,DANIEL DENNIS** SSN: [REDACTED] BR/CL: **USN**

FIRST: I am reenlisting in the ☒ UNITED STATES NAVY ☐ NAVAL RESERVE for **6** years from **10/30/2009**, unless sooner discharged by proper authority. My new contract expiration date is **10/29/2015**.

SECOND: I have read and understand the following SECTION OF TITLE 10 OF THE UNITED STATES CODE:

SECTION 5540 OF TITLE 10 OF THE UNITED STATES CODE; "(a) The senior officer present afloat in foreign waters shall send to the United States by Government or other transportation as soon as possible each enlisted member of the naval service who is serving on a naval vessel, whose term of enlistment has expired, and who desires to return to the United States. However, when the senior officer present afloat considers it essential to the public interest, he may retain such a member on active duty until the vessel returns to the United States. (b) Each member retained under this section: (1) shall be discharged not later than 30 days after arrival in the United States; and (2) except in time of war is entitled to an increase in basic pay of 25 percent. (c) The substance of this section shall be included in the enlistment contract of each person enlisting in the naval service."

THIRD: I understand that I may be extended on, or ordered to active duty for the duration of any war or national emergency declared by Congress, and for six months thereafter, and that my agreed period of active service may be extended as otherwise authorized by law.

FOURTH: I have had this contract fully explained to me, I understand it, and certify that no promise of any kind has been made to me concerning assignment to duty, geographical area, schooling, special programs, assignment of government quarters, or transportation of dependents except as indicated:

2009OCT30: I understand that continued entitlement to unpaid Selective Reenlistment Bonus (SRB) installments may be terminated and a pro-rated portion of advance bonus payments, including lump sum payments, will be recouped if I am considered not technically qualified in the bonus rating/NEC designator because I am no longer classified in that rating/NEC, the rating/NEC is removed from my records, and current and further assignment in that military specialty is precluded from any of the following reasons within my control:

- (1) Should I refuse to perform certain duties for effective performance in the military specialty when I have volunteered for such duties in writing prior to accepting the bonus.
- (2) Should disciplinary action be taken under the Uniform Code of Military Justice (UCMJ) or upon court conviction when such action renders me unqualified for future performance in the military specialty; or
- (3) Should I have withdrawal of the minimum-security clearance, loss of qualification under the Personnel Reliability Program (PRP), or loss of any other mandatory qualification required for effective performance in the military specialty, when such withdrawal or loss is voluntary or caused by my own misconduct, and results in removal from the military specialty.

(12) Memorandum for the Record 5812 of 19 Jul 17
(13) CTN1 Merwin, Daniel D. ltr of 18 Jul 17
(14) Accused Acknowledgment of NJP Appeal Rights of 20 Jul 17
(15) NAVPERS 1070/607 of 27 Jul 17

1. Per reference (a), this report and enclosures (1) through (15) are forwarded for inclusion into CTN2 Merwin's official record. As provided in enclosure (1), CTN2 Merwin received Non-Judicial Punishment (NJP) on 20 July 2017 for the following violation of the Uniform Code of Military Justice: Article 92 – Violation of a Lawful General Regulation, to wit: Sexual Harassment.

2. Enclosure (2), and its enclosures (a) through (p), is the investigation relied upon as evidence at the NJP hearing. In addition to the preliminary inquiry, enclosures (3) through (13) were used as evidence in addition to CTN2 Merwin's electronic training jacket.

3. As substantiated by the preliminary inquiry investigation and his own admissions, CTN2 Merwin communicated to his female coworkers in a manner that created a hostile environment. Leadership was forced to alter working hours and change seating locations as a result of CTN2 Merwin's actions.

FINISH FILE PERS 832 FICHE

Subj: REPORT OF NONJUDICIAL PUNISHMENT ICO CTN1 DANIEL D. MERWIN, USN

4. The evidence sufficiently supported all charges and specifications. During NJP, CTN2 Merwin read a personal statement aloud, included as enclosure (13) At NJP, he was awarded a reduction to the next inferior paygrade (E-5) and forfeiture of \$1,606 per month for two months. After acknowledging his NJP appeal rights as documented in enclosure (14), CTN2 Merwin declined to submit an appeal. Accordingly, NJP is now final, per enclosure (15), and has been reflected in the special evaluation for reduction in rate.

5. This report will be sent via CTN2 Merwin for acknowledgment, verification of his declination to appeal the NJP, and an opportunity to submit a statement. This serves as notice of his right, per reference (a), to submit his comments within 10 days of receipt concerning this report of NJP, which will be included as an adverse matter in his official record. His comments, if any, will be reflected in the first endorsement to this letter.

7. My point of contact for this matter is LT Pellittiere, Legal Officer, (443) 654-1908 or mmpelli@nsa.gov.

FIRST ENDORSEMENT on Cyber Strike Activity SIXTY THREE ltr 1621 Ser N00L/008 of
2 Aug 17

From: CTN2 Daniel D. Merwin, USN

To: Commander, Navy Personnel Command (PERS-832)

Subj: REPORT OF NONJUDICIAL PUNISHMENT ICO CTN1 DANIEL D. MERWIN, USN

1. I hereby acknowledge receipt of the report of Nonjudicial Punishment (NJP). I have read the above documents and understand my rights.
2. I was informed of my rights to appeal the NJP on 20 July 17 and declined to do so.
3. I have been advised of the adverse action taken by the command and understand that this report will be part of my official record.
4. I understand that I have 10 days to submit a statement and that failure to submit one within that time period will constitute a waiver of my right to do so.
5. I do not intend to make an additional statement at this time.

D. D. MERWIN

Subj: PRELIMINARY INQUIRY INTO THE CIRCUMSTANCES SURROUNDING ALLEGATIONS OF INAPPROPRIATE BEHAVIOR AND SEXUAL HARASSMENT ICO CTN1 DANIEL MERWIN (ANDERSON), USN

Ref: (a) JAGMAN Section 0203
(b) Preliminary Inquiry Officer appointment letter

Encl: (a)
(b)
(c)
(d)
(e)
(f)
(g)
(h)
(i)
(j)
(k)
(l)
(m)
(n)
(o)
(p)

1. This reports completion of the preliminary inquiry conducted in accordance with references (a) and (b) into the circumstances surrounding allegations of inappropriate behavior and sexual harassment ICO CTN1 Daniel Merwin (Anderson), USN. References (a) through (p) are submitted for consideration.

2. Personnel contacted:

a.
b.
c.
d.
e.
f.
g.
h.
i.
j.
k.

I. [REDACTED] (301) 688-0456

3. Materials reviewed: All materials reviewed are part of official statements or included in reference (O).

4. Summary of findings:

- a. I did not find a culture within the workcenter that facilitated the behavior of CTN1 Merwin (Anderson).
- b. I do not believe that CTN1 Merwin (Anderson) propositioned [REDACTED] in sending her the chat message, "Must be busy being the TF commander!" While this is familiar and unacceptable, it is not sexual harassment.
- c. There were several instances of sexual harassment of [REDACTED] CTN1 Merwin (Anderson) made several unwanted statements to her about how she looked including statements that she was "super cute" or how red looked good "especially on someone so beautiful." CTN1 Merwin (Anderson) also sent [REDACTED] two videos via social media that crossed the line into sexual harassment. In the first video, CTN1 Merwin (Anderson) is laying on his bed without a shirt making kissing gestures and showing his two boxer dogs. The second video is CTN1 Merwin (Anderson) entering his kitchen with meat cooking with one of his boxer dogs standing on hind legs smelling the meat. CTN1 Merwin (Anderson) repeatedly asks his dog, "Are you trying to lick my meat?" While these videos are available on CTN1 Merwin's (Anderson) Facebook page, I believe it constitutes sexual harassment in the context of what was being discussed and the desired relationship. CTN1 Merwin (Anderson) also sent a picture from the movie, "Julia & Julia" where Meryl Streep is holding what appears to be a turkey upside down with its legs spread. It did not have relevance to the discussion and CTN1 Merwin (Anderson) states, "JK! that's not the one I was looking for." CTN1 Merwin (Anderson) volunteered to babysit [REDACTED] child so she could drink after a long day.
- d. CTN1 Merwin (Anderson) did not receive the response he wanted with [REDACTED] and turned his attention to [REDACTED]. After friending her on Facebook, he went through numerous pictures making comments on her pictures that she was "cute" and a "hottie." CTN1 Merwin (Anderson) also told [REDACTED] that "she could do better" in regards to her current boyfriend. No Facebook records were provided.
- e. Once [REDACTED] reported to the division, CTN1 Merwin (Anderson) shifted his attention to her. He made several comments to [REDACTED] about his interest in [REDACTED] and began sitting next to [REDACTED] in the workcenter and following her around. This made [REDACTED] uncomfortable and she asked [REDACTED] to walk with her to prevent CTN1 Merwin (Anderson) from following her.
- f. In a conversation with [REDACTED] and [REDACTED] CTN1 Merwin (Anderson) stated that the medication he was currently taking affected his libido stating, "he didn't mind that it slowed down because his overactive sex drive was a problem in the past." He then motioned down to his crotch and commented how strongly it had returned.
- g. CTN1 Merwin (Anderson) has created a hostile work environment where the female Sailors are not comfortable being alone with CTN1 Merwin (Anderson). As a result, [REDACTED] and [REDACTED] have altered their work schedule to ensure one of them is always in the workcenter.
- h. Several Sailors expressed concerns about the fear of retribution from CTN1 Merwin (Anderson).

- i. CTN1 Merwin made several attempts to find out what was happening despite the verbal order from [REDACTED] to not talk about this with anyone. During these discussions, CTN1 Merwin (Anderson) expressed that he would refuse Non-Judicial Punishment and opt for Court Martial instead. He also expressed he would not receive punishment due to his previous mental health issues.
5. Recommendation: Based on statements, associated chat logs and social media files, I believe CTN1 Merwin (Anderson) is guilty of sexual harassment of [REDACTED] and [REDACTED]. CTN1 Merwin (Anderson) lacks comprehension of what appropriate actions and relationships are in and out of the workcenter. As a result, he often says and does things that violate acceptable behavioral standards within the Navy. It is my opinion that he also sees female Sailors in his workcenter first as potential dates and then Sailors. Based on this, I recommend that CTN1 Merwin (Anderson) receive Non-Judicial Punishment and be reduced in rank to E-5. Based on his entry into Naval Service, he will reach High Year Tenure for an E-5 – 12 years – in November 2017, and be separated from Naval Service. He should not be allowed to lead or be around Sailors.
- [REDACTED]

DEPARTMENT OF THE NAVY

NAVY INFORMATION OPERATIONS COMMAND MARYLAND

ALLEGATIONS OF INAPPROPRIATE BEHAVIOR AND SEXUAL
HARASSMENT ICO CTN1 DANIEL MERWIN, USN

Ref: (a) JAGINST 5800.7F, Chapter II

Encl: CDR Sharon Pinder's e-mail Detailing Allegations of Inappropriate Behavior
and Sexual Harassment of 21 Apr 17

1. This appoints you, per chapter II of reference (a), to inquire into the facts and circumstances surrounding the allegations of inappropriate behavior and sexual harassment in the workplace reported in enclosure (1).
2. You are to investigate all facts and circumstances surrounding the allegations and determine if misconduct occurred. If you have not previously done so, read chapter II of reference (a) in its entirety before beginning your investigation. Report your findings of facts, conclusions, and recommendations by 27 April 2017, unless an extension of time is granted.
3. You may seek assistance from LT James Moxness, II, JAGC, USN, (301) 677-0877, Staff Judge Advocate, Navy Information Operations Command Maryland, during the course of your investigation.
4. By copy of this appointing order, the NIOC Staff Judge Advocate Office is directed to furnish any necessary clerical assistance.

A handwritten signature in black ink, appearing to read "J. S. Scheidt", is written over the typed name.

RIGHTS

I certify and acknowledge by my signature and initials set forth below that, before the interviewer requested a statement from me, he/she warned me that:

- (1) I am suspected of having committed the following offenses: 1 DA

Article 92 - Failure to obey order or regulation.

- (2) I have the right to remain silent; 2 DA
- (3) Any statement I do make may be used as evidence against me in a trial by court-martial; 3 DA
- (4) I have the right to consult with an attorney prior to any questioning. This attorney may be a civilian attorney retained by me at my own expense, a military attorney without cost to me, or both; and 4 DA
- (5) I have the right to have such retained civilian attorney and/or military attorney present during this interview; 5 DA
- (6) If I decide to answer questions now without a lawyer present, I will have the right to stop this interview at any time. 6 DA

WAIVER OF RIGHTS

- (1) I further certify and acknowledge that I Have read the above statement of my rights And fully understand them, and that; 1 DA
- (2) I expressly desire to waive my right to remain silent; 2 DA
- (3) I expressly do not desire to consult with either a civilian attorney retained by me or a military attorney without cost to me prior to any questioning; 3 DA
- (4) I expressly desire not to have a attorney present with me during this interview; and 4 DA
- (5) This acknowledgment and waiver of rights is made freely and voluntarily by me, without any promises or threats having been made to me or pressure or coercion of any kind having been used against me. 5 DA
- (6) I further understand that, even though I initially waive my rights to an attorney and to remain silent, I may, during the interview, assert my right to an attorney or to remain silent. 6 DA

NOTE: IF THE SUSPECT INDICATES HE IS WILLING TO MAKE A STATEMENT, HE SHOULD FIRST BE ASKED WHETHER HE HAS MADE A STATEMENT IN RESPONSE TO QUESTIONS ABOUT THE SUSPECTED OFFENSE TO ANYONE HE PRIOR TO THE PRESENT INTERVIEW. IF THE SUSPECT INDICATES HE HAS PREVIOUSLY MADE SUCH A STATEMENT, ADVISE THE SUSPECT AS FOLLOWS:

- (1) Your previous statement may not be admissible at courts-martial and may not be usable against you. (It may not be possible to determine whether a previous statement made by the suspect will be admissible at some future court-martial; this suggests it may be wise to treat it as inadmissible and provide the cleansing warning).
- (2) Regardless of the fact that you have talked about this offense before, you still have the right to remain silent now.
- (3) (Continue with the Rights Advisement and Waiver of Rights above.)

RECORD OF EMERGENCY DATA

PRIVACY ACT STATEMENT

AUTHORITY: 5 USC 552, 10 USC 655, 1475 to 1480 and 2771, 38 USC 1970, 44 USC 3101, and EO 9397 (SSN).

PRINCIPAL PURPOSES: This form is used by military personnel and Department of Defense civilian and contractor personnel, collectively referred to as civilians, when applicable. **For military personnel,** it is used to designate beneficiaries for certain benefits in the event of the Service member's death. It is also a guide for disposition of that member's pay and allowances if captured, missing or interned. It also shows names and addresses of the person(s) the Service member desires to be notified in case of emergency or death. **For civilian personnel,** it is used to expedite the notification process in the event of an emergency and/or the death of the member. The purpose of soliciting the SSN is to provide positive identification. All items may not be applicable.

ROUTINE USES: None.

DISCLOSURE: Voluntary; however, failure to provide accurate personal identifier information and other solicited information will delay notification and the processing of benefits to designated beneficiaries if applicable.

INSTRUCTIONS TO SERVICE MEMBER

This extremely important form is to be used by you to show the names and addresses of your spouse, children, parents, and any other person(s) you would like notified if you become a casualty (other family members or fiancé), and, to designate beneficiaries for certain benefits if you die. IT IS YOUR RESPONSIBILITY to keep your Record of Emergency Data up to date to show your desires as to beneficiaries to receive certain death payments, and to show changes in your family or other personnel listed, for example, as a result of marriage, civil court action, death, or address change.

INSTRUCTIONS TO CIVILIANS

This extremely important form is to be used by you to show the names and addresses of your spouse, children, parents, and any other person(s) you would like notified if you become a casualty. Not every item on this form is applicable to you. **This form is used by the Department of Defense (DoD) to expedite notification in the case of emergencies or death.** It does not have a legal impact on other forms you may have completed with the DoD or your employer.

IMPORTANT: This form is divided into two sections: **Section 1 - Emergency Contact Information** and **Section 2 - Benefits Related Information.** **READ THE INSTRUCTIONS ON PAGES AND BEFORE COMPLETING THIS FORM.**

SECTION 1 - EMERGENCY CONTACT INFORMATION

1. NAME (Last, First, Middle Initial)

ANDERSON, DANIEL

2. SSN

3a. SERVICE/CIVILIAN CATEGORY

☐ ARMY ☒ NAVY ☐ MARINE CORPS ☐ AIR FORCE ☐ DoD ☐ CIVILIAN ☐ CONTRACTOR

b. REPORTING UNIT CODE/DUTY STATION

15. SIGNATURE OF SERVICE MEMBER/CIVILIAN <i>(Include rank, rate, or grade if applicable)</i>	16. SIGNATURE OF WITNESS <i>(Include rank, rate, or grade as appropriate)</i> Not Required	17. DATE SIGNED <i>(YYYYMMDD)</i> 20180906

INSTRUCTIONS FOR PREPARING DD FORM 93*(See appropriate Service Directives for supplemental instructions for completion of this form at other than MEPS)*

All entries explained below are for electronic or typewriter completion, except those specifically noted. If a computer or typewriter is not available, print in black or blue-black ink insuring a legible image on all copies. Include "Jr.," "Sr.," "III" or similar designation for each name, if applicable. When an address is entered, include the appropriate ZIP Code. If the member cannot provide a current address, indicate "unknown" in the appropriate item. Addresses shown as P.O. Box Numbers or RFD Numbers should indicate in Item 14, "Continuations/Remarks", a street address or general guidance to reach the place of residence. In addition, the notation "See Item 14" should be included in the item pertaining to the particular next of kin or when the space for a particular item is insufficient. If the address for the person in the item has been shown in a preceding item, it is unnecessary to repeat the address; however, the name must be entered. Those items that are considered not applicable to civilians will be left blank.

ITEM 1. Enter full last name, first name, and middle initial.

ITEM 2. Enter social security number (SSN).

ITEM 3a. Service. **Military:** Mark X in appropriate block. **Civilian:** Mark two blocks as appropriate. Examples: an Army civilian would mark Army and either Civilian or Contractor; a DoD civilian, without affiliation to one of the Military Services, would mark DoD and then either Civilian or Contractor as appropriate.

ITEM 3b. Reporting Unit Code/Duty Station. See Service Directives.

ITEM 4a. Spouse Name. Enter last name (if different from Item 1), first name and middle initial on the line provided. If single, divorced, or widowed, mark appropriate block.

ITEM 4b. Address and Telephone Number. Enter the "actual" address and telephone number, not the mailing address. Include civilian title or military rank and service if applicable. If one of the blocks in 4a is marked, leave blank.

ITEM 5a-d. Children. Enter last name (only if different from Item 1) first name and middle initial, relationship, and date of birth of all children. If none, so state. Include illegitimate children if acknowledged by member or paternity/maternity has been judicially decreed. Relationship examples: son, daughter, stepson or daughter, adopted son or daughter or ward. Date of birth example: 19950704. For children not living with the member's current spouse, include address and name and relationship of person with whom residing in item 5d.

ITEM 6a. Father Name. Last name, first name and middle initial.

ITEM 6b. Address and Telephone Number of Father. If unknown or deceased, so state. Include civilian title or military rank and service if applicable. If other than natural father is listed, indicate relationship.

ITEM 7a. Mother Name. Last name, first name and middle initial.

ITEM 7b. Address and Telephone Number of Mother. If unknown or deceased, so state. Include civilian title or military rank and service if applicable. If other than natural mother is listed, indicate relationship.

ITEM 8. Persons Not to be Notified Due to Ill Health.

- a. List relationship, e.g., "Mother," of person(s) listed in Items 4, 5, 6, or 7 who are not to be notified of a casualty due to ill health. If more than one child, specify, e.g., "daughter Susan." Otherwise, enter "None".
- b. List relationship, e.g., "Father" or name and address of person(s) to be notified in lieu of person(s) listed in item 8a. If "None" is entered in Item 8a, leave blank.

ITEM 9a. This item will be used to record the name of the person or persons, if any, other than the member's primary next of kin or immediate family, to whom information on the whereabouts and status of the member shall be provided if the member is placed in a missing status. Reference 10 USC, Section 655. **NOT APPLICABLE to civilians.**

ITEM 9b. Address and telephone number of Designated Person(s). **NOT APPLICABLE to civilians.**

ITEM 10. Contracting Agency and Telephone Number **(Contractors only). NOT APPLICABLE to military personnel.** Civilian contractors will provide the name of their contracting agency and its telephone number. Example: XYZ Electric, (703) 555-5689. The telephone number should be to the company or corporation's personnel or human resources office.

ITEM 11a. Beneficiary(ies) for Death Gratuity **(Military only).** Enter first name(s), middle initial, and last name(s) of the person(s) to receive death gratuity pay. A member may designate one or more persons to receive all or a portion of the death gratuity pay. The designation of a person to receive a portion of the amount shall indicate the percentage of the amount, to be specified only in 10 percent increments, that the person may receive. If the member does not wish to designate a beneficiary for the payment of death gratuity, enter "None," or if the full amount is not designated, the payment or balance will be paid as follows:

- (1) To the surviving spouse of the person, if any;
- (2) To any surviving children of the person and the descendants of any deceased children by representation;
- (3) To the surviving parents or the survivor of them;
- (4) To the duly appointed executor or administrator of the estate of the person;
- (5) If there are none of the above, to other next of kin of the person entitled under the laws of domicile of the person at the time of the person's death.

The member should make specific designations, as it expedites payment.

INSTRUCTIONS FOR PREPARING DD FORM 93

(Continued)

ITEM 11a. (Continued) Seek legal advice if naming a minor child as a beneficiary. If a member has a spouse but designates a person other than the spouse to receive all or a portion of the death gratuity pay, the Service concerned is required to provide notice of the designation to the spouse. **NOT APPLICABLE to civilians.**

Item 11b. Relationship. **NOT APPLICABLE to civilians.**

ITEM 11c. Enter beneficiary(ies) full mailing address and telephone number to include the ZIP Code. **NOT APPLICABLE to civilians.**

ITEM 11d. Show the percentage to be paid to each person. Enter 10%, 20%, 30%, up to 100% as appropriate. The sum shares must equal 100 percent. If no percent is indicated and more than one person is named, the money is paid in equal shares to the persons named. **NOT APPLICABLE to civilians.**

ITEM 12a. Beneficiary(ies) for Unpaid Pay/Allowance (**Military only**). Enter first name(s), middle initial, last name(s) and relationship of person to receive unpaid pay and allowances at the time of death. The member may indicate anyone to receive this payment. If the member designated two or more beneficiaries, state the percentage to be paid each in item 10c. If the member does not wish to designate a beneficiary, enter "By Law." The member is urged to designate a beneficiary for unpaid pay and allowances as payment will be made to the person in order of precedence by law (10 USC 2771) in the absence of a designation. Seek legal advice if naming a minor child as beneficiary. **NOT APPLICABLE to civilians.**

ITEM 12b. Enter beneficiary(ies) full mailing address and telephone number to include the ZIP Code. **NOT APPLICABLE to civilians.**

ITEM 12c. If the member designated two or more beneficiaries, state the percentage to be paid each in this section. The sum shares must equal 100 percent. **NOT APPLICABLE to civilians.**

ITEM 13a. Enter the name and relationship of the Person Authorized to Direct Disposition (PADD) of your remains should you become a casualty. Only the following persons may be named as a PADD: surviving spouse, blood relative of legal age, or adoptive relatives of the decedent. If neither of these three can be found, a person standing in loco parentis may be named. **NOT APPLICABLE to civilians.**

ITEM 13b. Address and telephone number of PADD. **NOT APPLICABLE to civilians.**

ITEM 14. Continuations/Remarks. Use this item for remarks or continuation of other items, if necessary. Prefix entry with the number of the item being continued; for example, 5/John J./son/ 19851220/321 Pecan Drive, Schertz TX 78151. Also use this item to list name, address, and relationship of other persons the member desires to be notified. Other dependents may also be listed. This block offers the greatest amount of flexibility for the member to record other important information not otherwise requested but considered extremely useful in the casualty notification and assistance process. Besides continuing information from other blocks on this form, the member may desire to include additional information such as: NOK language barriers, location or existence of a Will, additional private insurance information, other family member contact numbers, etc. If additional space is required, attach a supplemental sheet of standard bond paper with the information.

ITEM 15. Signature of Service Member/Civilian. Check and verify all entries and sign all copies in ink as follows: First name, middle initial, last name. Include rank, rate, or grade if applicable. May be electronically signed (see DoD Instruction 1300.18 for guidelines).

ITEM 16. Signature of Witness. Have a witness (disinterested person) sign all copies in ink as follows: First name, middle initial, last name. Include rank, rate, or grade as appropriate. A witness signature is not required for electronic versions of the DD Form 93 (see DoD Instruction 1300.18).

ITEM 17. Date the member or civilian signs the form. This item is an ink entry and must be completed on all copies.

REQUEST PERTAINING TO MILITARY RECORDS

Requests from veterans or deceased veteran's next-of-kin may be submitted online by using eVetRecs at <http://www.archives.gov/veterans/military-service-records/>.
To ensure the best possible service, please thoroughly review the accompanying instructions before filling out this form. PLEASE PRINT LEGIBLY OR TYPE BELOW.

SECTION I: INFORMATION NEEDED TO LOCATE RECORDS (Furnish as much information as possible.)

1. NAME USED DURING SERVICE (last, first, full middle) Anderson, Daniel, Dennis	2. SOCIAL SECURITY # [REDACTED]	3. DATE OF BIRTH [REDACTED] 1985	4. PLACE OF BIRTH RIVERSIDE, CALIFORNIA
--	------------------------------------	-------------------------------------	--

5. SERVICE, PAST AND PRESENT (For an effective records search, it is important that ALL service be shown below.)						
	BRANCH OF SERVICE	DATE ENTERED	DATE RELEASED	OFFICER	ENLISTED	SERVICE NUMBER (If unknown, write "unknown")
a. ACTIVE	USN-US Navy	11/01/05	10/19/18	<input type="checkbox"/>	<input checked="" type="checkbox"/>	UNKNOWN
b. RESERVE	-			<input type="checkbox"/>	<input type="checkbox"/>	
c. STATE NATIONAL GUARD	-			<input type="checkbox"/>	<input type="checkbox"/>	

6. IS THIS PERSON DECEASED? ☒ NO ☐ YES - MUST provide Date of Death if veteran is deceased:

7. DID THIS PERSON RETIRE FROM MILITARY SERVICE? ☒ NO ☐ YES

SECTION II: INFORMATION AND/OR DOCUMENTS REQUESTED

1. CHECK THE ITEM(S) YOU ARE REQUESTING:

☒ DD Form 214 or equivalent. Year(s) in which form(s) issued to veteran: _____
This form contains information normally needed to verify military service. A copy may be sent to the veteran, the deceased veteran's next-of-kin, or other persons or organizations, if authorized in Section III, below. An UNDELETED DD214 is ordinarily required to determine eligibility for benefits. If you request a DELETED copy, the following items will be blacked out: authority for separation, reason for separation, reenlistment eligibility code, separation (SPD/SPN) code, and, for separations after June 30, 1979, character of separation and dates of time lost.
An UNDELETED copy will be sent UNLESS YOU SPECIFY A DELETED COPY by checking this box: ☐ I want a DELETED copy.

☒ Medical Records includes Service Treatment Records, Health (outpatient) and Dental Records. IF HOSPITALIZED (inpatient) the FACILITY NAME and DATE (month and year) for EACH admission MUST be provided: _____

☒ Other (Specify): Please include ALL documents in my OMPF; do NOT send an extract.

2. PURPOSE: (Providing information about the purpose of the request is strictly voluntary; however, it may help to provide the best possible response and may result in a faster reply. Information provided will in no way be used to make a decision to deny the request.)

☒ Benefits (explain) ☐ Employment ☐ VA Loan Programs ☐ Medical ☐ Genealogy ☐ Correction ☐ Personal ☐ Other (explain)

Explain here: benefits claim assistance

SECTION III: RETURN ADDRESS AND SIGNATURE

1. REQUESTER NAME: DANIEL ANDERSON

2. ☒ I am the MILITARY SERVICE MEMBER OR VETERAN identified in Section I. above.
☐ I am the DECEASED VETERAN'S NEXT-OF-KIN (MUST submit Proof of Death. See item 2a on instruction sheet.)
(Relationship to deceased veteran)

☐ I am the VETERAN'S LEGAL GUARDIAN (MUST submit copy of Court Appointment) or AUTHORIZED REPRESENTATIVE (MUST submit copy of Authorization Letter or Power of Attorney)
☐ OTHER
(Specify type of Other)

3. SEND INFORMATION/DOCUMENTS TO:
(Please print or type. See item 4 on accompanying instructions.)
National Veterans Legal Services Program
Name
1600 K Street NW, Suite 500
Street Apt.
Washington DC 20006
City State Zip Code

4. AUTHORIZATION SIGNATURE: I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the information in this Section III is true and correct and that I authorize the release of the requested information. (See items 2a or 3a on accompanying instruction sheet. Without the Authorization Signature of the veteran, next-of-kin of deceased veteran, veteran's legal guardian, authorized government agent, or other authorized representative, only limited information can be released unless the request is archival. No signature is required if the request is for archival records.)
[Signature]
Signature Required - Do not print Date

* This form is available at <http://www.archives.gov/veterans-military-service-records/standard-form-180.pdf> on the National Archives and Records Administration (NARA) web site. *

Subject: Request for Copy of Military Records (Personnel Records)

To Whom It May Concern:

This is a request for documents under the Privacy Act, 5 U.S.C. § 552a; and 38 C.F.R. §§ 1.577 (2015) on behalf of veteran Daniel Anderson. Please find enclosed a copy of a Privacy Act Waiver and a Standard Form 180 signed by Daniel Anderson. See Privacy Act Waiver, executed on 12/5/2018 and Standard Form 180, executed on 12/5/2018.

I hereby request a copy of all documents contained in Daniel Anderson's military records file inclusive of all documents specified in the attached Standard Form 180. The documentation should include the undeleted DD Form 214 and all miscellaneous documents in the OMPF. Daniel Anderson was separated from the Navy on 10/19/2018. Please do NOT send an extract of the records.

****PER THE SF-180, MEDICAL RECORDS HAVE BEEN REQUESTED AND SENT TO THE APPROPRIATE OFFICE; THIS IS A REQUEST FOR PERSONNEL RECORDS ONLY****

I prefer a paperless option; information sent via electronic delivery with login information or on a disc with password is encouraged. Please forward the requested information directly to me at the following address:
Lawyers Serving Warriors c/o NVLSP
Attn: Dorrie Popovski
1600 K Street, NW, Suite 500
Washington, DC 20006

I am requesting these documents in order for our organization to assist Daniel Anderson with an application for disability benefits.

Please respond to this request within twenty (20) business days. If fulfillment of this request will result in fees, please discontinue processing this request and send correspondence with the amount in advance. Please contact me at dorrie@nvlsp.org if there are any questions. Thank you very much for your assistance.

Sincerely,

Dorrie Popovski

Subj: CTN2 DANIEL ANDERSON, USN; REPORT OF ADMINISTRATIVE SEPARATION

(1) Did member serve in an imminent danger zone in the 2-year period prior to notification of separation processing (If Yes, answer (2) and (3)): No

(2) Was member's record screened for PTSD/TBI as a contributing factor per MILPERSMAN 1910-702? N/A

(3) Was PTSD/TBI determined to be a contributing factor? N/A

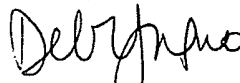

i. Psychiatric, medical and/or PTSD/TBI evaluation complete or not applicable (as required): N/A

j. Most recent NAVPERS 1070/613 (Rev. 07-06), Administrative Remarks Warning: Given on 26 March 2018, enclosure (3). Not related to reason for separation.

k. Comments of the Commanding Officer: Per Enclosure (1), CTN2 Anderson requested separation due to medical conditions that do not amount to a disability and obviates potential for continued naval service. His conditions included Irritable Bowel Syndrome-Diarrhea, Visceral Hypersensitivity, Major Depression Disorder, Generalized Anxiety Disorder, and Alcohol Use Disorder. These conditions were documented by his clinical psychologist, his gastroenterologist, and his counselor. These conditions, along with the recommendation for separation prior to the completion of his obligated service, were approved by his primary care manager and the Cryptologic Warfare Group SIX Authorized Medical Department Representative. At the time of his request, CTN2 Anderson was scheduled for a Physical Evaluation Board (PEB). He signed Enclosure (2), a Page 13 documenting that he understood that by making this request he was waiving this PEB and may not be eligible for any disability benefits. Based on the documentation and recommendations provided, his conditions, while not amounting to a disability, are incompatible with his duties and continued service as a Sailor in the United States Navy and necessitated his separation prior to the conclusion of his obligated service.

l. Date, Reason, and Characterization of Discharge: 19 October 2018; Condition, Not a Disability; Honorable. Enclosure (4) is the DD-214.

m. Point of contact: LT Michael Pellittiere, USN; Fort Meade, MD; (667) 812-2206 (COMM); E-Mail: mmpelli@nsa.gov.

Subj: REQUEST FOR SEPARATION BASED ON PHYSICAL OR BEHAVIORAL
CONDITION(S) NOT AMOUNTING TO A DISABILITY

Ref: (a) MILPERSMAN 1910-120

Encl: (1) Primary Care Physician Memo, Walter Reed National Medical Center
(2) Behavior Health Memo and Diagnoses, Walter Reed National Medical Center
(3) Gastroenterology Memo, Capital Digestive Care
(4) Gastroenterology Diagnoses, Capital Digestive Care
(5) Addiction Treatment Service Memo, Walter Reed National Medical Center

1. Per reference (a), I request separation based on the medical condition which I and or my attending physician believe exists but does not amount to a disability per current Navy guidance. The medical condition is Irritable Bowel Syndrome – Diarrhea (IBS-D), Visceral hypersensitivity (VH), Major Depression Disorder(MDD), Generalized Anxiety Disorder (GAD) and Alcohol Use Disorder (AUD) and is supported by enclosures (1-5).

2. The following information is provided:

- a. Active Duty Start Date: 01NOV05
- b. Expiration of Service: 15OCT21
- c. Date Reported Current Command: 15SEP16
- d. Projected Rotation Date (PRD): 01SEP19
- e. This medical condition did not exist upon my entry into Navy.
- f. This medical condition was not the result of, or contributed to, my own misconduct.
- g. A mishap/safety investigation was not conducted regarding this medical injury/problem. If conducted, attach as enclosure (2).

3. Remarks:

I am unable to complete my service obligations physically and mentally; which will be demonstrated by the attached enclosures and these remarks. The attached enclosures include doctors and counselor recommendations. These remarks and enclosures represent the future based on doctor recommendations and condition status. All treatment avenues available by the military have been exhausted for each major diagnosis. In summary the following items prevent

me from completing my service obligations; Inability to participate in group PT and PRT. Mental health practitioners and command recommendations to hold my security clearance access. Non-deployable and not medically ready due to mental health, pain diagnoses and incontinence. Historical time out of work between March 2015 and June 2018 (a total of 845 business days) is approximately 150 full working days and 243 half-full days due to medical treatment. Additional time loss to the military is approximately 75 to 125 working days due to prolonged bathroom usage, late arrival and sitting in pain at my desk or work center.

IBS-D, VH, MDD, GAD and because of coping incorrectly with the above conditions AUD exist prior to 2015 but became exacerbated by additional stress, anxiety, inability to develop healthy coping, no continuity and inability to form proper social and personal relationships. IBS-D is primarily caused by anxiety, stress, food types and physical exertion. The daily life of the military adds layers of stress and anxiety; contributing to my irritable bowel syndrome being completely uncontrolled and unpredictable. The military Gastrointestinal Clinic (GI) has not been able to provide any effective treatments. It is difficult pretty much impossible to keep getting repeat authorization for civilian Gastrointestinal clinic follow ups. Tricare will not cover my pain medication prescription due to its formulary not including it; out of pocket cost is over 1200 USD. According to the VA medical examinations all conditions are not likely to improve in 12-36 months. Continued service will not only continue to exacerbate the conditions; but possibly result in death.

FIRST ENDORSEMENT on CTN2 Anderson ltr of 20 Aug 18

From: Authorized Medical Department Representative, Cryptologic Warfare Group Six
To: Commanding Officer, Cyber Strike Activity 63

Subj: REQUEST FOR SEPARATION BASED ON PHYSICAL or BEHAVIORAL
CONDITION(S) NOT AMOUNTING TO A DISABILITY

1. The purposes of this endorsement is to provide information for the Commanding Officer's decision concerning the service member's medical status and separation request.
2. From an Authorized Medical Department Representative (AMDR) perspective, although CTN2 Anderson was found fit for continued service, he has requested voluntary administrative separation due to his ongoing specialty care.
3. I have reviewed available records and information from CTN2 Anderson's Primary Care Manager and other specialists and concur with their recommendations to support his separation.

SECOND ENDORSEMENT on CTN2 Anderson ltr of 20 Aug 18

From: Commanding Officer, Cyber Strike Activity SIXTY THREE
To: CTN2 Daniel D. Anderson, USN

Subj: REQUEST FOR SEPARATION BASED ON PHYSICAL OR BEHAVIORAL
CONDITION(S) NOT AMOUNTING TO A DISABILITY

1. In reference to your request received on 30 August 2018, I support your request to separate and find the information in your paragraph 2 to be accurate. After review of the information submitted in your request, I have determined that no mishap/safety investigation is required nor enclosed.
2. In accordance with your reference (a), I concur with the recommendations from the Authorized Medical Department Representative and those you included from your medical team. Based on submitted documentation, I find that your conditions, while not amounting to a disability, are incompatible with your duties and continued service as a Sailor in the United States Navy and necessitate your separation prior to the conclusion of your obligated service.
3. Under separate correspondence, I am directing your separation.

To: Commanding Officer, Cyber Strike Activity 63

Subj: Administrative Separation ICO: CTN2 Anderson Daniel, USN, XXX-XX [REDACTED]

Ref: (a) MILPERSMAN 1910-120

1. Per reference (a), the purpose of this memorandum is to provide information concerning CTN2 Daniel Anderson's medical treatment. I am the service member's Primary Care Manager. I coordinate his care and see him for routine medical concerns.
2. From a primary care perspective, CTN2 Daniel Anderson is cleared for separation. He has been through the PEB→IDES process and was found fit for continued service but has requested voluntary administrative separation
3. Petty Officer Anderson requires ongoing specialty care for Irritable Bowel Syndrome – Diarrhea, Visceral hypersensitivity, Major Depression Disorder and Generalized Anxiety Disorder. He is eligible to pursue this care through the VA Medical System.
4. I reviewed available records, letters from Dr. William Stern, Gastroenterologist, and Dr. Sherin Paul, Psychologist, and discussed the matter at length with Petty Office Anderson. I concur with the specialist recommendations and support his separation.

6 August 2018

TO: CTN2 Anderson, Daniel Dennis [REDACTED]

THRU: LCDR Rosa C. Grgurich, LCSW, Deputy Chief Adult Behavioral Health Clinic-
Outpatient Service, WRNMMC

SUBJECT: Administrative Separation

1. The purpose of this memorandum is to provide information concerning CTN2 Daniel Anderson's ability to continue to serve as a Cryptologic Networking Technician in the United States Navy from a behavioral health perspective.
2. CTN2 Anderson has received behavioral health services at the Adult Outpatient Behavioral Health Clinic at Walter Reed National Military Medical Center since 04 August 2014 and consistently on a weekly basis with this provider since 15 November 2016. CTN2 Anderson was initially treated in 2014 for a diagnosis of Anxiety Disorder Not Otherwise Specified which was then revised to a diagnosis of Generalized Anxiety Disorder (GAD) in 2015. CTN2 Anderson also has a concurrent diagnosis of Major Depressive Disorder (MDD). Additionally, per available records, CTN2 Anderson also completed a 28-day inpatient program in March 2015 for a diagnosis of Alcohol Use Disorder and has maintained follow up outpatient treatment on this issue.
3. Despite being found Fit for Duty and long term compliance with treatment recommendations CTN2 Anderson's GAD and MDD diagnoses cause him various symptoms that impair and limit his ability to serve in the military, including but not limited to the following: 1) consistent anxiety or depression affecting the ability to function independently, appropriately and effectively; 2) difficulty in adapting to stressful circumstances, including work or a work-like setting; 3) difficulty adapting to change; and 4) and difficulty developing healthy coping skills to manage life stressors.
4. The above limitations prevent CTN2 Anderson from performing both his basic military duties and the duties of his rating. As a Cryptologic Networking Technician, CTN2 Anderson works daily in a stressful position that requires him to maintain complex Information Technology (IT) networks containing secure, classified information. CTN2 Anderson's continued service would place at risk not only his mental health but also his sensitive work product, as his symptoms will likely continue to negatively interfere with his ability to efficiently, effectively, and accurately perform his duties.

This document may contain information covered under the Privacy Act, 5 USC522(a), and/or the Health Insurance Portability and Accountability Act (PL104-191) and the various implementing regulations and must be protected in accordance with those provisions.

Enclosure (2)

Walter Reed
National Military
Medical Center

5. In my professional medical opinion, CTN2 Anderson's GAD and MDD diagnoses, individually and when taken together, leave him unable to safely and reliably perform the duties required of a service member in the United States Navy. CTN2 Anderson is therefore unable to meet his obligated service requirement.
6. Questions regarding this memo can be directed to the undersigned at (301) 295-0500 and/or sherin.paul.ctr@mail.mil.

To: Whom It May Concern

SUBJECT: Statement of Program Progress for CT2 ANDERSON, Daniel (DOB: [REDACTED] 1985)

1. CT2 Anderson was a medical referral to Walter Reed National Military Medical Center (WRNMMC) Addiction Treatment Services (ATS) on 19 July 2017 due to disclosing to his behavioral health provider that he was using alcohol while taking prescribed psychotropic medications.
2. The psychosocial assessment was completed on 25 July 2017 and it was determined that CT2 Anderson meets criteria for Alcohol Use Disorder, Severe based on DSM V standards.
3. CT2 Anderson has been tested regularly for abstinence via breathalyzers and urinalysis testing. All tests have come back negative during his time in treatment.
4. CT2 Anderson was recommended to participate in a Level II (Intensive Outpatient) treatment which he successfully completed on 22 November 2017.
5. Following completion of Level II treatment, CT2 Anderson was recommended to participate in Level I treatment to include participation in Bill W. Group and Dialectical Behavioral Therapy (DBT) Skills and Process Groups.
6. CT2 Anderson is currently participating in DBT Process Group.
7. CT2 Anderson is recommended to attend community recovery meetings and prognosis is fair to good if CT2 Anderson attends those recovery meetings.
8. If you have any questions please contact Despina Hangemanole at (301) 400-1285 or the undersigned at 301-400-1298.
9. This document may contain information covered under the Privacy Act, 5 USC 552(a), and/or the Health Insurance Portability and Accountability Act (PL 104-191) and its various implementing regulations and must be protected in accordance with those provisions. 1. The following deficiencies in your performance and/or conduct are identified: Violation of the UCMJ Article 92, Violation of a Lawful General Regulation as evidenced by CO's NJP on 20 July 2017.
2. The following are recommendations for corrective action:
Reduction to the next inferior paygrade (E-5)
Forfeiture of \$1,606 per month for two months
3. Assistance is available through: your chain of command, the command chaplain, and Fleet and Family Support Center.
4. Any further deficiencies in your performance and/or conduct will terminate the reasonable period of time for rehabilitation that this counseling/warning entry provides and may result in disciplinary action and processing for administrative separation. All deficiencies or misconduct during your current enlistment, occurring before and after the date of this action will be considered. Subsequent violation of UCMJ, conduct resulting in civilian conviction, or deficient conduct or performance of duty could result in an administrative separation under Other Than Honorable Conditions.
5. This counseling/warning is made to afford you an opportunity to undertake the recommended corrective action.
6. This counseling/warning entry is based upon known deficiencies or misconduct. If any misconduct, unknown to the Navy, is discovered after this counseling/warning is executed, further counseling or administrative action may result.
